The Ascendens Asia Journal of Multidisciplinary Research Abstracts (AAJMRA) is a collection of abstracts of research papers presented during Multidisciplinary Research Festivals (MRFs) mainly organised by Ascendens Asia Singapore as well as other research conferences in collaboration with various institutions and learned societies. MRFs provide opportunities for collaboration with a common prime objective of creating platforms for students, faculty, staff, and researchers-like from different institutions to interrelate/interact with their counterparts. MRFs, are expected to aid and promote personality development and critical thinking as participants engage themselves in constructive discussions with other participating researchers.

AAJMRAs are made available complimentary and for open access by Ascendens Asia Singapore. For more information, please contact publications@ascendensasiasingapore.com.

Shaene Segarra, Raquel Banila, Glaizan Crisostomo, John David Hernandez, Chris Vincent Vidal, Christopher Azares

ENHANCING ACCESSIBILITY OF COMPUTER LABORATORY SERVICES FOR STUDENTS OF GENERAL ACADEMIC STRAND AT BESTLINK COLLEGE OF THE PHILIPPINES **885**

Gabriel Lois Gale, Alexis Nicole Adan, Carlos Joaquin Frias, Nicky Layma, Elissa Marie Quilon, Rica Mae Berja

- DEVELOPMENT OF ALTERNATIVE WHITEBOARD MARKER INK USING CHARCOAL AND USED ENGINE OIL** **886**
Rye Lou Punzal, Carylle Maye Retutal, Karl Gideon Medalla, Aaron James Abrasado, Marl Spancer Llosa, Reymundo Javier
- CURVED ARCHITECTURE IN GARDEN CAFE SETTING AT BLOCK 1 LOT 1 SARANAY ROAD, CALOOCAN** **887**
Analyn Aguillon, Jean Occeno, Rose Ann Suarez, Aiman Gerafusco, Aariah Repe
- RECONSTRUCTED MODEL OF UNELEVATED AND UNPASSABLE BRIDGE FOR VEHICLES IN PHASE 3B, BAGONG SILANG, CALOOCAN CITY** **888**
Shan Tumapon, Mark Banda, Aslima Birial, Kate Bolena, Kate Lastrilla, Michael Mahomoc, Roldan Bamondi
- AUTOMATED RETRACTABLE BLEACHER IN GYMNASIUM OF BESTLINK COLLEGE OF THE PHILLIPINES** **889**
Jowald Rebudal, Allyson Dequiros, Jaime Madelo, Michelle Ann Horcajo, Azalea Krisa Porras, Rainelyn Obligar, Carlito Gabriel
- AUTOMATED SOLAR-BASED GREENHOUSE VEGETABLE FARMING AND AQUAPONIC DEVICE USING ARDUINO R4 WITH MONITORING INTERFACE** **891**
Theresa Lejas, Bea Orcine, Nikki Benitez, David Allan Balili Jr, Ralph Emanuel Dela Guardia, Reynante Ponay
- DESIGN OF A MULTI-SENSOR LORA-CONNECTED ROBOT FOR HUMAN DETECTION AND NAVIGATION USING ARDUINO AND ESP32-CAM** **892**
John Brando Manangan
- DEVELOPMENT OF AIR QUALITY CONTROL SYSTEM FOR MODERN LIVESTOCK FARMING USING ESP32 WITH KOTLIN ANDROID FIREBASE INTERCONNECTIVITY** **893**
Leonardo Ubana, Keny Brian Amigable, Marjorie Valdez, Ma Teresa Torrechiva, Mark Ronald Baluyot, Reynante Ponay
- DEVELOPMENT OF AIR QUALITY MONITORING SYSTEM WITH TOUCHSCREEN INTERFACE USING RASPBERRY PI 4B** **894**
Ma Angel Mangaya, Melvin Buizon, Juhn Clive Estrabela, Ronlester Fenis, John Carlo Virtudazo, Reynante Ponay
- DEVELOPMENT OF ALEXA BASED SMART LIBRARY WITH RFID DOOR LOCK AND BOOK FINDER SYSTEM USING ESP 32 AND ARDUINO UNO** **895**
Amemiya Ryuh Domenica, Charie Jerztine Espineda, Sofia Evangelista, Guia Marie Fernandez, Lian Danise Gendrano, Justine Rio Nidoy, Marlon Bahana
- DEVELOPMENT OF ALEXA BASED SMART MIRROR MONITORING INTERFACE SYSTEM USING RASPBERRY PI WITH CLOUD LINKAGE TECHNOLOGY** **896**
Yvonne Erika Sevilla, Bernadeth Tan, Justine Santiago, Nica Decerez, Kenneth Ramacula, Reynante Ponay

DEVELOPMENT OF AN INTEGRATED ROBOTIC VACUUM CLEANER AND AIR PURIFIER WITH WIFI CONNECTIVITY AND MULTI-MODE CONTROL USING ARDUINO UNO	897
<i>Jean Lester Cachola</i>	
DEVELOPMENT OF AUTOMATED HOME MANAGEMENT SYSTEM USING ARDUINO UNO WITH MOTION TRACKER CAMERA	898
<i>Mar John Buquel, Nicole Alanis, Mark Jayson Barbadillo, Wendel Rodly Banzuelo, John James Monares, Jayson Dave Nucos, Reynante Ponay</i>	
DEVELOPMENT OF AUTOMATED MOUSE TRAP WITH REAL-TIME VIDEO SURVEILLANCE USING ARDUINO UNO R4 AND ESP32	899
<i>Mark Jhun Francisco, Tomnel Viñas, Jannoel Jamili, Caizer III Laya, Al-huzaiifa Biro, Reynante Ponay</i>	
DEVELOPMENT OF AUTOMATED TOUCHSCREEN MONITOR INTERFACE FOR BEVERAGE DISPENSERS USING RASPBERRY PI 4	900
<i>Jhermie Soriano, Mark Gabriel Olleres, Andrae Joseph Robles, Ulysis Vicedor, Angela Cabrerros, Reynante Ponay</i>	
DEVELOPMENT OF GREEN TECH OFF-GRID COOLING AND HEATING PORTABLE TABLE USING ARDUINO UNO WITH SOLAR BACK-UP POWER SOURCE	901
<i>Osmeña Marc Lous, Marvin Alba, Jim Samuel Quimque, James Vincent De Vera, Ivan Lopido, Reynante Ponay</i>	
DEVELOPMENT OF GREEN TECH SMART BUILDING USING ARDUINO MICROCONTROLLERS AND ESP 8266 WITH ESCALATOR MECHATRONICS SYSTEM	902
<i>John Kenneth Lazaro, Paolo Balesa, Kenneth Dela Cruz, John Vilmer Reymundo, John Chirstian Saranza, Reynante Ponay</i>	
DEVELOPMENT OF GREEN TECHNOLOGY SMART BUILDING USING ESP32 AND ARDUINO MCU WITH AUTOMATED MECHATRONICS PARKING	903
<i>Rhinehart Dejucos, Nesel John Almeniana, Aira Cruz, Rafaela Enriquez, Jamie Anne Faye Portillo, Reynante Ponay</i>	
DEVELOPMENT OF INTEGRATED INDUSTRIAL GREENHOUSE PLANT PRODUCTION USING ESP32 MCU WITH MULTIPLE SENSOR MONITORING	904
<i>Cherry Joy Pagios, Vincell Daban, Mark Justin Madara, Rochelle Ruth Marcelo, Shirotani Sandoval, Reynante Ponay</i>	
DEVELOPMENT OF IOT BASED SMART COUNTRY HOME USING ARDUINO UNO AND ESP32 WITH DBMS INTERFACE MONITORING	905
<i>Mark John Romo, Racyl John Asombrado, Veenz Star Ray Dela Rama, Ramel Lomoloy, Rachie Buiza, Reynante Ponay</i>	

DEVELOPMENT OF MECHATRONICS INVENTORY SYSTEM USING ARDUINO MCU, ESP32 AND GOOGLE SHEET APPLICATION WITH SMS MODULE	906
<i>Mary Grace Alapide, Rheallyn Abao, Mary Rose Catulay, Oliver Gorion, Angelicka Mahinay, Reynante Ponay</i>	
DEVELOPMENT OF MULTI-FUNCTIONAL COMPUTER TABLE USING ESP-32 AND ARDUINO MCU WITH LINEAR ACTUATOR AND VOICE COMMAND	907
<i>Ronald Saraga, Princess Venus Tanuan, Jessa Bueno, John Mark Merabueno, Audrey Rose Vitalicio, Reynante Ponay</i>	
DEVELOPMENT OF OFF-GRID SMART CABIN WITH SINRIC PRO BASED AND IOT MECHATRONICS CONTROLLER USING ARDUINO AND ESP32	908
<i>Jhemmmuel Entredicho, Raven Edelyn Landicho, Lienel Lacaba, Carlo James Bernaldez, Aaron Angel Granali, Reynante Ponay</i>	
DEVELOPMENT OF QUALITY CONTROL COBOTICS AND MECHATRONICS SYSTEM USING ARDUINO UNO AND RASPBERRY PI 5 WITH DBMS	909
<i>John Michael Consolacion, Jericho Dimacutac, Rovick Nagutom, Emmanuel Humantoc, Benedict John Lejos, Reynante Ponay</i>	
DEVELOPMENT OF ROBOTIC SECURITY AND INFORMATION SYSTEM USING RASPBERRY PI WITH LIDAR AND TRANSPONDER COMMUNICATION, ESP CAMERA, AND LOCATION RESPONSE CAPABILITY	910
<i>Reynante Ponay</i>	
DEVELOPMENT OF SMART BUILDING EMERGENCY EVACUATION SYSTEM USING ESP32 WITH FIRE AND SMOKE SENSOR	911
<i>Anthony James Patingo, Adrian Casiban, Edmar Bautista, Joachim Ezekiel Tuplano, Jericho Garcia, Wendy Jane Maniscan, Brando Manangan</i>	
DEVELOPMENT OF SOLAR BASED SMART HOME AND FRONT YARD AUTOMATION USING ESP AND ARDUINO MCU	912
<i>Jamie Marcelino, James Diaz, Rozelle Decalit, Ryan Christian Perillo, Jan Loyd Paraiso, Reynante Ponay</i>	
DEVELOPMENT OF SOLAR-BASED ATS ROBOTIC WEATHER MONITORING TECHNOLOGY USING ARDUINO MEGA 2560 AND ESP32	913
<i>Nick Anthony Tercero, Jhon Cedric Taguik, Gerald Balasta, Tom Robert Espiel, Reynante Ponay</i>	
DEVELOPMENT OF SOLAR-BASED PRIVATE RESORT SWIMMING POOL MECHATRONICS SYSTEM USING ESP32	914
<i>Princess Daniel Fabia, Doinnalyn Cabanero, Arlina Garcia, James Daniel Mariño, Rhythm Lalim, Reynante Ponay</i>	
DEVELOPMENT OF SURVEILLANCE ROBOT USING ESP32 AND ARDUINO MCU WITH IOT BASE COMMUNICATION	915
<i>Rigie Ansay, Michael Dela Cruz, Brian Marchadesch, Benidicto Rivas, Vince Trinidad, Reynante Ponay</i>	

DEVELOPMENT OF THREE CATEGORY MECHATRONICS PRODUCT CLASSIFIER USING ESP32 AND ARDUINO UNO WITH INVENTORY MONITORING	916
<i>Diega Nilo Jr, Lee Andrie Cabalquinto, Jay Vee Agraan, Joseph Janrei Salva, Reynante Ponay</i>	
DEVELOPMENT OF VERTICAL HYDROPONICS FARMING TECHNOLOGY USING ARDUINO MEGA 2560 WITH AUTOMATED DISPENSING SYSTEM	917
<i>Lao Mikael Gabriel, Joven Baluntong, Edison Josh Casingal, Arabela Delumen, Shaneth Garinga, Reynante Ponay</i>	
DRONE SURVEILLANCE SYSTEM USING RASPBERRY PI WITH HUSKYLENS CAMERA, WEB SERVER LINK, IOT, LIDAR, AND FOLLOW-ME INTEGRATED MODULE	918
<i>Mark Gerald Medenilla</i>	
GREEN TECHNOLOGY BASED INTEGRATED MECHATRONICS SYSTEM WITH IOT BASED MONITORING AND SEGREGATION MECHANISM USING ARDUINO UNO	920
<i>Jericho Breguiles, Ma. Isabel Cabangon, Rogelio Derama, Samuel John Lao, Jamee Panal, Reynante Ponay</i>	
INTELLIGENT TRAFFIC LIGHT CONTROL SYSTEM: A PROPOSED STUDY	921
<i>Xandra Mendoza, Baby Princess Omepig, Robert Louise Telin, Roberto Siaron III, John Loyd Rodriguez, Marlon Bahana</i>	
SMART CANE TECHNOLOGY: PROPOSING A MODEL REAL-TIME DETECTION AND NAVIGATION	922
<i>Veronica Marie Subingsubing, Leizhyllle Ann Erazo, Ella Mae Rodoy, Patricia Real, Lizel Ann Tomacina, Juliana Marie Gaviola, Carlito Gabriel</i>	
INTEGRATION ARTIFICIAL INTELLIGENCE FEATURES TO WHEELCHAIR MODEL	923
<i>Joseph Dela Cruz, Vernalyn Aspiras, Edrian Banog, Sophia Cassandra Jose, Samantha Cristina Palonpon, Prince Michael De Leon</i>	
A PERCEIVE EFFECTIVENESS OF E-WALLETS AS FORM OF PAYMENT AMONG GRADE 12 STUDENTS	924
<i>Aldrian Francisco, John Anthony Albor, Eurie Yabut, Yellena Ayessa Pinpin, Reymundo Javier</i>	
A PROPOSED MODEL OF AUTOMATED MACHINE FOR ASSISTING WHEELCHAIRS ON STAIRCASES AT BIGNAY NATIONAL HIGH SCHOOL	925
<i>Lei Ann Mae Vertera, Jhon Nomer Macasocol, John Mark Relatado, Allison Grace Ofrin, Liele Jhon Todio, Nerwin Jay Jamilla, Roldan Bamondi</i>	

- AUTOMATED GREEN TECH METAL AND NON-METAL MECHATRONICS
SORTER USING RASPBERRY PI AND REALTIME DATABASE** 926
Eleazar Flores, Jhon Rey Laddaran, Julieta Jr Janier, Angelito Jr Francisco, Nabur Rico Fiel, Reynante Ponay
- DEVELOPING A DIGITAL UNIFORM FOR PROFESSIONAL
CIVIL ENGINEERS: A STUDENTS PERCEPTION** 927
Jamaicca Celestine Toledo, Mary Joy Cardeño, Jan Rhaiven De Paz, Thom Jeaster Gelindon, Thalia Nicole Sapungay, Reymundo Javier
- DEVELOPMENT OF AN AUTOMATED SMOKE-FILTERING ASHTRAY USING
ARDUINO UNO WITH AN IGNITION SYSTEM AND STORAGE MECHANISM** 928
Lester Charles Bautista, Philip Kyle Miguel, Hommar Borres, Lovelee Ross Marayag, Michelle Anne Miralles, Reynante Ponay
- DEVELOPMENT OF BEVERAGES DISPENSING COBOTIC SYSTEM USING
RASPBERRY PI AND ARDUINO UNO** 929
Emmanuel Strauss Baranueulo, Lei Mark Cruz, Caster Troy Caingal, Mark Angelo Rebanco, Angelica Dela Peña, Joy Lyn Multo, Reynante Ponay
- DEVELOPMENT OF SMART HOME USING ESP32 AND ARDUINO UNO WITH
MULTIPLE AIR MONITORING AND CONTROL MODULES** 930
John Paul Umpad, Bea Angella Relis, Romar Sabas, Melaena Villaruel, Aisley Elpedes, Reynante Ponay
- DEVELOPMENT OF TRASH COLLECTOR ROBOT USING ARDUINO R3 WITH
IOT BASED MONITORING AND AUTOMATED CHARGING INTERFACE** 931
Angeline Joy Dela Cruz, Jericho Basiledes, Louis Arcega, Irish Frio, Eugene Lorena, Reynante Ponay
- FACEBOOK PAGE: A TOOL TO EMPOWER LIBRARY USERS AT
BESTLINK COLLEGE OF THE PHILIPPINES, BULACAN** 932
Mediana Jello Vince Jessie, Sharmaine Medes, Maica Muñoz, Realyn Roque, Reymundo Javier
- FLOOD CONTROL SYSTEMS: BUILDING A DETENTION TANK MODEL AT
DEPARO ROAD BAGUMBONG, CALOOCAN CITY** 933
Jhanine Bacaycay, Mary Anjielen Lorenzo, Angel Atejano, April Atejano, Maria Fe Santa, Carlito Gabriel
- HARNESSING PIEZOELECTRIC ENERGY FOR A SUSTAINABLE LIGHT
SOURCE IN BRIDGE DESIGN** 934
Mark Paul Beato, Marc Xhelly Perico, Christian Takahashi, Ferlyn Araneta, Charlene Angel Quiray, Carlito Gabriel
- IOT-ENABLED MULTIFUNCTIONAL BEDROOM LAMP WITH SIX-MODE
LIGHTING SYSTEM USING ESP32** 935
Joddie Dalicano, Jameson De Vera, Harold Galang, Darwin Morales, Clarence Ivan Sanz, Reynante Ponay

- ENHANCING RURAL CONECTIVITY: DEVELOPING A PWD FRIENDLY BRIDGE MODEL FOR SITIO ILIGAN, NORZAGARAY, BULACAN** **936**
Rain Salvador, Khateleene Rhian Aniel, Susana De Guia, Kurt Angelo Elcarte, Leeshene Marcelo, Axzel Kyth Tamayo, Marlon Bahana
- THE DEVELOPMENT OF IOT BASED INDUSTRIAL CONVEYOR USING ARDUINO MEGA AND ESP 32 WITH SQL DBMS** **937**
Eric Jahmel Ayuban, Melencio Cabiles, Fritz Zhander Juri Lim, Mcnair Lita, Alter John Marcellones, Engr. Reynante Ponay
- A PROPOSED INVENTORY MANAGEMENT SYSTEM FOR CARLA HATCHERY** **938**
Maria Nicole Valerio, Cherry Batoon, Donjite Francisco, John Patrick Labalan, Melanie Llaneta, Aramina Matan, Dr. Maria Edna Portugal
- APARTMENT SYSTEM WITH MESSAGE SUPPORT FOR LUNARIA'S APARTMENT** **939**
Justine Pombo, Melgeor Valdevieso, Ryan Lee Montero, Mark Gelo Dapiawen, Jarell Christian Maglaque, Nelar Reubal, R-jay Pornasdoro
- APPOINTMENT FOR ENROLLIES IN LMR** **940**
John Rey Verano, Angelo Candelaria, Shin Isaac Razon, Ken Sean Basanes, Marco Noah Alajar, Samuel Pisico, R-jay Pornasdoro
- ASSESSING THE EFFECTIVENESS OF AFFILIATE MARKETING ON TIKTOK IN SHAPING FINANCIAL PERFORMANCE: BASIS FOR PROPOSED MARKETING FUNNEL** **941**
Angel Liga, Angelo Caricungan, Jella Ogayon, Polaris Yna Salazar, Marry Joyce Torrenueva, Analyn Magalso
- EFFICIENT POINT OF SALE (POS) MANAGEMENT SYSTEM AT CAFE 25TH** **942**
Ian Ada, Kurt John Boyles, Jules Gerald Arangoso, Christian Bobiles, Genesis Sangalan, Julian Salando, R-jay Pornasdoro
- EMPLOYEE ATTENDANCE MONITORING SYSTEM FOR 24/7 GARMENTS** **943**
Clarence Josh Haberia, Jefford Diama, Renzo Pacheco, Amandeep Singh, Reiner Mavis Valenzuela, R-jay Pornasdoro
- HR RECRUITMENT AND SELECTION IN BESTLINK COLLEGE OF THE PHILIPPINES MAIN CAMPUS IN NOVALICHES** **944**
Matthew Alarcon, Matthew Alarcon, Abegail Baliwag, Aj Aragones, Roxan Dalina, Mark Castro, John Valenzuela, David Jaurigue
- HR TRAINING AND DEVELOPMENT IN BESTLINK COLLEGE OF THE PHILIPPINES- MAIN CAMPUS IN NOVALICHES** **945**
Rusty Talento, John Nove Hadcan, John Bert Sarmiento, Princess Mae Reanzares, Shaina Marie Isig, David Jaurigue

HUMAN RESOURCE COMPLIANCE AND LEGAL	946
<i>Leira Mae Domingo, She Kynah Mae Bernabe, Glen Yuan Magat, Dareal Mosquito, David Jaurigue</i>	
HUMAN RESOURCE EMPLOYEE MANAGEMENT SYSTEM IN BESTLINK COLLEGE OF THE PHILIPPINES	947
<i>Jeremy Apundar, Justin Jay Nasis, Darren James Dela Fuente, Aljhon Tugdan, Steven Jann Altarejos, David Jaurigue</i>	
INTEGRATED HUMAN RESOURCES AND FACILITIES AND RESOURCES MANAGEMENT WITH ROLE-BASED ACCESS CONTROL AND ADVANCED ANALYTICS IN BESTLINK COLLEGE OF THE PHILIPPINES - MAIN CAMPUS IN NOVALICHES	948
<i>Anne Klein Pagaduan, Angel May Bajio, Dexter James Papa, Jaypee Gantang, David Jaurigue</i>	
INVENTORY SYSTEM WITH AUTOMATED NOTIFICATION FOR LTSDECO FURNITURE	949
<i>Kathrice Ann Badeo, Belle Cacho, Aeron Agnir Daña, Shaine Francisco, Jhamir Go, Mary Ann La Torre, R-jay Pornasodoro</i>	
JUNIOR HIGH SCHOOL ALUMNI INFORMATON WITH CHATBOT SUPPORT FOR CAYBIGA HIGH SCHOOL	950
<i>Junji Arceo, Hans Martin Almoroto, Ghaizer Icarus Andaya, Marvin Lester Bedo, R-jay Pornasodoro</i>	
OPTIMIZING EMPLOYEE PERFORMANCE: A DIGITAL HR MANAGEMENT SYSTEM IN BESTLINK COLLEGE OF THE PHILIPPINES MAIN CAMPUS IN NOVALICHES	951
<i>Kyle Felipe, Rikko Vinz Arguelles, Mike Jeo Sedurifa, Kyla Rose Baltero, Jane Rovie Benitez, David Jaurigue</i>	
ORDERING MANAGEMENT WITH CHATBOT SYSTEM FOR NAGIMAS	952
<i>Miguel Rose Soriano, Jeremy Malana, John Christofer Lucero, Lei Airel Loquis, Mark Reuben Fortuito, Joshua Gagarin, R-jay Pornasodoro</i>	
POINT OF SALE SYSTEM WITH BARCODE READER IN SABELLE'S CLOSET	953
<i>Lilia Angela Sastre, John Lloyd Patungan, Mhaya Tapiador, Edlyn Nicole Cadiz, R-jay Pornasodoro</i>	
RADIO FREQUENCY IDENTIFICATION STUDENT MONITORING DEVICE USING ESP8266 FOR RICHLAND MONTESSORI	954
<i>Dave Owen Gison, Cristy-lyn Orlina, Jamaica Arenas, Michael Anthony Comentan, Charlie Purisima, Alien Joy Viola, Gerome Lagutan</i>	
RESERVATION MANAGEMENT SYSTEM FOR LYDIA'S RESORT	955
<i>Rotsen Serrano, Ahrbie Hilario, Sharmaine Joy Callada, Samuel Oco, R-jay Pornasodoro</i>	

SMS 4: REGISTRAR DATA MANAGEMENT SYSTEM WITH PREDICTIVE ANALYTICS USING ANOMALY DETECTION	956
<i>Alvin Marin, Michelle Aragdon, Billy Joe Baluarte, Niro Barlam, Rick Florece, Roland Roldan</i>	
STUDENT ATTENDANCE MONITORING SYSTEM USING QR CODES AND SMS NOTIFICATIONS AT HORACIO DELA COSTA ELEMENTARY SCHOOL	957
<i>Art Micheal Alba, Luis Antonio Acebo, Crystal Jane Salazar, Jerry Yodico, Ryan Eisa Perocho, R-jay Pornasdoro</i>	
TRANSPORTATION NETWORK VEHICLE SERVICE HUMAN RESOURCE 2 (TRAINING DEVELOPMENT, PERFORMANCE MANAGEMENT, RECRUITMENT AND AUTOMATED ONBOARDING)	958
<i>Samantha Felipe, John Christofer Lontoc, Richmon Salarda, Guia Marie Jaradal, Raisen Vasquez, Sheryl Adovas</i>	
VOICE CONTROL AIR HUMIDIFIER USING HC-06 FOR BARANGAY NOVA PROPER	959
<i>John Christopher Cañada, Bilino Bimmolog, Dave Justin Dimasuhid, Eman Lacorda, Jimmel Ponsica, Sir R-jay Pornasdoro</i>	
A WEB-BASED AND MOBILE APPLICATION VOTING SYSTEM WITH STUDENT EVALUATION FOR SUPREME STUDENT COUNCIL OF BESTLINK COLLEGE OF THE PHILIPPINES	960
<i>Hazel Lapso, Lesly Jan Cosares, Khadaft Rimbang, Nor-haima Satar, Naizah Mariquit, Ronald Roldan Jr.</i>	
BTMS: ADMIN (WEB-BASED MANAGEMENT SYSTEM WITH DOCUMENTATION WORKFLOW AUTOMATION AND OPERATIONAL STANDARDIZATION USING AI)	961
<i>Michael Angelo Pagadora, Mark Benedict Fuentes, Benzar Espinosa, Raymond Lodronio, John Kenneth Boseo, Emerson Gelera</i>	
BUS TRANSPORTATION MANAGEMENT SYSTEM CORE II WITH AI TICKETING SALES MANAGEMENT ANALYTICS	963
<i>John Michael Mandar, Ralph Miguel Vinluan, Runnen Joy Nierras, Lyka Dumangas, April Ongonion, Emerson Gelera</i>	
BUS TRANSPORTATION MANAGEMENT SYSTEM HUMAN RESOURCES IV: PAYROLL, PERFORMANCE MANAGEMENT, AND EMPLOYEE BENEFITS WITH PREDICTIVE ANALYTICS USING AI	964
<i>Joshua Ifurung, Nikkie Jr. Cabarrubias, Elaine Celestino, John Emer Madrid, Nicol Luzares, Emer Gelera</i>	

BUS TRANSPORTATION MANAGEMENT SYSTEM LOGISTIC I: DEVELOPING EFFICIENT INVENTORY AND WAREHOUSE MANAGEMENT, AUDIT MANAGEMENT, AND INFRASTRUCTURE MAINTENANCE USING REVERSE LOGISTICS	965
<i>Ricardo Aron III, John Vincent Dizon, Kent Mark Tejada, Kristel Casinillo, Andy Barrantes, Emerson Gelera</i>	
BUS TRANSPORTATION MANAGEMENT SYSTEM LOGISTIC II: PROCUREMENT MANAGEMENT WITH AI DRIVEN VENDOR TRANSIT	967
<i>Maikiru Baclason, Joshua Belza, Alexandria Valenzuela, Monica Pornelos, Quinly Kaye Eralino, Emerson Gelera</i>	
BUS TRANSPORTATION MANAGEMENT SYSTEM: HUMAN RESOURCE 1: (CANDIDATE SCREENING, RECRUITMENT, APPLICANT MANAGEMENT AND NEW HIRE ONBOARDING) WITH INTELLIGENT RESUME PARSING TOOL	968
<i>John Julius Lucaban, Mark Kian Ancheta, Vejay Sam Cayanan, Russel Lacandula, Jhon Lloyd Tao, Emerson Gelera</i>	
BUS TRANSPORTATION MANAGEMENT SYSTEM: HUMAN RESOURCES II COMPETENCY, LEARNING, AND TRAINING MANAGEMENT WITH AUTOMATED FEEDBACK ANALYSIS USING NATURAL LANGUAGE PROCESSING	969
<i>Christian Loberiano, EJ Delos Reyes, Aaron Gabriel Cañete, Via Geslani, Jhona Buenaventura</i>	
BUS TRANSPORTATION MANAGEMENT SYSTEM: IMPROVING TRANSPORTATION ACCURACY USING AI WITH AUTOMATION OF GENERAL LEDGER.	970
<i>Marvel Dulcero, Ronnie Crinan, Ryan Edaño, George Mckentosh Soriano, Emerson Gelera</i>	
BUS TRANSPORTATION MANAGEMENT SYSTEM: CORE TRANSACTION 1 (INTEGRATED OPERATIONAL MANAGEMENT SYSTEM FOR PROVINCIAL BUSES THROUGH ROUTE SCHEDULING, FLEET MONITORING, AND REAL-TIME-DATA INTEGRATION)	971
<i>Robert Zimon De Jesus, Janssen Cloyd Pidlaoan, Dianne Dorol, Maria Cristina Intero, Mariel Fadrogane, Emerson Gelera</i>	
CHEM-BOT; A CHEMISTRY SIMULATION AND LEARNING APPLICATION FOR INTERMEDIATE LEARNERS	972
<i>Jayson Doza, Monica Jhenna Rimando, Jontric Velasco, Jossa Ensipido, Jossa Ensipido, Ronelyn Prias, Carlito Gabriel</i>	
COMPREHENSIVE TALENT ACQUISITION OF SERVICE MANAGEMENT SYSTEM (RECRUITMENT, APPLICANT MANAGEMENT, NEW HIRE ONBOARD, PERFORMANCE MANAGEMENT, RECOGNITION)	973
<i>Mark Loyd Manibale, Evan Joshua Boneo, Remark Jay Penequito, John Lloyd Hinagpisan, Jeffrey Escalante, Enrico Pineda</i>	

COMPUTER SKILL ASSESSMENT OF GRADE 12 STUDENTS IN BESTLINK COLLEGE OF THE PHILIPPINES - BULACAN CAMPUS IN ONLINE CREATION TOOLS: A COMPARATIVE ANALYSIS	974
<i>Lhance Owen Borje, John Raven De Castro, John Lloid Del Rio, Daliah Del Rio, Rica Resus, Ahlen Lamida</i>	
CRANE AND TRUCKING RENTAL MANAGEMENT SYSTEM: DISPATCH MANAGEMENT, INVENTORY MANAGEMENT, REPORTING AND ANALYTICS WITH MOBILE ACCESS	975
<i>Andrei Lauren Gumahad, Isaac Chustine Briñas, John Cleford Concan, MJ Bhoy Eugenio, Jobert Jason, Khristian Hoseña</i>	
CRANE AND TRUCKING RENTAL MANAGEMENT SYSTEM: HUMAN RESOURCES II: (PERFORMANCE MANAGEMENT, INTEGRATION, AND AUTOMATION, BENEFITS MANAGEMENT, PAYROLL AND COMPENSATION, COMPLIANCE AND REPORTING) COMPENSATION EQUITY ANALYTICS USING H2O.AI	976
<i>Aldrin Arabia, Kenneth Engayas, Alfaro Bangon, Francis Paloma, Keneth Tillerba, Khristian Hoseña</i>	
DATA RECORD INVENTORY SYSTEM FOR TOP G WATCH	977
<i>Jake Aldred Sevilla, Roi Apolinario, Jasmin Bernadeth Barcenias, Shanlee Bautista, Jheovix Dianmar Ahmad Valdeavilla, John Christopher Velarde, R-jay Pornasodoro</i>	
DEVELOPMENT OF AN INFORMATION SYSTEM FOR DOCVAPE	978
<i>Arcel Zamora, Shaira May Lagamson, Rexes Lusanta Jr, Marc Lester Maglalong, Jake Kent Romanca, R-jay Pornasodoro</i>	
E-COMMERCE CORE TRANSACTION 3: CONTENT MANAGEMENT WITH CUSTOMER BEHAVIOR AND TRENDS ANALYTICS	979
<i>Ken Jayson Delantar, Joemarc Barcia, Jude Barbero, Stephen Mark Junior Aquino, Alejandro Adovas</i>	
E-COMMERCE FINANCE MANAGEMENT SYSTEM: BUDGET MANAGEMENT, ACCOUNTS PAYABLE AND ACCOUNTS RECEIVABLE, COLLECTION, GENERAL LEDGER WITH AUTOMATED PAYMENT REMINDER SYSTEM	980
<i>Ruzzel Serafica, Ninio Melendres, Ira Rafael Gabayeron, Axccl Clarence Calvez, Jevenry Montilla, Alejandro Adovas</i>	
E-COMMERCE HR MANAGEMENT SYSTEM: PERFORMANCE MANAGEMENT WITH PERFORMANCE TRACKING & ANALYTICS	982
<i>Justine Bagalihog, Domenic Allen Abit, Carl Angelo Elutin, Jelyn Ragundiaz, James Algie Vizcarra, Alejandro Adovas</i>	
E-COMMERCE HUMAN RESOURCE MANAGEMENT SYSTEM: HUMAN RESOURCE WORKFORCE ANALYTICS WITH SKILL GAP ANALYSIS TOOLS	983
<i>Renz Prado, Art Javar Pregoner, Kurven James Palma, Marni Kelli Mangat, Ronnin Lloyd Balderama, Alejandro Adovas</i>	

- E-COMMERCE HUMAN RESOURCE MANAGEMENT SYSTEM: ONLINE MONITORING FOR ATTENDANCE TRACKING, DYNAMIC SCHEDULING AND AUTOMATED PAYROLL PROCESSING** 984
Flores Rustom, Kristel Anne Valle, Lyka Alcantara, Chris John Tamayo, Sunshine Leon, Alejandro Adovas
- E-COMMERCE LOGISTIC MANAGEMENT SYSTEM: PROCUREMENT WITH AUTOMATED PERFORMANCE DASHBOARDS, FORECASTING AND ANALYTICS** 985
Joshua Tulod, Joseph Andoy, John Philip Octaviano, Carl Anthony Olalo, Thea Nerissa De Guzman, Alejandro Adovas
- E-COMMERCE LOGISTICS MANAGEMENT SYSTEM: A WEB BASED AND MOBILE APPLICATION DOCUMENT TRACKING SYSTEM, VEHICLE RESERVATION INTEGRATION WITH FLEET MANAGEMENT GPS ROUTE OPTIMIZATION USING TRACKING SYSTEM AND REAL-TIME TRAFFIC** 986
Nathaniel Matabang, Mosa Asimuddin, Brix Joshua Cejalbo, Derick John Raymundo, Romela Kate Santos, Alejandro Adovas
- E-COMMERCE: ADMINISTRATIVE DOCUMENT MANAGEMENT SYSTEM: A WEB-BASED INTEGRATED DOCUMENT MANAGEMENT USING AUTOMATED SORTING WITH CUSTOM NOTIFICATION ALERT** 987
Felisha Dyne Sy, Daryl Justine Gempesaw, John Lester Pines, Marvin Manibale, Marjorie Valette, Alejandro Adovas
- EIS: FREIGHT MANAGEMENT SYSTEM CORE 2: “SHIPMENT TRACKING AND VISIBILITY MANAGEMENT WITH CUSTOMER-CENTRIC SHIPMENT THROUGH GPS WITH REAL-TIME UPDATES AND NOTIFICATION”** 988
Rose Ann Tantiado, Ralph Ace Santos, Francis Mark De Vega, Cyril Gad, Ian Lou Alfaro, Gerald Dela Cruz
- EIS: FREIGHT MANAGEMENT SYSTEM: LOGISTICS 2: VENDOR PORTAL WITH AI CHATBOT SUPPORT, ADVANCE DOCUMENT TRACKING, AUTOMATED ALERTS AND CUSTOM REPORTING** 989
Ricafranca Rhica Mhay, Rona Irader, Ma Angelica Olavidez, Brian Joseph Pura, Louise Joshua Dollosa, Gerald Dela Cruz
- EVACUATION CENTER TRACKING MANAGEMENT SYSTEM (REAL-TIME DATA MANAGEMENT, RESOURCE ALLOCATION, COMMUNICATION TOOLS, FACILITY MANAGEMENT SECURITY AND PRIVACY, COLOR MAPPING)** 990
John Michael Medina, Alfren James Pangasian, Dave Josh Arcenal, Edsa John Stephen Mora, Allenson Manluctao, Rosauero Villalon
- FILIPINO DIALECT TRANSLATOR: AN APPLICATION FOR LANGUAGE LEARNING AND REGIONAL CONNECTIVITY** 991
Denmark Puchero, Nicole Capongcol, Laurice Nicole Ylanan, Gurjet Singh, Sandile Guadiz, Carlito Gabriel

FREIGHT MANAGEMENT SYSTEM FINANCE: CONNECTING QR CODE SOLUTIONS, PREDICTIVE FINANCIAL ANALYTICS, AND LEDGER SYSTEMS FOR SEAMLESS AND EFFICIENT OPERATIONS	992
<i>Jelly Plazo, Mark Aaron Oasay, Ma Joanna Benize Libao, Denmark Nini, Gerald Dela Cruz</i>	
FREIGHT MANAGEMENT SYSTEM HUMAN RESOURCE 2: "RECRUITMENT AND ONBOARDING MANAGEMENT SYSTEM WITH AI-DRIVEN RESUME SCREENING"	993
<i>Paolo Abina, Pedjovent Sindol, Justin Agelir, Rusty Villasan, Angel Abon, Gerald Dela Cruz</i>	
FREIGHT MANAGEMENT SYSTEM: ADMINISTRATIVE CREATING AN ALL-INCLUSIVE TOOLKIT FOR EFFICIENT FREIGHT MANAGEMENT	994
<i>Maricar Dela Cruz, Marjorie Daleja, Ryan Sangasina, Reneelet Lewis Padayao, John Christian Vega, Gerald Dela Cruz</i>	
FREIGHT MANAGEMENT SYSTEM: HUMAN RESOURCE 3: OPTIMIZING PAYROLL AND BENEFITS MANAGEMENT WITH REAL-TIME INTEGRATION AND AI-DRIVEN AUTOMATION	995
<i>Khrystell Kristine Barroga, Angelen Argomido, Jewelyn Castor, Arriana Garinga, John Carlo Gustilo, Gerald Dela Cruz</i>	
FREIGHT MANAGEMENT SYSTEM: HUMAN RESOURCES 4: "TRAINING AND DEVELOPMENT MANAGEMENT SYSTEM WITH AI-DATA DRIVEN AND DYNAMIC SKILL MATCHING LEARNING MANAGEMENT SYSTEM"	996
<i>Bench Manuel, Cristy Jean Ofianga, Angelyn Guma, Laderfort Malabad, Hannah Kristine Tidoso, Gerald Dela Cruz</i>	
FREIGHT MANAGEMENT SYSTEM: LOGISTICS 1, VEHICLE AND DRIVER MANAGEMENT, MAINTENANCE MANAGEMENT, SCHEDULE MANAGEMENT, WAREHOUSING	997
<i>Abdon Gerald Fuertes, Algie Marcaida, Yuri Degollacion, Jayson Dejesus, Nathaniel Lumilay, Gerald Dela Cruz</i>	
HOSPITAL MANAGEMENT SYSTEM ADMINISTRATION AND SUPPORT SERVICES USING DISASTER RECOVERY AND BACKUP MANAGEMENT WITH AI DRIVEN TOOL	998
<i>Vince Francis Ortego, Adrian Laroza, Rey Daniel Daitol, Mark Gil Casaña, Nick David Montoya, Ronald Roldan Jr</i>	
HOSPITAL MANAGEMENT SYSTEM CORE 1: (INPATIENT AND OUTPATIENT CARE THROUGH PREDICTIVE ANALYTICS WITH PATIENT RISK PREDICTION, LENGTH OF STAY PREDICTION, PREDICTIVE SCHEDULING AND FOLLOW UP NEEDS)	999
<i>Inard Archey Baño, Paul Niko Vincent Royo, Marwin Colinayo, John Paul Oco, Mecco Lagne, Ronald Roldan</i>	

HOSPITAL MANAGEMENT SYSTEM FINANCE: BUDGET PREPARATION, CAPITAL PLANNING & INSURANCE CLAIMS WITH AI DECISION SUPPORT **1000**
Prince Joshmyr Viray, Klarence Bilaro, Hannah Jay Quiamco, Renie Faith Diama, Arron King Pontay, Ronald Roldan

HOSPITAL MANAGEMENT SYSTEM: HUMAN RESOURCE 3 (EMPLOYEE ENGAGEMENT, EMPLOYEE ASSISTANT PROGRAM, TIME AND ATTENDANCE AND PAYROLL SYSTEM) WITH AI-DRIVEN BIOMETRIC AUTHENTICATION AND FRAUD PREVENTION **1001**
Jayvee Abat, Melvin Bardon, Rose Villa Cabigayan, Harvey Ronolo, Mark Kenneth Cadena, Ronald Roldan

HOSPITAL MANAGEMENT SYSTEM: HUMAN RESOURCES 1: FOR RECRUITMENT STRATEGY, JOB ROLE DEFINITION, HIRING PROCESS MANAGEMENT, STAFFING NEEDS ASSESSMENT, SUCCESSION PLANNING, AND CONTRACT MANAGEMENT WITH PREDICT AND PREVENT EMPLOYEE BURNOUT. **1002**
Armel Esteves, Marvin Tariman, Jhongoten Paul Castilla, Ma Xena Osabel, Chester Kim Alviola, Ronald Roldan Jr.

HOSPITAL MANAGEMENT SYSTEM: HUMAN RESOURCES 2 (LEARNING MANAGEMENT AND TRAINING MANAGEMENT, SUCCESS PLANNING) WITH RECOMMENDATION SYSTEMS USING TENSORFLOW **1003**
Aaron Kier Palarca, Justin Paul Bautista, Vincent Victore, Kenneth Soriano, Jerwin Ray Veloso, Ronald Roldan Jr.

HOSPITAL MANAGEMENT SYSTEM: HUMAN RESOURCES 4 (COMPENSATION MANAGEMENT AND BENEFITS ADMINISTRATION) WITH AI PREDICTIVE ANALYTICS AND MACHINE LEARNING FOR INTEGRATED OVERTIME, INCENTIVES AND BENEFITS FORECASTING **1004**
Ralph Lawrenze Apil, Emar Jhon Andaya, Jhoncent Trunks Castilla, Emjhay Dela Cruz, Edmund Domingo, Ronald Roldan Jr.

HOSPITAL MANAGEMENT SYSTEM: LOGISTICS 2 MEDICINE DISPATCH AND VENDOR SELECTION FOR HOSPITAL SUPPLY CHAINS WITH REAL-TIME TRACKING, EMERGENCY EXPRESS DELIVERIES, MULTI-VENDOR COORDINATION USING MICROSERVICES **1005**
Rhuzel Guazon, John Neover Cabuntas, Michael Camino, Eriel Clifford Cudanes, John Carlos Tivar, Ronald Roldan Jr.

HOSPITAL MANAGEMENT: LOGISTICS MANAGEMENT SYSTEM, STOCK LEVEL MANAGEMENT, ABC ANALYSIS WITH DEMAND FORECASTING USING MACHINE LEARNING **1006**
Marinel Gupit, Jennifer Aleman, Cristopher Gerald Buncag, Joshua Afable, Ralph Laplana, Ronald Roldan Jr.

- HOTEL AND RESTAURANT MANAGEMENT SYSTEM: CORE 3 – ROOM CLEANING & SERVICE MANAGEMENT, MAINTENANCE MANAGEMENT, AND AI-POWERED TASK ALLOCATION** **1007**
Reorio Mirandilla, Rhena Shekka Labog, Mark Glean Billanes, Angelica Sabalza, John Paul Saguban, Marifel Laynesa
- HOTEL AND RESTAURANT MANAGEMENT SYSTEM: HUMAN RESOURCE 3 – TIME AND ATTENDANCE MANAGEMENT, SHIFT SCHEDULING AND ROSTER MANAGEMENT, LEAVE MANAGEMENT WITH PREDICTIVE ANALYTICS USING TENSORFLOW, AND COMPLIANCE AND LABOR LAW ADHERENCE** **1008**
Ariane Jane Corpuz, Cherry Lyn Torrefranca, Rheniel Marzan, Grace Lipit, Angelo Eva, Marifel Laynesa
- HOTEL AND RESTAURANT MANAGEMENT SYSTEM: HUMAN RESOURCES 1 (JOB POSTING AND RECRUITMENT, APPLICATION MANAGEMENT, APPLICANT TRACKING SYSTEM, ONBOARDING) AUTOMATED PARSING WITH AI DRIVEN TOOL HIRETUAL** **1009**
Jenelyn Corpuz, Buenaventura Abejay, Mia Joy Napile, Marc Allen Papa, Cristine Versoza, Marifel Laynesa
- HOTEL AND RESTAURANT MANAGEMENT SYSTEM: HUMAN RESOURCES 4 – (PAYROLL PROCESSING, BENEFITS & COMPENSATION MANAGEMENT, AND EMPLOYEE SELF SERVICE PORTAL) UPGRADED WITH SMART PAYROLL HELPDESK** **1010**
Jimmy Saquez Jr, Renz Joshua Rosales, Reed Ashley Motol, Mark Angelo Calayag, Francisco Jr Turing, Marifel Laynesa
- HOTEL AND RESTAURANT MANAGEMENT SYSTEM: LOGISTIC 1 (WAREHOUSE AND VEHICLE RESERVATION) WITH SYSTEMATIZED INVENTORY REPLENISHMENT, AND ITEM TRACKING CAPABILITIES.** **1011**
Mark Anthony Fuentes, Alan Jules Bongon, Randolph Gutierrez, John Robert Oclo, Kenneth Panlilio, Marifel Laynesa
- HOTEL AND RESTAURANT MANAGEMENT SYSTEM: LOGISTICS 2 (PROCUREMENT, VENDOR PORTAL, AUDIT MANAGEMENT) WITH PREDICTIVE ANALYTICS** **1012**
Mheera Ann Valerie Conwi, Asmin Boga, Kier Salise, Sheila Velasco, Elaisa Grace Arca, Marifel Laynesa
- HOTEL FEEDBACK DEVICE FOR IMPROVING HOTEL RATINGS USING RASPBERRY PI** **1013**

- LOCAL GOVERNMENT UNIT 2: SOCIAL SERVICE AND WELFARE MANAGEMENT SYSTEM (CANCELLATION AND RESCHEDULING, SOCIAL WORKER AND CASE PORTAL, APPOINTMENT AND SCHEDULING, REPORTING AND ANALYTICS, BENEFICIARY MANAGEMENT, AI DECISION SUPPORT)** 1023
Henryco Buena, Jayboy Colo, Angeline Basas, Genny Annrich Biscocho, John Lloyd Lagman, Rosauro Villalon Jr.
- LOCAL GOVERNMENT UNIT 1: EMERGENCY RESPONSE AND DISASTER MANAGEMENT SYSTEM (AI CHAT ASSISTANT, REAL-TIME EMERGENCY ALERTS, COMMUNITY PORTAL, AND GIS-INTEGRATED EMERGENCY SUPPORT OPERATIONS)** 1024
Daryl Hans Ocao, Mark Daniel Edillor, Julian Jules Pardi, Vhie Jay Alcantara, Reyvi John Tagatac, Richelyn Villasor
- LOCAL GOVERNMENT UNIT 1: LIBRARY MANAGEMENT SYSTEM (CATALOG MANAGEMENT, BORROWING AND RESERVATION MANAGEMENT, REAL-TIME BOOK TRACKING AND MONITORING) AI AUTOMATIC FINE CALCULATION.** 1025
Leizel Banaria, Emil John Alberto, John Jerric Alinsuag, James Christian Laag, Longos Christian, Ms. Richelyn Villasor
- LOCAL GOVERNMENT UNIT 1: LOGISTICS (STOCK TRACKING, AUDITING, FLEET MANAGEMENT PROCUREMENT, AND VENDOR PORTAL) WITH AI DETECTOR.** 1026
Mary Ann Gumiran, Lester Joe Ebias, Steffane Bertanico, Tiffany Joy Bacan, Byron John Sanchez, Richelyn Villasor
- LOCAL GOVERNMENT UNIT 1: PUBLIC CONSULTATION MANAGEMENT (CONSULTATION SCHEDULING, CONSULTATION TRACKING AND MANAGEMENT, ROLE MANAGEMENT) WITH AI CONSULTANT SUPPORT** 1027
Hera Combo, Jhian Marie Antonio, Clarissa Joy Hapa, Ronnel Sanchez, Nicole Tolog, Richelyn Villasor
- LOCAL GOVERNMENT UNIT 1: SOLID WASTE MANAGEMENT SYSTEM (COMPLAINT SUBMISSION, WASTE COLLECTION MANAGEMENT, REPORTING AND ANALYTICS)** 1028
Benedicto Gacilan Jr, Davejan Quinagon, Nathaniel Alde, Gymcarl Omaguing, Julius Martin Francisco, Richelyn Villasor
- LOCAL GOVERNMENT UNIT 2: PERMIT MANAGEMENT SYSTEM (PERMIT APPLICATION, PERMIT ISSUANCE, AI EMAIL NOTIFICATION SYSTEM, USER AND SECURITY MANAGEMENT)** 1029
Bensor Bataller, Aaron Jerusalem, Aldrin Suela, Wilfredo Sison Jr, John Lester Liwag, Jhun Paredes Villalon

- LOCAL GOVERNMENT UNIT 2: PUBLIC SAFETY INCIDENT REPORTING SYSTEM: SYSTEMATIC REPORTING, REAL-TIME NOTIFICATION, ANALYTICS, AND AI-DRIVEN FIRST AID ASSISTANCE** **1030**
Joel Sulit III, Iverson Tobias, Jennifer Dionio, Bryan Estrera, John Harold Catoy, Rosauro Villalon Jr.
- LOCAL GOVERNMENT UNIT 3: ADAPTIVE EMERGENCY COORDINATOR, E-COMMUNITY SCHOLARSHIP AND EDUCATIONAL OPPORTUNITIES, CHILD & YOUTH SERVICES CASE USING VIRTUAL - CHAT ASSISTANT** **1031**
Jobert Dela Cruz, John Paul Eco, Ruzzel Javate, Elvin John Ubalde, Marveluz Tanamor, Marifel Laynesa
- LOCAL GOVERNMENT UNIT 3: BARANGAY MAPPING WITH INTERACTIVE MODEL USING OPEN STREETMAP** **1032**
Charmyrn Tolosa, Mary Joyce Bedonia, Kristine Mae Gilla, Justin Gacho, Karl Christian Panizales, Marifel Laynesa
- LOCAL GOVERNMENT UNIT 3: BARANGAY SAFETY AND SECURITY SERVICES MANAGEMENT SYSTEM WITH SUGGESTIVE AI** **1033**
Jhon Christopher Aldea, Laleen Artesano, Airra Hernandez, Maria Roberto, Carl Angelo Tolentino, Marifel Laynesa
- LOCAL GOVERNMENT UNIT 3: BUSINESS REGISTRATION AND RENEWAL SYSTEM WITH DOCUMENT UPLOAD, APPLICATION TRACKING, EXPORT OPTIONS, QR CODE FILTERING, AND AI-POWERED EXPIRATION ALERTS & RENEWAL ANALYTICS** **1034**
Edgeniel Buhian, Edyfer Fernandez, Rick Brian Tepase, John Michael Badilla, Loremina Sogui, Marifel Laynesa
- LOCAL GOVERNMENT UNIT 3: DIGITAL BARANGAY OFFICE SCHEDULING SYSTEM (REAL-TIME AVAILABILITY, RESCHEDULING, REPORTING AND DEPARTMENT SELECTION WITH AI CHAT ASSISTANCE)** **1035**
Ana Rose Abucejo, Julius Vincent Bilangel, Rhea Dantes, Kristine Marbella, Cassandra Karylle Molina, Marifel Julianda Laynesa
- LOCAL GOVERNMENT UNIT 3: PUBLIC FACILITIES RESERVATION SYSTEM (FACILITY LISTING AND AVAILABILITY, ONLINE RESERVATION MANAGEMENT WITH INTERACTIVE AI RESERVATION ASSISTANT)** **1036**
Harley Tristan Namoro, Cristian Dave Protacio, Angelica Tabado, Jenny Payumo, John Edmar Lopez, Marifel Julianda Laynesa
- LOCAL GOVERNMENT UNIT 3: PUBLIC HEALTHCARE STOCK MANAGEMENT SYSTEM WITH FORECASTING ANALYTICS USING AI DRIVEN TREND ANALYSIS AND INSIGHTS** **1037**
Matt Franky Boneo, John Ivan Doyola, Jomarie Gersalia, Carl Christian Mercado, Jeward Tañada, Marifel Julianda Laynesa

- LOCAL GOVERNMENT UNIT 4: A WEB-BASED BARANGAY CLEARANCE AND CERTIFICATE MANAGEMENT SYSTEM (CLEARANCE ISSUANCE, CERTIFICATE MANAGEMENT, STATUS AND REPORTING AND AI RESIDENT VERIFICATION USING GOOGLE CLOUD VISION)** 1038
Loren Sotto, Andrei Joseph Abesamis, John Joshua Recto, Russel Adrian Rubante, Jhanile Ann Ygot II, Marifel Julianda Laynesa
- LOCAL GOVERNMENT UNIT 4: A WEB-BASED BARANGAY DISASTER RELIEF SERVICE (DONATION MANAGEMENT, VOLUNTEER REGISTRATION, RELIEF INVENTORY, DISASTER REPORT, BARANGAY ANNOUNCEMENT AND COMMUNITY FEEDBACK, RELIEF REQUEST AND TRACKING WITH GIS MAPPING)** 1039
Ma Christina Baylon, Jimbo Cruz, Arvin Dionson, Ash Inocencio, Marifel Julianda Laynesa
- LOCAL GOVERNMENT UNIT 4: BARANGAY CRIME DATA ANALYTICS AND REPORTING (REAL-TIME ANALYTICS MANAGEMENT, DATA INTEGRATION FROM MULTIPLE SOURCES AND CRIME MAPPING MANAGEMENT AND VISUALIZATION USING ARCGIS)** 1040
Kyle Jastine Arroyo, Edward Bare, Joshua Rabac, Franch Patrick Villarante, Akira Franse Ybañez, Marifel Julianda Laynesa
- LOCAL GOVERNMENT UNIT 4: BARANGAY FOOD MARKET SAFETY MANAGEMENT SYSTEM (SAFETY MONITORING, CONCERNS REPORTING WITH AI INSIGHTS)** 1041
Ralph Christian Abina, Jonard Cabildo, Joemel Junio, John Cedric Magsadia, Nicole Dave Ramos, Marifel Laynesa
- LOCAL GOVERNMENT UNIT 4: CHILD DEVELOPMENT CENTER MANAGEMENT SYSTEM: GUARDIAN PORTAL, CHILD MANAGEMENT WITH AI-RECOMMENDATION TOOLS** 1042
Tiffany Shane Balase, Joshua Raphael Igaya, Richard Masculino, John Ryan Christian Ocampo, Freddieyn Villagrancia, Marifel Laynesa
- LOCAL GOVERNMENT UNIT 4: CHILDREN AND YOUTH MANAGEMENT SYSTEM WITH AI-DRIVEN EVENT RECOMMENDATION** 1043
Sofia Anna Dacara, Rovick Bench Cruz, Eli Boy Herrera, Jasmine Rosales, Daisy Reales, Marifel Julianda Laynesa
- LOCAL GOVERNMENT UNIT 4: EVENT MANAGEMENT AND COMMUNITY ENGAGEMENT SYSTEM (OPTIMIZED PLANNING, EXECUTION, CITIZEN PARTICIPATION WITH AI SCHEDULE ASSISTANT)** 1044
Sean Mirco Cati-an, Christian Allen Cabalquinto, Vellie Marie Calaylay, John Marc Demerin, John Philip Par, Marifel Laynesa

LOCAL GOVERNMENT UNIT 4: OFFICE OF THE SENIOR CITIZEN HEALTH AND WELLNESS MANAGEMENT, PERSONAL CARE MANAGEMENT, CAREGIVER MANAGEMENT WITH FAMILY COMMUNICATION PORTAL, AUTOMATED NOTIFICATIONS AND IOT INTEGRATION SYSTEM **1045**

Chris David Pee, Karl Cedrick Adriatico, Benedict Balce, Billy Calatrava Jr, Rose Ann Olarte, Marifel Julianda Laynesa

LOCAL GOVERNMENT UNIT 4: BARANGAY PET REGISTRATION FOR ANIMAL WELFARE AND PROTECTION SYSTEM (PET PROFILING, ANIMAL ADOPTION PORTAL, ANIMAL CRUELTY REPORTING, IOT BASED QR-GENERATED TAG, ANIMAL IMAGE RECOGNITION) **1046**

Mark Dominique Baril, Russel Derramas, Wendhil Himarangan, Ismael Nick Longcop, Ace Felixerp Manganaan, Marifel Laynesa

LOCAL GOVERNMENT UNIT: COMPLIANCE AND REGULATORY MANAGEMENT SYSTEM (SELF-ENROLL COURSES, POINTS-BASED SYSTEM, COMPLIANCE MONITORING) WITH AI GAMIFIED EVALUATION SYSTEM **1047**

Ercylie Cordero, Lemuel James Leonora, Joshua Nazareno, Eugene Aureus, Marifel Julianda Laynesa

LOCAL GOVERNMENT UNIT: E-LOCAL CIVIL REGISTRAR SYSTEM: REAL-TIME REGISTRATION, VERIFICATION, AND ISSUANCE OF CERTIFICATES (AUTOMATED CERTIFICATE AND VOICE-ACTIVATED CONTROLS) **1048**

Angelo Vitug, Cristine Joy Aggalut, Jorenz Danzel Allacaden, Arnel Dela Peña, Lando Sanchez, Rosauo Villalon

LOCAL GOVERNMENT UNIT: EDUCATION AND SCHOLARSHIP MANAGEMENT SYSTEM WITH AUTOMATED APPLICATION SCREENING AND FRAUD DETECTION **1049**

Jefferson Delaminez, Jesrael Astorga, Angelico Antonio, John Carlo Baluyo, Genecris Caballero, Rosauo Villalon Jr.

LOCAL GOVERNMENT UNITS 3: BARANGAY DEVELOPMENT MANAGEMENT SYSTEM FOR ZONING AND PERMIT PROCESSING WITH AI-DRIVEN DECISION SUPPORT TOOLS **1050**

Dexter Lucero, Jhon Anthony Bagaforo, John Lloyd Jampolina, Robinson Lacdang, James Sean Mayores, Marifel Laynesa

MANUFACTURING MANAGEMENT SYSTEM: ADMINISTRATIVE, AUTOMATED QUALITY CONTROL AND INTEGRATED COMMUNICATION TOOLS **1051**

Chriselda Dalanan, Joshua Andrei Redondo, Kent Russel Olanda, Rennix Alonzo, Abdulwahid Abdul, Rommel Constantino

MANUFACTURING MANAGEMENT SYSTEM: CORE 2: (PRODUCT EXECUTION AND AUDIT MANAGEMENT) WITH PREDICTIVE ANALYTICS USING TENSORFLOW **1052**

Harp Clarence Navarro, Eris Hally Pena, Jayrome Unay, John Andrei Lanuza, Jesson Bardon, Rommel Constantino

- MANUFACTURING MANAGEMENT SYSTEM: FINANCIAL MANAGEMENT SYSTEM (FINANCIAL SECURITY, ADAPTIVE OPTIMIZATION AND ANOMALY DETECTION USING MACHINE LEARNING AI)** **1053**
Raffy Uanan, Alvin Montemor, Mark Masangya, Angelo Oquiniano, Joneben Fanoga, Rommel Constantino
- MANUFACTURING MANAGEMENT SYSTEM: HUMAN RESOURCES 1 (EMPLOYEE RECORDS MANAGEMENT, ATTENDANCE AND TIME TRACKING MANAGEMENT, HR COMPLIANCE, ONBOARDING/OFFBOARDING) WITH PREDICTIVE ANALYTICS USING TENSORFLOWJS** **1054**
Mike Franz Aspa, Nimrod Alvarez, Edu Araojo, Maxine Baccay, Cris Michael Angelo Mortes, Rommel Constantino
- MANUFACTURING MANAGEMENT SYSTEM: HUMAN RESOURCES 2(RECRUITMENT AND APPLICANT TRACKING, PERFORMANCE MANAGEMENT, LEARNING AND DEVELOPMENT, SUCCESSION PLANNING) WITH PREDICTIVE PROMOTION MODELING USING TENSORFLOW** **1055**
John Renz Legaspi, John Kenneth Nuñez, Jovan Nicolas, Jade Mark Cadutdut, Crisvel Estuesta, Rommel Constantino
- MANUFACTURING MANAGEMENT SYSTEM: HUMAN RESOURCES 4 (GRIEVANCE MANAGEMENT, EMPLOYEE ENGAGEMENT, EMPLOYEE COMMUNICATION, AND WORKFORCE ANALYTICS) WITH ADAPTIVE LEARNING AND DEVELOPMENT PATHWAY USING TENSORFLOW** **1056**
Ma Graciella Canales, Aljon Arellano, Jasmin Dela Piedra, James Royce Icaranom, Joemar Samillano, Dr. Rommel Constantino
- MANUFACTURING MANAGEMENT SYSTEM: HUMAN RESOURCES III (PAYROLL PROCESSING, BENEFITS, INCENTIVES AND COMPENSATION PLANNING) WITH PREDICT ANALYTIS AND BEHAVIORAL ANALYTICS USING TENSORFLOW** **1057**
John Lloyd Borlagdatan, Abeguel Canja, Oliver Padit, Elsie Pagsiat, Renalyn Sajol, Rommel Constantino
- MANUFACTURING MANAGEMENT SYSTEM: LOGISTIC 1 (PROCUREMENT, VENDOR PORTAL, WAREHOUSE MANAGEMENT) WITH DEMAND FORECASTING AND DISCREPANCY DETECTION USING BRAIN.JS** **1058**
May Angelie Hubahib, Adrey Japheth Locaylocay, Adrian Rey Barrios, Januah Baldeo, Benjie San Juan, Rommel Constantino
- MANUFACTURING MANAGEMENT SYSTEM.LOGISTIC 2 WAREHOUSE, INVENTORY AND TRANSPORTATION FOR FORECASTING** **1059**
Reynaldo Sabilo, Bien Guiatao, Sarah Jane Cornelio, Sphencer Once, Clifford John Villareal, Rommel Costantino

- MERCHANDISING MANAGEMENT SYSTEM (CORE 2): PRODUCT POSITIONING, MARKETING STRATEGY CUSTOMER RELATIONSHIP MANAGEMENT PERSONALIZED PRODUCTS SHOWCASE USING AI** **1060**
Lee Ivans Gonzaga, Kim Wency Cornejo, Ryme Czeddrick Simbajon, John Lloyd Acido, John Eric Marmol, Paulo Tolentino
- MERCHANDISING MANAGEMENT SYSTEM (CORE1): (UI/UX), BRANCH INFORMATION, CUSTOMER BENEFITS, WITH PRODUCT DETAILS, CUSTOMER LOYALTY TRACKING USING AI** **1061**
Argie Tapalla, Pamela Jean Nolasco, Jaylord Villanueva, Blaire Lance Alilam, John Dhel De Villa, Paulo Tolentino
- MERCHANDISING MANAGEMENT SYSTEM (HR3): CENTRALIZED EMPLOYEE RECORDS, SUCCESSION PLANNING, AND SECURE DOCUMENT DEPOT WITH AUTOMATED DATA ENTRY** **1062**
Romeo Stotomas, Jonathan Alarcon, Mark Gil Anora, Justin Shane Luza, Jayar Dolfo, Paulo Tolentino
- MERCHANDISING MANAGEMENT SYSTEM (HR4): ATTENDANCE MONITORING, 201 FILE MANAGEMENT AND INNOVATED PAYROLL SYSTEM WITH AI INTEGRATION** **1063**
Mark Edrian Burac, Felipin Calamba, John Lloyd Picson, Russel Castillo, John Kenneth Estacion, Paulo Tolentino
- MERCHANDISING MANAGEMENT SYSTEM (HUMAN RESOURCE 1): ONBOARDING AND OFFBOARDING, TASK MANAGEMENT, AND ONLINE JOB POSTING WITH AI RESUME EVALUATION** **1064**
Roselyn Rosario, Julius Ervin Dela Torre, Jobert Camo, Christian Jay Noora, Jay Cullo, Paulo Tolentino
- MERCHANDISING MANAGEMENT SYSTEM: “FINANCE MANAGEMENT AND SALES FORECASTING USINGN UMPY, PANDAS, AND THE OLLAMA MODEL”** **1065**
Miranda Jake Francis, Mark Jomar Marcelo, Rylbert Ganzan, Karl Angelo Abanes, Aldrin Bulambot, Paulo Tolentino
- MERCHANDISING MANAGEMENT SYSTEM: ADMIN FEATURES FOR DESIGN AND IMPLEMENTATION FOR CENTRALIZED MERCHANDISE MANAGEMENT AND AI FOR ADMIN TASK AUTOMATION** **1066**
Cristel Mae Cabe, Harold Jade Pausal, Heidi Montero, Mark Angelo Perido, Paulo Tolentino
- MERCHANDISING MANAGEMENT SYSTEM: HR2 (LEARNING AND DEVELOPMENT, PERFORMANCE, AND TRAINING MANAGEMENT) WITH AUTOMATED EMPLOYEE PERFORMANCE EVALUATION** **1067**
Catherine Saminian, Jorish Catacutan, Geoffrey Ovarado, Jocneam Pacho, Ralph Leanry Rodulfo, Paulo Tolentino

MERCHANDISING MANAGEMENT SYSTEM: LOGISTIC 2 (VENDOR PORTAL, SUPPLIER PERFORMANCE MONITORING, AUTOMATED ORDER PROCESSING) WITH SUPPLIER PERFORMANCE ANALYTICS AI **1068**
John Albert Villanueva, Shirley Mae Vargas, Aron Mesa, Cherry Palad, Charles Kevin Calimlim, Paulo Tolentino

MERCHANDISING MANAGEMENT SYSTEM: LOGISTICS 1 (PROCUREMENT AND WAREHOUSING) WITH WAREHOUSE LAYOUT FOR MONITORING USING GENERATIVE AI AND BARCODE IDENTIFICATION **1069**
Jan Eisen Diokno, Ronelio Arañez, Renz Cauba, Noel Serv Orille, Russel Tolentino, Paulo Tolentino

MICROFINANCE MANAGEMENT SYSTEM CORE 1: SAVINGS WITH REGULATORY COMPLIANCE AND CUSTOMER EXPERIENCE USING AI-DRIVEN TOOLS **1070**
Melanie Joy Platitas, Christine Pearl Belisario, Sodais Pandagla, Rolly Ragub, Joharie Anwar, Rommel Constantino,

MICROFINANCE MANAGEMENT SYSTEM: ADMINISTRATIVE (USER MANAGEMENT, LEGAL MANAGEMENT, COMPLIANCE ASSURANCE, RISK ASSESMENT) PREDICTIVE RISK ANALYSIS USING LOGICAL REGRESSION MODEL **1071**
John Mark Rosario, Mark Angelo Alde, Ronie Jr Matutino, Jerome Medes, April Thennesse Nicolas, Dr. Rommel Constantino

MICROFINANCE MANAGEMENT SYSTEM: CORE 2 LOAN MANAGEMENT SYSTEM WITH CREDIT REWARD POINTS & AI SUPPORT **1072**
Mark James Salvadora, Jack Harold Caalim, Mjay Del Rosario, Timothy James Peros, Alex Deniel Rodelas, Rommel Constantino

MICROFINANCE MANAGEMENT SYSTEM: HUMAN RESOURCE 3 (“SKILL DEVELOPMENT, RECRUITMENT ANALYTICS, HR DATA ANALYTICS WITH PREDICTIVE ANALYTICS USING PYTORCH”) **1073**
Kenn Batacandolo, Garth Kor-oyen, Dhaienz Matthew Merca, Judy Ann Gorre, Niela Potente, Dr. Rommel Constantino

MICROFINANCE MANAGEMENT SYSTEM: HUMAN RESOURCES 1 (EMPLOYEE PERSONAL INFORMATION, JOB INFORMATION, SKILL AND QUALIFICATION USING PREDICTIVE JOB SEARCHING AND AI-BASED TRAINING AND SKILL DEVELOPMENT **1074**
Microne Olete, Microne Olete, Garnet Kevin Marañon, Kathleene Anne Tano, Christian Amparo, Jhon Rey Bustillo, Dr. Rommel Constantino

MICROFINANCE MANAGEMENT SYSTEM: HUMAN RESOURCES II (TIME AND ATTENDANCE, LEAVE MANAGEMENT, PERFORMANCE MANAGEMENT, SOCIAL RECOGNITION WITH FACIAL RECOGNITION AND ANOMALY DETECTION IN PERFORMANCE) **1075**
Restituto Murillo, John Lennon Aguilor, Wendel Ureta, Steffano Dizo, Rhyss Adrian Torres, Dr. Rommel Constantino

- MICROFINANCE MANAGEMENT SYSTEM: LOGISTICS II – VENDOR PORTAL, AUDIT MANAGEMENT, VEHICLE RESERVATION MANAGEMENT, FLEET MANAGEMENT AND DOCUMENTS TRACKING SYSTEM WITH FRAUD DETECTION AND PREVENTION USING AI-POWERED CANDIDATE QUALIFICATIONS TOOLS** **1076**
John Meddie Munoz, Brayle James Insigne, Cris John Failago, Vincent Jay Bentor, Ivan Inoferio, Dr. Rommel Constantino
- MICROFINANCE MANAGEMENT SYSTEMS: CASH MANAGEMENT AND DISTRIBUTION LOAN (SHORT-TERM FINANCING, REVOLVING CREDIT AND CASH FLOW MANAGEMENT) WITH FRAUD PREVENTION USING AI-POWERED TOOLS** **1077**
Shane Relingado, Johary Kudarat, John Paul Buyo, Johnrey Araula, Jay Mark Esguerra, Dr. Rommel Constantino
- NODADO HOSPITAL MANAGEMENT SYSTEM CORE II - PHARMACY SERVICES, LABORATORY SERVICES, AND THERAPEUTIC SERVICES WITH PHARMACEUTICAL AND MEDICATION** **1078**
Gino Abarro, John Andrie Azores, Nhial Stephen Gardose, Raven Odtuhan, Marco Ronquillo, Ronald Roldan
- OPTIMIZING FINANCIAL OPERATIONS: ENHANCING EFFICIENCY IN DISBURSEMENT, BUDGET MANAGEMENT, COLLECTION, GENERAL LEDGER, AND ACCOUNTS PAYABLE/RECEIVABLE THROUGH AI DRIVEN SERVICE MANAGEMENT SYSTEM** **1079**
Clarisse Dalida, Ken Andrei Bacongga, Ronn Matthew Hachero, John Jefrrusy Perez, Aldrich Quiwa, Enrico Pineda
- OPTIMIZING JOB AGENCY OPERATIONS (PAYROLL SYSTEMS, CORE HUMAN CAPITAL STRATEGIES, HR ANALYTICS AND STRATEGIC COMPENSATION PLANNING)** **1080**
Hannah Faye Perez, Gyle Aldrick Cordova, Christian Peji, Elton Kert Roleda, Daniela Santos, Enrico Pineda
- OPTIMIZING SUPPLY CHAIN EFFICIENCY LOGISTICS PREDICTIVE ANALYTICS** **1081**
Marc Daniel Rafael Llorente, John Carlo Bueno, John Michael Gallego, May Ruiz, Prince Velozo, Sheryl Adovas
- PARKS AND RECREATION MANAGEMENT SYSTEM(REAL-TIME FACILITY AVAILABILITY, FACILITY RESERVATION, MAINTENANCE AND SAFETY REPORTING AND AI-POWERED CUSTOMER SUPPORT)** **1082**
Vecera John Ralph, Dexter Vinanua, Anthony Pinto, Henderson Jorta, Rosauro Villalon
- PRODUCT INFORMATION SYSTEM FOR ATE DIOSA'S STATION** **1083**
Marie Buagas, Baldivino Ringo, Alexander Armstrong, Chelsea Umbac, Krystall Lingad, R-jay Pornasdoro

- PRODUCT INVENTORY MANAGEMENT SYSTEM IN KNM MINI MART** 1084
Mariane Nicole Valera, Jhon Carlo Ramos, Ivan Kurt Salvador, Christine Ledesma, Jshade Vincent Tamonan, R-jay Pornasodoro
- RAIN PROTECTION MACHINE FOR DRYING FISH THROUGH SUNLIGHT USING ARDUINO FOR VILMA'S DRIED FISH** 1085
Humphrey Yu, Jshade Arbhe Batiquin, Alfredo Uno, John Robert Nietes, Raph Gabriel Sendrijas, R-jay Pornasodoro
- SANGGUNIANG KABATAAN MANAGEMENT SYSTEM (COMMUNITY PORTAL, PROGRAM SCHEDULING, REAL-TIME DATA AND EVENT WITH AI ASSISTED EDUCATIONAL PROGRAM)** 1086
Charles Brazal, Fernando Jose Adigue, John Paulo Arrieta, Mohammad Rayyan Tambidan, Paul William Trinidad, Richelyn Villasor
- SCHOOL (MANAGEMENT SYSTEM: LOGISTICS MANAGEMENT SYSTEM WITH DEMAND FORECASTING AND DELIVERY SCHEDULING)** 1087
Rio Cupat, Isaiah Allen Falcon, Laurance Mondragon, Eugene Valdenebro, Hannah Alexandra Bangay, Marifel Laynesa
- SCHOOL MANAGEMENT SYSTEM 1: ENROLLMENT AND ADMISSION WITH ACCUMULATING STUDENT MONITORING DATA** 1088
Jay Paclauna, Roberto Gutierrez, Ken Eugene Herbolario, Eugene Tinio, Ronn Gabriel Julio, Ronald Roldan Jr.
- SCHOOL MANAGEMENT SYSTEM 1: LIBRARY WITH QR CODE INNOVATION AND BOOK MONITORING: STUDENT INFORMATION IN BESTLINK COLLEGE OF THE PHILIPPINES** 1089
Jerelyn Gargoles, Nelly Rose Peria, Ivan Obelidor, Carmina Ricablanca, Misha-el Bamba, Ronald Roldan Jr.
- SCHOOL MANAGEMENT SYSTEM 2: THE DEVELOPMENT OF A PREFECT MANAGEMENT SYSTEM WITH STUDENT CASE TRACKING AND AI CASE ANALYSIS AT BESTLINK COLLEGE OF THE PHILIPPINES** 1090
Arjay Austria, Reymondo Hernaez, Lovely Mae Koolyn Gaela, Mary Fien Cuabo, Mark Edwin Diesta, Ronald Roldan Jr.
- SCHOOL MANAGEMENT SYSTEM 2: AUTOMATED DEFENSE ROOM SCHEDULING SYSTEM WITH REAL-TIME AVAILABILITY AND CONFIRMATION FOR CENTER FOR RESEARCH AND DEVELOPMENT AT BESTLINK COLLEGE OF THE PHILIPPINES** 1091
Joseph Alfredo Pastores, Mark Joshua Trinidad, Cedrick Del Prado, Rosever Cunanan, Amina Sanson, Ronald Roldan Jr.

- SCHOOL MANAGEMENT SYSTEM 2: AUTOMATED GRADUATION PHOTOGRAPHY MANAGEMENT SYSTEM: STREAMLINING SOCIAL MEDIA SCHEDULING, STUDIO VERIFICATION, AND STATUS TRACKING FOR STUDENT DOCUMENTATION** **1092**
Joshua Quitariano, Cedrick Paul Gliban, Danny Duran, Mark Lester Agustin, Ronald Roldan Jr.
- SCHOOL MANAGEMENT SYSTEM 2: FACULTY LOADING WITH ONLINE SUBMISSION, DOCUMENTS TRACKING, SCHEDULE MONITORING REPORT WITH CLASSROOM MANAGEMENT** **1093**
John Robert Hernando, John Mark Ferrer, Raynald Carmen, Michael Anthony Casabon, Ronald Juan, Ronald Roldan Jr.
- SCHOOL MANAGEMENT SYSTEM 2: MANAGEMENT INFORMATION SYSTEM, STUDENT LEDGER WITH GENERAL REPORT BUSINESS INTELLIGENCE IN BESTLINK COLLEGE OF THE PHILIPPINES** **1094**
Jhon Lenard Escolano, Fernan Manaog, Don Alexis Sofio Aco, Klyden Maceda, Neil Vincent Boral, Ronald Roldan Jr.
- SCHOOL MANAGEMENT SYSTEM 2: PRODUCT CATEGORIES WITH SEPARATE SECTIONS FOR UNIFORMS, BOOKS AND OTHER PRODUCTS IN BESTLINK COLLEGE OF THE PHILIPPINES** **1095**
Karl Aaron Alvendo, Onemig Robenta, Angelo Abaigar, Marc Andrew Licuan, Cylenn Blezz Centillias, Ronald Roldan Jr.
- SCHOOL MANAGEMENT SYSTEM 4: ADMISSION (WITH STATUS PROGRESS TRACKING USING AI-DRIVEN TOOLS)** **1096**
Rheyvin Galang, Joana Rose Orbe, Leslie Nartates, James Robert Sto Domingo, Sherwin Canellas, Khristian Hoseña
- SCHOOL MANAGEMENT SYSTEM 4: AI CHAT SUPPORT BOT FOR PREFECT OF DISCIPLINE WITH MENU-BASED NAVIGATIONS** **1097**
Lester Caton, Chrisxander Merilo, Cedric Manlapaz, Clarence Bilon, Mark Russell Tabadero, Mr. Khristian Hoseña
- SCHOOL MANAGEMENT SYSTEM 4: AI-DRIVEN MANAGEMENT INFORMATION SYSTEM WITH INTELLIGENT STUDENT PAYMENT TRACKING AND HISTORY ANALYSIS** **1098**
Mark Aeron Lerida, Jesel Delabahan, Kyle Mico Lerida, Dean Andrew Revereza, Kenneth Sumampong, Mr. Khristian Hoseña
- SCHOOL MANAGEMENT SYSTEM 4: EVENT MANAGEMENT WITH AUTOMATED CHECK-IN SYSTEM FOR ATTENDEE ENGAGEMENT** **1099**
Maeve Tambiga, Kyla Mae Grampa, John Carlo Delos Santos, Jasper Kim Aspero, John Dave Del Moro, Khristian Hoseña

- SCHOOL MANAGEMENT SYSTEM 4: FINANCIAL ASSISTANCE MANAGEMENT SYSTEM WITH APPLICATION AND ELIGIBILITY MANAGEMENT USING AI -POWERED ELIGIBILITY ASSESSMENT** **1100**
Jhon Francis Cabizares, Jhon Mark Buhisan, Jhon Patrick Batilaran, John Mark Cabonegro, Melfred Dula, Khristian Hoseña
- SCHOOL MANAGEMENT SYSTEM 4: LIBRARY MANAGEMENT SYSTEM “AUTOMATED CATALOGING AND IMPROVED ONLINE PUBLIC ACCESS CATALOG SERVICES USING A.I DRIVEN TOOL”** **1101**
Augustine Brial Bacalso, Jaspher Achuela, Gerald Christian Brito, Marialhiz Galagala, Joshua Nalaunan, Khristian M. Hoseña
- SCHOOL MANAGEMENT SYSTEM 4: WEB-BASED HEALTH RECORD MANAGEMENT SYSTEM WITH ASSESSMENT USING ALLSCRIPTS FOR AI TECHNOLOGY** **1102**
Jocelyn Braga, Nadine Doña, Rheyka Magnaye, Kube Charles Morano, John Ronald Relano, Khristian M. Hoseña
- SCHOOL MANAGEMENT SYSTEM; CASHIERING MANAGEMENT SYSTEM WITH SCAN AND PAY QR CODE USING AN AI-DRIVEN APPROACH** **1103**
Raymond Gutierrez Jr, John Mark Mondala, Lorenz Dumandan, John Cedrick Espino, Jimboy Mascariña, Khristian Hoseña
- SCHOOL MANAGEMENT SYSTEM; WEB BASED DEVELOPMENT AND MOBILE APPLICATION FOR STUDENT PORTAL WITH PAY BILLS RECEIPT, AI CHAT BOT AND CONCERN TICKETING SYSTEM AT BESTLINK COLLEGE OF THE PHILIPPINES.** **1104**
Aubrey Gillego, Aillyn Grace Borromeo, John Patrick Tanalgo, Joseph Montoya, Jonalyn Diala, Ronald Roldan Jr.
- SCHOOL MANAGEMENT SYSTEM: A MANAGEMENT INFORMATION SYSTEM FEATURING ADAPTIVE WORKFLOW AUTOMATION WITH PREDICTIVE ANALYTICS AND FORECASTING** **1105**
Gianfrancis Jayson Delgado, Crystal Jane Omapas, Nicole Kisha Alcaraz, John Lloyd Claudio, Miralles Ignacio, Marifel Laynesa
- SCHOOL MANAGEMENT SYSTEM: ADMISSION AND ENROLLMENT SYSTEM (SCHEDULING SELECTION WITH PREDICTIVE ENROLLMENT MODELLING)** **1106**
Laurence Capati, John Kevin Limbaro, Rico Cambre, Russel Laboc, Justine Lance Roque, Marifel Laynesa
- SCHOOL MANAGEMENT SYSTEM: ALUMNI MANAGEMENT SYSTEM W/ AI-BASED CHATBOT FOR INQUIRIES AND SOLUTIONS** **1107**
Rizelle Kyla Pilapil, Inah Balag, Patrick John Doroin, Angelmyca Gonzales, John Kenneth Nacua, Marifel Laynesa

- SCHOOL MANAGEMENT SYSTEM: CLINIC (A WEB-BASED SOLUTION FOR CLINIC DATA MANAGEMENT AND MEDICAL RECORDS TRACKING INTEGRATED WITH FORECASTING AI)** 1108
Patrick Nobleza, John Nathaniel Bazar, Alexa Dumo, Marichelle Marilao, Mark Jones Baguinon, Ms. Marifel Laynesa
- SCHOOL MANAGEMENT SYSTEM: EMPLOYEE INFORMATION MANAGEMENT AND RECRUITMENT APPLICANT TRACKING SYSTEM AT BESTLINK COLLEGE OF THE PHILIPPINES** 1109
Hazel Godalle, Justhine Louise Solomon, Rechel Salvador, Bonbert Lasco, Derick Duremdes, Ronald Roldan Jr.
- SCHOOL MANAGEMENT SYSTEM: EVENT MANAGEMENT SYSTEM WITH BUSINESS INTELLIGENCE POWERED BY A.I VIDEO GENERATOR** 1110
John Arnel Mansueto, Christopher Reboton, Robert Lourd Cruz, Zedrick Vincecruz, Demver Mark Poserio, Marifel Laynesa
- SCHOOL MANAGEMENT SYSTEM: LIBRARY MANAGEMENT SYSTEM WITH ONLINE RESERVATION AND RENEWAL POWERED BY A.I. BASED ADAPTIVE LEARNING AND SKILL DEVELOPMENT** 1112
Vermelle James Mendiola, Mariz Stella Panganiban, John Kenneth Vicotorino, Felipe Santiago III, Gem Delos Reyes, Marifel Laynesa
- SCHOOL MANAGEMENT SYSTEM: PREFECT OF THE DISCIPLINE MANAGEMENT SYSTEM WITH AI DECISION MAKING TOOL** 1113
Rey Kenneth Perdigon, Nick Jhoven Zoleta, Rogemar Dañola, Mark Joseph Vallejos, Kirt Xymon Dela Rosa, Marifel Laynesa
- SCHOOL MANAGEMENT SYSTEM: STUDENT AFFAIRS MANAGEMENT SYSTEM WITH AI ENGAGEMENT ANALYTICAL TOOL** 1114
Sean Carl Manito, Christian Amarille, Jelyn Monte, Kristina Casandra Bayas, Crystal Mhye Bautista, Marifel Laynesa
- SCHOOL MANAGEMENT SYSTEM: STUDENT INFORMATION SYSTEM WITH DATA VISUALIZATION AND PREDICTIVE ANALYTICS USING OPENAI.** 1115
James Alano, Gerald Abenoja, Dee Jay Anareta, Anto Mari Deniel Bandiola, Mark Ryan Liscabo, Marifel Laynesa
- SCHOOL MANAGEMENT SYSTEM: THE DEVELOPMENT OF OUTGOING FEES REPORT AND BALANCE TRACKING FOR MANAGEMENT INFORMATION SYSTEM** 1116
Vincent Daez, Jeffrey Salabao, Charhly Sean Villalaralvo, John Jerico Meca, John Wilcel Mendoza, Ronald Roldan Jr.

DIGITIZING THE INVENTORY MANAGEMENT SYSTEM FOR FASHION FACTORY

Yorika Nagai, Shaila Joy Vitor, Camille Villarin, Marie Mostoles, Mary Rose Aguado,
Angela Nisola, Dr. Maria Edna Portugal

Abstract

In today's fast-paced business environment, many small businesses still depend on manual inventory tracking, leading to frequent issues such as missing entries, duplicate records, inaccuracies, and potential data manipulation. Fashion Factory, a boutique shop in San Jose del Monte, Bulacan, has experienced these challenges firsthand. To overcome these obstacles, the researchers developed a web-based Inventory Management System that offers precise, real-time monitoring of products and sales. This study aims to design and implement a digitized inventory solution for Fashion Factory to significantly reduce manual errors, enhance data security, and optimize store operations. The system empowers the client to efficiently track inventory levels, monitor sales activities, and generate detailed reports and visual analytics, thereby facilitating more informed and effective decision-making. The researchers adopted the Agile Software Development Methodology and leveraged OutSystems Service Studio to develop the system. Through comprehensive client interviews, specific business requirements were identified, informing the design and implementation of critical features including automated stock updates, role-based access controls, detailed sales reporting, best-selling product visualizations, exportable Excel reports, and employee activity tracking. Rigorous alpha and beta testing phases were conducted to validate the system's performance, ensure reliability, and confirm it met user needs and expectations. The results indicate that the system is intuitive, efficient, and fully compatible with both desktop and mobile browsers. Key features, such as automatic inventory updates after each transaction, controlled staff access to editing and deletion functions, and automatic restoration of product quantities upon sales reversal, significantly enhanced accuracy and data security. Moreover, the export-to-Excel capability and visual sales analytics empowered management with organized, data-driven insights. Survey feedback from clients and staff affirmed that the system streamlined operations, minimized errors, and improved the effectiveness of restocking and promotional planning. The web-based Inventory Management System developed for Fashion Factory effectively addressed the limitations of manual inventory tracking by enhancing accuracy, efficiency, and security in managing inventory and sales operations. The system's real-time data updates and robust reporting tools empowered better decision-making, leading to improved overall business performance. This solution is highly recommended for small businesses looking to modernize their inventory management. Future developments, such as integrating barcode scanning and providing an offline mobile application, would further enhance the system's flexibility and accessibility.

Keywords: inventory management system, web-based system, small business, manual inventory tracking, real-time data, sales reporting, data accuracy, data security, operational efficiency, decision-making, digitalization, barcode scanning, mobile accessibility

**LEVEL OF EFFECTIVENESS IN THE IMPLEMENTATION OF HELLOMONEY
APPLICATION FOR STUDENT PAYMENT TRANSACTION:
BASIS FOR A PURPOSE OF ACTION PLAN**

Izzy Gianchand, Leslie Apostol, Shaine Jasmine Nebreja, Richelle Mae Delos Santos,
Renalyn Laurio, Bryan Tubao

Abstract

With the ongoing rise of digital payment systems, students are increasingly adopting mobile banking for its convenience, yet some challenges remain. This study explores the use of the Hello Money mobile banking application in processing student payment transactions at Bestlink College of the Philippines (BCP). It evaluates the application's ease of use, transaction speed, security, reliability, accessibility, and convenience compared to traditional payment methods. Guided by the Unified Theory of Acceptance and Use of Technology (UTAUT2), Technology Continuance Theory (TCT), and Perceived Risk Theory (PRT), the study aims to understand students' acceptance, continued use, and perception of the Hello Money app in an academic context. This study utilized a descriptive research design and employed stratified random sampling to select 390 respondents from the total student population of 15,234 at Bestlink College of the Philippines. The sample primarily included students from business-related programs, as they are most likely to engage in digital payment transactions for academic purposes. Stratification was based on key demographic factors such as program and year level to ensure diverse and representative participation. Data were gathered using a structured survey questionnaire designed to assess students' perceptions of the HelloMoney mobile banking application, focusing on its ease of use, transaction speed, security, convenience, and accessibility. The findings suggest that Hello Money is moderately effective in facilitating student payments. While students acknowledged its ease of use and transaction speed, they also experienced issues related to transaction delays, security, and accessibility. These results highlight the need for improved user support and strengthened security measures to enhance the overall user experience. While Hello Money has shown some effectiveness in facilitating school fee payments, significant challenges persist, especially in security, transaction delays, and accessibility. To improve the user experience and encourage continued use, it is recommended to optimize system performance, enhance security protocols, and develop more accessible support services. Further research is suggested to investigate long-term adoption trends and user satisfaction with digital payment platforms in academic settings.

Keywords: hello money, mobile banking, digital payment systems, student payments, transaction speed, security, accessibility, bestlink college of the philippines, user experience, technology adoption

**THE EFFECT OF REMOTE WORKS ON INTERNAL CONTROL PRACTICES
AND FINANCIAL REPORTING OF SELECTED COMPANIES
IN NOVALICHES, QUEZON CITY**

Albie Caingat, Marjorie Ignacio, Judy Pearl Rendora, Cheery Ann Seño,
Aleah Jane Espinola, Eugene Bayani

Abstract

This study explores the impact of remote work on internal control practices and financial reporting among selected companies in Novaliches, Quezon City. While remote work offers advantages such as flexibility and cost savings, it poses risks to the effectiveness of preventive controls that are essential to maintaining financial integrity. Key challenges include diminished supervisory oversight, weakened segregation of duties, and vulnerabilities in data security within decentralized work environments. Traditional control measures, such as physical document verification, are less effective in virtual settings. This study addresses these concerns within the specific economic and technological context of Novaliches, aiming to fill a gap in localized research on remote work's implications for accounting and control systems. A quantitative correlational research design was used to examine the relationship between remote work adoption, internal control effectiveness, and the reliability of financial reporting. Data were collected through an online structured questionnaire distributed to 50 participants from selected companies in Novaliches using convenience sampling. The instrument employed 5-point Likert scales to assess the extent of remote work, the effectiveness of preventive controls, and the accuracy of financial reporting. The process ensured anonymity and voluntary participation throughout data collection. The results revealed that 72.5% of respondents were female and primarily between the ages of 20 and 39, indicating that younger female employees provided most of the insights. Remote work was found to improve task completion, performance, and employee satisfaction. However, it also introduced accountability issues due to reduced face-to-face supervision. While companies adapted physical controls by using VPNs and digital monitoring, risks such as unauthorized access remained. Digital tools improved transaction tracking, but delays in financial reporting continued. Younger employees adapted more effectively to remote setups, while internet connectivity and limited access to technology emerged as common barriers. Respondents suggested programs that enhance communication, cybersecurity, digital workflows, and employee well-being to improve internal control systems under remote conditions. To strengthen internal controls in remote work environments, companies should prioritize enhanced virtual accountability, invest in employee training, implement stronger cybersecurity measures, and adopt intelligent monitoring technologies. It is also essential to tailor internal control strategies to workforce demographics and to regularly review and update remote work policies. These steps can ensure the reliability of financial reporting and maintain organizational integrity in increasingly digital work settings.

Keywords: remote work, internal control, financial reporting, preventive controls, digital monitoring, cybersecurity, virtual supervision, accounting, novaliches, financial integrity

**A BUSINESS PLAN ON THE ESTABLISHMENT OF CHICKSIGLAZE IN NOVA
SQUARE MALL, BRGY. SAN BARTOLOME NOVALICHES, QUEZON CITY**

Regine Roco, John Lester Ayon, Mina Quindao, Jevy Conato, Francis Jay Blanco, Karen Valenzuela,
Jodessa Rasines, Richelle Languido, Julie Ann Kate Santos, Dave Zyon Comision,
Sheila Mae Husain, Reynold Bangalisan

Abstract

Chicksiglaze is a distinctive food business founded in 2025 by eleven young entrepreneurs with a shared goal of innovating Filipino cuisine. The venture reimagines the iconic flavors of sisig by incorporating them into fried chicken and banana heart-based dishes. Located in Nova Square Mall, Brgy. San Bartolome, Novaliches, Quezon City, Chicksiglaze caters to students, commuters, workers, and local residents. Guided by a mission to offer flavorful and affordable meals, and a vision to become a recognized brand in the food industry, the business is built on the pillars of innovation, accessibility, and quality. The business plan was developed through comprehensive market research, including segmentation analyses, demographic, psychographic, behavioral, and geographic, along with competitor profiling and feasibility studies. Financial projections were prepared using cost-plus pricing, return on investment (ROI) analysis, and budget forecasting. Product offerings were finalized through product testing and sensory evaluations. Marketing strategies incorporated direct selling, social media promotions, and on-ground campaigns such as grand opening samplings. Chicksiglaze offers a core menu featuring Chick 'N Sisig Glaze and Banana Heart 'N Sisig Glaze, available in various spice levels and combo meals, with prices ranging from ₱50 to ₱65. Add-ons include rice, fried egg, and beverages. The business operates daily from 7:00 AM to 6:30 PM and is funded by a shared capital of ₱55,000 among the partners. Its pricing strategy incorporates a 50% markup, while operational costs are managed through streamlined staffing, allowance-based compensation, and efficient production processes. Initial projections indicate profitability and a sustainable business model with strong potential for expansion. Chicksiglaze stands out with its Filipino fusion concept, offering a fresh twist on traditional comfort food. By using locally inspired ingredients, such as banana heart and sisig glaze, the brand builds a strong cultural identity while maintaining affordability. Its strategic location near schools and transportation hubs ensures high visibility and steady foot traffic. Customer engagement, word-of-mouth referrals, and interactive promotions are central to its growth strategy. With strong branding, operational efficiency, and a commitment to quality, Chicksiglaze is well-positioned to become a community favorite and a benchmark for modern Filipino food ventures.

Keywords: filipino cuisine, filipino fusion, locally inspired ingredients, chicksiglaze, modern filipino food

**A BUSINESS PLAN ON THE ESTABLISHMENT OF CUPZZA AT SWEET
HEAVEN SQUARE BAZAAR, COMMONWEALTH, QUEZON CITY**

Giovana Therese Duyapat, Erika Carmen Cebrano, John Ivan Bardillon, Edrian Lloyd Samonte,
John Lawrence Juab, Rod Lawrence Alfon, Rogielyn Pito, Jose Fernando Pallar,
Jomar Granadil, Eric John Condino, Rolando Atencio, Reynold Bangalisan

Abstract

This business plan explores the feasibility and potential profitability of establishing Cupzza, a unique food venture offering a pizza-cupcake hybrid, at Sweet Haven Square Bazaar in Commonwealth, Quezon City. Designed to cater to the snacking preferences of students, young professionals, and pedestrians in the area, Cupzza introduces a novel, crust-free, cheese-centered snack that aims to satisfy the cravings of pizza and cheese lovers seeking convenience, affordability, and bold flavor. The study employed a descriptive survey research design to assess market demand and consumer preferences. Data were collected from 100 individuals within the target demographic using structured questionnaires. In addition, financial projections, location analysis, competitive assessment, and pricing strategies were evaluated to determine the business's overall viability. Survey results revealed strong interest in Cupzza, with 80% of respondents expressing a desire to try the product. The preferred price range was ₱100–₱150 per box, with flavor and convenience identified as the primary purchase drivers. Sweet Haven Square Bazaar was affirmed as the ideal location due to its high foot traffic and proximity to schools, markets, and transit points. Financial analysis indicated a sustainable model, featuring a 40% markup on production costs, projected profitability within six months, and a minimal startup capital of ₱60,000. The business also incorporates eco-friendly practices through biodegradable packaging and community outreach initiatives under the “Cupzza Cares Day” program. Cupzza's appeal lies in its innovative concept, accessible pricing, strategic location, and a strong marketing plan that leverages social media. While competitive threats exist from both direct and indirect food businesses, Cupzza sets itself apart through its niche product and customer-centric approach. The business plan outlines robust management, production, and marketing frameworks to ensure operational efficiency and scalability. Potential challenges, such as maintaining product quality and controlling costs, are addressed through consistent staff training, internal monitoring, and effective supplier management.

Keywords: pizza-cupcake hybrid venture, innovative food businesses, marketing in business, cupzza

**A BUSINESS PLAN ON THE ESTABLISHMENT OF FIBURRITO
IN ATHERTON, NORTH FAIRVIEW, QUEZON CITY**

Jennylyn Mabuan, Adrian Supeña, Keith Louise Estandian, Renelen Cuadra, Clarissa Junio,
Noel Soberano, Percival Dereck Gutierrez, Jimwell Maliglig, Nathaniel Diocos,
Jomarie Balila, Vinalyn Sarzata

Abstract

The burrito is closely associated with the Mexican state of Chihuahua and plays a significant role in the evolution of Mexican-American food traditions in the United States. The term "burrito," which means "little donkey" in Spanish, is rooted in folklore. One popular theory suggests the name originated from the resemblance between the rolled tortillas and the bedrolls or packs carried by donkeys. FiBurrito, established in 2025, is a unique fusion food concept developed by a team of food enthusiasts passionate about blending the bold flavors of Filipino cuisine with the convenience of burritos. Located in Atherton, North Fairview, Quezon City, FiBurrito offers Filipino-inspired creations such as the Adobo Burrito, Sisig Burrito, and BBQ Burrito. It caters to young professionals, students, and families seeking quick, affordable, and flavor-packed meals. FiBurrito operates as a business partnership with four key roles: General Manager Jennylyn Mabuan, Marketing Manager Keith Louise Estandian, Financial Manager Clarissa Junio, and Production Manager Renelen Cuadra. Each manager plays a vital role in the business's success, overseeing operations, handling promotions, managing the budget, and conducting quality control. Customer service responsibilities include opening the restaurant, greeting and seating guests, taking orders, preparing meals, and gathering customer feedback to ensure a positive dining experience. FiBurrito operates under a structured organizational model, led by a general manager who oversees daily operations and ensures responsibilities are aligned with employees' skills to maintain an efficient workflow. The business performed exceptionally well during its first ten months, generating ₱1,926,000 in sales without any returns or discounts. After deducting the cost of goods sold and operating expenses, it achieved a strong net income of ₱371,320.13. Launched with an initial capital of just ₱52,000 on July 1, 2025, and without any additional investments, the owner was able to withdraw ₱357,000 and still close with ₱66,320.13 in capital by April 30, 2026. The initial investment was fully recovered within just two months. With a return on investment (ROI) of 714.08%, FiBurrito earned more than seven times its original capital based on first-year net income alone, demonstrating that the business is highly profitable and financially robust.

Keywords: mexican fusion, filipino cuisine, fiburrito, urban city eaters, creative food ideas

**A BUSINESS PLAN ON THE ESTABLISHMENT OF FILITALIA
IN KATUPARAN, COMMONWEALTH QUEZON CITY**

Redielyn Kate Palacpac, Bianca Mae Boiser, Karl Anjelo Evangelista, Sheela Mae Espuerta,
Janah Mae Manait, Maryjane Gamo, Juhnllinlle Ocba, Vernie Villanueva, Vinalyn Sarzata

Abstract

Filitalia is a distinctive fusion dish that combines the bold flavors of Filipino sisig with the richness of Italian pasta. Located on Katipunan Street in Commonwealth, Quezon City, we offer a flavorful and affordable dining experience ideal for students, professionals, and food enthusiasts. Featuring crispy pork pieces, a tangy zest, and just the right amount of spice, Filitalia reimagines traditional comfort food with a modern twist. Our mission is to serve authentic and inventive Filipino-Italian pasta creations, and our vision is to become a recognized name known for delivering tasty, high-quality, and innovative meals. The plan was developed through a comprehensive process that included feasibility studies, financial forecasting, product development, and market analysis. The team identified their target audience using demographic, geographic, and psychographic segmentation, and also conducted a competitive analysis. To assess the business's viability, financial documents such as cost analysis reports, pricing strategies, and ROI projections were prepared. Promotional strategies featured social media campaigns, a grand opening event, and a customer loyalty program. Operational planning focused on staffing, standard procedures, and store layout to ensure efficient workflows. With an initial capital of ₱50,000 shared among eight co-owners, Filitalia developed a well-structured organizational plan and a targeted marketing strategy to position itself as a unique food brand. The menu features three sisig pasta options: pork at ₱95, chicken at ₱90, and bangus at ₱85, each served with flavored sodas. Financial projections estimate a 29% return on investment within six months, supported by stable daily operations from 3:00 PM to 12:00 AM. A location assessment confirmed the business's strategic position near Iglesia ni Cristo and the Barangay Hall in Commonwealth, providing strong foot traffic and high visibility. Filitalia is a modern fusion dish that combines the rich, savory flavors of classic Filipino sisig with the creamy, comforting texture of pasta. This inventive pairing offers a unique dining experience that resonates with both local and international audiences. The seasoned, chopped pork in the sisig brings bold flavor and depth, while the pasta provides a mild, creamy base that balances the dish's intensity. Filitalia showcases the adaptability and creativity of Filipino cuisine, reflecting its ability to evolve with today's dynamic food trends.

Keywords: filipino fusion dish, filipino traditional comfort food, unique food, filitalia

**A BUSINESS PLAN ON THE ESTABLISHMENT OF GOLDEN GRAINS
DESSERTS IN DUMALAY, NOVALICHES, QUEZON CITY**

Riemar Jay Alpos, John Kayle Allanic, Jamaica Cabit, Roger Sebelina, Richard Manalo,
Sarah Jane Isidro, John Darl Shane Mosatalla, Marygrace Miraña, Jenny Pantaleon,
Marvin Villaruel, Vinalyn Sarzata

Abstract

Founded in 2025 in Fairview, Manila, Suman Matcha offers a modern twist on the traditional Filipino delicacy, suman. Featuring three exciting flavors, chocolate, ube, and matcha, this innovative dessert caters to the evolving tastes of today's generation. Priced affordably and available throughout the Philippines, it utilizes social media platforms such as Facebook, TikTok, Lazada, and Shopee for effective marketing and sales. The business plan for Golden Grains Dessert outlines a comprehensive strategy, including market segmentation based on demographics, location, and lifestyle. By targeting specific customer profiles such as students and young professionals near schools and marketplaces in General Luis City, Suman Matcha is well-positioned to meet local demand for unique dessert options. This targeted approach enhances visibility and increases foot traffic. A crucial component of the business model is its direct delivery method, which ensures food freshness while maintaining high hygiene standards. The operational strategy focuses on efficient inventory control and comprehensive employee training in both customer service and production procedures. These practices not only enhance product quality but also build strong customer loyalty. Golden Grains Dessert is well-positioned to make significant strides in the Philippine dessert market with its distinctive offering, flavored suman. Financial projections indicate a remarkable monthly return on investment of 1,781.55%, driven by innovative production techniques and strategic pricing. Cost-efficient production methods play a vital role in the financial success of Golden Grains Dessert. By utilizing modern techniques, the company optimizes production processes, minimizes waste, and significantly reduces costs. This operational efficiency enables Golden Grains to offer competitive prices while maintaining a healthy profit margin. The brand's pricing strategy is carefully crafted to appeal to both budget-conscious consumers and those willing to pay a premium for a unique dessert experience. This dual approach allows the company to capture a broader market share across diverse consumer segments. As the company navigates the evolving food landscape, Golden Grains Dessert holds immense potential to influence and transform Filipino eating habits. By staying attuned to consumer preferences and emerging market trends, the brand is poised to carve out a distinct niche in the flourishing dessert market, offering both exciting flavors and a refreshing twist on tradition.

Keywords: modern filipino food, food innovation, filipino delicacies, suman matcha

**A BUSINESS PLAN ON THE ESTABLISHMENT OF MOJOS SNAPS AT 32B DOÑA
ASUNCION STREET SAUYO ROAD, NOVALICHES, QUEZON CITY**

Clarisse Charity Oyando, Baby Ann Lumatap, Carl Joshua Arnosa, Sarah Marie Paulino,
Krisanta Nicole Estriber, John Christian Estrada, Kenneth Gallardo, Anshelyn Larioza,
Daniella Abrigo, Archel Pica, Reynold Bangalisan

Abstract

Mojos Snaps is an innovative business concept that blends health-conscious snacking with creative experiences. Located in Novaliches, Quezon City, the venture offers crispy, veggie-infused mojos paired with refreshing beverages and a distinctive instant photography service. Established in 2025, Mojos Snaps aims to serve students, professionals, and local residents looking for healthy, affordable, and engaging food experiences. The business plan utilized surveys and feasibility studies targeting 50 respondents from the local area. These assessments evaluated customer preferences in terms of flavor, packaging, and pricing to ensure alignment with market demand. Financial analyses identified optimal pricing strategies and projected profitability, while operational plans were designed to maximize efficiency within the compact 8.64-square-meter space. Legal compliance was ensured by adhering to all relevant regulatory requirements. Survey findings revealed that 74% of respondents preferred snack-and-drink combos, while 78% emphasized the importance of eco-friendly packaging. Financial projections supported a sustainable markup strategy ranging from 30% to 200% across products, balancing affordability with profitability. Mojos Snaps' innovative fusion of food and photography services sets it apart from competitors, with a strong focus on health-conscious, interactive dining experiences. Mojos Snaps successfully integrates healthy snacking with customer engagement, addressing key gaps in the local market. Its strengths lie in the use of fresh, vegetable-based ingredients, sustainable packaging, and an innovative service offering. While challenges such as space constraints and a limited initial menu exist, these are mitigated through strong marketing strategies and customer-centric approaches. The business shows strong potential for expansion, leveraging its distinctive appeal to build a loyal customer base. Future plans include introducing new flavors, opening additional locations, and enhancing accessibility through partnerships with delivery platforms. Mojos Snaps stands out as a promising venture, meeting the growing demand for health-focused and experiential dining. With strategic planning and responsiveness to market trends, it is well-positioned for long-term success and continued growth.

Keywords: health food, super food, veggie mojos, interactive dining, mojos snaps

A BUSINESS PLAN ON THE ESTABLISHMENT OF MUNCH MYSTIC AT SAMPAGUITA STREET MALIGAYA PARKLAND, BRGY. 177 CALOOCAN CITY

Jhes Sarabia, Lovely Azuelo, Reymil Bautista, Monina Belgica, Zerubbabel Bongcaras, Katrina Buraga, Shaira Ann De Veyra, Lilibeth Embodo, Ervin Mencede, Mery Cris Soccobos, Janeth Varrion, Reynold Bangalisan

Abstract

Munch Mystic proposes a snack-focused business at Sampaguita Street, Maligaya Parkland, Barangay 177, Caloocan City. This enterprise, managed by 11 co-owners, redefines traditional shawarma with potato-based pita bread and three unique fillings: chicken, beef, and mushroom. By prioritizing innovation, affordability, and eco-friendly practices, Munch Mystic aims to attract individuals, students, and professionals seeking convenient, high-quality snacks. To assess the feasibility of the venture, the study employed various methods including surveys to gather consumer preferences, interviews for expert insights, and SWOT analysis to evaluate internal and external factors. With a strong focus on creativity, affordability, and environmentally conscious practices, Munch Mystic targets individuals, students, and professionals in search of quick, satisfying, and high-quality snack options. Financial projections indicate a monthly return on investment (ROI) of 22.37%, supported by cost-efficient production and a competitive pricing strategy. Munch Mystic's innovative use of potato-based pita bread serves as a unique selling proposition, setting it apart from direct competitors such as bakeries and milk tea shops. Its strategic location near schools and marketplaces enhances visibility and foot traffic, further strengthened by active social media engagement. Munch Mystic's core strength lies in its ability to offer innovative, affordable snacks while addressing environmental concerns through the use of sustainable packaging. Challenges include managing the complexities of a general partnership structure and maintaining operational consistency. Future growth opportunities involve expanding the menu, offering event catering services, and utilizing digital sales platforms. By consistently adapting to consumer preferences and upholding its commitment to quality and innovation, Munch Mystic aims to establish itself as a leading local snack provider.

Keywords: traditional shawarma, eco-friendly business, potato-based pita bread, munch mystic

**A BUSINESS PLAN ON THE ESTABLISHMENT OF PINTA KAPE AT 108
SAN AGUSTIN, SUSANO ROAD, NOVALICHES, QUEZON CITY**

Jherom Honrado, Abegail Marbella, Allia Clemente, Sarah Alfeche, Meg Meg Candole,
John Lloyd Albao, Jensie Donal, Mienard Martinez, Carl Philip Romasanta,
Adrian Sabare, Vinalyn Sarzata

Abstract

Pinta Kape offers a relaxing and creative café experience by combining healthy, flavorful iced coffee lattes made with real fruits and our signature caffeine-free roasted corn coffee. More than just a café, we provide a unique artistic atmosphere with live and commissioned sketching, portraits, henna tattoos, and painting services. Every visit is not only about enjoying our refreshing drinks but also about immersing yourself in a personalized, heartwarming, and inspiring environment. Pinta Kape offers a delightful selection of iced coffee lattes, including Sweet Corn, Banana, Watermelon, and Strawberry flavors, each crafted from real ground fruits and caffeine-free roasted corn coffee beans. Beyond its flavorful beverages, Pinta Kape provides a unique and relaxing space where customers can unwind with locally sourced drinks while engaging in art jamming activities. Artistic services include sketching, portrait drawing, glass painting, and henna tattoos, making every visit a memorable and creative experience. Based on Pinta Kape's income statement, net sales increased from ₱1,327,440.00 in 2026 to ₱1,657,607.26 in 2030, reflecting a consistent upward trend in revenue. After accounting for all expenses, the business also demonstrated a clear increase in net income over the five-year period. According to the Statement of Changes in Owner's Equity, the initial capital on July 1, 2025, was ₱50,000.00. This capital grew annually through retained earnings, reaching a final balance of ₱292,198.40 by April 30, 2030. Notably, net income rose from ₱302,198.40 in 2026 to ₱366,099.17 in 2030, with total withdrawals amounting to ₱60,000.00 and no additional capital investments made during the period. The Return on Investment (ROI) for Pinta Kape, based on an initial investment of ₱50,000.00 and cumulative net income of ₱377,748.00, is calculated at an impressive 755.50%. Pinta Kape is operated by a dedicated team of individuals working collaboratively to deliver an exceptional café experience. The General Manager is Ms. Abegail B. Marbella, with Ms. Meg Meg T. Candole serving as Assistant Manager. Financial operations are overseen by Ms. Allia A. Clemente, while Mr. Jherom B. Honrado takes on the dual role of Production Manager and in-house Artist. The café's front-line team includes Cashiers Ms. Sarah B. Alfeche and Mr. Jensie Y. Donal. Our team of skilled Baristas consists of Mr. John Lloyd Albao, Mr. Adrian M. Sabare, Mr. Mienard A. Martinez, and Mr. Carl Philip P. Romasanta.

Keywords: caffeine-free roasted corn coffee, cafe business, creative cafe, healthy coffee, chill cafe, locally sourced ingredients

**A BUSINESS PLAN ON THE ESTABLISHMENT OF PIZZANADA IN
29 QUIRINO HIGHWAY, NOVALICHES, QUEZON CITY**

Jennywen Palomo, Nicolie Mae Vallega, Coebi Alberio, Deaserie Edubos, Juby Ann Dalupan,
Anna Marie Reales, Jeisel Faith Morandarte, Jhoross Carl Cruz, Melvin Jericko Cabatingan,
Bianca Marie Pontilla, Daryl Den Rontas, Reynold Bangalisan

Abstract

This business plan presents the establishment of Pizzanada, an innovative food venture located at 29 Quirino Highway, Novaliches, Quezon City. The business introduces a unique product that merges two popular favorites, pizza and empanada, by offering pizza-inspired fillings wrapped in malunggay-infused empanada dough. Aimed at students, professionals, and local residents, Pizzanada addresses the growing demand for affordable, convenient, and flavorful snacks. This business plan was developed through comprehensive methods including market research, financial forecasting, product testing, and SWOT analysis. To identify the target market, demographic, psychographic, geographic, and behavioral segmentation were applied. Surveys and product sensory evaluations were conducted to assess consumer appeal and preferences. Financial viability was analyzed through detailed income statements, cost assessments, and return on investment (ROI) projections. The marketing strategy focuses on direct selling and digital promotions, primarily through social media platforms such as Facebook and TikTok. Pizzanada offers a variety of flavors, including Cheesy Ham, Cheesy Mushroom, Cheesy Bacon, and Hawaiian, priced between ₱32 and ₱36. These savory options are complemented by refreshing beverages such as Iced Lemon Tea and Cucumber Bliss Tea. With a starting capital of ₱55,000, the business is structured as a general partnership among 11 members. Financial projections indicate that the return on investment (ROI) can be achieved by the eighth month of operation. A cost-plus pricing strategy is employed to ensure profitability while maintaining affordability. All necessary legal requirements, including business permits and licenses, have been secured. The business's strategic location near schools and commercial centers provides high foot traffic and excellent visibility. Pizzanada combines culinary creativity with health consciousness by incorporating malunggay into its empanada dough, appealing to health-aware consumers. Its affordability and innovative concept provide a competitive edge in a saturated snack market. The business also fosters customer loyalty through discounts and referral incentives. Overall, Pizzanada is well-positioned for sustainability and growth by offering a fresh twist on traditional snacks, supported by strong branding, a strategic location, and effective marketing strategies.

Keywords: innovative food, malunggay-infused empanada, pizzanada, healthy dough, healthy food

**A BUSINESS PLAN ON THE ESTABLISHMENT OF SCRUNCHOS AT
QUE GRANDE STREET BRGY. UGONG, VALENZUELA CITY**

Kyle Stephen Dela Cruz, Edeson Isayas, James Legria, Jenefer Lopez, Rafael Moboayaen,
Jezrah Irie Ordeniza, Edmarei Soriano, Reynold Bangalisan

Abstract

Scrunchos is a unique snack venture located on Que Grande Street, Barangay Ugong, Valenzuela City. Founded by 11 partners, the business transforms chicken skin, a poultry by-product, into indulgent and innovative snacks, including chicken skin nachos and chips. Rooted in sustainability and customer satisfaction, Scrunchos offers eco-friendly, affordable, and flavorful treats that cater to evolving consumer tastes while promoting responsible and sustainable consumption. The Scrunchos business model integrates market research, financial analysis, and strategic planning to ensure long-term viability. Key methods include demographic, geographic, and psychographic market segmentation, allowing the business to effectively target students, working professionals, and local residents. Operational plans focus on sustainable sourcing and efficient production processes. Marketing strategies leverage social media platforms, loyalty programs, and direct customer engagement to boost visibility and foster brand loyalty. Financial projections affirm the viability of Scrunchos, with cost-efficient production enabling both affordability and profitability. A markup pricing strategy is employed to balance operational costs with customer value, with product prices ranging from ₱65 to ₱85. The business's strategic location ensures accessibility to a diverse customer base. Scrunchos' distinctive product offerings and commitment to sustainability set it apart from competitors, supporting strong initial market adoption and long-term customer loyalty. Scrunchos demonstrates strong potential to redefine the snack food market by addressing unmet consumer needs for indulgent yet environmentally responsible products. Key challenges include scaling operations and maintaining consistent product quality. However, growth opportunities lie in expanding the product line, leveraging e-commerce channels, and exploring additional locations. By fostering innovation, upholding high-quality standards, and prioritizing customer satisfaction, Scrunchos aims to establish itself as a leading brand in the competitive snack industry.

Keywords: unique snacks, sustainable snacks, eco-friendly treats, scrunchos

**A BUSINESS PLAN ON THE ESTABLISHMENT OF TOFU GLAZED IN
SARANAY ROAD, BARANGAY 171, CALOOCAN CITY**

Lorielane Ann Palacpac, Morelia Joy Torres, Cristine Mae Torres, Michelle Balanon,
Ronaldyn Robenacio, Juliet Daker, Leizel Hontiveros, Jenie Anne Kaye Portillo,
Ciara Lyn Plaza, Ma Andrea Latap, Lester Punzalan, Reynold Bangalisan

Abstract

Tofu Glazed is a plant-based food business located on Saranay Road, Barangay 171, Caloocan City, offering affordable and flavorful tofu dishes tailored to students, professionals, and health-conscious individuals. In response to the growing demand for healthier food options, the business aims to redefine tofu as a delicious everyday choice through its unique glazes, including Salted Egg, Garlic Parmesan, and Spiced Honey. Guided by its mission to promote nutritious yet affordable meals, Tofu Glazed envisions becoming a top-tier brand in the plant-based food industry. The business plan was developed through a comprehensive approach that included a feasibility study, financial forecasting, product development, and market analysis. Demographic, geographic, and psychographic segmentation were applied to clearly define the target audience. A competitive analysis was conducted to assess both direct and indirect competitors. Financial statements, including cost analysis, a cost-plus pricing strategy, and return on investment calculations, were created to evaluate business viability. Promotional strategies include social media campaigns, grand opening events, and a customer loyalty program. Operational planning covers staffing roles, workflow procedures, and layout design to ensure efficiency in daily operations. With an initial capital of ₱50,000 contributed by eleven co-owners, Tofu Glazed developed a structured organizational plan and a targeted marketing strategy to position itself as a niche plant-based food brand. The menu features three tofu dish variants priced at ₱55 each, complemented by flavored sodas and optional rice add-ons. Financial projections indicate a 75% return on investment within six months, supported by sustainable daily operations from 10:00 AM to 7:00 PM. A location analysis confirmed the business's strategic placement near SM Caloocan and the University of Caloocan City, ensuring high foot traffic and strong visibility. Tofu Glazed fills a market gap by offering flavorful, affordable, and healthy meals tailored especially for plant-based consumers. Its strategic pricing, unique menu, and strong social media presence provide a competitive edge over traditional meat-based and snack-oriented food businesses. With accessible offerings, sustainable practices, and a commitment to community engagement, the business is well-positioned for steady growth in the fast-evolving food industry.

Keywords: plant-based food, tofu dishes, healthy food, tofu glazed, sustainable food practices

**A BUSINESS PLAN ON THE ESTABLISHMENT OF TUYO ESSICATO IN
1274 RIVERSIDE ST. BRGY. COMMONWEALTH QUEZON CITY**

Lady Dianne Revilla, Daisery Bantayan, Mary Joy Cordon, Romeo Declines, Clark Lois Fernando,
Fatima Merdegia, Mark Palaroan, Christine Mae Pasagui, Karl Jeffrey Patungan,
Nicson Torres, Vinalyn Sarzata

Abstract

Tuyo Essicato is a healthy and delicious gourmet tuyo product that serves as the flagship offering of the business. Developed in 2024, it is crafted to meet the evolving preferences of the Filipino market, renowned for its adventurous palate and openness to innovative cuisine. With a shelf life of up to two years, the product offers both exceptional flavor and long-term storage. Its distinctiveness and originality enable Tuyo Essicato to stand out in the local food industry, paving the way for clear business direction and strategic growth. Tuyo Essicato operates at 1274 Riverside Street, Barangay Commonwealth, Quezon City, and is structured as a general partnership, with co-owners equally sharing responsibilities, profits, and liabilities. One of its featured offerings is Penne Con Pesce, a flavorful pasta dish priced affordably at ₱77.00. The initial capital of ₱50,000 was strategically allocated to key areas such as procuring raw ingredients, purchasing cooking equipment, acquiring packaging supplies, and executing marketing efforts. The pricing model was designed to strike a balance between customer affordability and sustainable profit margins. To ensure product freshness and consistent supply, raw materials are replenished every three days. According to financial projections, Tuyo Essicato is expected to generate monthly revenue of ₱137,157. With an estimated cost of goods sold (COGS) of ₱61,009, this results in a monthly gross profit of ₱76,148. After accounting for operating expenses, the projected monthly net income is ₱42,234, translating to an annual net profit of ₱506,807. By the end of its first year, the business anticipates reaching an owners' equity of ₱404,765, yielding an impressive Return on Investment (ROI) of 1,014%. These results indicate strong financial performance and underscore the business's potential for rapid growth and long-term sustainability. The high ROI reflects effective management of initial capital and operational efficiency. The unique concept of gourmet tuyo paired with affordable pasta options resonates with the local market, enabling the business to attract and retain customers. Additionally, the general partnership structure fosters shared accountability and collaborative decision-making among the owners.

**A BUSINESS PLAN ON THE ESTABLISHMENT OF ULUMPIA
IN 170 SUSANO ROAD, CALOOCAN CITY**

John Lloyd Amador, Geomel Dalire, James Kerck Balanquit, Aldrene Amante,
Micheal Franz Villanueva, Evangeline Dasig, Charme Laine Benavente,
Angelene Adan, Jerome Lagana

Abstract

ULumpia is a Filipino dish featuring savory fillings wrapped in thin dough and fried to a crisp. While often likened to spring rolls or egg rolls, it boasts a unique flavor profile and preparation method that set it apart. The business name, ULumpia, combines the words ulam (a Filipino term for main dish) and lumpia, highlighting its commitment to delivering a consistently delightful culinary experience. Conveniently located near Susano Road and Bestlink College of the Philippines, ULumpia is easily accessible by both bus and jeepney. ULumpia also offers catering services for events such as birthdays, corporate gatherings, and parties, providing large quantities of its signature dish. Daily operations are managed by a dedicated team that includes the General Manager, Production Leader, Cashier, Assembler, Dispatcher, Delivery Personnel, Stockman, and Cook. The Production Leader plays a key role in ensuring smooth workflow and adjusting staffing as needed. Each team member handles their responsibilities efficiently within the store. One staff member is assigned to cooking, two focus on serving orders, and the remaining two manage the materials used to prepare lumpia. Customers can place orders directly at the store, through mobile apps, or via Facebook. Free delivery is available for customers located near the store. ULumpia is a general partnership composed of nine members, each contributing ₱6,000, for a total capital of ₱54,000. Financial projections indicate that ULumpia incurs a monthly cost of goods sold (COGS) amounting to ₱28,170.48, with monthly sales reaching ₱52,344. This results in a gross profit of ₱24,173.52 per month.

Keywords: filipino dish, lumpia, filipino spring rolls, ulumpia

**A BUSINESS PLAN PREPARATION ON ESTABLISHMENT OF LETTUCE GO
SNACK AT DUMALAY STREET, BRGY. NOVALICHES, QUEZON CITY**

Khem Verly Barioga, Marie Shine Bacares, Angela Elisaga, Jenny Maquiling, Bebylyn Robenacio,
Chelsea Rea Andrade, Juliana Mharie Cruz, Niña Gernale, Joyce Pandero,
Franz Christian Serrano, Vinalyn Sarzata

Abstract

Lettuce Go Snacks introduces an innovative snack concept that reimagines the way people enjoy vegetables. By using lettuce as the primary ingredient, the brand offers a unique alternative to traditional chips, delivering bold flavor and satisfying crunch without compromise. Available in exciting flavors such as Cheese, Sour Cream, Garlic Parmesan, Chili Barbecue, and Smoky Barbecue, the product caters to a wide range of taste preferences. Packaged in resealable zip-lock pouches, Lettuce Go Snacks is designed for convenience and enjoyment, whether at home or on the go. The business is located on Dumalay Street in Barangay Novaliches, Quezon City, and is structured as a general partnership formed by ten student entrepreneurs. The production process at Lettuce Go Snacks prioritizes quality and consistency. Fresh lettuce is thoroughly cleaned, seasoned with carefully selected spices, and deep-fried to achieve a crispy texture. The team adheres strictly to cleanliness standards and ensures consistent flavor in every batch. The operations team oversees all aspects of the business, from ingredient sourcing and logistics to customer service. Products are sold through pop-up booths, direct orders, and online platforms. The business was launched with an initial capital of ₱55,000, which covered product development, marketing, packaging, and distribution. Team members rotate between two shifts and are assigned specific roles across marketing, production, finance, and daily operations. Lettuce Go Snacks has received a positive response from customers, who praised its innovative concept, addictive quality, and wide range of flavors. Priced at ₱75.00 per pouch, the product remains accessible to students, professionals, and families alike. Financial projections indicate a promising 2,083% return on investment within the first ten months, reflecting strong market potential and profitability. The team effectively allocated their initial capital to cover essential startup costs and successfully implement marketing campaigns. Lettuce Go Snacks has successfully carved out a niche in the local market by combining a health-conscious concept with great taste and affordability. With continued product development, strategic marketing, and efficient operations, the business demonstrates strong potential for expansion and sustained success.

**ACCEPTABILITY OF CAULIFLOWER FRIED BALLS WITH SHRIMP FLAVOR AMONG
HOME ECONOMICS STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Jericson Andino, Aaron Franz Faustino, Ricka De Rianne Gomez,
Joshua Gregorio, Prince Jael Norado, Analyn Brosas

Abstract

Cauliflower, a member of the cabbage family originating in the Mediterranean region, offers a nutrient-dense, low-calorie alternative for grain-based dishes and is valued for its high vitamin C and fiber content. This study examines the acceptability of a novel snack, cauliflower fried balls with shrimp flavor, among Grade 11 and 12 Home Economics students at Bestlink College of the Philippines. Ingredients such as potatoes and carrots enhance nutritional value and flavor diversity, with carrots contributing beta-carotene, fiber, and antioxidants. Assessing taste, texture, and appearance preferences helps determine the product's potential for wider adoption. A descriptive correlational design is employed to evaluate sensory acceptability of the cauliflower shrimp balls. Seventy-one Grade 11 and 12 Home Economics students are selected through simple random sampling to complete a structured questionnaire rating sweetness, bitterness, and saltiness under taste; softness, crunchiness, and chewiness under texture; and freshness, uniqueness, and shape under appearance. Quantitative analysis of the survey responses determines overall acceptability levels. Most respondents were aged 17 to 18 (63 percent) and male (37 percent), with the largest representation from section HECF1201 (27 percent). Taste ratings were acceptable for sweetness, bitterness, and saltiness. Texture attributes like softness, crunchiness, and chewiness also received acceptable ratings. Appearance metrics freshness, uniqueness, and circularity were rated very acceptable. Suggestions for product improvement included reducing hardness, increasing crunchiness and sweetness, adding more cauliflower, and adjusting saltiness for balanced flavor. The findings indicated that cauliflower fried balls with shrimp flavor achieved high acceptability across sensory attributes, supporting their viability as a nutritious snack for Home Economics students. Feedback on texture and flavor balance guided formulation refinements to enhance customer satisfaction. These results demonstrated the importance of iterative sensory testing in product development and suggested that similar vegetable-based snacks could be successfully introduced into school food programs.

**ACCEPTABILITY OF KALABASA BROWNIES AMONG HOME ECONOMICS
STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Ronald Ryan Maputi, Rolan Jabez Martos, Emanuel Cacayuran, Francis Dave Bangga,
Ma Joana Rose Quipe, Analyn Brosas

Abstract

Increasing health concerns have led consumers to seek desserts that combine indulgence with nutritional benefits. Kalabasa, a nutrient-rich squash high in vitamins and fiber, offers a wholesome alternative to traditional brownie ingredients. This study examines the acceptability of kalabasa brownies among Grade 11 and 12 Home Economics students at Bestlink College of the Philippines by evaluating sensory attributes such as taste, texture, and appearance and gauging overall preference. A quantitative descriptive design is employed, using a structured questionnaire to collect data from 71 Home Economics students selected through simple random sampling. Participants rate taste attributes (sweetness, bitterness, bittersweet), texture attributes (softness, fudginess, chewiness) and appearance attributes (uniqueness, appeal, freshness) on a four-point Likert scale. Weighted mean scores are calculated for each attribute to determine levels of acceptability. Respondents were predominantly 17 to 18 years old and female, with most drawn from sections HECF 1203 and HEHO 1201. The brownies' sweetness received the highest weighted mean, while bitterness and bittersweet notes were deemed acceptable. Texture ratings indicated that softness was most acceptable, followed by fudginess, with chewiness rated lowest. In terms of appearance, uniqueness scored highest, and both appeal and freshness were rated "very much acceptable." The findings indicated that kalabasa brownies achieved strong acceptability across sensory dimensions. High ratings for sweetness, softness and unique appearance demonstrated the product's viability as a healthier dessert alternative. Respondents recommended increasing the kalabasa content and enhancing sweetness to further improve the brownies. These insights can guide formulation adjustments and support the development of nutrient-enhanced baked goods in academic and commercial settings.

Keywords: kalabasa brownies, sensory acceptability, health-forward desserts, home economics students, descriptive study

**ACCEPTANCE OF BANANA-OATS COATED IN WHITE CHOCOLATE BASED AMONG
(H.E.) HOME ECONOMICS STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Maria Nicole Roque, Kyla Marie Barajan, Irish Nicole Mapa,
Joshua Laranang, Raven Cianne Pato, Analyn Brosas

Abstract

Balanced nutritional health has driven demand for convenient, nutrient-dense snacks. The banana-oats bite coated in white chocolate merges fruit, whole grains, and indulgence to meet this need. By combining banana's natural sweetness and oats' fiber content with a white chocolate coating, the product aims to satisfy busy consumers seeking health-aware alternatives. This study evaluates the acceptability of this snack among Grade 11 and 12 Home Economics students at Bestlink College of the Philippines to inform future product development. A descriptive quantitative design is employed to assess sensory acceptability. Seventy-one Grade 11 and 12 Home Economics students are selected via simple random sampling. Participants complete a structured questionnaire rating taste attributes (sweetness, saltiness, bitterness), texture attributes (softness, crunchiness, chewiness), and appearance attributes (freshness, uniqueness, cleanliness) on a four-point Likert scale. Mean scores determine levels of agreement and overall acceptance. Respondents were predominantly 17 to 18 years old, and 58 percent were male, with most from Section HECF 1201. Taste evaluations were positive, with agreement on sweetness, saltiness, and bitterness. Texture ratings were strong, with high scores for softness, crunchiness, and chewiness. Appearance attributes, freshness, uniqueness, and cleanliness, also received strong agreement. Recommended improvements included adjusting sweetness, increasing banana and oats content, and enhancing creaminess. The findings indicated strong acceptability of the banana-oats bites coated in white chocolate across sensory dimensions. High ratings for texture and appearance suggested the product's potential as a satisfying, health-oriented snack. Recommendations for sweetness and ingredient adjustments will guide iterative formulation. These results support further exploration of fruit-grain combinations in snack development and suggest that similar products could gain traction among health-conscious youth.

Keywords: banana-oats bites, white chocolate coating, sensory acceptability, nutrient-dense snacks, home economics students

**ACCEPTANCE OF CARROT POLVORON AMONG HOME ECONOMICS STUDENTS AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Ryza Lorrain Canillo, Justine Cristobal, Athina Irish Manuel, Arabella Grace Bucu,
Jenyrose Espinola, Analyn Brosas

Abstract

Carrot polvoron combines the nutrient-rich qualities of carrots originally cultivated in Central Asia with the traditional Spanish-influenced shortbread known as polvoron. Carrots provide beta-carotene, which the body converts to vitamin A for vision, immunity, and skin health, making this dessert a health-aware alternative. This study examines the acceptability of carrot polvoron among Grade 11 and 12 Home Economics students at Bestlink College of the Philippines by evaluating sensory attributes, including taste, texture, and appearance. A descriptive quantitative design is employed to measure acceptance levels via a structured questionnaire. Seventy-one Home Economics students in Grades 11 and 12 are selected through simple random sampling. Participants rate taste attributes (sweetness, saltiness, bitterness), texture attributes (softness, chewiness, crunchiness), and appearance attributes (uniqueness, appeal, overall attractiveness) on a four-point scale. Weighted mean scores are calculated to determine acceptability across sensory dimensions. Respondents, predominantly 17 to 18 years old and male, with most from sections HECF 1201, HEHO 1201 and HRS 1201, rated carrot polvoron highest for sweetness, while saltiness and bitterness were only partially acceptable. Texture ratings showed softness as the most acceptable attribute, followed by chewiness and then crunchiness. Appearance evaluations indicated strong agreement that the polvoron looked unique, appealing, and “very much acceptable.” Suggestions for improvement included increasing powdered milk content and enhancing the carrot flavor. The findings indicated that carrot polvoron achieved high acceptability for taste, texture, and appearance among Home Economics students. Strong ratings for sweetness, softness, and unique appearance supported its potential as a nutritious dessert alternative. Recommendations to adjust the formulation, adding more milk powder and accentuating carrot flavor, will guide product refinement. These results support the development of health-forward snacks that align with student preferences and nutritional goals.

Keywords: carrot polvoron, sensory acceptability, home economics students, nutrient-rich dessert, descriptive study

ACCEPTANCE OF INNOVATING SUSHI INTO SWEET SUSHI ROLLS AMONG GRADE 11 AND 12 HE STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES

Gabriel Delfin, Jhon Cedrick Dolom, Ryan James Bloron, Mirasol Destor,
Cristal Jane Camacho, Analyn Brosas

Abstract

Sushi, a staple of Japanese cuisine, features vinegared rice paired with vegetables, egg, or seafood and is traditionally served cold (Britannica, 2025). Desserts, by contrast, emphasize sweetness. Innovating sushi into a dessert format requires blending the familiar textures of sushi rice with sweet elements. This study explores the acceptability of sweet sushi rolls, fruit-filled rice rolls, among Grade 11 and 12 Home Economics students at Bestlink College of the Philippines, aiming to evaluate whether the fusion of sushi textures and dessert flavors appeals to this demographic. A descriptive quantitative design is employed to assess sensory acceptability through a structured questionnaire. Seventy-one Grade 11 and 12 Home Economics students are selected via simple random sampling. Participants rate taste attributes (sweetness, blandness, sourness), texture attributes (softness, stickiness, chewiness), and appearance attributes (presentability, appeal, vibrancy) on a four-point Likert scale. Weighted mean scores are calculated to determine levels of acceptability. Respondents, predominantly 16 to 17 years old and female, with most from sections HECF 1201, HECF 1202 and HECF 1203, rated sweetness the highest, while blandness and sourness were only partially acceptable. Texture evaluations showed softness as the most favorable attribute, followed by moderate stickiness, with chewiness rated lowest. Appearance ratings indicated that the sweet sushi rolls were perceived as highly presentable, appealing, and vibrant, all achieving “very much acceptable” interpretations. Recommendations included increasing fruit fillings and balancing sweetness. The findings indicated strong acceptability of sweet sushi rolls, driven by sweetness, softness, and striking presentation. High sensory scores supported the product’s potential as an innovative dessert option. Recommendations to enhance fruit content and adjust sweetness will guide future formulation. These insights demonstrate that sushi-inspired desserts can resonate with young consumers and inform the development of novel fusion snacks in culinary education and industry settings.

Keywords: sweet sushi rolls, sensory acceptability, fusion dessert, home economics students, descriptive study

**AI POWERED TOOLS FOR EFFICIENT DOCUMENT PROCESSING
ON SELECTED OFFICES: AN ASSESSMENT**

Mica Ponteres, Jessica Arquero, Gladness Bacos, Lucky Maria Fabros, Joshua Tuan, Bryan Tubao

Abstract

Office administration has been transformed by the rapid advancement of artificial intelligence. This study assesses the impact of AI-powered tools on the efficiency of document processing in selected offices. It examines how these technologies influence workflow speed, automation of repetitive tasks, search and retrieval accuracy, and content modification capabilities. A quantitative correlational design is employed, surveying personnel from Zectra Enterprise and Brahms Global Tech Inc. Twenty respondents are selected through purposive sampling. A structured questionnaire uses a Likert scale to measure perceptions of AI tool effectiveness. Data are analyzed using frequency distributions and weighted mean calculations to determine overall impact on document processing efficiency. Respondents reported that AI-powered tools significantly enhanced document processing efficiency. Automation of repetitive tasks received the highest effectiveness ratings, followed by improvements in search and retrieval accuracy and faster workflow procedures. However, some challenges emerged, including occasional retrieval failures and difficulties integrating AI tools with existing systems. The findings indicated that AI-powered tools have strong potential to improve operational efficiency in document management, but successful adoption depended on addressing integration issues and providing comprehensive user training. As a result, organizations were advised to implement structured training programs and ensure seamless system integration to fully leverage AI benefits.

Keywords: ai tools, document processing, workflow efficiency, automation, search and retrieval

ANALYSIS ON CUSTOMER COMPLAINTS RESOLUTION SYSTEM IN CASUAL DINING BUSINESS TOWARDS SERVICE IMPROVEMENT

Jan Alex Paringit, Rina Flor, Klein Inna Yulo, Micky Albina, Dr. Dana France Ignacio

Abstract

This study evaluates the effectiveness of the customer complaint resolution system employed by Chowking, a well-known casual dining restaurant. It investigates the existing procedures for addressing customer concerns, with a focus on response time, communication channels, and resolution strategies. Data was collected through customer surveys, staff interviews, and a review of company feedback records. Results show that while Chowking generally upholds a responsive and customer-focused approach, improvements are needed, particularly in reducing response time and enhancing staff training to manage complaints with empathy and professionalism. The findings suggest that refining the complaint management process and implementing proactive strategies could significantly enhance customer satisfaction and promote long-term loyalty. This research offers meaningful insights for casual dining establishments seeking to improve their customer service systems and strengthen customer relationships. This study examines the effectiveness of customer complaint resolution systems in the casual dining industry, focusing on their impact on service improvement. A mixed-methods approach was utilized, combining quantitative and qualitative analyses. Descriptive statistics identified common complaint types, while correlation and regression analyses explored the relationship between complaints and service enhancements, as well as key factors affecting customer satisfaction. Qualitative methods, including thematic and content analysis, revealed recurring issues and insights from customer feedback, supported by case studies of specific complaint scenarios. Service improvement tools such as root cause analysis, service blueprinting, employee training, and customer feedback loops were integrated into the evaluation. Data was collected through surveys, complaint log reviews, social media monitoring, and interviews with customers and staff. The findings offer a comprehensive view of how effective complaint management contributes to service quality and highlight strategic areas for improvement in the casual dining sector. The evaluation of Chowking's customer complaints resolution system revealed meaningful insights into its operational strengths and areas requiring improvement. Overall, the findings suggest that Chowking maintains a customer-centric approach, showing a clear dedication to resolving concerns promptly and professionally. This study found that Chowking's customer complaint resolution system reflects a generally proactive and customer-centered approach. Most respondents reported satisfactory experiences, citing timely responses and courteous staff as notable strengths. These findings underscore Chowking's commitment to service quality and customer satisfaction. However, challenges remain, particularly in reducing response times and improving staff training in empathy and conflict resolution. Despite having multiple reporting channels such as feedback forms, hotlines, and social media, delays and inconsistencies in complaint handling across branches were frequently reported. These issues highlight the need for standardized procedures and continuous staff development. Quantitative analysis revealed a moderate positive correlation between effective complaint resolution and overall customer satisfaction, emphasizing the value of swift and empathetic responses. Qualitative feedback further indicated that customers value transparency, sincerity, and follow-up actions beyond mere problem resolution. The study also points to the potential of integrating technology, such as AI-driven feedback tracking and automated responses, to improve efficiency and consistency while preserving a human touch.

In conclusion, while Chowking's current system provides a strong foundation, ongoing improvements in responsiveness, staff training, and technological integration are essential to strengthen customer trust

and loyalty. These insights may also benefit other casual dining establishments aiming to enhance complaint management practices.

Keywords: customer complaints, complaint resolution system, chowking, service improvement, customer satisfaction, casual dining, response time, employee training, feedback mechanisms, customer loyalty

**ASSESSING OF CONTROL SECURITY POLICIES ON DATA PROTECTION IN
ACCOUNTING INFORMATION SYSTEM IN QUEZON CITY**

Angel Angot, Lorenz Lacdang, Kyla Nicole Ladera, Christine Fernandez,
Angelica Mae Macarandang, Analyn Magalso

Abstract

This study evaluates the effectiveness of control security policies in protecting data within Accounting Information Systems (AIS) used by government institutions in Quezon City. As digital systems become integral to financial operations, the need to ensure data security, integrity, and confidentiality has become increasingly important. The research examines how security policies, system protection measures, technological tools, and data management practices contribute to safeguarding financial information. It also identifies key challenges in the implementation of these policies and offers recommendations to strengthen cybersecurity measures in AIS environments. This study adopted a quantitative research design to examine the effectiveness of control security policies in safeguarding data within Accounting Information Systems (AIS). A total of 50 participants from the Commission on Elections (COMELEC) in Quezon City, including accountants, IT staff, auditors, and treasurers, were selected through convenience sampling, given their direct involvement in AIS operations. Data collection was conducted using a validated survey questionnaire, which captured both demographic information and evaluations of cybersecurity practices. The organization maintains solid technical and procedural security measures, enhancing policy enforcement, strengthening access controls, improving staff training, and developing a more comprehensive incident response plan are essential to fully optimize data protection within the Accounting Information System (AIS). The study revealed that the majority of respondents, primarily young professionals aged 22–26, demonstrated a strong awareness of and positive attitudes toward control security policies, reflecting a solid baseline in digital literacy and cybersecurity practices. Survey findings showed that respondents generally agreed their organization had effective security controls, consistent system protection measures, secure technological infrastructure, and reliable data protection strategies. However, slightly lower ratings in areas such as policy enforcement, clearly defined user access rights, and incident response planning indicate the need for targeted improvements in these aspects.

Keywords: control security policies, accounting information systems (ais), data protection, cybersecurity, policy enforcement, access controls, incident response, digital literacy, government institutions, quezon city

**ASSESSING PATIENT SATISFACTION WITH DENTAL OPERATION AT BARANGAY
178 HEALTH CENTER: IMPLICATION FOR SERVICE IMPROVEMENT**

Mary Grace Danao, Enjell Betito, Erica Dela Marquez, Pamela Gapol,
Glydel Marie Casim, Bryan Tubao

Abstract

Patient satisfaction is essential to the success and continuous improvement of healthcare services. Satisfied patients are more likely to return for future care and recommend the facility to others. This study evaluates whether the dental services provided at Barangay 178 Health Center effectively meet the expectations and needs of the local community, highlighting areas for improvement and service enhancement. Patient satisfaction is crucial for the success and ongoing improvement of healthcare services. When patients are satisfied, they are more likely to seek future care and recommend the facility to others. This study assesses whether the dental services offered at Barangay 178 Health Center effectively meet the expectations and needs of the local community, focusing on areas for improvement and opportunities for enhancing services. The study used the Quantitative Descriptive Research Design to measure patient satisfaction with dental operation. A total of 40 respondents from Barangay 178 Health Center were selected through purposive sampling as they had direct experience with dental operation provided by the health center, making them highly relevant and suitable for the research. The data collection was done through survey questionnaires designed to gather specific details on patients' satisfaction administered through face-to-face interaction. The results indicated that the majority of respondents were aged 24 to 34, female, and single. Most individuals visited the dental clinic once a year, while fewer went every six months or every three months. Respondents strongly agreed on the effectiveness of infection control, although some aspects showed minor room for improvement. Accessibility and availability received high ratings, but certain areas had lower satisfaction levels. Financial management was generally considered effective, with a few recommendations aimed at enhancing patient comfort during treatment. Respondents also agreed on the speed and responsiveness of dental services. The attitude, professionalism, and work ethic of the dental personnel were rated positively, while productivity was viewed as satisfactory but could benefit from slight improvements. The primary challenge affecting patient satisfaction was related to service delivery issues, such as waiting times and limited resources. The researchers recommend that Barangay 178 Health Center continue to actively promote its free dental services, emphasizing the importance of dental health, especially among the elderly, men, and married couples. The center should implement targeted outreach programs to encourage these groups to take advantage of the services offered. Additionally, to attract first-time visitors, the center should create positive experiences that motivate patients to return. Establishing a comfortable environment and offering follow-up appointments or reminders will also help foster long-term relationships between patients and the health center's services.

Keywords: patient satisfaction, dental services, healthcare quality, community needs, barangay 178 health center

**ASSESSING THE CUSTOMER LIFETIME VALUES (CLV) OF THE
PERFUME BRAND BUSINESS**

Jennylyn Bandola, Kelly Michelle Alcantara, Precious Catherine Rosqueta,
Princess Ruiz, Kevin Galvez, Christine Calvo

Abstract

This study aims to determine the Customer Lifetime Value (CLV) of a perfume brand. This study adopted a descriptive research approach and used convenience sampling to gather data from 30 business owners based in Caloocan City and Quezon City. The primary goal was to examine how issues related to product effectiveness, quality, and customer loyalty impact overall consumer behavior and satisfaction. This study examined factors affecting product quality and customer loyalty based on survey responses. The results showed that maintaining hygiene and safety standards received a high mean score of 3.7, indicating its strong influence on customer satisfaction. Likewise, the practice of addressing customer concerns promptly, by offering solutions such as repairs, replacements, or refunds, also earned a mean score of 3.7, highlighting its role in building trust. Furthermore, the study explored Customer Lifetime Value (CLV) in the perfume brand industry, emphasizing the importance of product reliability, consistent quality, and effective customer service in fostering long-term loyalty and profitability. To boost consumer awareness and grow their market presence, respondents emphasized the importance of personalized customer service, consistent engagement with customer feedback, attractive discount offerings, and improved product durability. These strategies serve as practical recommendations for perfume brand owners, enabling them to refine their marketing approaches, enhance product quality, and build long-lasting customer relationships.

Keywords: customer lifetime value (clv), perfume brands, personalized customer service, product durability, customer feedback, consumer awareness, marketing strategies, customer loyalty

**ASSESSING THE EFFECT OF CREDIT BORROWING ON THE PROFITABILITY OF
SELECTED MICRO ENTERPRISE IN SUSANO ROAD
NOVALICHES QUEZON CITY: TOWARDS GUIDE**

Jiro Dañaguel, Arvin Anquilo, Carl Christian Jose, Charles Louie Agapito,
Limwel Mollejon, Cielo Ogao-ogao, Euigenio Bayani Jr.

Abstract

Micro enterprises significantly contribute to local economic growth in the Philippines, especially in communities such as Susano Road, Novaliches, Quezon City. However, many of these small businesses struggle with financial constraints, often relying on borrowed credit to support daily operations. While credit access can enhance business sustainability and expansion, poor credit management may negatively impact overall profitability. This study investigates the effect of credit borrowing on the profitability of selected micro enterprises and aims to develop practical strategies for sound financial decision-making. A quantitative-descriptive research design was utilized in this study. Data were gathered through structured questionnaires administered to 25 purposively selected micro-entrepreneurs. To assess business profiles, borrowing practices, and the perceived impact of credit on profitability, statistical tools such as frequency, percentage, and weighted mean were used for data analysis. The results indicate that most micro-enterprises depend on informal lenders and family networks due to easier access, despite the associated high interest rates and rigid repayment terms. Credit borrowing was assessed as “effective” in supporting capitalization, loan utilization, and repayment behavior. Responsible borrowing practices contributed positively to increased sales and liquidity, thereby enhancing overall profitability. However, the study also highlights concerns regarding the long-term financial sustainability of these enterprises, primarily due to inadequate financial literacy and heavy reliance on high-interest credit sources. The study concludes that, when used strategically, credit borrowing can be an effective financial tool for micro-enterprises. To enhance overall profitability, the study recommends implementing targeted financial literacy programs, adopting flexible and inclusive lending policies, and encouraging the reinvestment of business profits. A financial literacy guide has also been developed to assist micro-entrepreneurs in making informed and responsible borrowing decisions. These insights are intended to support policymakers, financial institutions, and future researchers in strengthening the resilience and sustainability of the micro-enterprise sector.

Keywords: micro-enterprises, credit borrowing, financial literacy, profitability, informal lenders, flexible lending policies, financial sustainability, susano road, quezon city, loan utilization

**ASSESSING THE EFFECT OF E-WALLET USAGE ON LEAD TIME IN INVENTORY
PROCUREMENT AMONG MICRO ENTERPRISES IN BARANGAY
NOVALICHES PROPER, QUEZON CITY**

Abigail Remontal, Princess Alojado, Micah Jasmine Bailon, Ruth Ann Furtuz,
Rozwel Amie Pahignalo, Analyn Magalso

Abstract

In Barangay Novaliches Proper, Quezon City, micro enterprises (MEs) contribute significantly to the local economy but often face difficulties in managing inventory procurement due to outdated manual methods, resulting in delayed restocking. As the use of e-wallets gains traction in the Philippines, fueled by smartphone accessibility and a nationwide push toward digital payments, there emerges an opportunity to modernize procurement processes. Despite this shift, the role of e-wallets in reducing inventory lead time for micro enterprises remains largely unstudied, presenting a valuable area for further research. The research explores how the adoption of e-wallets affects the lead time in inventory procurement among micro enterprises (MEs). Utilizing a descriptive research approach and purposive sampling, the study collected data from 30 selected MEs through structured survey questionnaires. The responses were analyzed using weighted mean and t-test to determine the extent of the impact. Findings reveal that e-wallet usage is highly effective in reducing inventory procurement lead time, scoring 3.47 on the effectiveness scale. Factors such as perceived usefulness, ease of use, intention to adopt, and actual usage strongly influence micro enterprises' decisions to implement e-wallets. While challenges like limited supplier adoption and monthly transaction limits exist, their effects were minimal, and the solutions applied successfully mitigated these issues. Consequently, an action plan was developed to assist micro enterprises in leveraging e-wallet technology more efficiently to streamline their procurement operations. To sum up, e-wallets play a crucial role in boosting the efficiency of inventory procurement for micro enterprises, thereby helping to shorten lead times. Despite this, the study finds that many MEs primarily use e-wallets for convenience rather than leveraging them strategically to streamline procurement. It is recommended that micro enterprises adopt a more deliberate and strategic use of e-wallets to maximize operational efficiency. Moreover, improving collaboration with suppliers around e-wallet transactions can further enhance the smoothness and effectiveness of procurement processes.

Keywords: e-wallet, micro enterprises, inventory procurement, lead time, operational efficiency, digital payments, supplier coordination, strategic adoption, procurement process

**ASSESSING THE EFFECTIVENESS OF ENTERPRISE RESOURCES PLANNING IN
ACCOUNTING: BASIS IN PROPOSED IMPROVEMENT PLAN**

Lope Martin Gabua, Mark Jomari Aquino, Armie Casabuena, Zaldrien Paul Dela Cruz,
Jhastine Jhon Revilla, Analyn Magalso

Abstract

This study aimed to evaluate the effectiveness of Enterprise Resource Planning (ERP) systems within accounting operations, serving as a foundation for a proposed improvement plan. It investigated how ERP effectiveness influences accounting practices and implementation success. The research also explored common challenges encountered during ERP adoption and identified practical solutions to address these issues and enhance overall system performance. This study employed a descriptive-correlational research design to examine the relationship between ERP system effectiveness and its implementation in accounting processes. Fifteen (15) participants were purposively selected from Jetour Auto Philippines Inc. to serve as respondents. Data collection was conducted using a survey questionnaire, and the responses were analyzed using statistical techniques, including correlation analysis, to determine the degree of association between ERP effectiveness and its practical application in accounting. The study found a negative correlation ($r = -0.2222$) between the effectiveness of ERP systems and their implementation in accounting. This suggests that ERP effectiveness is more influenced by user adaptability than by the implementation process itself. The findings also indicate that challenges and proposed solutions can significantly impact users' attitudes toward accepting and using the ERP system in accounting practices. The study concludes that Enterprise Resource Planning (ERP) systems are valuable tools for enhancing performance, particularly in increasing efficiency and accuracy in accounting operations. However, the success of ERP implementation is not determined solely by the system itself, but largely depends on user adaptability, comprehensive training, and consistent IT support. The absence of a strong correlation between ERP effectiveness and implementation emphasizes the pivotal role of end-users in unlocking the system's full potential. To maximize the benefits of ERP in the accounting environment, it is essential to address challenges such as employee resistance, limited customization options, and inadequate training programs. These factors must be prioritized to ensure a smoother transition and sustained success in ERP adoption.

Keywords: enterprise resource planning (erp), accounting, system implementation, user adaptability, training, it support, efficiency, accuracy, employee resistance, erp challenges

ASSESSING THE EFFECTIVENESS OF MANAGERIAL DECISION AND ACCOUNTING INFORMATION SYSTEM SUPPORT SMALL BUSINESS IN NOVALICHES, QUEZON CITY.

Ryan Barrera, Jay Mica Badillo, Darren Bucio, Archie Rellama,
Jan Enrico Untal, Analyn Megalso

Abstract

This study evaluates the effectiveness of managerial decision-making and accounting information system support in small businesses in Novaliches, Quezon City. It examines how small enterprises leverage AIS tools, such as point-of-sale and inventory systems, to inform strategic decisions, enhance operational control, and foster business growth. The study aims to identify best practices and provide recommendations for maximizing AIS potential in daily operations. A quantitative descriptive design is employed using a structured survey questionnaire. Purposive sampling selects ten small business managers who actively use AIS tools in their operations. Participants possess expertise in financial management, inventory control, and decision-making. The questionnaire, grounded in a theoretical framework of managerial decision processes and AIS support functions, measures perceived effectiveness across key performance dimensions. Data are analyzed using weighted means to assess AIS impact. Respondents, predominantly operating in the food industry with one to fifteen years of business tenure and employing one to fifteen staff, rated AIS effectiveness as “very effective” across all measured dimensions. Financial management received the highest scores, followed by operational efficiency, business growth, budgeting and cost control, data accuracy, and transaction recording. These ratings indicate strong AIS support for informed decision-making and streamlined operations. The findings indicated that robust AIS implementation significantly enhanced decision quality and operational performance in small businesses. As a result, it was recommended that enterprises invest in comprehensive AIS training, integrate advanced analytics modules, and regularly update system functionalities. Such measures were expected to further optimize financial oversight, resource allocation, and strategic planning, thereby sustaining competitive advantage and growth in Novaliches’s small business sector.

Keywords: managerial decision making, accounting information system, small business, operational efficiency, financial management, novaliches

**ASSESSING THE IMPACT OF ACCOUNTING INFORMATION SYSTEMS ON DECISION-
MAKING AND ORGANIZATIONAL PERFORMANCE**

Carlo Gaon, Nonie Arcillas, Niña Mae Alayon, Patricia Escaleta,
Elmira Loureen Ann Garcio, Analyn Magalso

Abstract

This study examines how Accounting Information Systems (AIS) influence decision-making and organizational performance by providing timely financial data, identifying growth opportunities, controlling cash flows, and tracking expenditures. Emphasis is placed on the role of AIS in enabling strategic choices, mitigating risks, and enhancing overall business outcomes through improved information accuracy and accessibility. A descriptive quantitative research design is employed to assess the impact of AIS on organizational outcomes. Thirty employees directly involved with the AIS are selected using purposive sampling. A structured survey questionnaire gathers data on perceptions of AIS effectiveness across dimensions of financial management, communication, data handling, and decision-making support. Respondents strongly agreed that AIS positively affected decision-making and organizational performance, with a composite mean of 3.52 across financial status, management, communication, and data handling dimensions. Fifty percent of participants identified system integration challenges as the most significant obstacle. Spearman's correlation revealed a moderate positive relationship ($p = 0.361$) between AIS effectiveness and organizational performance metrics, indicating that higher perceived AIS quality corresponded with better performance outcomes. The findings confirmed that AIS enhancements reduced manual errors, improved data reliability, and accelerated financial reporting. As a result, organizations gained real-time insights that supported more informed strategic decisions. Challenges related to system integration and user training were addressed through targeted recommendations, including structured training programs and ongoing system updates. These measures were intended to further strengthen the link between AIS utilization and organizational growth.

Keywords: accounting information system, decision-making, organizational performance, financial management, data handling, business strategy

**ASSESSING THE IMPACT OF AI ADOPTION IN ACCOUNTING INFORMATION
SYSTEM AT WILMAR BENBY CORPORATION: BASIS FOR A PROPOSED EXTREME
IMPLEMENTATION PLAN**

Jhon Ray Villareal, Edrian Encarnacion, Alysa Hong, Angel Naxela Vargas,
Reziah Mae Zabay, Bryan Tubao

Abstract

This study assesses the impact of artificial intelligence adoption on minimizing errors in the accounting information system at Wilmar Benby Corporation. It examines employee perceptions of AI in terms of perceived usefulness, perceived ease of use, and actual system utilization. The research further explores how demographic factors relate to AI adoption and identifies challenges encountered in error reduction. Findings from this assessment inform the development of an Extreme Implementation Plan to enhance AI integration in accounting operations. A descriptive-correlational design is employed, with purposive sampling used to select thirty employees across finance, audit, and compliance departments. A structured questionnaire, validated by subject-matter experts, measures perceptions of AI usefulness, ease of use, system usage frequency, and encountered obstacles. Data are analyzed using frequency distributions, percentages, weighted means, and ANOVA to test for differences in perceptions across demographic groups. AI adoption improved reporting accuracy and processing efficiency while reducing manual errors. Respondents rated perceived usefulness at a weighted mean of 3.75 and ease of use at 3.60 on a four-point scale. Actual usage recorded a moderate mean of 2.90, reflecting constraints in familiarity and training. Key challenges included workflow disruptions, limited user training, and outdated system components. ANOVA results revealed no significant differences in AI perceptions by department, tenure, or role. AI demonstrated a clear potential to minimize errors within the accounting information system when supported by robust training, seamless integration, and ongoing user assistance. As a result, an Extreme Implementation Plan is proposed, comprising five phases: system needs assessment, technology selection, integration and customization, comprehensive user training, and continuous performance monitoring. Future studies are recommended to replicate this research in different industries and with larger samples to validate these findings and refine implementation strategies.

Keywords: artificial intelligence, accounting information system, error reduction, user perception, implementation plan

**ASSESSING THE INTERNSHIP PROGRAM IN RELATION TO OFFICE
ADMINISTRATION STUDENTS' CAREER READINESS AT HIGHER EDUCATIONAL
INSTITUTION
IN QUEZON CITY**

Jessiel Baguio, Rica Buhia, Lhea Marie Vigo, Angela Navarro, Leajen Quilantang, Bryan Tubao

Abstract

This study examines how internship programs foster career readiness among Office Administration students in higher educational institutions in Quezon City. Grounded in Kolb's Experiential Learning Theory, the research investigates how structured on-the-job training develops organizational skills, communication competencies, and technical expertise that are essential for employability. The study assesses the effect of formal internship experiences on students' preparedness for the workplace by evaluating demographic influences, student perceptions, and skill development outcomes. A descriptive quantitative research design was employed to evaluate internship impact on career readiness. A total of 155 fourth-year Office Administration students who completed third-year internships in 2024 were selected via convenience sampling, with sample size determined using the Slovin formula. A validated survey questionnaire measured perceptions of program implementation, skill acquisition, challenges encountered, and overall readiness. Data were analyzed using weighted means, frequency distributions, and correlation analyses. Internships enhanced students' career readiness, with the highest gains observed in critical thinking (mean = 3.72) and personal development (mean = 3.68). Networking opportunities and hands-on tasks were particularly beneficial (mean = 3.75). However, only 20.65 percent of students received retention offers from host companies. Communication barriers with supervisors (mean = 2.45) and logistical challenges such as scheduling conflicts (mean = 2.38) were identified as obstacles to optimal learning. The internship program was perceived as effective in strengthening professional competencies and clarifying career expectations. As a result, students endorsed its role in bridging academic learning and workplace demands. Recommendations included organizing preparatory workshops on workplace communication, offering short courses in emerging office technologies, and establishing stronger partnerships with industry to design structured internship curricula. Employers were encouraged to provide clear mentorship frameworks and consider extending retention pathways for high-performing interns.

Keywords: internship program, career readiness, office administration, experiential learning, skill development, higher education, quezon city

**ASSESSING THE OPERATIONAL ASPECT OF SELLING MICRO ENTERPRISE IN
NOVALICHES BAYAN, QUEZON CITY**

Marieson Grace Buaya, Jhon Michael Bello, Jasmine Marie Caballero, Era Rollaine Cebu,
Melvi Jane Talamayan, Christine Calvo

Abstract

This study examines the operational aspects of micro enterprises engaged in selling within Novaliches Bayan, Quezon City. As small businesses continue to adapt to a rapidly changing market environment, the research explores the challenges, opportunities, and strategies that contribute to their sustainability and growth. A quantitative research design was employed using a survey questionnaire administered to 50 small business owners across various sectors in Novaliches. The instrument focused on operational strategies, workforce management, and market adaptation. Respondents represented a balanced gender distribution and varied business tenures, ranging from less than a year to over five years. The analysis showed that while gender representation among respondents was equal, their experiences varied notably based on business tenure. The main operational challenges identified were workforce management and market competition. Time management was also cited as a concern but considered less critical. Findings further revealed that business owners are adopting strategic measures to manage human resources and address competitive pressures effectively. The results suggest that micro enterprises in Quezon City actively assess and refine their operations to remain competitive. Workforce management and competitor analysis are central to their success, while time management issues appear secondary. Moreover, the use of digital marketing tools and government support programs emerged as key drivers of adaptability and growth. These findings highlight the importance of continuous strategic planning and supportive policies to strengthen the resilience of small businesses in an evolving market.

Keywords: competitive pressures, opportunities and challenges, sustainable growth, adaptation strategies, digital marketing tools

ASSESSING THE ROLE OF COMPLAINT MANAGEMENT IN SELECTED FAST-FOOD CHAIN: ADDRESSING FEEDBACK TO IMPROVE BRAND LOYALTY

Laye Jandra Alamin, Ma. Arabella Abasula, Jasmine Canales, Trixie Mhay Mercado,
Cynthia Rizaldo, Bryan Tubao

Abstract

This study assesses the role of complaint management in selected fast-food chains, Jollibee, Mang Inasal, and McDonald's, in improving brand loyalty. Guided by the Complaint Management Model, it examines how customer responsiveness, communication quality, resolution timeliness, and satisfaction vary across demographic groups such as age and gender. The study further explores how these complaint-handling dimensions influence customer perceptions of brand loyalty. A comparative descriptive design is employed with purposive sampling to select 75 employees (25 per chain) from Jollibee, Mang Inasal, and McDonald's. A structured survey questionnaire measures four complaint-management dimensions: responsiveness, communication, resolution timeliness, and customer satisfaction, and five brand-loyalty indicators, customer retention, repeat purchase intention, positive word-of-mouth, emotional attachment, and preference over competitors. Data are analyzed using means for each dimension and Pearson's correlation to test the relationship between complaint management and brand loyalty. Respondents were predominantly aged 18 to 20 (68 percent) and male (68 percent). Mean ratings for complaint management were 3.31 for responsiveness, 3.24 for communication, 3.07 for resolution timeliness, and 3.28 for customer satisfaction. Brand loyalty means there is a 3.13 for customer retention, 3.24 for repeat purchases, 3.04 for positive word-of-mouth, 2.99 for emotional attachment, and 3.13 for preference over competitors. Pearson's correlation analysis revealed no statistically significant relationship between overall complaint-management effectiveness and brand loyalty. The findings indicated that while responsiveness, clear communication, prompt resolutions, and customer satisfaction scored moderately high, these alone did not translate into stronger brand loyalty within the sample. As a result, it was concluded that complaint management must be integrated with broader loyalty strategies, such as personalized rewards, customer engagement programs, and consistent service quality, to have a measurable impact on customer retention and advocacy.

Keywords: complaint management, brand loyalty, fast-food chains, customer satisfaction, service recovery

**ASSESSING THE USABILITY OF VENDING MACHINES AND
SELECTED CAR WASH SERVICES**

Cindy Olleta, Rich Arique, Joramie Colongan, Mariel Ramos, Vince Kim Rey, Christine Calvo

Abstract

Automation in car wash services and vending machines offers an opportunity to reduce operational costs and enhance customer satisfaction through on-demand, eco-friendly methods. Usability plays a crucial role in determining customer acceptance and market viability of these technologies. This study assesses the usability of vending machines and selected car wash services to identify factors that influence user experience and long-term adoption. A quantitative descriptive design is employed, with purposive sampling used to recruit customers of car wash vending machines. Data are gathered via a structured questionnaire addressing key usability dimensions, accessibility, efficiency, functionality, and customization options. Convenience sampling ensures a diverse range of respondents, and results are analyzed using weighted means to evaluate levels of agreement with each usability criterion. Respondents were predominantly male (92 percent), and overall satisfaction with vending machine functionality was positive. Accessibility received an average rating of 3.19 (“Agree”), while efficiency was rated 3.28 (“Strongly Agree”). However, 28 percent of users identified limited-service customization as a major drawback, highlighting a gap between automated convenience and individual preferences. Findings suggested that car wash vending machines succeeded in delivering convenient and efficient service but fell short in offering personalized options. As a result, future development should focus on enhancing customization features, such as adjustable wash cycles or add-on services, to improve user satisfaction and expand market appeal. Further research could examine the balance between automation and personalization to optimize the usability and adoption of self-service car wash technologies.

Keywords: usability, vending machines, car wash services, automation, customer satisfaction, customization

**ASSESSING THE VALUE PROPOSITION AS PERCEIVED BY OWNER OF
FOOTWEAR IN NOVALICHES, QUEZON CITY**

Hazel Fabillo, Hazel Fabillo, Hazel Fabillo, Hazel Bernadeth Bautista, Maria Louisse Oraño,
Meryl Divine Jane Paraggua, Maria Christine Ramos, John-Johnrey Tuazon, Christine Calvo

Abstract

This study examines the value proposition as perceived by owners of footwear service businesses in Novaliches, Quezon City. It explores how service quality and operational efficiency influence owners' assessment of their offerings. By understanding these perceptions, key performance indicators can be identified, market dynamics clarified, and strategic decisions formulated to enhance sustainability and profitability. A quantitative survey was conducted among proprietors of footwear service establishments offering repair, cleaning, and customization services. Data were gathered using a structured questionnaire that measured perceptions of service quality such as technician competence and material quality, as well as operational factors, including turnaround time, pricing, customer service, and location convenience. Responses were analyzed using descriptive statistics to determine the relative impact of each factor on perceived value. Owners reported that service quality and operational efficiency were the primary drivers of perceived value. Technician competence received the highest mean score among quality criteria, while turnaround time and pricing were rated as the most influential operational factors. Customer service and convenient location also ranked highly but contributed less strongly to overall value ratings. Findings indicated that enhancing technician training and ensuring the use of high-quality materials significantly elevated perceived value. Improvements in turnaround efficiency and transparent pricing further reinforced owners' confidence in their service offerings. These insights suggest that targeted investments in workforce skill development and process optimization can boost both customer satisfaction and business viability. Actionable recommendations include establishing standardized training programs, implementing real-time job tracking systems, and adopting tiered pricing models to strengthen value propositions and support long-term growth.

Keywords: value proposition, service quality, operational efficiency, footwear services, customer perception

**ASSESSMENT OF PROCEDURES IN REQUIREMENT SUBMISSION FOR MEDICAL
ASSISTANCE AND SATISFACTION OF PERSONS WITH DISABILITIES
AT DSWD – CENTRAL OFFICE**

Andrea Balingasa, Janelle Abad, Hazel Ann Gipanao, Jesamie Gozo,
Alyssa Mae Tindan, Bryan Tubao

Abstract

This study assesses how the DSWD Central Office handles requirement submission for medical assistance and evaluates the satisfaction of people with disabilities. It examines variables such as document clarity and completeness, administrative procedure, staff competency, communication, and follow-up processes to determine their influence on client satisfaction and service efficiency. This study employs quantitative descriptive research design. Purposive sampling is used to select twenty people with disabilities who have applied for medical assistance at the DSWD Central Office. Data is collected via a structured survey questionnaire that evaluates each stage of the requirement submission procedure, including document preparation, administrative steps, staff interactions, communication channels, and follow-up practices. Respondents reported high satisfaction with document clarity, administrative procedures, staff competency, and overall communication and follow-up processes. As a result, the medical assistance submission process was perceived as reliable and professionally managed. However, a significant communication gap was identified, with many applicants citing insufficient guidelines and unclear instructions that led to confusion and processing delays. The findings highlighted the need for enhanced communication and clearer procedural guidelines to streamline requirement submission. It was found that middle-aged applicants with disabilities were more likely to seek assistance, and that staff competency and facility professionalism were generally praised. As a result, standardizing minor procedural inconsistencies and enhancing staff training in empathy and active listening could further strengthen trust and user experience. Recommendations include developing accessible document templates, shortening submission timelines, implementing a dedicated hotline, introducing a digital document management and tracking system, and establishing a feedback mechanism to continuously improve service delivery for persons with disabilities.

Keywords: document clarity, administrative procedure, staff competency, communication, follow-up

**ASSESSMENT OF QUEUING MANAGEMENT SYSTEM OF RELEASING LICENSE
CARDS IN GOVERNMENT AGENCY**

Alvic Simbajon, Joel Jay Esparza, Arsenio Goc-ong, Eugene Maulit,
Shiela Ann Hayahay, Bryan Tubao

Abstract

This study examines the queuing management system at the Land Transportation Office–Novaliches District, focusing on the efficiency of the driver’s license issuance process. LTO–Novaliches provides essential public services such as license renewals and traffic law enforcement. However, the office faces challenges including long wait times, overcrowding, and service delays due to manual procedures. This study aims to assess the effectiveness of queuing strategies, such as electronic queue displays and online appointment scheduling, reducing wait times and improving overall service efficiency. This study employs a descriptive research design to gather detailed data on the queuing process at LTO–Novaliches. Purposive sampling is used to select twenty clients who have experienced the license issuance process. A structured survey questionnaire collects demographic information and client evaluations of the queuing system. Collected data are analyzed using percentage distributions and weighted means to identify patterns, relationships, and areas for improvement. Findings showed that the introduction of the Land Transportation Management System (LTMS) achieved some improvements in the license renewal process. Clients indicated that certain procedures were streamlined and transaction times were reduced. However, reported problems included system outages, slow processing speeds, and difficulties navigating the online platform, all of which contributed to continued service delays. The study found that, despite the positive impact of digital tools like LTMS, significant challenges remained. Technical malfunctions, system downtimes, and inefficiencies in queuing continued to hinder service quality and client satisfaction. As a result, a more robust digital infrastructure is required to ensure reliable operations. The study recommended the adoption of advanced queuing solutions, including online appointment systems and automated ticketing, to further enhance service efficiency and client experience at the LTO–Novaliches District Office.

Keywords: queue management, service efficiency, electronic queue system, online scheduling, ltms

**ASSESSMENT ON THE FACTORS THAT INFLUENCE MOBILE TECHNOLOGY
ADAPTATION IN SYSTEM CORPORATION: BASIS FOR PROPOSED GUIDELINES**

Cristan Dave Bundalian, Ivette Marie Ajesta, Hazel Anne Liao,
Cielo Magbanua, Kiana Christina Vicente, Analyn Magalso

Abstract

This research investigates the factors that impact the adoption of mobile technologies in corporate environments, grounded in the Diffusion of Innovation Theory. It focuses on five critical attributes, relative advantage, compatibility, complexity, trialability, and observability, to better understand how organizations can effectively implement mobile solutions. The study aims to provide strategic recommendations that support successful digital transformation initiatives. This research utilized quantitative design, employing a structured survey questionnaire as the primary tool for data collection. The study involved 20 professionals from System Corporation who frequently use mobile technologies in their daily work. Purposive sampling was used to select participants with relevant experience in mobile systems and accounting information systems. Statistical analyses, including weighted mean, percentage distribution, ranking, and the Kruskal-Wallis test, were conducted to examine the relationships between respondents' demographic characteristics and factors affecting mobile technology adoption. The questionnaire was validated through expert review and pilot testing to ensure its reliability and validity prior to the main study. The majority of respondents aged 18 to 25 use laptops and smartphones to access data. Mobile technology improves work productivity and efficiency, is compatible with current software, and is user-friendly. However, challenges include inadequate internet connections and slow adoption rates among workers. Additionally, no correlation was found between demographic factors and the determinants of adoption. The findings confirm that the Diffusion of Innovation Theory effectively explains the adoption of mobile technology. The key factors driving this adoption were perceived relative advantage and simplicity. Testing technologies before their complete implementation provided helpful reassurance, while observing the benefits contributed to greater acceptance. However, significant challenges arose from infrastructure issues, such as slow internet speeds and inadequate training, which hindered full adoption. The study highlights that for mobile technologies to be successfully integrated, organizations must address technical constraints and provide ongoing support to users.

Keywords: mobile technology adaptation, technology adoption factors, mobile device usage, system corporation, user acceptance, technology acceptance model (tam), mobile technology implementation, workplace technology, digital transformation, technology integra

**ASSESSMENT ON THE PENSION PROCESS OF THE SOCIAL SECURITY SYSTEM
BASIS FOR ENHANCEMENT**

Reyna Joy Lucañas, Patricia Angeline Cayago, Nicole Anne Eraya, Stephanie Florino,
Mary Grace Peñaranda, Bryan Tubao

Abstract

The Social Security System (SSS) serves as a cornerstone for providing financial security to retirees across the Philippines. However, persistent challenges, including procedural delays, systemic inefficiencies, and limited digital accessibility, have increasingly raised concerns among its members and pensioners. This study seeks to critically assess the current pension process within the SSS, pinpoint key areas requiring enhancement, and offer strategic recommendations aimed at improving the system's efficiency, responsiveness, and accessibility. This study employed a descriptive research design incorporating both qualitative and quantitative methods. Primary data were gathered through surveys administered to pensioners and in-depth interviews with selected SSS personnel. To enrich the analysis, secondary data from official reports and relevant documentation were also systematically reviewed. The findings identified several significant challenges in the pension process, such as lengthy processing times, limited transparency in the calculation of benefits, dependence on outdated manual procedures, and inadequate support services for elderly beneficiaries. Moreover, respondents emphasized the urgent need for more user-friendly digital platforms and improved, clearer communication from the agency to better serve its members. The study recommends several key improvements, including the automation of pension processes, the development of intuitive and user-friendly online platforms, the simplification of application requirements, and the enhancement of client support services. These measures are intended to establish a more efficient, transparent, and accessible pension system that better serves both current and future SSS beneficiaries.

Keywords: social security system, sss, pension process, financial security, automation, digital platforms, client support, transparency, benefit computation, process efficiency, philippines

**ATTAINING THE ACCEPTABILITY OF COCONUT MEAT AS A FLAVOR OF TAPIOCA
PEARLS AMONG GRADE 11 AND 12 HOME ECONOMICS (HE)
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Eryl Achiveda, Gian Eric Pula, Andrei Mamalumpong, Ashley Mae Regacho,
Jemie Rose Mollejon, Analyn Brosas

Abstract

Coconut has been deeply rooted in the Philippines' agricultural legacy for centuries, serving not only as a staple crop but also as a symbol of the Filipino farming lifestyle. What sets this tropical fruit apart is its unique endosperm, which contains a nutrient-rich, translucent liquid commonly known as coconut water. Celebrated for its wide range of health benefits, the coconut continues to thrive as one of the most economically viable and sustainable agribusiness commodities in the country. As one of the world's leading producers and exporters of coconut and coconut-based products, the Philippines presents endless possibilities for innovation. In this study, we sought to elevate the culinary potential of coconut by infusing its flavorful meat into tapioca pearls, locally known as sago, a beloved ingredient in traditional Filipino beverages and desserts. This fusion aims to enhance both the nutritional value and the cultural richness of local delicacies. A quantitative research design was utilized in this study to systematically gather and analyze numerical data through a structured survey questionnaire. This method was chosen to objectively measure the level of acceptability of buko (coconut) meat as a flavoring for tapioca pearls. The data collected served as the basis for concluding the respondents' preferences and perceptions. The study involved seventy-one (71) Grade 11 and 12 students from Bestlink College of the Philippines, who were selected using simple random sampling to ensure that every individual in the population had an equal chance of being chosen, thereby enhancing the reliability and generalizability of the findings. The demographic profile of the respondents revealed that the majority were between 15 and 17 years old, and most were female. A significant number of participants came from the following sections: HECF 1201, HECF 1203/HEHO 1201, and HECF 1101/HETEM 110/HEHRS 1101. In terms of taste, the respondents rated the sweetness of the buko-infused pearls as the most acceptable, receiving the highest weighted mean. Conversely, bitter and sour flavors were rated as only partially acceptable, indicating lower preference. For texture, the soft consistency of the buko pearls was the most favored, also achieving the highest weighted mean, followed by the smooth texture, while the hard texture was the least preferred. Regarding appearance, the respondents strongly agreed that the buko pearls looked fresh, which received the highest rating. The attribute presentable followed in acceptability, while the edible appearance was rated lowest among the three visual aspects evaluated. The findings indicate that the majority of respondents perceived the buko-infused tapioca pearls as sweet, with this attribute receiving the highest weighted mean in the category of taste, reflecting strong acceptability. In terms of texture, most respondents described the pearls as soft, which also earned the highest weighted mean, suggesting it was the most preferred among the texture options. Regarding appearance, the buko pearls were widely regarded as fresh, supported by the highest weighted mean and a verbal interpretation of "very much acceptable. "Based on the feedback, respondents recommended enhancing the sweetness and adding a more pronounced coconut flavor to further improve the overall sensory quality and consumer appeal of the buko tapioca pearls.

Keywords: buko pearls, coconut meat, tapioca pearls, sensory evaluation, taste preference, texture analysis, product acceptability, filipino desserts, quantitative research, consumer feedback, flavor enhancement, student respondents

BEAUTY TRENDS PRODUCTS: SIGNIFICANCE OF PURCHASING BEHAVIOR

Ryza Cepedoza, Jean Bridget Bulan, Angel Manalang, Princess May Marcelino,
Princess Aya Ramil, Dave Espinosa

Abstract

This study aims to explore the key factors that influence the purchasing behavior of beauty products among senior high school students, with a particular emphasis on the impact of trending products. In the contemporary digital landscape, beauty standards are increasingly shaped by social media, which serves as a powerful tool in driving consumer interest and shaping individual preferences. The research focuses on Accountancy, Business, and Management (ABM) students at Bestlink College of the Philippines – Bulacan Campus, examining how social media exposure and peer pressure affect their buying decisions. Additionally, the study seeks to identify gaps in product literacy and assess the effectiveness of current consumer awareness. Ultimately, it aims to propose strategies that promote safer, more informed, and sustainable purchasing behaviors among the youth. This study utilized purposive sampling to select 30 senior high school students from the Accountancy, Business, and Management (ABM) strand as respondents. Data collection was conducted through a structured survey questionnaire, designed to obtain both demographic information and detailed insights into the students' consumer behavior, specifically related to the purchasing of beauty products. The questionnaire centered on four critical themes: the influence of counterfeit beauty products, the tendency toward panic purchasing, the impact of pricing on buying decisions, and the role of peer pressure and social exclusion in shaping consumer preferences. These focus areas were selected to comprehensively assess the various social and psychological factors that drive beauty product consumption among students. The findings reveal that ABM learners generally agree on several key factors influencing their purchasing behavior of beauty products. A weighted mean of 3.67 indicates that students believe social media platforms should play a more proactive role in regulating and preventing the sale of counterfeit products. An even higher weighted mean of 3.90 underscores the perception that a lack of consumer knowledge significantly contributes to the purchase of fake products, often leaving students vulnerable to misleading marketing tactics. Moreover, a weighted mean of 3.43 reflects the students' agreement on the importance of developing budgeting skills to support more sustainable and responsible consumer behavior. In light of these results, the study recommends enhancing awareness campaigns about counterfeit products, introducing purchase limits to discourage impulsive buying, and promoting financial literacy education. These strategies aim to improve product safety, reduce instances of panic buying, strengthen financial decision-making, and foster a more informed and socially responsible youth consumer culture. This study seeks to explore the impact of social media influence and peer pressure on the purchasing decisions of students, particularly in the context of beauty product consumption. The evidence indicates that ABM learners are often driven to make purchases not out of necessity, but as a response to prevailing digital beauty trends and peer expectations. This consumer behavior places students at risk of purchasing counterfeit or unsafe products, often without fully understanding the long-term health, financial, or social implications of their decisions. A lack of product awareness and critical evaluation contributes to impulsive buying driven by image conformity. To mitigate these risks, the study emphasizes the importance of educational interventions aimed at improving product literacy, developing budgeting and financial management skills, and fostering critical thinking in evaluating online content. Such strategies can significantly enhance students' ability to make informed, safe, and sustainable purchasing choices in an increasingly digital consumer landscape.

Keywords: social media influence, peer pressure, purchasing behavior, beauty products, abm learners, counterfeit products, product literacy, financial management, critical thinking, sustainable consumer behavior

**BRIDGING THE COMMUNICATION GAP: EMPLOYEE - CUSTOMER INTERACTION
AT FYM SEAFOOD RESTAURANT IN VALENZUELA CITY**

Jhoana Gelyn Yanila, Rhea Lucenisio, Vera Cabana, Gil Jeremy Lander Del Rosario,
Caroline Nicolas, Rolando Rambo Jayoma

Abstract

Effective communication between employees and customers is fundamental to delivering outstanding service in the increasingly competitive food service industry. Despite continuous efforts to improve service quality, numerous small to medium-sized restaurants still grapple with communication breakdowns that undermine customer satisfaction and loyalty. This study centers on FYM Seafood Restaurant in Valenzuela City, where persistent communication issues, such as inaccurate order taking and service delays, have detrimentally affected patrons' dining experiences. The research seeks to comprehensively examine these communication barriers, assess their impact on service delivery, and evaluate their implications for customer retention and overall business success. This study employed a quantitative descriptive research design to investigate communication gaps between employees and customers at FYM Seafood Restaurant in Valenzuela City. The sample consisted of 50 purposively selected respondents, including 35 employees and 15 customers. Data collection was conducted using a structured, researcher-developed questionnaire divided into three sections: demographic profile, nature of communication gaps, and their impact on service quality. The instrument was rigorously validated by subject matter experts and pre-tested to ensure clarity and reliability. Questionnaires were distributed both personally and electronically, achieving a 100% response rate. Data was analyzed using frequency counts, percentage distributions, rankings, and weighted means to provide a detailed understanding of the communication challenges and their influence on service delivery. The results indicate that the majority of both employees and customers are young, single, and primarily Tagalog-speaking. The employee sample was evenly distributed across genders, whereas most customers were female and engaged in office-based occupations. While employees generally perceived their communication skills and service responsiveness favorably, customers reported only moderate satisfaction. Customers particularly noted deficiencies in professionalism, empathy, and aspects of the physical environment, as reflected in responses to items 1, 4, and 7 of the survey. These findings reveal a significant disparity between employees' self-assessments and customer expectations, underscoring the need for improved alignment to enhance overall service quality. The findings highlight a critical need for focused employee training programs, greater consistency in service delivery, and the development of tailored communication strategies. Prioritizing emotional intelligence, professionalism, and culturally sensitive communication, specifically designed for the restaurant's largely young, Tagalog-speaking clientele, can effectively address these gaps. This study ultimately offers practical, evidence-based recommendations that can empower FYM Seafood Restaurant to enhance service quality, elevate customer satisfaction, and build stronger, long-lasting customer relationships.

Keywords: employee training, service consistency, communication strategies, emotional intelligence, professionalism, cultural sensitivity, customer satisfaction, food service industry, fym seafood restaurant, customer loyalty.

**BUSINESS SIMULATION: EVALUATION OF PERCEIVED ACCEPTABILITY OF
LEMON BALM LEAF FOR COOLING PROPERTIES IN PERFUME WITH VANILLA
SCENT**

Yzza Estorninos, Jessy Rosales, Leanne Joy Bayola, Shaira Mae Lucero, Leila Nunag,
Maria Teresa Nolasco, Christine Calvo

Abstract

This study focuses on the development and evaluation of a fragrance formulation that harnesses the refreshing, cooling qualities of lemon balm extract, complemented by the warm, comforting essence of vanilla. Reflecting the rising consumer preference for natural and functional ingredients, the research aims to create a harmonious scent profile that delivers both sensory refreshment and soothing familiarity, catering to the growing market for innovative perfumery and personal care products. This study employed a descriptive-experimental research design utilizing questionnaires to gather relevant data. A purposive sampling technique was used to select respondents, which included five skincare experts and ten 4th-year BS Entrepreneurship students. The combination of an experimental approach and survey questionnaires enabled the researchers to collect targeted insights from both industry professionals and students. The study evaluated the assessments of two respondent groups on the influence of the lemon balm leaf perfume across three dimensions: effectiveness, benefits, and market trends. Effectiveness: Both groups described the fragrance as having a pleasant vanilla note paired with a light, refreshing scent and a cooling effect that enhances the user experience. Benefits: The perfume was recognized for being gentle on fabrics, delivering a long-lasting scent, and possessing a subtle, non-overpowering aroma. Market Trends: The product aligns with contemporary consumer preferences by emphasizing natural ingredients, sustainability, and a distinctive blend of lemon balm and vanilla. Quantitative analysis showed that skincare experts gave an overall weighted mean of 3.35, while 4th-year BS Entrepreneurship students rated it slightly higher at 3.51. A t-test yielded a computed t-value of 0.397 with 13 degrees of freedom and a significance level of 0.05, against a critical t-value of 2.160. Since the critical value is greater than the computed value, there is no statistically significant difference between the two groups' assessments across all measured variables. The findings strongly indicate that the lemon balm leaf perfume, enriched with the warm vanilla scent, resonates well with consumers, highlighting its promising market potential. Based on these insights, the researchers recommend focusing marketing efforts on commuters, who are likely to value a fragrance that is both refreshing and long-lasting. The distinctive combination of natural lemon balm extract and comforting vanilla not only enhances user experience but also provides a unique selling proposition that can effectively differentiate the product in a competitive personal care market.

Keywords: lemon balm perfume, vanilla fragrance, natural ingredients, cooling effect, long-lasting scent, fragrance formulation, market appeal, commuter fragrance, personal care products, sensory experience, product differentiation, sustainable perfumery, natu

**BUSINESS STIMULATION: THE PERCEIVED EFFICACY OF HAIR OIL
INFUSED WITH ONION PEELS**

Rhian Rein Garcia, Janel Espenida, Trixie Tillo, Ashton Hongria,
Mary Concept Olayan, Christine Calvo

Abstract

This study examines the perceived efficacy of a hair oil infused with onion peels in the context of business stimulation. It aims to determine how effective the infused hair oil product is with respect to quality, texture, and consumer preference. This study employs purposive sampling to select respondents who possess specific characteristics, namely dermatologists and fourth-year Bachelor of Science in Entrepreneurship students. A descriptive-experimental design is used to gather the necessary information and to evaluate cause-and-effect relationships. Data are collected via a structured survey questionnaire that assesses respondents' perceptions of the hair oil's efficacy. The results showed that respondents perceived the hair oil as having a non-greasy, fast-absorbing consistency that prevented a heavy or sticky feel on the scalp. Participants also indicated that the product had a mild and pleasant scent. Furthermore, the hair oil was reported to provide long-lasting nourishment, ensuring continuous protection and improvement of hair quality. The findings indicated that there was no significant difference between the two respondent groups in their ratings of the product. Fourth-year entrepreneurship students gave a mean rating of 3.567 with a variance of 0.120, while dermatologists gave a mean rating of 3.307 with a variance of 0.177. Statistical testing of the difference between these means revealed that it was below the threshold for significance. This suggests that both groups hold similar opinions regarding the product's quality, texture, and consumer preference.

Keywords: hair oil, onion peel infusion, perceived efficacy, texture, quality, consumer preference, business stimulation

**CHALLENGES IN TECHNOLOGY ADVANCEMENT IN SUSTAINING ONLINE
BUSINESS THROUGH DATA PRIVACY IN THE DIGITAL AGE.**

Mica Espeña, Shanaia Lee Fabon, Jayvee Loriyo, Jessianne Patrice Morcilla,
Charles David Serrano, Christine Calvo

Abstract

This study examines the effects of technological advancement on the sustainability of online businesses through the lens of data privacy. Online enterprises operate primarily via internet channels, leveraging digital marketing and social media platforms to engage customers. This study focuses on how secure data management practices and evolving technologies contribute to customer trust and long-term business viability in the digital age. This study adopts a descriptive quantitative design to explore relationships among technological advancement, data management practices, and business sustainability. A structured survey questionnaire was administered to 30 online business owners active on social media platforms. Respondents were predominantly female (80 percent), and most (63.33 percent) had more than one year of experience in online commerce. Data analysis utilized composite weighted means to assess perceptions of technological impact and data handling effectiveness. Participants rated the impact of technological advancement as highly significant, with a composite weighted mean of 3.49, indicating strong agreement on its positive role in business sustainability. Data management practices also received strong endorsement, with a composite weighted mean of 3.23, reflecting respondents' concerns about secure, accurate handling of customer information. Data management emerged as the second most critical challenge after technological capability. The results highlighted that continuous technological innovation and robust data management were essential for maintaining customer trust and competitive advantage. Emphasis on accurate and reliable data handling supported higher levels of customer satisfaction and loyalty. Strategies that prioritized data privacy protocols and differentiated product or service offerings were found to bolster business resilience. The establishment of responsive customer service systems further enhanced operational effectiveness and sustained growth.

Keywords: technological advancement, online business sustainability, data privacy, data management, digital marketing, social media platforms

CONSUMER PREFERENCES OF SELECTING PET GROOMING INDUSTRY

John Mark Salazar, Ivan Dante, Rhea Marie Gardoce, Prince Albern Are, Christine De Guia Galvo

Abstract

This study examines how shifting consumer behavior and growing pet ownership influence the pet grooming industry. It focuses on factors that guide pet owners' choices, such as product type, service format, and environmental impact, and reflects the strong emotional bond between pets and their owners. Insights from this analysis aim to help grooming providers tailor offerings to evolving customer expectations. This study employs a descriptive research design with purposive sampling to select 30 pet owners. A structured questionnaire assessed preferences for grooming products (organic vs. conventional), service modalities (in-salon vs. mobile grooming), pricing, and hygiene standards. Collected data were analyzed using weighted means to rank the relative importance of each preference factor. Based on the results of the above-mentioned variables, the pet owners obtained an overall weighted mean of 3.30. In light of these findings, the researchers recommend the use of organic and eco-friendly grooming products, as well as the adoption of mobile grooming services. Findings indicated that high-quality, safe products and stringent hygiene practices were primary drivers of customer satisfaction. The strong preference for organic and eco-friendly products highlighted environmental and health concerns among pet owners. Convenience factors, particularly mobile grooming, were valued for saving time and reducing pet stress. It was recommended that grooming businesses prioritize premium, eco-friendly product lines, maintain rigorous cleanliness standards, and expand mobile service offerings to align with consumer preferences.

Keywords: consumer preferences, pet grooming, eco-friendly products, mobile grooming, product quality, hygiene standards

**CONSUMER SATISFACTION OF SELECTED HAIRMASK BUSINESS AROUND
NOVALICHES BAYAN, QUEZON CITY**

Chris Rey Labisig, Rose Ann Losaura, Vince Jun Lustan, Christine Mae Militante,
Anthony Policarpio, Christine Calvo

Abstract

This study examines consumer preferences and satisfaction with hair mask products offered by businesses around Novaliches Bayan, Quezon City. It investigates how product formulation, particularly the use of natural and chemical-free ingredients, affects perceived benefits such as nourishment, repair, and overall hair health. Insights from this analysis aim to guide local sellers in optimizing product attributes to meet customer expectations. This study employs a quantitative descriptive design with purposive sampling to select 20 hair mask sellers and 40 consumers from Novaliches Bayan. Participants completed a structured questionnaire that assessed satisfaction with product formulation, perceived benefits, efficacy, and factors influencing purchase decisions. Data were analyzed using weighted means and percentage distributions to rank satisfaction levels and purchase drivers. Consumers reported high satisfaction with natural, chemical-free formulations, citing improved nourishment, repair, and hair health. Key benefits identified included increased hydration, softness, and smoothness. Efficacy ratings confirmed that hair masks delivered superior results and value. Analysis of purchase factors showed that product quality and effectiveness ranked highest at 11.28 percent, followed by scent and texture and brand reputation at 10.85 percent each. Word-of-mouth feedback (10.64 percent) and packaging (10.21 percent) were also influential, while price, expert recommendations, and promotions each contributed 9.79 percent. Natural ingredients (8.72 percent) and dermatologist testing (8.09 percent) were rated lowest. The findings indicated that formulation and tangible performance drove consumer satisfaction and loyalty. Consumers favored products that combined natural ingredients with proven efficacy. Recommendations included enhancing product scent and application ease, developing specialized formulas for different hair types, eliminating harsh chemicals to extend benefits, and leveraging natural components to improve overall quality. Implementing these improvements was expected to strengthen market positioning and consumer trust.

Keywords: consumer satisfaction, hair mask products, natural ingredients, product efficacy, purchase drivers

**DIGITAL MARKETING STRATEGY: EFFICIENCY OF INFLUENCER IN PROMOTING
COSMETICS PRODUCTS AMONG GRADE 12 ABM-A STUDENTS IN BESTLINK
COLLEGE OF THE PHILIPPINES-BULACAN CAMPUS**

Jhamila Kate Ilustrisimo, Ashley Nicole Panao, Alfrech Gamali, Lorraine Tajan,
Jasmine Ajero, Dave Espinosa

Abstract

Digital marketing strategies allow businesses to leverage online platforms to achieve objectives such as brand awareness, lead generation, and increased sales. One effective method is influencer marketing, where brands collaborate with social media personalities to influence consumer purchasing behavior. Unlike many brands, Ellana Minerals, a cosmetics company known for high-quality, natural, and hypoallergenic mineral makeup suitable for various skin types, has established a strong market presence without heavily depending on influencers. While it highlights the use of ethically sourced and skin-friendly ingredients, it does not make explicit claims about FDA approval. As noted by Puthuserry (2020), digital marketing blends traditional and modern techniques to promote products across both online and offline platforms, with social media tools like Facebook, TikTok, Twitter, and Instagram playing a vital role in driving consumer engagement. This study utilizes a mixed-method research design to assess the effectiveness of influencer marketing in promoting beauty products. A purposive sampling technique was used to select 30 Grade 12 Accountancy, Business, and Management (ABM) students from Bestlink College of the Philippines-Bulacan Campus who had experience purchasing cosmetics through online platforms. Data were gathered through a structured Google Form questionnaire containing 36 items. The responses were reviewed, tallied, and analyzed to determine patterns and insights regarding digital marketing and influencer efficiency. Findings showed a generally positive response to the influence of digital marketing strategies on consumer behavior. Respondents agreed that technology-based consumer education is engaging and easy to understand, yielding a weighted mean of 3.73. Additionally, learners agreed that online resources serve as accessible tools for consumer education (3.60) and that technology has improved access to such education (3.53). These results reflect favorable perceptions of how digital platforms support informed purchasing decisions. The study highlights the growing influence of digital marketing and social media influencers on consumer choices among students. It raises awareness among Grade 12 ABM-A learners about the purchasing of cosmetic products and the role of influencers in shaping perceptions. The research underscores how influencers enhance product visibility and consumer education, especially regarding skin sensitivity and diversity, such as products suitable for morena skin tones. The findings affirm the relevance of influencer marketing as an efficient tool in the digital promotion of cosmetics to young consumers.

Keywords: digital marketing, influencer marketing, consumer behavior, cosmetics promotion, abm students, online shopping, social media platforms, product awareness, technology-based education, skin type consideration

**EFFECTIVENESS OF TIME MANAGEMENT TOOLS IN PROJECT MANAGEMENT AT A
MICRO FINANCE COMPANY IN QUEZON CITY**

Meludy Mendez, Carmela Cornito, Shamae Hagosojos, Jerald Lucion, Jovita Francia Moralda,
Jhenny Babes Orbiso, Kimberly Joyce Embile

Abstract

This study evaluates the effectiveness of time management tools in enhancing project management within a microfinance company located in Quezon City. Specifically, it focuses on three commonly used tools, Google Calendar, Microsoft Outlook, and Google Workspace, and explores their contributions to task prioritization, performance measurement, and team collaboration. The study aims to assess how the proper application of these tools can support project success and operational efficiency in a business setting. A quantitative descriptive research design is employed to examine the influence of time management tools on project management. A total of 124 respondents are selected using purposive sampling. Data are gathered through a structured survey questionnaire and analyzed using descriptive statistics, including percentage, frequency, weighted mean, ranking, and the Likert scale. Pearson r is also used to determine the correlation between time management tool usage and project performance indicators. The findings show that time management tools significantly enhance project management effectiveness by improving task prioritization, monitoring performance, and fostering collaboration among team members. Google Calendar is effective in managing schedules and timelines, while Microsoft Outlook facilitates task prioritization and professional communication. Google Workspace proves essential for real-time collaboration and document sharing. However, the study also reveals that without proper training, employees may misuse these tools, resulting in inefficiencies and missed deadlines. The study concludes that time management tools are crucial to the success of project management within the organization. Although tools like Google Calendar, Microsoft Outlook, and Google Workspace provide measurable benefits, their impact is maximized only when users are adequately trained. The researchers recommend that the microfinance company implement structured training programs to ensure the proper use of these tools. Enhancing awareness of tool features and promoting user proficiency are essential steps toward improving task prioritization, communication, and team collaboration in future projects.

Keywords: time management tools, project management, google calendar, microsoft outlook, google workspace, task prioritization, team collaboration, performance measurement, business efficiency, microfinance company

**EFFECTS OF JOLLIBOTS TO THE CUSTOMER DINING EXPERIENCE IN
JOLLIBEE GLORIETA 4 AYALA, MAKATI CITY**

Reinzai Nicole Lau, Jelly Joyce Diaz, Johnpaul Maduro, James Saballa,
Jhunzen Salatan, Jennylene Abalos

Abstract

The integration of robotic servers, known as Jollibots, at Jollibee Glorietta 4 has enhanced operational efficiency and attracted customer attention. However, this technological innovation also presents challenges. These include possible technical malfunctions that may result in service delays or order errors, which necessitate routine maintenance and reliable technical support. Additionally, the absence of human interaction may affect customer satisfaction, highlighting the need to balance automation with personalized service. The rise of automation also raises concerns about job displacement. Nevertheless, these can be addressed through employee retraining and upskilling programs. A hybrid service model, where Jollibots operate alongside human staff, is proposed to maximize efficiency while maintaining service quality and protecting employment. This study adopts a descriptive-correlational research design to assess the impact of Jollibots on the customer dining experience at Jollibee Glorietta 4. Data will be gathered using a structured questionnaire distributed to customers who have interacted with the Jollibot system. Convenience sampling will be used to select participants from various demographic groups, including age, gender, and visit frequency. The objective is to evaluate customer perceptions of service quality, efficiency, and satisfaction in relation to robotic-assisted dining. The findings revealed that most of the customers at Jollibee Glorietta 4 were aged 18 to 21, with a higher brand preference observed among female respondents. A majority of participants were familiar with the company's corporate social responsibility (CSR) programs and reported visiting the branch twice a month. Despite the technological advancements, customer satisfaction remained variable. Product and service quality were found to have a limited direct impact on satisfaction, while factors such as friendly staff, prompt service, and cleanliness played more significant roles. Variable cost was also identified as a key determinant of overall dining satisfaction. Additionally, the study noted specific limitations at the Glorietta 4 branch, such as difficulties navigating the ordering system and limited food selections. This study assessed the impact of Jollibots on customer dining experiences and found that robotic service contributes positively to operational efficiency but requires enhancements to meet customer expectations fully. The results suggest that while robotic servers can streamline processes, the absence of human interaction may hinder the overall dining experience. A balanced approach involving both robotic and human service is recommended to address these concerns. Future strategies should focus on improving Jollibot functionality, maintaining service quality, and implementing a hybrid model that prioritizes both technological innovation and human engagement.

Keywords: jollibots, customer dining experience, robotic service, technology acceptance, service quality, human-robot interaction, automation in fast food

ENVIRONMENTAL EFFICIENCY OF HYDROPONICS (SOIL-LESS) BUSINESS

May Pimentel, Regine De Vera, Brian De Jesus, Meekaella Mora,
Ryan Louise Rodriguez, Christine Calvo

Abstract

This study examines the feasibility and profit potential of hydroponic farming, an innovative agricultural technique that replaces soil with nutrient-rich water solutions. By removing the need for arable land, hydroponics addresses key challenges faced by traditional farming, such as limited land availability, unpredictable climate conditions, and water scarcity. The research seeks to evaluate hydroponic cultivation not only as a sustainable alternative to conventional agriculture but also as a scalable, economically viable business model capable of meeting the demands of modern food production. This study employed a descriptive research design, collecting data through a combination of interviews and structured surveys administered to 30 hydroponic farmers in Quezon City, Caloocan, and Bulacan. This approach allowed the researchers to gather comprehensive insights into the participants' practices, experiences, and perceptions regarding the viability of hydroponic farming. The findings indicate that hydroponic farming offers substantial economic potential, especially in urban areas where land is scarce. Long-term profitability, however, depends on key factors such as high initial capital investment, fluctuating market demand, and spatial limitations. Despite these challenges, hydroponic farmers highlight its environmental benefits, including efficient resource utilization, reduced water consumption, and enhanced food security. Consequently, hydroponics stands out as both a viable income-generating enterprise and a sustainable agricultural alternative well-suited to the demands of modern urban development. This concludes that hydroponic farming presents a practical and sustainable alternative to traditional agriculture, offering cost-effectiveness, resource efficiency, and a minimal environmental footprint. Its adaptability to urban and land-constrained settings further highlights its potential in addressing contemporary agricultural challenges. To promote wider adoption and ensure long-term sustainability, the study recommends further research aimed at lowering capital and operational costs, exploring untapped market opportunities, and integrating advanced technologies such as smart farming systems. These innovations are vital for enhancing profitability, scalability, and the resilience of hydroponic farming in the face of evolving environmental and economic conditions.

Keywords: hydroponic farming, urban agriculture, sustainability, profitability, resource efficiency, smart farming, market opportunities, capital investment, environmental benefits, food security

**EVALUATING CLIENT-CENTERED QUALITY MANAGEMENT BASIS
FOR IMPROVEMENT PLAN**

Jella Eliana Janda, Jacobo Dela Cruz, Lorievell Elequin, Alibai Gayao,
Abegail Jean Torres, Rica Joyce Viaña, Kimberly Joyce Embile

Abstract

This study evaluates client-centered quality management as a foundation for developing an improvement plan in compliance with ISO 9001 standards. It offers insights across key dimensions of the Quality Management System, including customer focus, continuous improvement, evidence-based decision-making, and leadership commitment. A descriptive quantitative research design was adopted, involving fifty (50) randomly selected clients of the Philippine Statistics Authority. Data were primarily gathered using structured survey questionnaires. This study evaluated the client-centered Quality Management System (QMS) of the Philippine Statistics Authority (PSA), focusing on four key dimensions: Customer Focus, Continuous Improvement, Evidence-Based Decision-Making, and Leadership Commitment. Findings revealed that while respondents generally acknowledged the presence of these QMS principles, several areas still require significant enhancement. Customer Focus received the lowest weighted mean of 10.48, indicating a critical need for improved responsiveness and client engagement. In contrast, Continuous Improvement earned a score of 12.74, reflecting satisfaction with ongoing enhancements in service delivery. Evidence-Based Decision-Making was rated highly, with a mean of 3.28, suggesting effective use of data in operational decisions. Leadership Commitment garnered a score of 12.56, showing moderate agreement but signaling the need for stronger visible support from leadership. While gender did not significantly influence perceptions, both age and service type showed notable variations in client satisfaction, with older respondents and users of specific services reporting different experiences. The study recommends prioritizing service efficiency, strengthening leadership visibility and accountability, and enhancing digital communication and feedback systems to promote continuous client engagement and alignment with ISO 9001 standards. In conclusion, while competitive digital and automated self-service information systems are widely adopted, some clients remain dissatisfied with their use. Age plays a pivotal role in shaping client satisfaction: younger and middle-aged clients generally exhibit greater ease and confidence in navigating Quality Management Systems, leveraging technological tools effectively. In contrast, older clients tend to prefer traditional, manual processes and often encounter difficulties in fully recognizing and benefiting from the innovations introduced by modern technological advancements within the QMS. This generational divide highlights the need for tailored approaches that accommodate diverse user capabilities and preferences to ensure inclusive and effective quality management.

Keywords: quality management system, client satisfaction, digital self-service, automated systems, age differences, technological adoption, user experience, traditional processes, philippine statistics authority, generational gap, service improvement

**EVALUATING PRODUCTION MANAGEMENT PRACTICES OF HORAIOS:
BASIS FOR IMPROVEMENT PLAN**

Kristine Ulanday, Abigail Dalida, Abegail Delos Santos, Cyd Laguerta,
Crizel Mae Riveral, Vinalyn Sarzata

Abstract

Production management serves as a cornerstone for ensuring efficiency, quality assurance, and employee well-being in manufacturing industries. Despite holding a competitive edge in the market since 2018, Horaios Corporation, renowned for its household and skincare products, faces persistent challenges that hinder its operational effectiveness. Problems related to inventory control, workplace safety, employee compensation, and overall engagement have contributed to a noticeable decline in productivity and staff morale. This study aims to assess the current state of production management within the company, identify key areas of concern, and develop actionable strategies to streamline operations, enhance workforce satisfaction, and support long-term organizational growth. The study followed a quantitative-descriptive approach, focusing on numerical data to examine patterns and relationships. A total of 30 production employees from Horaios Corporation were selected through purposive sampling based on their direct involvement in the company's operational processes. Data collection was conducted using structured survey questionnaires designed to capture employee satisfaction and perceptions of production management practices. The responses were analyzed using frequency percentages, weighted means, and Pearson's correlation coefficient to identify trends and determine the relationship between management strategies and employee productivity. The study revealed that employees reported the highest satisfaction in areas related to meeting production quotas (weighted mean = 3.30) and receiving compensation for target achievements (weighted mean = 3.13). Conversely, the lowest levels of satisfaction were associated with work-life balance and the adequacy of feedback from management, both of which scored a weighted mean of 2.70. Correlation analysis revealed a statistically significant negative relationship between ineffective production management and employee satisfaction ($r = -0.5222$, $p = 0.0032$), suggesting that deficiencies in management practices are strongly linked to decreased employee morale. These findings highlight the critical need for enhancing workplace policies, particularly in managerial communication and employee support systems, to foster a more productive and satisfying work environment. The study concludes that optimizing production management through the adoption of automation technologies, real-time inventory tracking, and well-structured employee feedback systems holds significant potential to enhance both operational efficiency and workforce satisfaction. To address the identified gaps, it is strongly recommended that Horaios Corporation implement robust safety protocols, reevaluate and modernize its compensation schemes, and actively invest in employee engagement and development initiatives. These strategic improvements are not only vital for improving current performance but also instrumental in fostering a sustainable, high-performing, and future-ready organizational culture.

Keywords: production management, operational efficiency, employee satisfaction, automation, real-time inventory monitoring, feedback systems, workplace safety, compensation structure, employee engagement, organizational development

**EVALUATING THE IMPACT OF INVENTORY MANAGEMENT ON BIGBREW
BRANCHES IN NOVALICHES, QUEZON CITY: A STRATEGIC FRAMEWORK
FOR FINANCIAL OPTIMIZATION**

Dudes Vincent Vinluan, Nicanor Labadan, Ericka Nepomuceno, Mary Grace Montalba, Leshan Robles, Lerick Alfred Tejol, Eugenio Bayani

Abstract

Effective inventory management is crucial to the success of food and beverage businesses, as it ensures adequate stock levels, prevents losses, and supports smooth business operations. Poor inventory control can result in stockouts, overstocking, and increased operational costs. This study focuses on the inventory management practices of BigBrew in Novaliches, examining how stock monitoring, tracking systems, shortage management, supplier coordination, and cost-efficiency contribute to business performance. It also aims to identify the common challenges faced by employees and proposes strategies to improve inventory processes and overall operational efficiency. This study utilizes descriptive statistical methods, namely frequency, percentage, mean, and standard deviation, to evaluate the inventory management practices of BigBrew branches in Novaliches, Quezon City. As the research primarily aims to describe existing procedures and identify recurring issues, the use of inferential statistical techniques such as t-tests or correlation analysis is deemed unnecessary. The application of descriptive analysis ensures a comprehensive and systematic understanding of the data, offering meaningful insights that can guide improvements in inventory efficiency, cost control, and overall business performance. The study highlights significant inconsistencies in BigBrew's inventory management due to varying staff experience levels across branches. Although basic inventory checks and employee training are implemented, the absence of standardized schedules and uniform protocols leads to operational inefficiencies. Diverse tracking methods contribute to frequent stock discrepancies, while persistent stock shortages occur despite established replenishment procedures and supplier communication. Cost control efforts are uneven, with some branches incurring losses from product spoilage and expiration. Supplier coordination exists but is often undermined by delivery delays and the lack of alternative vendors, disrupting overall workflow. These issues, ranging from stockouts and overstocking to inefficiencies and inflated costs, emphasize the urgent need for a more integrated inventory system, improved forecasting accuracy, streamlined supply chain processes, and strengthened supplier reliability to enhance operational performance and profitability. The findings indicate that although inventory management systems are implemented across BigBrew branches, inconsistent execution undermines their effectiveness, resulting in recurring issues such as stock shortages, overstocking, and elevated operational costs. These outcomes reinforce existing literature that links inadequate inventory control to diminished business performance. Nonetheless, the study's limited scope, characterized by a small sample size and the exclusive use of descriptive statistical tools, constrains the depth and applicability of its conclusions. To strengthen future investigations, broader sampling and the integration of inferential statistical methods are recommended to examine correlations between inventory practices and key performance indicators. Ultimately, the study highlights the pressing need for standardized digital tracking systems, improved supplier reliability, and continuous staff training to streamline inventory operations and enhance overall organizational efficiency.

Keywords: inventory management, stock shortages, overstocking, operational costs, business efficiency, supplier coordination, digital tracking, staff training, descriptive analysis, bigbrew novaliches

**EVALUATING THE INFLUENCE OF ACCOUNTING INFORMATION SYSTEM ON
FINANCIAL PERFORMANCE OF SELECTED SMALL ENTERPRISES:
BASIS FOR PROPOSED IMPROVEMENT PLAN**

Arelle Joy Riva, Tiffany Kinkito, Rose Fallado, Marian Joy Ordiales, Arvin Miralpes, Analyn Magalso

Abstract

Technological advancements have revolutionized Accounting Information Systems (AIS), transforming them into powerful tools that drive operational efficiency and support strategic decision-making. What once relied on manual bookkeeping has now transitioned to sophisticated computerized and cloud-based platforms, significantly reducing the risk of data loss and enhancing real-time access to financial information. Modern AIS seamlessly integrate key business processes, such as inventory management, billing, financial accounting, and order processing, into a centralized system. This integration not only improves accuracy and workflow coordination but also mitigates issues like inventory mismanagement and potential revenue loss, ultimately contributing to better financial control and organizational performance. This study adopts a descriptive quantitative research design, involving ten (10) employees selected through simple random sampling to ensure unbiased representation. Data collection is conducted using a carefully developed and validated survey questionnaire, which serves as the primary instrument. This approach facilitates the systematic and objective measurement of variables relevant to the study's aims, enabling reliable and generalizable insights. The survey findings reveal that a substantial portion of respondents are aged 25 and above, comprising 48% of the sample, with most falling within the 25–34 age bracket. Age is identified as a significant demographic variable influencing customer behavior and usage patterns. In examining the challenges faced by medium-sized enterprises in implementing Accounting Information Systems (AIS), several critical factors emerged: the absence of reliable vendors, concerns regarding data security and privacy, inadequate training and professional development programs, the considerable cost associated with AIS software acquisition and deployment, and a general lack of technical expertise among employees. Among these barriers, the predominant issue is the pressing need for enhanced employee training and competency development in AIS-related technologies. Although the high cost of AIS software and implementation remains a notable obstacle, it was reported as the least influential factor compared to others. Table 3.2 presents data on factors affecting AIS adoption through the lens of Perceived Ease of Use. Respondents predominantly perceive AIS as facilitating task completion with minimal effort, attributing this to the system's user-friendly interface. This underscores the importance of rigorous usability testing to ensure intuitive system design. Moreover, elements such as system usability, data accuracy, comprehensive training, and strong organizational support play pivotal roles in fostering user satisfaction and optimizing individual performance. The role of Accounting Information Systems (AIS) in shaping the financial performance of small enterprises has become increasingly pivotal within today's dynamic and competitive business landscape. Small businesses, often constrained by limited financial and human resources, rely heavily on efficient financial management practices to sustain operations and foster growth. An effective AIS not only streamlines core accounting and operational workflows but also enhances the accuracy and reliability of financial reporting. Furthermore, it provides timely access to critical financial data, empowering business owners and managers to make informed, strategic decisions that can improve profitability, optimize resource allocation, and ensure long-term viability.

Keywords: accounting information systems (ais), financial performance, small enterprises, financial management, decision-making, operational efficiency, financial reporting, business sustainability

**EVALUATING THE LEADERSHIP STYLE OF OFFICERS IN A GOVERNMENT
AGENCY: BASIS FOR IMPROVEMENT PLAN**

Natasha Nabaunag, Juliana Dino, Trecia Muñoz, Jan Arth Adrian Novejas,
Glodane Quiruz, Kimberly Joyce Embile

Abstract

This study aims to evaluate the leadership styles exhibited by officers within a government agency, serving as the foundation for a targeted improvement plan. Drawing on Kurt Lewin's Leadership Framework, the research focuses on three primary leadership styles: autocratic, democratic, and laissez-faire. The study's central objective is to investigate the impact of these distinct leadership approaches on employee productivity, thereby providing insights to enhance organizational effectiveness. This study utilized a quantitative descriptive research design to investigate the relationship between leadership styles and employee productivity. A total of sixty (60) respondents were selected through a random sampling method to ensure unbiased representation. Data were collected via a carefully structured survey questionnaire designed to capture relevant variables effectively. Descriptive statistical techniques, including percentages, frequencies, weighted means, and rankings, were employed to summarize the data. Additionally, respondents' perceptions were measured using a Likert scale. To assess the strength and significance of the association between leadership styles and employee productivity, Pearson's correlation coefficient (Pearson r) was applied. This comprehensive analytical approach allowed for a nuanced understanding of the impact of different leadership styles on workforce performance. The findings of this study substantiate the significant influence of leadership styles on employee productivity. Democratic leadership was identified as the most effective approach, as it fosters employee participation, facilitates transparent communication, and encourages constructive feedback, thereby enhancing motivation and performance. In contrast, autocratic and laissez-faire leadership styles were found to detrimentally affect employee engagement and productivity, largely due to their restrictive involvement and lack of consistent direction. The study underscores the importance of comprehensive leadership development programs, including coaching and mentorship, as pivotal strategies to cultivate leadership competencies, support employee growth, and ultimately improve organizational productivity. The findings indicate that embracing a democratic leadership style can substantially improve organizational outcomes by fostering inclusive decision-making, effective mentorship, and transparent communication, which collectively contribute to heightened employee productivity. Conversely, autocratic and laissez-faire leadership approaches were shown to undermine productivity by limiting employee involvement and failing to provide consistent guidance. In light of these insights, the study strongly recommends that government agencies adopt democratic leadership frameworks that prioritize open dialogue and mentorship programs to boost employee engagement and performance. Ultimately, this research underscores the pivotal influence of leadership styles on employee productivity and advocates for the strategic adoption of democratic leadership to enhance overall organizational effectiveness and resilience.

Keywords: democratic leadership, autocratic leadership, laissez-faire leadership, employee productivity, leadership development, government agencies, mentorship, communication, organizational effectiveness, employee engagement

**EVALUATING THE ONLINE ENROLLMENT ON STUDENT SATISFACTION AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Shaiina Mantiza, Sarah Lalangan, Lyca Mae Morales, Karen Hazel Ponilas,
Kristine Mae Ubag, Kimberly Joyce Embile

Abstract

The transition from traditional paper-based to online enrollment systems has significantly influenced student experiences in higher education institutions. At Bestlink College of the Philippines, the online enrollment system was introduced to streamline administrative tasks and enhance accessibility for students. However, the extent to which this system satisfies students' needs and expectations remains uncertain. This study aims to evaluate the effectiveness of the online enrollment system in terms of accessibility, usability, technical support, efficiency, and overall student satisfaction. This study uses a quantitative research approach employing a descriptive-correlational design. A structured survey questionnaire was administered to fifty (50) randomly selected students from Bestlink College who have utilized the online enrollment system. The instrument was designed to measure perceived system performance and corresponding satisfaction levels. Statistical tools such as frequency distribution, weighted mean, and Pearson correlation coefficient were applied for data analysis and interpretation. The findings indicated that while the online enrollment system offers convenience and supports administrative efficiency, technical issues and limited user assistance affect its overall effectiveness. The correlation analysis revealed a weak relationship between enrollment system efficiency and student satisfaction. This suggests that student satisfaction may be influenced more by administrative support and communication practices than by the technical performance of the system alone. The study concludes that although the online enrollment system performs adequately across various functional areas, its influence on student satisfaction is limited. The results emphasize that institutions must not only focus on system functionality but also strengthen user assistance and administrative responsiveness. It is recommended that Bestlink College address the existing technical challenges and enhance user support to ensure a more satisfying enrollment experience for students.

Keywords: online enrollment, student satisfaction, system accessibility, technical support, administrative services, descriptive-correlational study, bestlink college of the philippines

**EVALUATION IN OFFICE DESIGN AND ITS IMPACT ON EMPLOYEES'
PRODUCTIVITY AT XY COMPANY IN MANDALUYONG CITY**

Geracel Sumalinog, Khryisia Camille Leonardo, Sherlyn Joy Raval, Shaina Tabinas,
Dharlene Uy, Kimberly Joyce Embile

Abstract

Office environments play a critical role in shaping employee behavior, influencing productivity, engagement, and job satisfaction. The design of office spaces affects how individuals perform their tasks, maintain focus, and interact with their surroundings. This study aims to evaluate the extent to which office design impacts employee productivity at XY Company in Mandaluyong City. Specifically, the research examines how office layout, furniture, and technology contribute to employee performance. The hypothesis is that a well-organized and ergonomically supportive workspace promotes greater motivation and efficiency among employees. The study utilizes a descriptive and quantitative research design to gather numerical data from twenty-five employees through survey questionnaires. A nonprobability purposive sampling method was applied to select participants with relevant experience and familiarity with the work environment. The researchers used the Pearson correlation coefficient to determine the statistical relationship between elements of office design and employee productivity. The findings revealed that most of the respondents were female, aged 25 to 34, and held administrative positions. The office layout at XY Company was perceived as supportive of collaboration but presented challenges in terms of accessibility. Employees reported that organized workspaces and ergonomic furniture contributed positively to their comfort, though improvements were suggested in the areas of workspace personalization, technological efficiency, and minimizing distractions. Statistical analysis showed a weak correlation ($r = 0.1937$) and a p-value of 0.231072, indicating no significant relationship between office design and employee productivity. Despite the lack of a statistically significant correlation, the findings suggest that office design still plays an important role in employee satisfaction and workplace efficiency. Recommendations include revising the current layout to improve accessibility, enhance movement flow, and reduce workplace distractions. An improvement plan is proposed to support a more conducive work environment that may lead to better overall employee performance and morale.

Keywords: office design, employee productivity, workplace ergonomics, office layout, organizational efficiency, technology integration, employee satisfaction

**EXAMINING THE IMPACT OF KEYBOARDING SKILLS TO THE PERFORMANCE OF
OFFICE ADMINISTRATION INTERNS IN QUEZON CITY:
HIGHER EDUCATION INSTITUTION**

Mark Joseph Pabaya, Justine Clair Emotin, Jasmine Fulo, Desiree Hisarza,
Alessandra Juliet Reyes, Bryan Tubao

Abstract

In the digital era, keyboarding has become a fundamental skill, particularly for students pursuing a Bachelor of Science in Office Administration (BSOA). This skill plays a vital role in completing various academic and professional tasks, including email correspondence and digital documentation. Mastery of keyboarding enhances computer efficiency and overall performance in the workplace. However, many students continue to struggle with proper techniques, such as hand positioning and accurate typing methods. This study aims to examine the impact of keyboarding skills on the performance of fourth-year BSOA interns and highlight its significance in preparing students for the demands of modern office environments. This study employs a quantitative research design. Data were gathered using a validated survey questionnaire that included items relevant to assessing the keyboarding proficiency of the respondents. A total of 155 participants, primarily female and aged between 18 to 25 years old, were selected through non-probability convenience sampling. The data were analyzed using statistical tools such as percentage, weighted mean, and Likert scale to determine trends and measure the respondents' typing proficiency and perceived performance outcomes. The findings indicated that students with higher keyboarding proficiency demonstrated improved efficiency, accuracy, and adaptability when using digital tools. These students also exhibited greater self-confidence, motivation, and readiness for real-world office tasks. Furthermore, the study found that access to quality training programs and alignment with employer expectations influenced interns' performance evaluations, job placement, and potential for career advancement. The results underscore the importance of keyboarding skills as a critical competency in today's fast-paced office environments. Interns with strong keyboarding abilities adapt more effectively to technological systems, contribute more efficiently to organizational tasks, and meet professional standards with greater ease. These skills are especially valuable in roles requiring precision in documentation, data management, and digital communication. In response to these findings, the study recommends integrating advanced keyboarding instruction and digital performance assessments into higher education curricula to better prepare students for workforce demands.

Keywords: keyboarding skills, office administration, digital proficiency, internship performance, workplace readiness, higher education, typing accuracy, digital communication

**EXAMINING THE RELATIONSHIP BETWEEN OFFICE SPACE DESIGN AND
EMPLOYEES PRODUCTIVITY AT BRGY. PAYATAS B**

Romelyn Segun, Aldrin Asoy, Ma Andrealyn Basista, Manuela Rose Bataanon,
Mac Jocel Lactao, Bryan Tubao

Abstract

The purpose of this study is to examine the relationship between office space design and employees' productivity at Brgy. Payatas B. This study determines the demographic profile of the respondents and the factors that affect employees' productivity in terms of ergonomics and comfort, lighting and ventilation, acoustic design, and aesthetic appeal. Many organizations invest heavily in office spaces to keep up with a fast-paced environment but fail to measure or create plans that fully address the factors that influence employees' satisfaction. Office spaces in local government units such as barangay offices face similar issues. This is particularly significant in areas with limited resources, such as Brgy. Payatas B, where improvements in office space design can greatly enhance employee productivity and overall community service delivery. This study utilized a correlational quantitative research method and purposive sampling. The researchers conducted the study with 30 Brgy. Payatas B employees using a survey questionnaire. The collected data were analyzed using statistical methods such as frequency and percentage, ranking, weighted mean, and ANOVA. The results indicate that 22 out of 30 employees were female, mostly aged 48–53 years and above, and employed on a contractual or co-term basis. The three most encountered challenges in terms of office design were uncomfortable seating that caused back pain, poor ventilation that made the air stuffy and uncomfortable, and inconsistent temperature, often too hot or too cold for comfort. It was also found that office space design and employees' productivity had no significant relationship. The researchers respectfully recommend the following: Brgy. Payatas B may provide age-friendly measures such as ergonomic work arrangements. Since the employees are mostly women, the barangay office may also pursue wellness activities, flexible arrangements, and leadership development to create an inclusive work environment. Additionally, enhancing chairs and tables may help prevent fatigue from prolonged working hours. Although the study did not find a significant relationship between office space design and employees' productivity, this does not lessen the necessity of ensuring that the office environment remains well-planned, comfortable, and conducive to productivity.

Keywords: acoustic design, aesthetic appeals, employees productivity, ergonomics and comfort, correlational quantitative, office space design, lighting and ventilation, purposive sampling

**EXAMINING THE ROLE OF COMMUNITY PARTICIPATION IN BARANGAY POLICIES
IN CALOOCAN CITY: BASIS FOR PROPOSED INTERVENTION STRATEGY**

Ma Julian Culpa, Juliana Gwenyth Alcisto, Janice Dionisio,
Rinoah Appleen Opilac, Junela Rogas, Bryan Tubao

Abstract

This study examines community participation in barangay policies in Caloocan City as a basis for a proposed intervention strategy. It focuses on residents' engagement in policies on pet ownership, curfew, and parking. Demographic factors such as age, gender, and monthly income were considered in analyzing awareness and participation levels. The goal is to identify gaps in policy awareness and enforcement and propose strategies to strengthen community involvement in barangay governance. A descriptive research design was used, employing survey questionnaires as the main data-gathering tool. The survey involved thirty (30) residents of Barangay 167, Llano, selected based on availability and willingness to participate. The questionnaire collected demographic data and assessed awareness, participation, and perceived challenges related to barangay policies. Most respondents were female, aged 18–25, with a monthly income below ₱10,000. They showed high awareness of pet ownership and curfew policies but only moderate awareness of parking regulations. Although respondents were generally willing to comply, several issues hindered participation, including unclear communication, limited involvement opportunities, inconsistent enforcement, difficulty understanding certain policies, and lack of updates from barangay officials. The study reveals a gap between community awareness and participation in barangay policies. To address this, it proposes interventions such as educational seminars, informational materials, and community events like free pet vaccinations and health drives. For curfew policy awareness, posters, social media campaigns, and barangay meetings are recommended. To address illegal parking, improved signage, designated parking maps, and greater involvement of barangay officials are suggested. These strategies aim to build a more informed, participative, and cooperative community supporting barangay governance.

Keywords: community participation, barangay policies, caloocan city

**EXPLORING THE HEALTH BENEFIT OF MALUNGGAY AS HEALTHY ALTERNATIVE
MALUNGGAY CHIPS FOR THE COMMUNITY IN SAN JOSE DEL MONTE**

Shyrille Brigatay, Rovie Bulanadi, Justyne Dela Cruz, Trinity Alysa Magtanong, MJ Eufriel Santiago,
Feliz Marie Tolentino, Romeoul Karl Flores

Abstract

Malunggay, or *Moringa oleifera*, is a widely known vegetable in the Philippines, often found growing in backyards. It is recognized for its high nutritional value and has traditionally been used to reduce inflammation and pain. It is also known to provide benefits in managing conditions such as asthma and diabetes and is especially popular among mothers for its ability to support breastfeeding. Given its medicinal and nutritional properties, this study explores the potential of malunggay as a primary ingredient in the development of a healthy snack alternative in the form of malunggay chips for the community of San Jose del Monte. This study employs an experimental research design to investigate the relationship between independent and dependent variables, specifically to determine the cause-and-effect benefits of malunggay chips as an alternative snack. The research evaluates the product's sensory qualities and consumer acceptability, with a focus on its appeal to children and adults. Data were collected through surveys that measured appearance, taste, texture, satisfaction, and challenges in consumption. The findings revealed that malunggay chips were perceived as a healthy and appealing snack alternative with high acceptability across various age groups. Respondents strongly agreed that the chips resembled traditional chips in appearance, texture, and taste. Most respondents expressed high levels of satisfaction, noting the malunggay chips' unique yet familiar flavor profile. The chips were particularly favored for their crispiness and balanced taste, which contributed to their positive reception. The results suggest that the malunggay chips have strong potential as both a nutritious snack and a viable business product. This study highlights the potential of malunggay chips as a healthy snack alternative that is well-accepted by children, teenagers, and adults. The high satisfaction ratings among respondents indicate that malunggay chips can meet consumer expectations in terms of taste, texture, and nutritional value. The product is especially beneficial for children and seniors, who require nutrient-rich food options. Despite minor challenges, such as acceptability among picky eaters, the overall reception was positive. The malunggay chips were recognized not only for their health benefits but also for their market potential, making them a promising innovation in the healthy snack industry.

Keywords: malunggay chips, healthy snack, *moringa oleifera*, nutritional benefits, consumer satisfaction, experimental research, san jose del monte, food innovation, alternative chips, business potential

**EXPLORING THE POTENTIAL OF COCONUT HUSK AS AN ALTERNATIVE
MATERIAL FOR AESTHETIC BAG BUSINESS**

Jay Jasareno, Chynna Alonzo, Riamin Jane Cas, Chen Tauli, Jennilyn Salva,
Glenn Rusiana, Christine Calvo

Abstract

This study investigates the potential of coconut husk, an abundant and underutilized agricultural waste product, as a sustainable and aesthetically appealing alternative material for the bag manufacturing industry. The research is driven by increasing environmental concerns over the continued use of synthetic and non-biodegradable materials in fashion and retail. The aim is to assess the practicality, visual appeal, and market feasibility of using coconut husk in producing eco-friendly bags. The researchers adopted a descriptive-experimental research design, utilizing both qualitative and quantitative data collection methods. A structured questionnaire was distributed to a purposive sample of fifteen respondents, ten fourth-year BS Entrepreneurship students and five local craftsmen, chosen for their background in business innovation and bag craftsmanship. Data were analyzed using statistical tools such as frequency distribution, weighted mean, and t-tests to determine any significant differences in perception between the two respondent groups regarding the material's feasibility and marketability. The results revealed that coconut husk presents a feasible and practical option for bag production, particularly when enhanced for visual appeal and structural durability. Both respondent groups acknowledged the potential of coconut husk as a sustainable material. The study also identified a growing market interest in eco-conscious fashion products and emphasized the importance of product innovation and design in boosting the material's commercial appeal. The study underscores the viability of coconut husk as an alternative raw material in the fashion industry. It highlights the need for further development in terms of improving the durability, design flexibility, and aesthetic features of coconut husk-based bags. The findings encourage entrepreneurs and product developers to pursue sustainable practices and contribute to eco-friendly fashion innovations. The proposed use of coconut husk offers a promising direction for small-scale enterprises aiming to align business with environmental advocacy.

Keywords: coconut husk, sustainable material, aesthetic bags, eco-friendly fashion, market feasibility, green innovation

**FACTORS AFFECTING THE SALES PERFORMANCE OF KRISTAL-G RISTORANTE:
PROPOSED IMPROVEMENT PLAN**

Maria Cristina Rodulfo, Patricia Lynesse Cabading, John Lemon Rome Encinas,
Anthony James Francisco, Mark Anthony Somido, Vinalyn Sarzata

Abstract

This study explores the challenges affecting the sales performance of Kristal-G Ristorante. It aims to identify key factors such as service or product quality, pricing, location, promotion, customer service, competition from new establishments, more affordable alternatives, and the growing popularity of food delivery services. Kristal-G Ristorante was founded by Chef Girlie D. Queddeng in December 2011 in Rodriguez, Rizal, offering Filipino and Italian cuisines. After relocating twice, the restaurant settled at Daang Bakal Balite in 2019. In response to competition and the COVID-19 pandemic, the restaurant expanded its offerings to include pastries and milk teas, improved its online presence through Facebook, and provided delivery options via platforms like Grab and FoodPanda. It also upgraded its interior to enhance customer experience and hosted private events such as birthdays, weddings, and corporate functions. This study utilizes a quantitative-descriptive research design with simple random sampling to gather data from 78 customers in Rodriguez, Rizal. It is anchored on Hilal Cokeli's (2023) theory, which emphasizes the importance of the 5Ps of marketing, product, price, place, promotion, and people, as foundational strategies for improving business sales performance. A researcher-made and validated survey questionnaire was used to assess customer perceptions of these factors. The analysis revealed that customers rated the restaurant's marketing elements favorably. Among the 5Ps, staff and service (people) received the highest overall mean of 3.59, while the lowest observed mean was 3.45. Pricing had a mean score of 3.54, indicating customer satisfaction with value for money. The restaurant's location (place) was rated moderately, with an overall mean of 3.50. Promotional efforts received a highest mean of 3.56, suggesting some effectiveness, although visibility and reach remain areas for enhancement. The study recommends several strategies to improve Kristal-G Ristorante's sales performance. These include developing promotional campaigns targeting middle-aged and female customers, enhancing the ambiance and food quality, offering fair and competitive pricing, improving accessibility and parking, and ensuring a safe, comfortable environment. Staff training should focus on product knowledge and efficient service. Operational improvements such as ingredient preparation and kitchen workflow optimization are advised to reduce wait times. Increasing social media presence and launching limited-time menu offerings are also suggested to attract and retain customers.

Keywords: sales performance, marketing strategies, 5ps, restaurant management, customer satisfaction, business improvement, food industry

**FACTORS OF SELLING FLOWER TO FLORAL INDUSTRY IN
NOVALICHES QUEZON CITY**

Jade Balbuena, Lhyza Keith Ansotigue, Saipoding Boga, Shamebert Gutang,
Rosanna Raagas, Don Solomon Santander, Christine Calvo

Abstract

This study aims to assess the sustainability of the floral industry by examining consumer perceptions and purchasing practices in Novaliches, Quezon City. It seeks to analyze how varying pricing strategies influence consumer decisions in choosing among different types and qualities of flowers. The study also explores how affordability, customization, and sustainable practices impact customer satisfaction and the overall viability of flower businesses in the area. A descriptive research design was employed, utilizing convenience cluster sampling to gather data from 30 flower shop owners in Novaliches, Quezon City. The data collection instrument was a structured questionnaire designed to evaluate consumer preferences, satisfaction, and the shop owners' sustainable practices. The findings revealed that transparency in pricing and offering affordable options, such as smaller yet visually appealing flower arrangements, received the highest mean score (3.9). This was followed by the preference for bouquet personalization, including the ability to select specific flower types, colors, and vase styles, with a mean score of 3.8. Sustainable practices, such as transitioning to organic farming and using natural pest control methods, also received a mean score of 3.8. Based on the results, shop owners observed that customers preferred cost-effective yet high-quality products. Many owners responded to this preference by offering discounts and promoting personalized arrangements. The data suggests that a successful pricing strategy in the floral industry combines cost management, competitive pricing, and quality customer service. Based on the results, it is recommended that flower shop owners lower material costs to make prices more accessible to customers. Offering promotional discounts can enhance pricing strategies and attract more buyers. Moreover, engaging with customer feedback provides valuable insight into improving products and strengthening customer relationships. Finally, educating new customers on proper product use may further enhance their perception and satisfaction, contributing to the sustainability and growth of floral businesses in Novaliches, Quezon City.

Keywords: floral industry, consumer perception, pricing strategy, customer satisfaction, sustainability, organic practices, personalization, flower shop, novaliches, quezon city

**FACTORS OF SERVICE QUALITY TOWARDS CUSTOMER SATISFACTION OF
QUICKIE LAUNDRY SHOP IN MALIGAYA, CALOOCAN CITY**

Joaquin Jay Pee, James Dave Garcia, Angela Juab, Niño Mar Macasojot,
Jeanina Erika Tañgalin, Cheryl Tupaz, Vinalyn Sarzata

Abstract

Quickie Laundry Shop, located in Maligaya, Caloocan City, aims to deliver high-quality, affordable, and efficient laundry services. With the tagline “Finish your laundry within 75 minutes,” the shop promotes both speed and excellence in service. However, as customer demand increases, various service issues have emerged, including inconsistent quality, insufficient manpower, and prolonged waiting times. These challenges suggest a deviation from the shop’s core mission of providing reliable service. Factors such as equipment efficiency, staffing, and operational systems may contribute to the declining service quality. This study aims to identify the service quality factors that influence customer satisfaction at Quickie Laundry Shop and to develop a targeted action plan to address these issues and improve overall service delivery. This study uses a correlational-quantitative research design to examine the relationship between service quality and customer satisfaction. A purposive sampling technique was applied, involving 20 regular customers of Quickie Laundry Shop as respondents. Data were collected through survey questionnaires and analyzed using statistical tools including the Likert Scale, frequency and percentage, weighted mean, and Pearson Correlation Coefficient. The findings revealed that the majority of respondents were female, aged 23 to 30 years old, and visited the laundry shop on a weekly basis. Within the reliability dimension of service quality, long waiting times and limited operating hours emerged as the most frequently cited issues. Statistical analysis showed a weak positive correlation between service quality and customer satisfaction, indicating that while service quality does influence satisfaction, other factors may also play a role. To address the issues identified, the researchers proposed an action plan centered on the 4M’s: Machine, Manpower, Method, and Materials. Recommendations include increasing the number of machines, hiring additional staff, providing standardized training and uniforms for employees, scheduling monthly machine maintenance, and extending the shop’s operating hours. These strategies aim to improve service efficiency, enhance customer satisfaction, and realign the laundry shop with its original promise of quality and speed.

Keywords: service quality, customer satisfaction, laundry business, quick service, 4m analysis, operational efficiency, correlational study, caloocan city

**FACTORS THAT INFLUENCE NON-BOARD GRADUATES IN PURSUING
PROFESSIONAL CERTIFICATION: FOR CAREER ADVANCEMENT**

Angelica Labro, Crizza Mae Bation, Darrell Gamboa, Joana Pascua, Aine Key Salonga,
Jenelyn Sosa, Bryan Tubao

Abstract

Professional certification plays a vital role in shaping career trajectories, particularly for non-board graduates, those whose academic programs do not require a licensure examination. In the absence of such credentials, professional certifications often serve as key indicators of competence and employability. Gaining a deeper understanding of how these certifications influence employment prospects can aid in developing a comprehensive framework to guide future graduates of business programs. However, existing research on the relationship between the factors that drive the pursuit of professional certification and its impact on employability remains limited. This study aims to explore the key factors that influence non-board graduates from higher education institutions (HEIs) in Quezon City to pursue professional certifications. Ultimately, the research seeks to contribute valuable insights toward supporting career advancement and improving job readiness among entry-level graduates. This study will employ a quantitative-descriptive research design to assess the role of professional certifications in enhancing career opportunities for graduates of non-board programs. To obtain relevant data, the researchers will use convenience sampling to select 20 alumni from business-related programs who have acquired professional certifications. These respondents will provide valuable insights into how certification has influenced their employability and career progression. The findings will serve as a foundation for understanding the practical value of professional certification as a career advancement tool for non-board graduates. The analysis of the gathered data revealed a significant relationship between the factors influencing the pursuit of professional certification and its impact on the current employment status of non-board graduates from Bestlink College of the Philippines. The findings indicate that respondents overwhelmingly agreed that accessibility to training programs and certification resources has played a critical role in equipping them with the necessary skills and competencies for their current roles. These results underscore the importance of professional certification in bridging the gap between academic qualifications and industry demands, ultimately enhancing the employability and career readiness of non-board program graduates. To empower non-board graduates in navigating the competitive job market, strategic and practical recommendations have been identified. First, non-board students are encouraged to obtain professional certifications while still in college, as doing so allows them to take advantage of recently learned concepts and increases their chances of passing. Second, students should select certifications that align with their intended career paths. This ensures relevance, prevents wasted time and expenses, and maximizes the long-term value of the credential. Lastly, non-board graduates should follow a well-structured career roadmap specifically designed for entry-level professionals. This guide will provide clear, step-by-step directions for entering their chosen fields. By implementing these strategies, non-board graduates can overcome the challenges of pursuing professional certifications and position themselves more competitively in the workforce.

Keywords: non-board graduates, professional certification, employability, career planning, job market, entry-level guide, skill development, strategic recommendations, assessment preparation, competitive advantage.

**FROM WASTE TO WONDER: EVALUATING THE PERCEIVED EFFICACY OF
DRAGON FRUIT PEELS IN HIGHLIGHTER PRODUCTION**

Jasmine Saturay, Dionilo Pino, Sharlyn Paderna, Patrice Dominique Vargas,
Rimpy Kumar, Jasmine Azul, Christine Calvo

Abstract

This study investigates the viability of utilizing dragon fruit peels, an often discarded agricultural byproduct, as a sustainable and eco-friendly alternative to traditional highlighter ink. Through purposive sampling, feedback was collected from teachers and fourth-year BS Entrepreneurship students. The findings revealed a significant difference in the evaluations of the two groups, particularly in terms of the ink's perceived effectiveness, environmental sustainability, and texture. These results highlight the potential of repurposing agricultural waste while also emphasizing the need for further refinement based on user feedback. The researchers adopted a descriptive-experimental research design and employed a survey questionnaire alongside purposive sampling to collect relevant data. The study involved a total of twenty respondents, comprising ten teachers and ten fourth-year BS Entrepreneurship students, all of whom were selected based on their direct relevance and contribution to the objectives of the research. The results of the study reflect the assessments of two respondent groups, teachers and fourth-year BS Entrepreneurship students, regarding the perceived efficacy of dragon fruit peels as a component in highlighter production, evaluated in terms of effectiveness, sustainability, and texture. In terms of effectiveness, the highlighter was noted to produce a vibrant and noticeable color on paper. For sustainability, respondents recognized that the ink formulation does not contain harmful chemicals, making it environmentally friendly. Regarding texture, the ink was observed to adhere smoothly across different types of paper. The overall weighted mean score from the teachers was 3.453, while the students reported a slightly higher mean of 3.767. A t-computed value of 2.207 was obtained, with 29 degrees of freedom, and a significance level (α) of 0.05. Given that the t-computed value exceeded the t-critical value of 2.045, the null hypothesis was rejected. This indicates a statistically significant difference in the evaluations of the two groups concerning the highlighter's effectiveness, sustainability, and texture. It is also noted that while the respondents were equally distributed by occupation (50% teachers and 50% students), there was an unequal distribution in terms of sex. Based on the findings, the researchers recommend the potential commercialization of highlighter pens formulated with dragon fruit peel extracts. A significant majority of the respondents expressed strong agreement regarding the highlighter's efficacy, particularly in terms of effectiveness, producing vibrant and visible markings, sustainability, being free from harmful chemicals and environmentally friendly, and texture, offering smooth application across various paper types. To further improve the product's quality and user experience, future research and development efforts are encouraged, specifically focusing on enhancing the consistency, formulation stability, and overall composition of the ink.

Keywords: dragon fruit peel extract, highlighter ink, effectiveness, sustainability, texture, ink consistency, eco-friendly product, commercialization, natural dye, product development.

**IMPACT OF AI-POWERED DECISION-MAKING ON BUSINESS INDUSTRY
EFFICIENCY: BASIS FOR PROPOSED AI-ASSISTED STRATEGIC PLANNING**

Lobos Ma Elaiza, Xyra Suangco, Rolando Brian, Stephanie Collado,
Ferlyn Mae Quilang, Analyn Magalso

Abstract

This chapter presents a study conducted at Teleperformance that explores the enhancement of AI-assisted strategic planning. The research underscores the growing role of artificial intelligence in business decision-making, while also acknowledging key challenges such as data bias and limited transparency in AI processes. One significant issue identified is the absence of a unified dashboard to effectively consolidate and present AI-generated insights. To address this gap, the study proposes the development of a predictive analytics dashboard designed to align AI outcomes with organizational goals, streamline decision-making, and drive operational growth and efficiency. This chapter details the research methodology utilized to examine the role of artificial intelligence in strategic business planning. A quantitative-descriptive research design was employed to gather empirical data. The study involved 133 respondents, primarily composed of corporate professionals and key decision-makers who actively implement AI in strategic processes. Using purposive sampling, participants were selected based on their expertise and direct involvement with AI integration. Data were collected through a structured survey consisting of three key sections: factors influencing AI-driven planning, the impact of AI on decision-making, and challenges in AI adoption. This approach ensured the acquisition of precise and relevant insights into how AI shapes modern strategic planning in the corporate sector. The study found that most of the 133 respondents from Teleperformance are young professionals aged 18 to 34, predominantly employed in customer service roles, and with relatively short tenure in the company. While participants acknowledged that artificial intelligence significantly enhances decision-making accuracy and operational efficiency, they also highlighted several key challenges to its integration in strategic planning. These challenges include concerns over data privacy, resistance to change within the organization, and a lack of sufficient knowledge or training in AI applications. The study concludes that although most Teleperformance employees are young professionals at the early stages of their careers, the effective integration of AI into strategic planning demands targeted training and inclusive mentorship programs. Perceptions of AI-driven decision-making are significantly shaped by concerns about data privacy, safety, fairness, and trust, with varying degrees of influence depending on employees' roles and experience levels. To ensure successful AI adoption, it is essential to address organizational challenges such as readiness, knowledge gaps, and data security. Moreover, cultivating a culture that values transparency, innovation, and inclusivity will be crucial in maximizing AI's strategic potential within the organization.

Keywords: ai integration, strategic planning, teleperformance, young professionals, data privacy, employee perception, organizational readiness, mentorship, innovation, inclusivity, trust, training.

**IMPACT OF CONTINUING EDUCATION IN THE EMPLOYABILITY AND
CAREER ADVANCEMENT OF BSOA GRADUATES**

Karen Aggabao, Sheryl Ajeas, Rachel Bordallo, James Ferrer,
Ara Mae Larga, Kimberly Joyce Embile

Abstract

In today's highly competitive professional landscape, it is essential for individuals to continuously sharpen their skills to remain relevant and advance in their careers. This study investigates the relationship between continuing education and career development among graduates of the Bachelor of Science in Office Administration (BSOA) program. It emphasizes the importance of lifelong learning as a key factor in achieving career growth. The research focuses on evaluating how skill enhancement through further education influences employability, salary progression, and opportunities for promotion. This study utilized a quantitative research design to collect data from graduates of the Bachelor of Science in Office Administration (BSOA) program through survey questionnaires. The data were statistically analyzed to identify the relationship between continuing education and career development. The study examined various factors, including demographic profiles, forms of continuing education undertaken, skills acquired, work-life balance, and opportunities for professional networking. The findings indicate that BSOA graduates participating in continuing education are predominantly young professionals in the early stages of their careers. Corporate training and professional development programs were identified as the most frequently pursued educational avenues. Respondents emphasized the importance of enhancing communication, leadership, and technical skills as primary motivations. Additionally, they reported that continuing education contributed to improved job opportunities, higher salary prospects, and greater career satisfaction. Networking opportunities also played a crucial role in supporting their professional development. This study underscores the positive effects of continuing education on career advancement, emphasizing the importance of integrating industry-relevant training with flexible learning within BSOA programs. It recommends revising the curriculum to incorporate greater alumni engagement and establishing professional development initiatives that support graduates in their lifelong learning journey. Cultivating this supportive environment provides BSOA graduates with a competitive advantage, fostering both continuous growth and resilience in an ever-evolving labor market.

Keywords: continuing education, career development, bachelor of science in office administration (bsoa), lifelong learning, employability, skill enhancement, professional development, networking, curriculum development, labor market resilience

**IMPACT OF FLEXIBLE WORK ARRANGEMENTS ON EMPLOYEE PERFORMANCE IN
A CORPORATE OFFICE IN QUEZON CITY**

Lumapas Grace Ann, Reza Flores, Ricalene Lavarro, Liezl Ombao, Justine Platitas,
Paula Mae Ruetas, Bryan Tubao

Abstract

The evolving workplace culture has prompted many organizations to implement flexible work arrangements (FWAs) such as telecommuting, flextime, blended models, and compressed workweeks. These shifts raise important questions about their impact on employee performance, particularly in vibrant urban centers like Quezon City. This research explores how FWAs affect employee output, productivity, and the ability to meet deadlines within a corporate environment. This study utilized a descriptive quantitative research design and purposive sampling to gather data from 40 employees at Sagility Philippines, a corporate office located in Quezon City. Data were collected through a validated survey questionnaire comprising demographic information and performance-related items. Statistical analyses, including frequency, percentage, weighted mean, and one-way ANOVA, were conducted to determine significant differences in employee performance across demographic and job-related variables. The findings indicate that flexible work arrangements (FWAs) positively affect employee performance, particularly in task completion and quality of output. Flextime emerged as the preferred schedule, followed by the hybrid work model. Employees consistently reported higher efficiency and greater autonomy under these arrangements. However, common challenges included poor internet connectivity, delayed communication, and insufficient feedback. Statistical analysis revealed significant variations in performance based on age, years of service, department, performance rating, and job function. Employees with higher performance ratings and those in administrative roles exhibited notably better results in output, efficiency, and deadline adherence. The findings indicate that flexible work arrangements (FWAs) can improve employee performance when effectively managed. However, their impact varies based on demographic factors and job roles. To sustain performance, organizations should implement formal FWA policies, provide continuous technological support, and establish robust communication channels. Tailoring flexible work plans to employee needs enables organizations to maximize benefits and achieve their strategic objectives.

Keywords: flexible work arrangements, employee performance, telecommuting, flextime, hybrid work, productivity, task completion, urban workplace, quezon city, organizational policy

**IMPACT OF HYBRID WORK SET UP ON EMPLOYEES PRODUCTIVITY IN A
GOVERNMENT AGENCY: A CASE STUDY**

Chian Jasper Asias, Kathlean Mae Domingo, Diana Dugcol, Kaye Paglinawan,
Juylene Aira Uy, Bryan Tubao

Abstract

Hybrid work arrangements, which blend remote and on-site work, have become increasingly common across various sectors, including government agencies. While offering greater flexibility, this model can also present challenges to employee productivity, job satisfaction, and overall performance. This study seeks to assess the impact of hybrid work setups on employee productivity and to identify the challenges encountered within government organizations, aiming to develop policies that improve the effectiveness of this work model. This study adopts a quantitative descriptive approach to effectively collect and analyze data on employee experiences within hybrid work structures. Through purposive sampling, twenty Human Resource employees engaged in a hybrid work setup were selected as respondents. The research examines the relationship between employee satisfaction, work hours and output, performance metrics, and their overall impact on employee productivity. The results of the study indicate that a hybrid work setup enhances employee flexibility and supports productivity by allowing better management of work-life balance and maintaining effective communication with colleagues. However, employees also reported difficulties in completing tasks efficiently due to factors such as commuting stress, technical issues, and workplace environment challenges. While statistical analysis shows a very strong positive correlation between hybrid work and employee productivity, the relationship was found to be statistically insignificant based on the t-statistic and p-value, leading to the acceptance of the null hypothesis. To enhance the effectiveness of the hybrid work setup, it is recommended that agencies implement structured work schedules, provide appropriate productivity tools and training, promote the creation of distraction-free workspaces, and support employee well-being through regular breaks and a healthy work environment. These measures aim to foster a more efficient and balanced hybrid work arrangement. Additionally, based on the study's findings, the development of a formal compliance policy is advised to address existing challenges. This proposed policy can serve as a foundation for improving current guidelines in government agencies, to boost employee productivity, performance, satisfaction, and overall well-being.

Keywords: hybrid work setup, structured schedules, productivity tools, employee training, distraction-free workspace, employee well-being, compliance policy, government agency, employee productivity, performance, satisfaction

**IMPACT OF WORKPLACE COMMUNICATION CHANNELS ON TASK EFFICIENCY AT
HYTEC POWER INC., NOVALICHES, QUEZON CITY**

Ferdinand Simacon, Ferdinand Simacon, Shiela Mae Erecilla, Bryan Gravoso,
Alexandra Roda, Sheila Villar, Bryan Tubao

Abstract

In the modern workplace, effective communication channels are fundamental to achieving organizational success. Tools such as face-to-face meetings, email, instant messaging, and video conferencing play a vital role in coordinating tasks and meeting operational goals. At Hytec Power Incorporated, employees frequently face information overload, emphasizing the need for streamlined and efficient communication practices. This study seeks to explore the impact of various communication channels on task efficiency, assessing how different modes such as email, messaging apps, video calls, and in-person interactions, affect productivity and workflow within the company. This study utilized a quantitative research design. A total of 20 employees from the Administrative, Human Resources Management, and Bidding Departments of Hytec Power Inc.–Quezon City were selected as respondents through purposive sampling. This non-probability sampling technique allowed the researchers to choose participants based on their relevance to the objectives of the study. The collected data were analyzed using frequency, percentage, and weighted mean to interpret the responses. Furthermore, a t-test was applied to determine the correlation coefficient (r), assessing the relationship between communication channels and task efficiency. The study indicates that most employees are young and primarily work in the Administrative Department. Their high-performance ratings suggest effective workplace communication. However, many lack familiarity with project management tools, which may hinder task coordination. Face-to-face communication is associated with improved work quality, while chat applications sometimes lead to miscommunication. Instant messaging and video conferencing are the most commonly used platforms, though they can affect efficiency depending on usage. Age and familiarity with communication tools significantly influence task completion, whereas department, job role, and performance ratings do not. The study highlights the need for employee training on communication technologies. Common challenges identified include technical issues, miscommunication, delayed responses, and slow internet connectivity. To enhance communication efficiency in the workplace, organizations should implement targeted training on project management tools and encourage their regular use. Evaluating and optimizing underused communication channels can help streamline workflows. Guiding effective email and platform usage can minimize delays. Workshops and mentoring programs will assist older employees in adapting to modern tools. Furthermore, investing in reliable communication systems, offering strong technical support, ensuring regular updates, and establishing clear protocols for managing multiple platforms can significantly improve productivity. Enhancing internet connectivity and minimizing technical disruptions will further support seamless and effective communication.

Keywords: workplace communication, project management tools, communication efficiency, training, technical support, internet connectivity, digital platforms, employee productivity, communication channels, hytec power inc.

INFLUENCE ON ANTIQUE VALUATION IN ONLINE MARKET

Jamaica Gatoc, Ken Bagay, Irish Yzabelle Foronda, Niño Clar Naranja,
James Kent Jordan, Christine Calvo

Abstract

This study seeks to examine the various factors that influence antique valuation within the context of an emerging online market. It focuses on antique business owners' perceptions of different valuation methods, the key determinants of customer preferences, and the impact of digital accessibility on how value is interpreted and assigned in the online space. The study employed a descriptive research design to capture diverse perspectives and experiences. Data collection was conducted through surveys administered to 25 antique shop owners involved in online trading, aiming to gain insights into their valuation practices and the dynamics of the digital antique market. The findings reveal that antique business owners commonly regard perceived value, customer preferences, and accessibility as key factors influencing antique valuation in the online market. However, variations were observed in the degree of influence attributed to each factor. Notably, accessibility, while found to be highly influential, was also the least understood. This suggests that elements such as website design, user experience, and digital reach play a critical yet often overlooked role in shaping pricing strategies in the online antique trade. This study examines the demographics of respondents, primarily women aged 18 to 30, to contextualize participation in the online antique trade. It explores how these demographic trends inform marketing strategies and provides recommendations for enhancing online valuation practices, sales performance, and customer engagement. Adopting a descriptive research design, the study investigates key factors influencing antique pricing in the digital marketplace. Data were collected through a structured survey covering demographics, valuation determinants, and suggestions for improving online appraisal methods. Analytical tools such as frequency distribution, percentages, mean, weighted mean, and Likert scale interpretation were used. By capturing the perspectives of antique shop owners, the study contributes to a broader understanding of the antique business in the digital era, emphasizing the need for refined valuation methods, stronger digital marketing strategies, and a more engaging customer experience.

Keywords: antique valuation, online marketplace, user demographics, digital marketing, customer engagement, descriptive research, pricing factors, survey analysis, user experience, and women entrepreneurs

**LEVEL OF SATISFACTION IN TOYOTA FAIRVIEW INC.:
BASIS FOR A PROPOSED ACTION PLAN**

Jamaica Kaye Inso, Yolanda Aldave, Abegail Bordios, Geraldine Ibeas,
Cristina Palarion, Maam Analyn Magalso

Abstract

This study investigates customer satisfaction in the automotive sector, focusing on Toyota Fairview Inc., a prominent dealership in Quezon City. As a trusted representative of the Toyota brand, known worldwide for its durability, quality, and customer service excellence, Toyota Fairview provides vehicle sales, maintenance, and after-sales services. The research evaluates the dealership's effectiveness in fulfilling customer expectations and aims to provide actionable insights to enhance service quality and strengthen customer loyalty. This study employed a quantitative research design utilizing a structured survey distributed to customers who had availed services at Toyota Fairview Inc. within the last three years. The questionnaire evaluated satisfaction across various aspects, including product quality, service efficiency, staff professionalism, pricing, convenience, and after-sales support, using a five-point Likert scale. A total of 60 responses were gathered and analyzed through descriptive statistics and correlation analysis to determine the significant factors affecting overall customer satisfaction. The survey assessed satisfaction with different payment methods. Monthly amortization plans received moderate satisfaction (2.98), while installment plans scored slightly lower (2.71). Bank and car loan approvals were rated highest (3.73), indicating strong satisfaction. In contrast, cash payments received the lowest rating (1.92), showing low satisfaction. Overall, customers favored flexible financing options over cash payments. This study used convenience sampling to select customers of Toyota Fairview Inc. to assess their satisfaction levels and guide the development of a proposed action plan. This sampling method ensured that respondents had sufficient experience with the dealership's services, providing meaningful and relevant insights for the study.

Keywords: customer satisfaction, automotive industry, toyota fairview inc., service quality, payment options, customer experience, dealership evaluation, financing satisfaction

**LOYALTY PROGRAMS AND CUSTOMER SATISFACTION IN CONVENIENCE STORES
IN BARANGAY COMMONWEALTH QUEZON CITY**

Gilbert Peñaverde, Mark Clarence Tamang, Reignecharlotte Reyno, Dinri Pacaanas,
Jesster Canoy, EJ Boy Caldoza, Jennylene Abalos

Abstract

This study examines the relationship between loyalty programs and customer satisfaction in convenience stores located in Barangay Commonwealth, Quezon City. As businesses increasingly utilize loyalty programs to improve customer retention, this research investigates how reward structures, customer engagement, and program consistency influence satisfaction levels. The study also identifies existing gaps in customer interaction and proposes strategies to enhance loyalty programs by improving communication, offering more relevant rewards, and ensuring consistent program execution. Addressing these areas may lead to greater customer loyalty and overall satisfaction. A correlational research design was used to assess the relationship between loyalty program features and customer satisfaction. Data were collected from 50 respondents using a structured questionnaire distributed via Google Forms. The questionnaire measured variables such as reward structure, tier systems, and perceived benefits using a 4-point Likert scale. Descriptive statistics, including the weighted mean, were applied, along with a Pearson correlation analysis and a p-test to determine the statistical significance of the relationships. The results showed an overall weighted mean of 3.42 for customer satisfaction, indicating that respondents generally agreed on the effectiveness of loyalty programs. The highest rated factor was the perceived value of rewards (3.50), while the lowest was the variety of rewards (3.30). A strong negative correlation ($r = -0.769$) was found between loyalty program quality and customer satisfaction, implying that improvements in program features significantly increased satisfaction levels. The p-test result ($p = 0.001$) confirmed that the correlation was statistically significant at the 0.05 level. The study concludes that enhancing loyalty programs, especially by expanding reward options and refining tiered benefits, can significantly improve customer satisfaction in convenience stores. These findings underscore the importance of strategic loyalty program design in fostering long-term customer engagement and retention.

Keywords: customer satisfaction, loyalty programs, convenience stores, reward structure, tier system, customer engagement, barangay commonwealth, business strategy, correlational research, consumer retention

MEASURING THE IMPACT OF RETURN AND REFUND POLICIES ON CONSUMER SATISFACTION AND LOYALTY IN B2C E-COMMERCE: A CASE STUDY ON ONLINE SHOPPING EXPERIENCE IN SPX EXPRESS NOVALICHES HUB

Edmar Jay Gebertas, Danica Catungal, Razel Aubry Nicole Molines,
Rizza Mai Semaña, Dianne Urbina, Eugene Bayani

Abstract

In the rapidly evolving e-commerce landscape, return and refund policies play a crucial role in shaping consumer behavior, satisfaction, and loyalty. As online shopping continues to grow, businesses must implement policies that protect their operations while also meeting customer expectations. Well-structured return and refund policies can foster trust, encourage repeat purchases, and increase overall consumer satisfaction. In contrast, unclear or restrictive policies may lead to dissatisfaction and diminished loyalty. This study aims to assess the impact of return and refund policies on consumer satisfaction and loyalty in business-to-consumer (B2C) e-commerce, focusing on the online shopping experiences associated with SPX Express Novaliches Hub. This study employs quantitative research design. Data were collected through structured online and offline surveys, utilizing standardized questionnaires that assessed consumer attitudes and perceptions regarding return and refund policies. Rating scales were used to quantify satisfaction and loyalty levels. Statistical analyses were conducted to examine the relationship between the effectiveness of return and refund policies and consumer satisfaction and loyalty in the context of B2C e-commerce. Survey responses from participating consumers revealed valuable insights into their experiences with return and refund processes in e-commerce transactions. Respondents emphasized the importance of policy flexibility, transparent communication, and hassle-free return procedures. The data showed that consumers who experienced straightforward and timely return processes were more likely to report higher satisfaction and expressed increased loyalty to the platform. Feedback also highlighted areas for improvement, such as better tracking of returns and quicker refund processing times. The findings confirm that return and refund policies significantly influence consumer satisfaction and loyalty in B2C e-commerce. Key factors such as flexible return periods, transparent guidelines, and seamless processing contribute to positive customer experiences. The study recommends that e-commerce platforms, including SPX Express Novaliches Hub, enhance their policies by prioritizing ease of use, timely communication, and consumer-centric procedures to foster long-term customer relationships and trust.

Keywords: return policy, refund policy, consumer satisfaction, customer loyalty, b2c e-commerce, online shopping, spx express, customer trust

**MEMES AS BRAND PROMOTION; IT'S INFLUENCE ON CONSUMER PURCHASING
BEHAVIOR IN MI PANDA PHILIPPINES SMDC**

Rysa Lumada, Enna Mae Siso, Yocel Balcos, Ryan James Labiste,
Leonard Kobe Serafica, Randy Villaseñor

Abstract

Memes are humorous digital content widely shared across social media platforms, often used to engage audiences and influence perception. Brand promotion, on the other hand, refers to strategic efforts to increase a brand's visibility, appeal, and customer connection. This study aims to determine the influence of memes as a form of brand promotion on consumer purchasing behavior, with a specific focus on Mi Panda Philippines located in SMDC. The researchers employed a descriptive research design to explore patterns and relationships associated with meme-based brand promotion. A sample of 200 respondents was selected through simple random sampling, calculated using the Z-test formula. Data was collected via Google Forms by scanning QR codes provided at the store location. Statistical tools such as frequency distribution, percentage, ranking, and weighted mean were applied to analyze the responses and derive meaningful insights. Findings showed that Mi Panda Philippines primarily appeals to consumers aged 20 to 30, with a balanced distribution across genders. Buying frequency varied, indicating a mix of regular and occasional shoppers. The use of memes in marketing significantly increased social media engagement, helped build a relatable brand image, and enhanced visibility among younger audiences. This cost-effective promotional strategy fostered higher levels of audience interaction. However, while meme marketing offers substantial benefits, it also presents risks related to misinterpretation or negative audience reaction. Meme-based promotion effectively encourages consumer interaction through likes, shares, and comments, creating a dynamic online presence. This strategy allows Mi Panda Philippines to cultivate a youth-oriented brand identity and develop stronger consumer relationships. The study concludes that memes, when used strategically, can positively influence consumer behavior by increasing brand awareness and driving purchase decisions. Careful management is essential to ensure message clarity and cultural relevance.

Keywords: meme marketing, brand promotion, consumer purchasing behavior, mi panda philippines, social media engagement, youth marketing, digital branding

**OPERATIONAL EFFICIENCY OF SELECTED MICRO-ENTERPRISES IN
NOVALICHES, BAYAN, QUEZON CITY**

Jhove Ashley Fornoles, Myla Esparagosa, Angela Lanon, Jonalyn Lanon,
Meryl Ronquillo, Christine Calvo

Abstract

This study investigates the relationship between operational efficiency and quality management practices (QMP) in selected micro-enterprises in Novaliches Bayan, Quezon City. It aims to assess how QMP influences business success, focusing on factors such as customer satisfaction, resource utilization, and internal processes. Given the vital role of micro-enterprises in local economic development, understanding the impact of quality management on their operational performance is essential for sustainability and growth. The study utilized a quantitative-descriptive research design and surveyed 50 micro-enterprise owners. Data collection focused on the implementation of quality management practices and their perceived impact on operational performance. Key areas examined included customer trust, employee awareness, resource optimization, and scheduling. Areas identified for further development included cost control, innovation, and increased staff involvement. Findings revealed that quality management practices significantly contribute to improving operational efficiency, customer satisfaction, and business operations. Respondents demonstrated increased awareness of quality standards and their role in enhancing service delivery and internal productivity. These results suggest that effective implementation of QMP can elevate business performance among micro-enterprises. The study highlights the value of adopting structured quality management frameworks to promote long-term operational efficiency. The insights gained may inform the development of practical tools and models tailored for micro-enterprises. Moreover, the findings serve as a foundation for future research into the long-term effects of QMP on small business sustainability and competitive advantage.

Keywords: operational efficiency, quality management practices, micro-enterprises, business performance, customer satisfaction, resource optimization, novaliches bayan, quezon city, business sustainability, process improvement

**OPERATIONAL EFFICIENCY TREND OF COMMERCIAL PRINTING INDUSTRY
IN NOVALICHES, QUEZON CITY**

Ma Denise Matubis, Bleszy Czaira Badua, Jesmark Fausto, Jerick Fedirizo,
John Patrick Torio, Justine Badillo, Christine Calvo

Abstract

This study aims to determine the operational efficiency trend in the commercial printing industry within Novaliches, Quezon City. As technological advancements raise customer expectations for high-quality, cost-effective printed materials, maintaining consistent print quality and efficient operations has become essential for businesses to remain competitive. The research highlights the importance of operational excellence in meeting customer demands and sustaining profitability in the printing sector. A quantitative-descriptive research approach was employed, using convenient cluster sampling to survey 50 business owners in the commercial printing industry. Data were gathered through a structured questionnaire focusing on customer service practices and operational processes. The study examined how quality, responsiveness, and pricing influence customer satisfaction and operational efficiency, particularly in addressing service errors and utilizing customer feedback. Findings revealed that proactive error resolution is highly valued by customers. The statement, “When mistakes might happen, proactively address them and make things right for the customer,” received a high mean score of 4.00. This indicates that customers prioritize transparency and accountability in service recovery. The data also suggested that customer feedback, when used constructively, contributes significantly to improving operational practices and service quality. The study underscores the role of customer service in driving operational efficiency and customer loyalty in the printing industry. Business owners are encouraged to offer personalized printing services, enhance customer engagement, and implement support systems that maintain high service standards. Strategies such as providing discounts, actively engaging with customers, and fostering a professional and approachable atmosphere contribute to improved customer satisfaction and business growth. These insights can guide future efforts in strengthening operational frameworks across the sector.

Keywords: operational efficiency, commercial printing, customer service, error resolution, customer satisfaction, printing industry, novaliches quezon city, business strategy, quality management, client retention

**OPERATIONAL ISSUES AT PAINT CENTER BUSINESSES AT
CALOOCAN CITY, DISTRICT 1**

Irish Implica, Noraima Dumacil, Mariane Gorobat, Trisha Lane Mercado,
Jillian Rose Mesa, Jude Eilis Reolo, Christine Calvo

Abstract

This study aims to assess the operational issues affecting paint center businesses in Caloocan City, District 1. It seeks to support not only small paint businesses but also the broader industry by identifying critical concerns related to workplace safety, financial management, and resource materials. Operational issues in these areas are shown to impact employee safety and business profitability, particularly due to low-quality materials that lead to costly defects and inefficiencies. A qualitative research design was employed using survey questionnaires and purposive sampling to gather data from 20 small business owners in the paint industry. Participants were selected based on their relevance to the study's objectives, including both male and female owners with varying lengths of business operation. The focus was to assess the root causes of operational challenges within these enterprises. The findings indicated that operational issues significantly affected three key areas. First, workplace safety was compromised due to insufficient employee training and lack of enforced safety protocols. Second, the financial aspect of operations was hindered by the absence of proper inventory management, leading to reduced profitability. Lastly, the quality of resource materials was jeopardized by inadequate machinery inspection and the lack of consistent quality control, increasing the risk of defective products. Among the three operational areas assessed, resource materials received the highest overall weighted mean (3.25), followed by financial aspect (3.22) and workplace safety (3.20), all rated as "strongly agree" by respondents. These results highlight the urgent need for improvements in employee training, inventory systems, and equipment maintenance. The study recommends implementing targeted interventions such as regular safety training, inventory control mechanisms, and routine inspection of machinery to ensure consistent product quality and operational efficiency.

Keywords: operational issues, paint industry, workplace safety, inventory management, quality control, small business, resource materials, financial performance, caloocan city, business efficiency

**OPTIMIZE OFFICE PRODUCTIVITY; AN EVALUATION OF DIGITAL TOOLS
EFFECTIVENESS AT NORTH CALOOCAN CITY HALL**

Merylle Bisnar, Diana Isabel Bainto, Jesslie Felizarta, Jheah Loberas,
Maria May Punay, Cristine Joy Ramirez Kimberly Joyce Embile

Abstract

This study aims to evaluate the effectiveness of digital tools in optimizing office productivity at North Caloocan City Hall. The increasing demand for efficiency in public service has led to the adoption of digital technologies. The research focuses on understanding current practices in digital tool adoption, identifying the factors influencing their implementation, and assessing both the benefits and challenges experienced by employees in their use. A descriptive quantitative research design was utilized, engaging fifteen (15) purposively selected employees from North Caloocan City Hall. Data were collected using structured survey questionnaires, which served as the primary research instrument to measure the respondents' experiences and perceptions of digital tool effectiveness. The findings showed that most respondents were female, aged 36 to 45, and had at least five years of employment. The results indicated that employees were generally proficient in using digital tools. Document management tools were particularly effective, with 46.67% of respondents reporting a reduction in errors and rework, 40% citing increased work volume, 33.33% noting time saved on routine tasks, and 13.33% stating improvements in data sharing and collaboration. Overall, respondents found the integration of digital tools beneficial to their workflow. The study concluded that digital tools significantly enhanced employee productivity and collaboration. However, several challenges were identified, including communication delays, system crashes, poor video and audio quality during virtual meetings, and connectivity issues. Additional problems such as delayed document access, file corruption, and data loss also impacted productivity. These findings suggest the need for improved infrastructure, training, and support systems to maximize the effectiveness of digital tools in government operations.

Keywords: digital tools, office productivity, document management, public sector efficiency, north caloocan city hall, employee collaboration, technology adoption, workplace challenges, government services, digital transformation

**PERCEIVED ACCEPTABILITY OF PERFUME INFUSED WITH GREEN TEA LEAVES
AMONG COLLEGE STUDENTS OF BESTLINK COLLEGE OF THE PHILIPPINES**

Jell Maika Dela Cruz, Mary Devine Belicena, Sheila Mae Binaya,
Jeramie Delos Santos, Jasper Clark Tundag, Christine Calvo

Abstract

This study examines the distinctive qualities and potential applications of green tea leaves in perfumery. Although green tea is commonly consumed as a beverage, its unique aroma and beneficial properties have not yet been fully utilized in the fragrance industry. The study employed a quantitative-descriptive approach using product testing and survey questionnaires, with purposive sampling to select respondents. Participants included five skincare experts and ten fourth-year BS Entrepreneurship students, chosen for their relevance to the study. Their feedback provided insights into the perception of offering a perfume product infused with green tea leaves. The results of the study, both skincare experts and fourth-year BS Entrepreneurship students evaluated the potential of green tea-infused perfume in terms of aroma effects, consumer preference, and calming effects. The aromatic profile was found to significantly enhance the product's appeal. Respondents noted that the natural benefits of green tea could influence consumer perceptions and preferences, and that the product has the potential to promote relaxation and calmness. The skincare experts gave an overall weighted mean of 3.39, while the BS Entrepreneurship students gave a mean of 2.83. The t-computed value was 1.378 with 41 degrees of freedom, compared to a t-critical value of 2.020 at a 0.05 significance level. Since the t-computed value is less than the t-critical value, the null hypothesis is accepted, indicating no significant difference between the two groups' assessments across the three variables. The findings revealed positive reviews regarding the product's quality and potential, particularly emphasizing the distinctive aroma of green tea as a valuable component in perfume formulation. The researchers recommend using premium-grade green tea leaves to enhance the fragrance's potency and ensure superior product performance.

Keywords: green tea, perfume-making, product quality, aroma, premium ingredients, fragrance potential, skincare experts, consumer perception, calmness effects, t-test, statistical analysis, no significant difference

**PRICING STRATEGIES OF EYEWEAR BUSINESSES ON CONSUMER
PURCHASING BEHAVIOR IN NOVALICHES, QUEZON CITY**

Kate Cathlene Red, Oran Jr. Sanchez, Danica Mae Vila, Jack Tabanquerao,
Jovel Degracia, John Kiel Rejuso, Christine Calvo

Abstract

The study aims to explore consumers' perceptions of pricing, assess the effectiveness of different pricing strategies in attracting and retaining customers, and analyze how online presence and competitive pricing influence consumer purchasing decisions. The study applied a descriptive analysis method and purposive sampling to gather data from 30 participants, including eyewear owners, employees, and staff, via a survey questionnaire. It examined consumer purchasing behavior in the eyewear services industry. Pricing strategies significantly influence purchasing decisions in eyewear services, as indicated by a high satisfaction mean score of 3.8. The statement, “The customer’s eyewear is designed for durability, with proper care ensuring long-lasting use,” received a mean score of 3.6. This indicates that eyewear providers in Novaliches, Quezon City, tend to focus on offering affordable products while maintaining quality and durability. Most respondents highlighted the importance of product effectiveness in improving vision. Additionally, the majority preferred using discounts as a strategy to reduce prices and attract customers. As a result, offering personalized eyewear options was favored by many respondents. An effective pricing strategy for eyewear services combines cost management, competitive pricing, and outstanding customer service. This approach boosts profitability and efficiency by lowering operating costs, encouraging fair competition, and strengthening customer loyalty. Therefore, eyewear businesses should emphasize affordability while maintaining high-quality materials.

Keywords: eyewear services, pricing strategy, cost management, competitive pricing, customer service, profitability, operational efficiency, affordability, product quality, customer loyalty.

**PROMOTIONAL STRATEGIES: BRAND AWARENESS IN APPAREL RETAIL AMONG
ABM LEARNERS IN BESTLINK COLLEGE OF THE PHILIPPINES - BULACAN INC.**

Donnalyn Pontillas, Myca Baucan, Jenny Guevara, Ren-cel Mahusay,
Janamae Martires, Dave Espinosa

Abstract

The apparel retail industry is rapidly evolving due to changing consumer preferences, technological progress, and intense market competition. In this environment, strategic marketing has become essential for retailers to strengthen brand visibility and drive sales. Brand awareness is a key factor in achieving business success; however, retailers often face challenges in building and maintaining it. Among the common obstacles in promoting apparel brands are the implementation of effective discounts and promotional campaigns, the use of appropriate online marketing techniques, selecting the right influencers, and managing public perception of the brand. This study utilized a descriptive research design to explore effective promotional strategies that Accountancy, Business, and Management (ABM) students can apply in the apparel retail industry. The research also aims to guide consumers in making well-informed decisions when choosing clothing brands. Using purposive sampling, the researchers selected 30 ABM students as participants. Data collection was conducted through survey questionnaires administered to the chosen respondents. The findings indicate that promotional offers, particularly discounts such as “Buy 1, Get 1 Free,” have a strong influence on customer purchasing behavior, receiving a weighted mean of 3.73. However, in the area of online marketing, trust remains a major concern. Many customers are hesitant due to their inability to meet sellers in person, making it difficult to verify product authenticity: this concern garnered a weighted mean of 3.2. These results highlight the need for apparel brands to capitalize on their strengths, address weaknesses like trust in e-commerce, embrace opportunities such as digital trends and influencer marketing, and navigate competitive threats in the market. This study underscores the importance of identifying and understanding the target audience to develop effective promotional strategies. By gaining insights into customer needs and preferences, businesses can craft marketing efforts that align with their audience’s expectations. This targeted approach enhances engagement, boosts brand visibility, and increases the likelihood of customer retention and sales.

Keywords: promotional strategy, brand awareness, apparel retail, consumer behavior, target audience, marketing strategy, digital marketing, influencer marketing, discounts and promotions, online shopping trust

**REFORMULATING ORGANIC WASTE: INNOVATION USING
ONION PEEL IN A SUSTAINABLE ECO-FRIENDLY LAMP**

Christine Badajos, Arman Jr. Barrete, Frinces Gebertas, Gian Akemie Imperial,
Jhamerica Ashley Sarile, Christine Calvo

Abstract

This study explores the potential of converting leftover onion peels into a sustainable and eco-friendly product. It highlights how common kitchen waste can be innovatively repurposed into practical, environmentally conscious designs. Purposive sampling was used to select participating households and 4th-year BS Entrepreneurship students. The study adopted a descriptive-experimental research design and utilized survey questionnaires as the primary data-gathering tool. The results of the study show that both groups of respondents positively assessed the onion peel lamp in terms of durability, sustainability, and quality. These findings suggest that onion peels can be effectively innovated into a viable and eco-friendly material for lamp production. Additionally, the results provided insights that contributed to developing improved methods for transforming onion peels into suitable material for lamp production, supported by the proposed recommendations. A qualitative approach was used in the study, employing survey questionnaires and purposive sampling to collect data from 10 households and 10 fourth-year BS Entrepreneurship students.

Keywords: onion peels, eco-friendly lamp, sustainable design, qualitative research, purposive sampling, innovation, waste utilization, household feedback, bs entrepreneurship students

**RESOURCE OPTIMIZATION OF HELMET CLEANING MACHINE:
BASIS FOR MARKET DEMAND AND BUSINESS GROWTH**

Lei Adriatico, Jay Ann Bolival, Ron Angelo Cuysona, Ferdinand Enrique Faustino,
Ivan Jhon Lequin, Cilifford Jay Valino, Christine Calvo

Abstract

Helmets are essential for safety in activities such as motorcycling, sports, and construction. However, frequent use leads to the buildup of dirt, sweat, and bacteria, which can compromise hygiene and reduce user comfort. Traditional cleaning methods are often inefficient and time-consuming, creating a growing need for innovative helmet cleaning solutions. This study focuses on optimizing resources, analyzing market demand, and informing effective marketing strategies to support the development and growth of helmet cleaning machine businesses. This study adopted a qualitative descriptive approach and employed purposive sampling to gather relevant data from 30 helmet cleaning machine business owners in Quezon City. Data collection was conducted through a structured survey questionnaire designed to evaluate how resources are optimized, assess the current market demand, and analyze marketing strategies that contribute to business expansion and sustainability in the helmet cleaning industry. The study explored respondents' views on optimizing resources for helmet cleaning machines amid rising demand for satisfaction, effectiveness, and efficiency. Findings underscored the importance of excellent customer service, with a satisfaction mean of 3.80 related to prompt responses. Effectiveness received a weighted mean of 3.73, highlighting the need to increase market visibility to attract more customers. For efficiency, both improving maintenance routines and adopting energy- and water-saving measures earned a weighted mean of 3.67, indicating these strategies can enhance performance and reduce costs. The study recommends creating a straightforward guide to troubleshoot common machine problems, placing machines in visible locations to draw clients, and using social media as a key marketing platform. It also suggests conducting competitive analysis to identify growth opportunities. Most of the respondents were males aged 30–39, indicating that helmet cleaning machine owners should focus on improving customer satisfaction, increasing visibility, and enhancing operational efficiency. Key recommendations include assigning dedicated staff to customer inquiries, enforcing quality control, and standardizing procedures. Market demand is influenced by shifting customer preferences, particularly the use of social media for promotion sharing. To address this, it is recommended to develop a troubleshooting guide, strategically place machines for maximum exposure, ensure cleaning effectiveness, analyze competitors, and leverage social media marketing.

Keywords: helmet cleaning machines, resource optimization, customer satisfaction, operational efficiency, market demand, social media marketing, quality control, troubleshooting guide, business growth

**SCHEDULING AND CALENDAR MANAGEMENT OF QUEZON CITY
PAROLE AND PROBATION OFFICE: AN ASSESSMENT**

Diane Nicole Soriao, Trisha Gail Felices, Ella Marie Lao, Jonalyn Palmes,
Nicole Rodolfo, Kimberly Joyce Embile

Abstract

This study investigates the use of both digital and manual scheduling practices among staff at the Quezon City Parole and Probation Office, examining their effects on productivity, goal attainment, employee satisfaction, and workload management. Findings reveal that only 12% of employees plan their tasks in advance, indicating a predominantly reactive work approach. The study seeks to identify scheduling inefficiencies and offer strategies to enhance time management and overall organizational effectiveness. This study adopted a quantitative-descriptive design and involved 24 staff members selected through purposive sampling. Data collection was conducted using a researcher-designed survey questionnaire, which was validated by experts to ensure its clarity, accuracy, and relevance. The instrument captured information on respondents' demographic profiles and scheduling practices. The study found that the predominantly young operational workforce relies heavily on digital scheduling tools, particularly Google Calendar and Microsoft Outlook. While these tools are generally effective, they lack seamless integration and automation. Employees expressed moderate satisfaction with the current scheduling system, but challenges such as scheduling conflicts, difficulty handling urgent tasks, and managing multiple calendars continue to impede flexibility and overall efficiency. To overcome the identified challenges, it is recommended that regular training sessions be conducted to enhance staff competence in utilizing scheduling tools effectively. Improved integration between platforms such as Google Calendar and Microsoft Outlook is essential to streamline scheduling processes and minimize overlaps. Introducing flexible features for managing urgent tasks, along with automated systems to prevent conflicts, can significantly improve operational efficiency. Furthermore, enhancing notification and reminder functionalities will help ensure timely task execution and reduce the likelihood of missed appointments.

Keywords: scheduling practices, digital tools, time management, organizational efficiency, google calendar, microsoft outlook, employee satisfaction, workload balance, automation, scheduling conflicts

**SHOPLINK: BESTLINK COLLEGE OF THE PHILIPPINES
ONLINE SHOPPING WEBSITE**

Mark Lawrence Agocoy, Elmark Billedo, Christian James Jumawid,
Rex Angelo Luna, Prince Chayld Mabalatan, Roldan Bamondi

Abstract

Shoplink is an online shopping website developed exclusively for the students of Bestlink College of the Philippines. The concept of online shopping primarily focuses on addressing the needs and wants of customers through digital platforms. This study aims to develop a dedicated online shopping platform that provides convenience and accessibility tailored specifically for BCP students. This study utilizes a quantitative-descriptive research method with purposive sampling. A survey questionnaire served as the primary research instrument to measure the level of acceptability of the proposed system in terms of convenience, quality of service, security, website interface, and presentation. Data was analyzed using frequency and percentage, rating scale, weighted mean, and t-test to determine whether there were significant differences between the assessments of the two respondent groups. Findings revealed that the proposed Shoplink model was rated as “Highly Acceptable” across all measured criteria: convenience, quality of service, security, website interface, and presentation. The Information Technology specialists gave an overall weighted mean of 3.51 with a variance of 0.066, a t-computed value of 0.070, and a degree of freedom of 64, with a t-critical value of 1.998 at a 0.05 level of significance. Similarly, the accountants provided a weighted mean of 3.53 with a variance of 0.198 and a t-computed value of 0.079. The results indicated no significant difference between the two groups’ assessments, thereby confirming the acceptability of the proposed system. The study recommends seeking assistance from experienced individuals or professionals to improve the system's success rate. Feedback from respondents emphasized the need for enhancements in display features and the implementation of a login password for improved security. These refinements aim to further optimize the website’s usability and functionality for BCP students.

Keywords: online shopping, website development, user acceptability, convenience, website interface, information security, business, bestlink college

**SIGNIFICANCE OF KIOSK UTILIZATION ON CUSTOMER TRUST AND
SATISFACTION IN MCDONALD'S FRISCO AT QUEZON CITY**

Jeninafer Mendoza, Jessalyn Porcadilla, Dannyca Piedad, Jamiah Abaya,
Bryan Herilla, Randy Villaseñor

Abstract

This study examines how kiosk utilization influences customer trust and satisfaction at McDonald's Frisco in Quezon City. As self-service kiosks become increasingly common in the fast-food industry, understanding their impact on customer experience is essential for business success. This research focuses on both the advantages and limitations of kiosk use, including improved productivity, reduced wait times, and potential technological difficulties. By evaluating factors such as usability, operational efficiency, and functionality, the study aims to determine how these elements affect customer satisfaction and trust, thereby providing insights for improving customer loyalty and service quality. A descriptive research design was used to investigate the relationship between kiosk functionality, user interface, operational efficiency, customer satisfaction, and trust. A total of 100 customers from McDonald's Frisco were randomly selected to participate in a survey. The questionnaire gathered feedback on aspects such as kiosk dependability, order accuracy, service speed, and ease of use. It also assessed the overall satisfaction and trust levels associated with kiosk usage. Descriptive statistics were applied to analyze the responses, while correlation analysis was conducted to examine relationships among the variables. Findings revealed a strong positive correlation between customer satisfaction and effective kiosk functionality. Respondents reported higher levels of satisfaction when kiosks were user-friendly, accurate, and provided timely service. However, some participants expressed dissatisfaction due to technical issues such as system malfunctions or unclear instructions. A lack of accessible human assistance during technical difficulties was also a concern. Many respondents suggested that clearer guidance and professional staff support could significantly improve the kiosk experience. Kiosk utilization was found to enhance order accuracy and reduce wait times, contributing positively to customer satisfaction. However, its effectiveness depends on an intuitive user interface and reliable performance. To improve the overall customer experience, McDonald's Frisco should enhance kiosk design for greater accessibility, especially for users with limited technological familiarity. Additionally, staff should receive proper training in kiosk operations and troubleshooting to assist customers during system failures or confusion.

Keywords: kiosk utilization, customer trust, customer satisfaction, fast-food industry, mcdonald's frisco, user interface, operational efficiency, self-service technology

**SIMULATING BUSINESS: EXPLORING THE PERCEIVED ACCEPTABILITY OF
VAPOR INHALER INFUSED WITH MELON SCENT**

Rancheska Yvonne Torres, Jazel Lanzon, Justine Miles Punzalan,
Neriza Mea Pable, Stephanie Mabanana, Christine Calvo

Abstract

This study focuses on the perceived acceptability and effectiveness of a vapor inhaler infused with melon scent, emphasizing its potential health benefits and practical applications. With the increasing preference for organic and naturally derived products, the study explores how such aromatherapy-based items may contribute to overall well-being. Specifically, it investigates how the product influences users' stress relief, mental clarity, and physical comfort. A quantitative experimental research design was employed, using a survey questionnaire as the primary data collection tool. Convenience sampling was applied to select participants from fourth-year BS Entrepreneurship students who were considered relevant to the study's focus. A total of 116 students participated, providing feedback on various aspects of the melon-scented vapor inhaler. The findings revealed that the melon-scented vapor inhaler received favorable evaluations across several dimensions. In terms of Aroma Effects, respondents indicated that the product emitted a pleasant scent that reduced stress and promoted relaxation. For Healing Effects, the vapor inhaler was perceived to enhance the ability to cope with stress and promote mental refreshment. Regarding Cooling Effects, respondents noted that it helped reduce fatigue and provided a refreshing sensation. The overall weighted mean score given by the respondents was 3.49, indicating a generally positive perception of the product's effectiveness. The results suggest that the melon-scented vapor inhaler is perceived as effective in promoting relaxation, mental clarity, and physical refreshment. The positive sentiment expressed by respondents supports the idea of offering such therapeutic products within student-led enterprises. These findings may encourage the development of more wellness-oriented innovations in student business simulations and small-scale entrepreneurial ventures.

Keywords: vapor inhaler, melon scent, aromatherapy, product acceptability, stress relief, cooling effects, healing effects, student enterprise, therapeutic products

**SNAKE PLANT (DRACENA TRIFASCIATA) FIBERS AS AN
ALTERNATIVE THREAD FOR CROCHET PRODUCTS**

Kathleen Quirante, Nicole Araña, Mariel Mae Gillego, Abegail Moldez, Elaiza Jane Ramirez,
John Micko Revillosa, Christine Calvo

Abstract

This study explores the viability, effectiveness, and potential of snake plant (*Dracaena trifasciata*) fibers as an alternative thread for crochet products. As interest grows in sustainable and eco-friendly materials, the research aims to assess the practical application of plant-based fibers in craft industries, particularly in crochet, where durability and aesthetic quality are crucial. A quantitative experimental research design was utilized. Data were collected through survey questionnaires distributed to two groups: 10 BS Entrepreneurship students and 10 local craftsmen, selected through purposive sampling. The study focused on evaluating perceptions of the material's durability, texture, and variation as a viable crochet thread. Based on the results of the variables, the BS Entrepreneurship students had an overall mean of 3.073, a variance of 0.448, an alpha of 0.05, a degree of freedom of 76, a t-critical value of 1.992, and a t-computed value of 0.689. The craftsmen had an overall mean of 2.525, a variance of 0.281, an alpha of 0.05, a degree of freedom of 76, a t-critical value of 1.992, and a t-computed value of 0.689. Since the t-critical value is greater than the t-computed value, there is no significant difference between the assessments of the two groups of respondents in terms of durability, variation, and textile. Respondents noted that while snake plant fibers may unravel if not properly secured, this can be addressed through proper crocheting techniques such as tight knotting. Both groups emphasized the importance of eco-conscious branding in marketing such products. Suggestions included using slogans that promote the sustainability and uniqueness of the fiber. The study recommends positioning snake plant fiber crochet products as inclusive in terms of design and usability for all genders and age groups. This approach enhances their potential for market acceptance and aligns with growing demand for innovative and environmentally friendly craft materials.

Keywords: snake plant fiber, *dracaena trifasciata*, crochet products, eco-friendly materials, sustainable crafting, alternative thread, business innovation, product viability

**STRAWBERRY-SCENTED LIP BALM FORMULATION USING
PINK PITAYA (DRAGON FRUIT) EXTRACT**

Ariane Joyce Cuento, Frances Labang, Wendel Antonio, Apple Ann Rivera,
Ashley Bayate, Christine Calvo

Abstract

This study aims to develop a new lip balm formulation using pink pitaya (dragon fruit) extract combined with a strawberry scent. The formulation is designed to address common skin-related concerns such as dry and chapped lips. The research also seeks to demonstrate the product's potential marketability. Data were gathered through purposive sampling from two groups of respondents: dermatologists and fourth-year entrepreneurship students. A descriptive-experimental research design was employed. The study used questionnaires and product testing to assess the lip balm's effectiveness and quality. Respondents were selected based on their relevance to the study, ensuring informed and credible feedback on the formulation. The experimental process evaluated both the dermatological benefits and market acceptability of the product. The findings revealed positive evaluations from both groups of respondents. In terms of effectiveness, the lip balm demonstrated the ability to soothe chapped lips and provide immediate comfort. Regarding quality, it was noted to contain natural ingredients that nourished the lips, contributing to a healthier appearance and feel. Statistical analysis showed that dermatologists reported an overall mean of 3.680 with a variance of 0.087, while fourth-year entrepreneur students reported a mean of 3.550 with a variance of 0.118. Both groups shared the same t-computed value of 0.760, which was less than the t-critical value of 3.106 at a 0.01 level of significance. Thus, the hypothesis was accepted, indicating no significant difference between the two groups' assessments in terms of effectiveness and quality. The study concludes that the strawberry-scented lip balm infused with pink pitaya extract is both effective and well-received in terms of quality. However, concerns were raised about long-term product stability. To address this, the researchers recommend incorporating natural preservatives to extend shelf life. Furthermore, the product is proposed for commercial use, suitable for all genders and skin types, with potential for business development in the cosmetics and skincare industry.

Keywords: lip balm formulation, pink pitaya, dragon fruit extract, strawberry scent, natural skincare, product development, descriptive-experimental design, business innovation

**SUSTAINABLE SKINCARE VENTURE: EXPLORING THE PERCEIVED MARKET
POTENTIAL OF ORGANIC FACIAL CLEANSER INFUSED WITH
DRAGON FRUIT PEEL EXTRACT**

Kate Rosiel Curioso, Ji-ann Gurpido, Angel Divine Pollosco, Mark San Jose,
Ryan Mark Tuazon, Christine Calvo

Abstract

This study aims to assess the perceived market potential of an organic facial cleanser infused with dragon fruit peel extract. As consumer demand for sustainable and eco-friendly skincare products continues to grow, natural formulations have become increasingly favored. Dragon fruit peel, often discarded as waste, is rich in antioxidants and nutrients, making it a viable ingredient for skincare applications. The study evaluates the product's effectiveness, acceptability, and consumer preferences, providing insight into its potential as a sustainable skincare innovation. A descriptive-experimental research design was employed, using purposive sampling and product testing. Survey questionnaires were distributed to 120 respondents, comprising 5 skincare experts and 115 fourth-year BS Entrepreneurship students. The study sought to determine if a significant difference existed between the two groups' assessments in terms of effectiveness, acceptability, and consumer preference. A z-test was used to analyze the data at a 0.05 level of significance. The skincare experts yielded a z-critical value of 1.960, a z-computed value of 1.315, variance of 0.18, and an overall mean of 3.67. Meanwhile, the student respondents had the same z-critical and z-computed values, a variance of 0.11, and an overall mean of 3.35. With the z-critical being greater than the z-computed, the hypothesis was accepted, indicating no significant difference between the assessments of skincare experts and BS Entrepreneurship students. Both groups generally rated the product as effective and acceptable. The findings suggest promising market potential for the organic facial cleanser infused with dragon fruit peel extract. The study recommends intensifying marketing efforts by targeting diverse age groups and promoting inclusivity across all genders. It also suggests utilizing unique selling propositions (USPs) to highlight the product's sustainability and distinctiveness in the skincare market. These strategies can help position the product as a competitive and eco-conscious alternative within the skincare industry.

THE DIFFICULTIES ENCOUNTERED IN EXPANDING FAMILY-OPERATED BUSINESS

Princess Jenica Villa, Olvee Mariel Madera, Jessa Delos Santos, Liezel Liza, Christine Calvo

Abstract

This study investigates the challenges encountered by family-operated businesses in Quezon City during business expansion. As these enterprises seek growth, they often face a unique set of obstacles, including succession planning, financial limitations, and internal conflicts. These issues can hinder long-term sustainability and limit competitiveness in the market. The study aims to identify and quantify the most common barriers faced by these businesses in order to propose strategies that promote sustainable expansion. A descriptive research design was used, with data gathered through a structured survey questionnaire. The study involved 25 family business respondents selected from Quezon City. The survey assessed various factors that affect expansion, including operational, financial, and management-related challenges. The findings revealed that 56% of the respondents were male, and 40% were aged 41 and above. Among the identified challenges, operational difficulties emerged as the most significant (weighted mean = 3.46), followed by market competition (weighted mean = 3.26) and experience-related challenges (weighted mean = 3.18). These results indicate that internal business operations and external market pressures are primary barriers to expansion for family-run enterprises. The study provides important insights into the struggles of family-operated businesses attempting to expand in a competitive environment. Understanding these difficulties allows for the development of targeted strategies, such as improving operational systems, succession planning, and competitive positioning. The findings contribute to strengthening management practices that support the growth and sustainability of family businesses in Quezon City.

Keywords: family business, business expansion, operational challenges, succession planning, financial constraints, market competition, business sustainability, quezon city

**THE EFFECT OF MOBILE WALLET ON SAVING BEHAVIOR OF
MICRO ENTERPRISE OWNER IN LITEX MARKET, QUEZON CITY**

Beche Fearl Mangubat, Lea Mae Fernadez, Baby Angel Ann Gare, Kyla Marie Brondial,
Princess Lyka Gamelo, Ariel Jose Aceron, Eugenio Bayani

Abstract

In the Philippines, mobile wallets have revolutionized financial transactions by providing a convenient, secure, and efficient alternative to traditional banking, particularly for micro enterprise owners. Their increasing popularity is driven by user satisfaction, functionality, and accessibility. With the rise of financial technology (FinTech), mobile wallets now support services such as money transfers, bill payments, and retail purchases. According to the 2021 Bangko Sentral ng Pilipinas Financial Inclusion Survey, digital account ownership increased from 29% in 2019 to 56% in 2021. This study investigates how mobile wallet usage influences the saving behavior of micro enterprise owners in Litex Market, Quezon City. The study used a descriptive-correlational research design to examine the relationship between mobile wallet usage and saving behavior among micro enterprise owners. A structured survey combining multiple-choice and rating scale items was administered to 50 purposively selected business owners familiar with mobile wallet platforms like GCash and PayMaya. Surveys were conducted in person over the course of one week, with trained enumerators ensuring the accuracy of responses. Data were analyzed using statistical methods to identify correlations between digital wallet usage and financial behavior. Findings revealed that most micro enterprises in Litex Market prefer using mobile wallets such as GCash and PayMaya due to their accessibility and security. Participants rated the platforms positively in terms of ease of use (mean = 3.37), usefulness (mean = 3.31), and support for saving (mean = 3.17). A statistically significant positive correlation between mobile wallet usage and improved saving behavior was observed ($r = 0.6563$, $p = 0.00001$). Despite these benefits, challenges such as unreliable internet connectivity (25.66%) and transaction fees were noted. The study concludes that mobile wallets positively influence the saving behavior of micro enterprise owners, supporting their role in promoting financial inclusion and management. However, inconsistent saving habits and limited financial literacy among users highlight the need for educational programs and incentives. Infrastructure-related challenges, including poor internet access and high transaction costs, also hinder optimal use. The study recommends providing microloans, grants, and digital literacy initiatives to support mobile wallet adoption and improve financial outcomes for small-scale entrepreneurs.

Keywords: mobile wallet, saving behavior, micro enterprise, financial inclusion, gcash, paymaya, fintech, digital transactions, quezon city, business owners

**THE IMPACT OF DIGITAL INNOVATION ON OPERATIONAL EFFICIENCY
AT A PRIVATE COMPANY IN HYTEC POWER INC**

John Maico Bolabola, Joann Marie Dela Cruz, Hazel Mae Inghog, Charmaine Matias,
Riza Placa, Kimberly Joyce Embile

Abstract

This study evaluates the impact of digital innovation on operational efficiency at Hytec Power Inc., a private company. It specifically focuses on the use of digital tools such as Google Calendar, Microsoft Outlook, and Google Workspace in enhancing internal processes. The research investigates how these platforms contribute to task prioritization, performance monitoring, and team collaboration, aiming to determine their effectiveness in improving organizational productivity. A quantitative descriptive research design was employed, involving thirty (30) purposively selected employees from Hytec Power Inc. Data were gathered through a structured survey questionnaire and analyzed using frequency distribution, percentage, weighted mean, ranking, Likert scale interpretation, and Pearson r correlation. The study assessed the relationship between digital tool usage and improvements in operational efficiency. The findings indicated that digital tools significantly enhanced operational efficiency by streamlining communication, supporting project management, and strengthening collaborative work. Google Calendar was most effective in improving time management, Microsoft Outlook facilitated better task organization and internal communication, while Google Workspace enabled real-time collaboration across teams. Despite these advantages, the study revealed that a lack of employee training and inconsistent usage hindered the full potential of these digital platforms, resulting in underutilization and process gaps. The results underscore the value of digital innovation in optimizing business operations. Effective integration of tools such as Google Workspace, Outlook, and Calendar can drive substantial gains in productivity, coordination, and information flow. However, the study also highlights the need for structured training programs and stronger digital adoption strategies to overcome existing challenges. It is recommended that Hytec Power Inc. invest in capacity-building initiatives and continuous digital transformation efforts to maximize the benefits of innovation and sustain operational efficiency.

Keywords: digital innovation, operational efficiency, google workspace, microsoft outlook, google calendar, business technology, process optimization, workplace collaboration, hytec power inc., digital transformation

THE IMPACT OF DIGITAL TRANSFORMATION ON TRADITIONAL BUSINESS

Haziel Baybayan, Jenjen Herrera, Joven Borrel, Jenny Cariaga, Christine Calvo

Abstract

This study investigates the impact of digital transformation on traditional businesses, with a particular focus on the challenges that arise during the transition. The research explores common barriers to growth and sustainability, including succession planning issues, financial limitations, and internal conflicts. As digital tools and technologies become increasingly integrated into business operations, understanding these challenges is essential for preserving the viability of traditional enterprises. A descriptive research design was employed, using a structured survey questionnaire as the primary instrument for data collection. A total of 30 respondents participated in the study, providing insights into the effects of digital transformation on various aspects of business operations. The demographic analysis showed that the majority of respondents were male (53%), with 46% having been in business for over one to five years. Among the identified challenges, business operations emerged as the most significant (weighted mean = 3.41), followed by operational efficiency (weighted mean = 3.26) and workplace culture (weighted mean = 3.21). These factors reflect the areas most affected by the shift from traditional methods to digital practices. The findings underscore the need for strategic management practices to guide traditional businesses through digital transformation. The results suggest that improvements in operational planning, employee adaptation, and cultural integration are critical to ensuring a smooth transition. By addressing these key areas, businesses can better position themselves to harness the benefits of digital innovation while minimizing disruption.

Keywords: digital transformation, traditional business, operational efficiency, business operations, workplace culture, succession planning, business sustainability, change management, business innovation, descriptive research

**THE IMPACT OF INCENTIVES SCHEME ON THE PRODUCTIVITY OF PROPERTY
CONSULTANT IN SELECTED REALTY DEVELOPER IN QC.**

John Carlos Asuro, Zarah Azañes, Glessie Raga, Erica Suello, Angelyn Serafin, Bryan Tubao

Abstract

Incentive schemes are widely employed in the real estate industry to motivate sales personnel and improve performance outcomes. This study investigates the impact of various incentive schemes on the productivity of property consultants working for selected realty developers in Quezon City. It aims to determine which types of incentives: monetary or non-monetary, are most effective in enhancing consultant performance, particularly in relation to sales output and overall productivity. A quantitative research design was utilized in this study. Data was gathered through a structured survey distributed to fifty (50) property consultants employed by three major realty developers in Quezon City. The questionnaire assessed the type and frequency of incentives received, alongside self-reported productivity levels and monthly sales figures. Descriptive statistics and Pearson correlation analysis were employed to examine the relationship between incentive schemes and consultant productivity. The findings revealed a significant positive correlation between structured incentive schemes and the productivity of property consultants. Among the types of incentives, monetary rewards such as performance-based commissions and bonuses had the most substantial impact on productivity. Non-monetary incentives, including employee recognition and career development opportunities, also demonstrated a positive influence, though to a lesser extent compared to financial rewards. The results suggest that strategically designed incentive programs can meaningfully enhance employee performance in the real estate sector. Employers are advised to adopt a balanced combination of monetary and non-monetary incentives that align with the needs and motivations of their workforce. These strategies not only boost short-term productivity but may also contribute to long-term employee engagement and retention. Further studies may explore the sustainability of incentive-driven performance and the role of intrinsic motivation in achieving consistent success.

Keywords: incentive schemes, property consultants, productivity, real estate industry, monetary incentives, non-monetary rewards, sales performance, employee motivation, quezon city, business administration

**THE IMPACT OF MICROSOFT SOFTWARE ON EMPLOYEE PROFICIENCY OF
BFDE WALASTIK INTERNET CONNECTION**

Ronnielyn Noora, Erika Ele, Annabelle Lapirap, Peny Mae Reazon, Helen Taño-an, Bryan Tubao

Abstract

Proficiency in Microsoft software is essential in modern workplaces, as it enhances adaptability, productivity, and job knowledge. However, many employees encounter challenges such as software complexity, limited training, and inconsistent performance. This study assesses the proficiency levels of employees at BFDE Walastik Internet Connection in using Microsoft Word, Excel, and PowerPoint, and examines whether demographic factors influence their proficiency. A descriptive-correlational research design was employed, with data collected through survey questionnaires from 25 employees. The study examined demographic factors such as age, gender, job position, length of service, and frequency of software usage. Statistical tools, including ANOVA and weighted mean, were employed to evaluate proficiency levels and analyze their relationship with the identified demographic variables. The findings indicate that most respondents (80%) were aged 25–35, with only 4% identifying as female. Microsoft Word (46.5%) was the most frequently used software, followed by Excel (39.5%) and PowerPoint (14%). Employees reported high proficiency levels in adaptability ($M = 3.66$), job knowledge ($M = 3.71$), and productivity ($M = 3.70$). However, ANOVA results revealed no significant relationship between proficiency levels and demographic factors, suggesting that training availability and personal motivation play a more critical role. The study concludes that demographic factors do not significantly influence Microsoft software proficiency. Instead, challenges such as software complexity (22.92%) and an overwhelming interface (19.79%) were found to impact efficiency. The study recommends implementing structured training programs, enhancing IT support, and improving software accessibility to boost proficiency. These measures can contribute to increased workplace productivity and the continued development of employees' skills.

Keywords: microsoft software, boost proficiency, workplace productivity and employee skill development

**THE IMPACT OF THE BIOMETRIC TIMEKEEPING SYSTEM ON PAYROLL
EFFICIENCY AND EMPLOYEE ATTENDANCE TO THE WORK PERFORMANCE OF
WELLJOB SOLUTIONS AND GENERAL SERVICES, INC.**

Michael John Bitoon, Alvin Legaspi, Raymond Manadong, Janeth Solomon,
Carmen Tanlugon, Eugenio Bayani

Abstract

Efficient payroll practices play a crucial role in enhancing employee work performance. Research indicates that implementing a biometric timekeeping system can improve payroll efficiency and employee attendance, which in turn positively influences work performance. This study aims to strengthen the impact of the biometric timekeeping system on payroll efficiency and employee attendance, thereby contributing to improved overall work performance. The researchers employed descriptive research design and utilized a questionnaire to assess the employees of Welljob Solutions and General Services, Inc., applying quantitative methods with appropriate statistical data analysis. The majority of respondents were electricians and technicians. In terms of age, most were above 36 years old and reported being significantly impacted by the use of the biometric timekeeping system. The researchers assessed employee productivity, accountability, and accuracy, which are factors that may lead to payroll efficiencies. Respondents strongly agreed that the biometric timekeeping system had a positive impact on their work. They also strongly agreed that their work performance could be evaluated based on quality, consistency, and timeliness. However, privacy concerns emerged as the most common issue, reported by 31.58% of respondents. System failure, environmental factors, and user experience were identified as the third most common issues, while data syncing problems ranked lowest, with contributing factors including network connectivity issues, server downtime, and data conflicts. To maintain these standards, Welljob Solutions and General Services, Inc., must continue to adopt new strategies and technologies. The study revealed that employees over 36 years old are more likely to use the biometric timekeeping system, which contributes positively to both payroll efficiency and overall work performance. These two factors: payroll efficiency and work performance, are essential in assessing the impact of biometric timekeeping systems. To enhance payroll efficiency and work performance, Welljob Solutions and General Services, Inc. should focus on reducing errors, eliminating fraud, automating data capture, and streamlining administrative processes. These measures can result in significant time savings, improved compliance, and more accurate payroll management. In turn, this contributes to overall operational efficiency, enables more precise tracking, reduces administrative burdens, and fosters improved workplace performance.

Keywords: biometric, timekeeping system, payroll, attendance, work performance

**THE IMPACT OF TRAINING ON MICROSOFT OFFICE SOFTWARE UPGRADES
ADAPTION AT GOVERNMENT AGENCY IN QUEZON CITY.**

Justin Talion, Giselle Gales, Avegail Pentecostes, Jhocel Pilan, Leila Johanna Salvadora,
Honeylyn Solo, Bryan Tubao

Abstract

Founded in 1975, Microsoft has continually evolved, introducing numerous upgrades to its products, including Microsoft Word and the Microsoft 365 suite. Employees are among an organization's most valuable assets and training them enhances productivity and efficiency. At SSS Diliman, the adoption of Microsoft Office upgrades varies, particularly due to differing digital capabilities among employees, with older workers often facing greater challenges. Training programs help bridge this gap, fostering both productivity and inclusivity. This study investigates the impact of training on employees' adoption of software updates. A quantitative descriptive research design was employed to measure employees' readiness and adaptability. The respondents were 30 purposively selected frontline employees of SSS Diliman, Quezon City, chosen for their daily interaction with office systems and clients. Data were collected using a standardized questionnaire, and the results were analyzed by determining the frequency of responses, calculating percentages and weighted averages, ranking survey question scores, and interpreting the findings using a Likert scale. The results showed that most respondents were aged 32–42, female, and had over 10 years of work experience. The majority possessed middle-level computer skills, with no respondents classified as beginners or experts. While some employees adapted easily to the new Microsoft Office software, many encountered challenges, particularly in terms of ease and confidence of use. Training improved knowledge and efficiency but fell short in developing practical skills. Feedback indicated that the training was generally effective but limited by time, resources, and clarity. Statistical analysis revealed that age, gender, experience, and computer skill level significantly influenced training outcomes, with younger, less experienced, and more skilled users adapting more successfully. The researchers recommend that to enhance the adoption of Microsoft Office at SSS Diliman, training programs should be tailored according to age, gender, skill level, and experience. Senior employees would benefit from gradual, buddy-assisted sessions, while ensuring equal training opportunities for all personnel. Targeted, practice-intensive modules, frequent refreshers, and encouragement of personal use can further improve adaptation. Agencies should address digital skill gaps by integrating online modules and strengthening resource management. Continuous feedback, along with personalized and interactive courses, is essential to sustaining training effectiveness despite staff and budget limitations.

**THE INFLUENCE OF ADVERTISING ON CONSUMER PREFERENCES
FOR DENTAL SERVICES**

Loraine Rabe, Dimple Joy Tagala, Cire Jedrick Poso, Queen Romero,
Alexander Lance Boyles, Christine Calvo

Abstract

This research examines the impact of advertising on consumer preferences for dental services, with a focus on key factors such as customer satisfaction, service preference, and perceived service quality. A quantitative approach was employed, with data collected through a survey administered to 40 dental service consumers in Quezon City, using cluster sampling to ensure diversity. The questionnaire consisted of three sections: demographic information, consumer perceptions of advertising, and suggestions for service improvement. Data analysis involved the use of frequency counts, percentages, and weighted mean calculations, with responses evaluated using a Likert scale. The study found that advertising significantly influences consumer preferences for dental services. The majority of respondents reported that honest advertising helps build trust and satisfaction (weighted mean = 3.76), supports informed decision-making (weighted mean = 3.73), and sets realistic expectations regarding service quality (weighted mean = 3.82). The survey sample was predominantly female (88%), with 52.5% having 1 to 2 years of experience with dental services. These findings suggest that ethical and effective advertising strategies play a crucial role in shaping consumer behavior in the dental services sector. The research indicates that transparent and honest advertising enhances consumer satisfaction and loyalty, significantly influencing purchasing decisions. The researcher recommends creating advertisements that deliver relevant and accurate information, regularly collecting consumer feedback, and refining marketing strategies to better engage a broader audience, particularly male consumers. This study contributes to the understanding of ethical advertising practices that support the improvement of dental service quality.

Keywords: satisfaction, consumer preferences, advertising, dental services

**THE INFLUENCE OF EMPLOYEE RECOGNITION INITIATIVES ON THE WORK
PERFORMANCE OF SELECTED PUBLIC AND PRIVATE SECTOR IN
MEYCAUAYAN, BULACAN: A COMPARATIVE STUDY**

Cassandra Ramirez, Milagros Aclao, Reychele Basilio, Marvin Batalon,
Jennilyn Demiden, Bryan Tubao

Abstract

Employee recognition plays a crucial role in fostering motivation, job satisfaction, and overall work performance. Despite its importance, organizations in both the public and private sectors face challenges in implementing effective recognition programs. This study investigates the influence of recognition initiatives on work performance in Barangay Bahay Pare (public sector) and Oracle Petroleum Corporation (private sector), utilizing the PERMA+4 framework to examine psychological and behavioral outcomes. Additionally, the research explores how demographic factors such as age, gender, length of service, and organizational classification interact with recognition strategies to affect employee motivation, job satisfaction, and sense of belonging. A comparative descriptive research design was employed, using purposive sampling to select 25 employees from both the public and private sectors. Survey questionnaires assessed perceived types of recognition, effectiveness, and perceptions of recognition's influence on motivation, job satisfaction, sense of belonging, and work performance, as well as challenges affecting recognition initiatives. Data were analyzed using weighted means and Pearson's r correlation to compare responses between sectors and to assess relationships between variables. Findings show that both sectors value employee recognition, with public sector employees reporting stronger positive effects on motivation, satisfaction, and productivity. Private sector responses were more varied but similarly positive. Challenges like lack of authenticity, managerial support, and consistency affected effectiveness. No significant correlation was found due to limited response variability, which reduced statistical sensitivity. The study suggests that employee recognition positively influences work performance in both public and private sectors, particularly in motivation, job satisfaction, and productivity. Although statistical correlation couldn't be confirmed due to limited response variability, descriptive results show stronger engagement and purpose, especially in the public sector. To enhance impact, organizations should personalize recognition, clarify criteria, and use tools like peer feedback and performance reviews.

Keywords: employee recognition, work performance, public vs private sector

THE INFLUENCE OF POINT-OF-SALE (POS) SYSTEM ON THE OPERATIONAL PERFORMANCE AND FINANCIAL SUCCESS OF FIORE PETALO FLOWER & CAFE

Bianca Louise Garados, Ana Sofia Dagoc, Shandle Ruiz, Honeyryrine Millora,
Diana Elizabeth Torno, Eugenio Bayani

Abstract

In today's competitive business environment, technology plays a crucial role in enhancing operational efficiency and financial success. Small businesses like Fiore Petalo Flower & Cafe, which combines flower arrangement and cafe services, can benefit significantly from adopting tools such as point-of-sale (POS) systems. This study explores the impact of POS implementation on Fiore Petalo's operational performance and financial outcomes, focusing on transaction efficiency, inventory management, and customer interactions. Many small businesses continue to rely on traditional manual processes, which often result in inefficiencies, errors, and missed opportunities. This research aims to determine how POS adoption can improve business performance, reduce costs, increase revenue, and enhance customer satisfaction. Using a descriptive research design, the study surveys employees and customers to gather insights into key aspects of operational performance, such as service speed, order accuracy, and employee productivity. It also evaluates financial success through pricing strategies, cost-effectiveness, and revenue growth. The research is grounded in the Technology Acceptance Model (TAM) and the "Do It Now" Theory." This explains user perceptions and the practical application of POS systems in business settings. Findings indicate that the POS system significantly enhances business operations. It accelerates transactions, reduces billing and order errors, and streamlines service delivery. Employees report that the system is user-friendly and facilitates smoother, more organized workflows. Customers benefit from faster service and improved order accuracy, resulting in higher satisfaction levels. Financially, the cafe has improved its pricing strategies, achieved better cost control, and increased revenue through more efficient tracking and promotions. Statistical analysis confirms the positive impact of the POS system, with a t-value of 18.3554 and a p-value of 0.0001. The study highlights the importance of integrating technology to improve small business efficiency and profitability. The study recommends incorporating clear operational procedures and regulatory compliance measures into the system to ensure adherence to standards. This approach will help businesses fully optimize the system's capabilities and support long-term growth and success.

Keywords: point-of-sale system, operational performance, financial success, small business technology

**THE ROLE OF ACCOUNTING INFORMATION SYSTEM IN ENHANCING
INTERNAL CONTROLS IN AN ORGANIZATION: BASIS FOR
PROPOSED IMPLEMENTATION PLAN**

Luis Naag Jr, Cheriann Battad, Rica Mae Calebag, Roselyn Garbo,
Princess Kyla Javier, Analyn Magalso

Abstract

Advancements in technology have significantly transformed Accounting Information Systems (AIS), improving both operational efficiency and strategic decision-making. These systems have evolved from traditional manual bookkeeping to advanced digital platforms, including cloud-based solutions. This shift has minimized the risk of data loss and enabled the automation of essential business functions such as inventory management, billing, accounting, and order processing. As a result, AIS plays a critical role in preventing sales losses, reducing inventory mismanagement, and strengthening internal controls within organizations. This study employed a descriptive quantitative research design. A total of 15 employees were selected using purposive sampling to ensure the inclusion of individuals with relevant knowledge and experience. Survey questionnaires served as the primary data collection instrument, allowing the researchers to gather structured and measurable responses related to the topic under investigation. Integrating Accounting Information Systems (AIS) into internal control frameworks presents several key challenges for organizations. The most frequently cited issue, reported by 10.56% of respondents, is the significant time and resources required, underscoring the importance of strategic planning. System complexity (9.15%) also poses a barrier to seamless integration with existing controls. Other commonly reported challenges (8.45%) include insufficient employee training, high implementation costs, limited technical support, difficulties in system monitoring, compatibility issues, and contractual disputes. Additionally, employee resistance and regulatory compliance concerns (7.75%) further complicate AIS adoption. Issues related to data accuracy and ambiguous contract terms (7.04%) continue to affect system reliability. To ensure successful AIS integration, organizations must prioritize employee training, effective change management, sufficient budget allocation, and system compatibility. The study concludes that the successful implementation of Accounting Information Systems (AIS) is strongly influenced by user acceptance, positive attitudes, and behavioral intention. Furthermore, information quality and service quality were identified as critical factors that significantly impact both the intention to use AIS and overall user satisfaction. Therefore, organizations aiming to strengthen their internal control systems should prioritize comprehensive employee training, cultivate a supportive environment for technology adoption, and uphold high standards of information and service quality within their AIS frameworks.

Keywords: accounting information systems (ais), internal controls, user acceptance, behavioral intention, information quality, service quality, system integration, employee training, technological adoption, organizational culture, system complexity

**THE ROLE OF DIGITAL PAYMENT SYSTEM IN CUSTOMERS' TRANSACTIONAL
CHALLENGES AT LA LA MART ON CONGRESSIONAL
TOWN CENTER, QUEZON CITY**

Phoebe Joy Sevidal, Ana Marie Ramilo, Chelene Joan Marie Verzosa,
Mary Joy Lique, Krystal Albiola

Abstract

As the world rapidly embraces digital transformation, small retail businesses like La La Mart in Quezon City are adapting to meet the evolving expectations of modern consumers. This study investigates the role of digital payment systems such as GCash and PayMaya, in addressing common transactional challenges, including long queues, system delays, and payment errors. Additionally, it examines how these technologies contribute to improved customer satisfaction and enhanced financial security. The researchers employed descriptive-quantitative research design, utilizing survey questionnaires distributed to 50 customers of La La Mart. Simple random sampling was used to ensure equal representation among respondents. The study focused on customer experiences with digital payment platforms. Collected data were analyzed using frequency counts, weighted means, and ranking methods to evaluate customer perceptions and identify common challenges associated with the use of digital payment systems. The findings reveal that the majority of La La Mart customers are aged 18 to 30, with women comprising the larger portion of respondents. Among the available digital payment options, GCash emerged as the most preferred platform. Overall, respondents agreed that digital payment systems significantly enhanced transaction speed and provided a reasonable level of financial security. Nevertheless, common challenges were reported, including slow internet connectivity, application downtimes, and user-side errors. Despite these issues, customers consistently expressed strong agreement regarding the convenience, efficiency, and user-friendliness of digital payment systems. The study concludes that digital payment systems significantly improve transactional reliability and foster greater user confidence, particularly when reinforced by security features such as biometric authentication and real-time notifications. However, recurring issues, including poor internet connectivity and delayed refund processing underscore the need for further improvement. These findings emphasize the critical role of customer education, responsive technical support, and robust infrastructure development in ensuring a seamless and secure digital payment experience.

Keywords: digital payment systems, transactional reliability, user confidence, biometric authentication, real-time alerts, connectivity issues, delayed refunds, customer education, technical support, infrastructure development.

**THE ROLE OF ORGANIZATIONAL COMMUNICATION IN MINIMIZING OFFICE
PROCEDURES DELAYS AT A GOVERNMENT AGENCY IN QUEZON CITY**

Zhantel Alexis Disquitado, Joana Candelasa, Angela Cuares,
Melanie Paderan, Leslie Ann Riambon, Bryan Tubao

Abstract

This research investigates the role of organizational communication in minimizing delays in office procedures within a government agency in Quezon City. Guided by Max Weber's Bureaucracy Theory, the study examines how communication effectiveness, transparency, and clarity contribute to operational efficiency. Findings suggest that office delays frequently stem from miscommunication, lack of coordination, and overly complex procedures, factors that hinder timely service delivery and erode public trust in government operations. This study employed a quantitative-correlational research design to examine the relationship between organizational communication and office procedure delays. The respondents consisted of 20 administrative staff members from the Novaliches Police Station – 4, under the Quezon City Police District. Data was collected through structured questionnaires designed to assess key communication indicators and their correlation with procedural delays within the agency. The findings revealed that, although communication practices within the agency were generally functional, persistent issues remained, such as outdated communication systems, vague directives, and staffing gaps. Statistical analysis indicated a weak correlation between organizational communication and office procedure delays. This suggests that while communication contributes to procedural efficiency, it is not the sole determinant, highlighting the influence of other structural and operational factors. The results underscore the importance of integrating communication strategies with broader organizational reforms. Respondents emphasized that ineffective communication contributes to confusion, extended processing times, and reduced productivity. However, the study also identified other critical factors, such as poor interdepartmental coordination, insufficient training, and procedural redundancy, that significantly impact operational efficiency. These findings suggest that enhancing communication alone is insufficient; meaningful improvements require addressing underlying structural and procedural inefficiencies within the organization.

Keywords: organizational communication, office procedure delays, bureaucratic efficiency, government agency, communication barriers, structural inefficiencies, interdepartmental coordination, max weber's bureaucracy theory, public service delivery, administration

**THE TRANSFORMING ROLE OF OFFICE ADMINISTRATORS IN CORPORATE
MANAGEMENT: A STUDY OF EVOLVING DUTIES AND REPONSIBILITIES**

Arvin Faraun, Jamela May Agas, Ryan Scott Arroyo, Rocelle Coyao,
Nelsie Lasota, Kimberly Joyce Embile

Abstract

The role of office administrators has significantly evolved from clerical support to strategic contributors in modern corporate settings. This study explores their expanding responsibilities, including project management, employee engagement, and tech-driven operations. As workplaces emphasize flexibility and collaboration, office administrators have become crucial in managing complex organizational demands. Citing Guzvita (2021) and Bennett (2023), the research underscores the growing importance of these professionals in ensuring corporate efficiency and success amidst rapidly changing business environments. The researchers utilized a quantitative descriptive design to investigate the evolving role of office administrators in corporate management. Grounded in established theoretical and conceptual frameworks and supported by related literature, the study aims to collect data from various participants to explore and validate the transformation of office administrators' responsibilities. This method enables the researchers to assess how their roles have shifted from traditional support functions to strategic involvement in organizational success. Table 20 reveals a major challenge faced by office administrators: difficulty adapting to new technologies due to insufficient training and organizational resistance. With 22 respondents identifying this as the top concern, the data underscores a gap between technological advancement and the support provided to administrators. This highlights the need for improved training programs and more proactive organizational strategies to help office administrators transition effectively into their evolving roles in corporate management. The study on the transforming role of office administrators in corporate management emphasizes the shift in their responsibilities from clerical tasks to strategic and technological functions. Findings indicate that a majority of office administrators are single, a trend supported by research suggesting that single professionals often prioritize personal development and career advancement. This demographic detail reflects how evolving job roles are intersecting with lifestyle choices, reinforcing the importance of continuous learning and adaptability in today's corporate environment.

Keywords: office administrators, evolving roles, corporate management, technology integration, career development, professional challenges, single professionals, workplace transformation

**THE TRANSITION FROM CASH TO DIGITAL PAYMENT: EMERGING TRENDS AND
CONSUMER PREFERENCES IN BRGY. CAPRI, NOVALICHES, QUEZON CITY**

Reema Lynn Santiago, Zychrile Joice Antonio, Kharyme Mae Bonrostro,
Jamaicah Daluma, Jessabeth Delos Reyes, Analyn Magalso

Abstract

This study examines the ongoing shift from traditional cash transactions to digital payment platforms in Barangay Capri, Novaliches, Quezon City. It explores the factors influencing the adoption of digital payment methods and the challenges encountered by both users and non-users. The study employed a descriptive research design and purposive sampling to gather data from residents and store owners in Barangay Capri. Survey questionnaires were used for data collection, and the data were analyzed using frequency, percentage, ranking scale, weighted mean, and F-test procedures. The findings reveal that while digital payment adoption is growing, influenced by factors like convenience and incentives, challenges persist. These include concerns about transaction costs, security and trust, ease of use, and digital literacy. The study highlights the need for strategies to promote digital payment adoption by addressing concerns, improving accessibility, and enhancing user education.

Keywords: digital payments, consumer preferences, digital divide, transaction costs, security and trust, ease of use, incentives and rewards, barangay capri

**TIKTOK PROMOTIONAL VIDEO AND CONSUMER ENGAGEMENT
OF G21 SOAP AND COSMETICS PRODUCT**

Jhenalyn Joseph, Catherine Joy Onting, Joshua Postrado, Maricar Tiglao,
Kristine Joyce Torres, Jennylene Abalos

Abstract

This study explores the impact of TikTok promotional videos by G21 Soap and Cosmetics, a company founded in 2018, on customer awareness and consumer engagement. Recognizing TikTok's role as a powerful social media platform driven by short-form, algorithm-curated content, the research assesses how effectively G21's videos enhance brand visibility and foster interaction with customers. The study aims to measure the level of customer awareness generated by these promotional efforts and analyze their influence on consumer engagement behaviors. This study employed a correlational research design to examine the relationship between TikTok promotional videos by G21 Soap and Cosmetics and consumer engagement. Data was gathered from 50 respondents using a survey questionnaire. Statistical analyses, including weighted mean, ranking, and Pearson correlation, were utilized to evaluate how TikTok videos influence customer awareness and engagement levels. The research aims to provide insights into the effectiveness of short-form social media content in enhancing brand-customer interactions. The study found that TikTok promotional videos by G21 Soap and Cosmetics scored high in brand appeal, consumer trust, and content alignment, with respondents rating the brand as appealing (3.32), frequently checking reviews before purchase (3.54), and feeling encouraged to buy (3.48). Consumer engagement indicators, awareness of product features (3.56), information-seeking behavior (3.38), and positive brand perception (3.58), were similarly rated positively. However, hypothesis testing revealed a weak, non-significant negative correlation ($r = -0.1471$, $p = 0.3030$) between TikTok videos and consumer engagement. While the relationship was not statistically significant, the findings emphasize the importance of further exploring how TikTok content influences brand perception and engagement. Users identified several challenges with G21's TikTok marketing, including an overreliance on influencers rather than authentic customer testimonials (23 respondents), incomplete product information (21), and absence of real-time feedback or live demonstrations (19). Additional concerns involved unrealistic filters, inauthentic influencers (18), and unclear explanations of product benefits and ingredients (17). To address these issues, the study recommends that G21 focus on authentic user testimonials, incorporate real-time feedback mechanisms, and produce engaging content like skincare tutorials and behind-the-scenes videos. These strategies aim to build consumer trust and enhance engagement by delivering meaningful and relatable content.

Keywords: tiktok marketing, consumer challenges, influencer authenticity, product information, real-time feedback, customer testimonials, consumer trust, engagement strategies, g21 soap and cosmetics

**UTILIZATION OF TECHNOLOGY IN ASSESSING OPERATIONAL SERVICES
IN PUBLIC LIBRARY TOWARDS CLIENT SATISFACTION**

Anthony Santos, Arvin Centeno, Christine Sereño, Camille Corto,
Jo-an Bobila, Kimberly Joyce Embile

Abstract

The digital revolution has significantly transformed public libraries, improving book management, staff scheduling, document organization, and user record-keeping. While manual tasks remain essential for maintaining library efficiency, they can be time-consuming and prone to errors. By integrating technology, these processes can be streamlined, reducing employee workload and enhancing overall productivity. Digital innovations have reshaped the operations of public libraries especially within the Division of Readers' Services at both global and local levels. This study employed both descriptive and quantitative research methods, using a survey questionnaire as the primary data-gathering tool. A convenience sampling approach was applied, with 50 clients of the Public Library serving as respondents. Data collection and analysis were conducted through the use of questionnaires. The weighted mean was utilized to assess responses, while Pearson's correlation coefficient was applied to determine whether there is a significant relationship between technology utilization and client satisfaction. Overall, the study concludes that technology significantly impacts client satisfaction by improving various service aspects, though further investment is needed to address existing gaps. The findings show that clients of the Quezon City Public Library strongly agree that the use of technology in the library is both accessible and efficient. In particular, the library is consistently accessible to its users. Most clients are under 25 years old, indicating that the library is widely used by young people and students. This is a positive sign, as it shows that younger generations benefit from library services for their specific needs. The majority of users are female, suggesting that women tend to visit the library more often than men. In terms of visit frequency, clients typically visit the library occasionally about two to three times per month likely due to other commitments or priorities.

Keywords: digital revolution, technology in libraries, book management, document organization

**WHITENING RESULTS WITH GUAVA LEAF EXTRACT AND
PAPAYA POWDER INFUSED WITH PEPPERMINT**

John Mark Guya, Raiza Lee Maica Mayote, Danielle May Maniquis,
Krystal Gayle Ignacio, Xyjoenas Ann Soleta, Christine Calvo

Abstract

This study aims to evaluate the feasibility and future potential of launching an innovative teen-led business specializing in teeth whitening using natural ingredients, including guava leaf extract, papaya powder, and peppermint. The research demonstrates that these natural components effectively enhance oral care, contributing to both the physical health and emotional well-being of users. Purposive sampling was used to select dentists and entrepreneur students for this study. Data was collected through questionnaires within a quantitative experimental research design. The results showed that the natural teeth whitening product, enriched with guava leaf extract, papaya powder, and peppermint, significantly improved users' attitudes toward teeth whitening. Additionally, the respondents' feedback was instrumental in guiding the formulation of targeted marketing strategies for the whitening toothpaste, complemented by the proposed recommendations. This study highlights the critical role of understanding customer perceptions when introducing innovative oral care products, especially in the realm of teenage entrepreneurship. Five dentists and ten entrepreneurs, chosen for their expertise and connection to teeth whitening products, provided valuable feedback. Their input helped assess the effectiveness and market potential of a product combining guava leaf extract, papaya powder, and peppermint, not only improving oral health but also offering a promising business opportunity. Based on these insights, recommendations were formulated to enhance product development and marketing strategies to drive greater business success.

Keywords: teenage entrepreneurship, natural teeth whitening, guava leaf extract, papaya powder, peppermint, oral care innovation, customer perception, marketing strategies, business potential

**A BUSINESS PLAN OF CRUNCH AND OAT CAFE AT 22 GOLD STREET,
MILLIONAIRES VILLAGE, QUEZON CITY**

Erika Lazaro, Loveliduds Aguilar, Maria Yvannica Lyle De Guzman, Samuel Rosaceña,
Marjorie De Leon, Justine Ejorcadass, Shawn Gabriel Tumalad, Jam Aila Agustin,
Reniel Nuevo, Wendell Azores, Vinalyn Sarzata

Abstract

Crunch and Oat Cafe offers a fast-casual dining experience with crispy rice meals and oat-based coffee. These are healthier, plant-based alternatives crafted for professionals, students, and families. Blending old-school flavors with modern innovation, the café delivers quick, eco-friendly meal options. The oat coffee, rich in soluble fiber, promotes healthy digestion, while the crispy rice balls offer a tasty, crunchy twist on traditional rice dishes. Conveniently located at 22 Gold Street, Millionaires Village, Novaliches, Quezon City. The business plan incorporated surveys and feasibility research involving 60 respondents to identify customer preferences regarding product range, promotional strategies, pricing, and location. These analyses confirmed the market viability of the concept. Financial assessments were conducted to determine optimal pricing and forecast profitability, while operational plans were developed to maximize efficiency within the compact 18-square-meter space. The business also ensured full legal compliance by adhering to all applicable regulatory standards. Survey results revealed that 63% of respondents are open to trying innovative food, while 49% expressed a preference for a contemporary dining environment. Financial projections indicated a profitable markup strategy ranging from 50% to 100% across products, balancing both affordability and profitability. The café's signature offerings: innovative crunchy rice balls and oat coffee, set it apart from competitors by emphasizing food that is both healthy and delicious. Crunch and Oat offers a unique and delightful fusion of oat-based coffee and crunchy rice balls filled with classic Filipino flavors blending modern nutritional trends with deep cultural roots. The oat coffee, crafted from rich oat extract with a hint of sweetness, serves as a smooth, dairy-free alternative ideal for lattes and macchiatos. It meets the growing demand for plant-based, eco-friendly options. Complementing this is a serving of golden, crispy rice balls packed with bold Filipino flavors. This combination delivers satisfying textures and savory tastes, refreshing coffee paired with creamy, rich, and crunchy bites, making it a standout addition to cafés and innovative snack menus.

Keywords: fast-casual dining, innovation in food, healthy food, plant-based alternatives

**A BUSINESS PLAN ON THE ESTABLISHMENT OF LANGKA LICIOUS IN
BUENAMAR NOVALICHES PROPER QUEZON CITY**

Rogeldemae Cuyag, Armina Claire Castañeda, John Mike Bragais, Stephanie Solis,
Maria Gabriela Acuña, Irish Aguilar, Ella Marie Avila, Lyka Mae Peñaranda,
Rhyzza Mye Manzano, Cristian George Gabasa

Abstract

Langka Licious is a new plant-based restaurant in Quezon City that uses young jackfruit to create vegan versions of classic Filipino dishes, such as sisig. The restaurant aims to offer healthy, eco-friendly, and culturally inspired meals to employees, students, and health-conscious individuals. Open daily from 11 a.m. to 8 p.m., Langka Licious provides both dine-in and takeout options. Its slogan, “Langka Licious, Langkatulad!”, reflects the brand’s commitment to originality and plant-based innovation. This study focused on establishing Langka Licious, a plant-based food business. The researchers optimized resources to align with the initial investment and designed the store to be both eco-friendly and inviting. They selected a location with strong visibility and accessibility and ensured its presence on Google Maps. By observing customer behavior and gathering feedback, the researchers refined their marketing strategies and operations to better meet customer needs and enhance overall business performance. Langka Licious showed promising results in both sustainability and customer satisfaction. Customers appreciated the flavor and texture of the jackfruit sisig. By using unripe jackfruit, the business helped reduce food waste, a clear win for sustainability. Additionally, the use of biodegradable packaging minimized plastic waste, further enhancing its eco-friendly approach. Overall, Langka Licious demonstrated strong potential in terms of product acceptability and environmental impact. Langka Licious targets health-conscious consumers who value sustainability and unique food experiences. In the short term, the company aims to build brand awareness, deliver excellent customer service, and foster customer loyalty. Long-term goals include expanding its product range and improving customer retention. To support these objectives, Langka Licious leverages social media, influencer marketing, and value-based pricing strategies. The company also prioritizes staff training, operational efficiency, and safety policies while offering employee incentives to encourage performance and growth. Overall, Langka Licious strives to build a strong brand rooted in quality products, customer satisfaction, and team development.

Keywords: plan based restaurant, vegan filipino food, filipino healthy food, langka licious

**A BUSINESS PLAN ON THE ESTABLISHMENTS OF PITA BITES AT
PASCUAL ROAD NOVALICHES QUEZON CITY**

Hyacinth Anne Quintua, Shaira Mae Bonghanoy, Maria Sheena Leyco, Cindy Lopez, Paulyne Gail Lumanta, Kimberley Paez, Ira Mae Perua, Kathleen Requillas, Eunice Charlotte Rumol, Kennard Zale Vargas, Vinalyn Sarzata

Abstract

Pita Bites operates under a well-defined organizational structure, divided into key functional areas: operations, kitchen production, marketing, sales, and logistics. Each department has specific responsibilities to ensure the smooth and efficient execution of daily business activities. The kitchen production team is responsible for preparing all menu items using standardized recipes, ensuring consistent taste, quality, and food safety. The operations team oversees critical backend functions such as budgeting, supplier coordination, and inventory control, helping to allocate resources effectively and maintain an uninterrupted supply chain. Marketing efforts at Pita Bites are executed through both digital and traditional channels. The marketing team focuses on building brand awareness through social media campaigns, printed flyers, in-person product sampling, and direct customer engagement, all aimed at attracting and retaining customers. Additionally, the team has developed a comprehensive financial plan to assess the business's feasibility and long-term sustainability, supporting informed strategic decision-making. Financially, Pita Bites is well-positioned for strong performance. Projected monthly sales are estimated at ₱34,960, with associated costs totaling ₱22,500, resulting in a gross income of ₱12,460. After deducting operating expenses of ₱5,990, the net income amounts to ₱6,470. This translates to a return on investment (ROI) of 49.77%, based on an initial capital of ₱85,000. The business is expected to reach its break-even point by the 12th day of operations, indicating rapid cost recovery and early profitability. Owner's equity is also projected to grow steadily through retained earnings. Overall, Pita Bites exceeded initial expectations. The positive reception of its products reflects strong alignment with market demand for convenient, flavorful, and affordable food options. A solid financial outlook, strategic pricing, and a customer-centric approach all contribute to the business' growth potential. With continued focus on quality, teamwork, and effective marketing, Pita Bites is well-positioned for long-term success in a competitive market.

Keywords: pita bites, digital marketing, traditional marketing, brand awareness, social media marketing

**A COMPARATIVE ANALYSIS OF THE TRADITIONAL AND DIGITAL
RECORD-KEEPING METHODS OF GOVERNMENT AGENCY IN CALOOCAN CITY**

Shaira Abegail Barola, Kristine Capunong, Jamaicah Casalme,
Aisa Donato, Blessy Orogio, Bryan Tubao

Abstract

Effective record management is essential for maintaining accountability, transparency, and compliance with legal and regulatory requirements (Lawan & Henttonen, 2024). This research presents a comparative analysis of traditional and digital record-keeping methods used by a government agency in Caloocan City, focusing on key factors such as usability, record preservation, security, auditing, compliance, and accessibility. These elements are critical to ensuring election integrity and enhancing operational efficiency. A survey of 20 records department employees revealed a well-balanced workforce, with the majority of staff members aged 31 to 35, predominantly male, and primarily serving in support roles. Results indicate that digital record-keeping is significantly more effective than traditional methods, particularly in terms of ease of use, security, auditing, and immediate access. Statistical findings reveal a notable difference in perception, with digital records being favored due to enhanced encryption, authentication, and automation features. However, both approaches present challenges. Traditional record-keeping is vulnerable to environmental hazards, requires substantial storage space, and is inefficient in retrieval. In contrast, digital systems demand continuous security updates, regular maintenance, and ongoing infrastructure support. The research concludes that transitioning to a digital record-keeping system is essential for improving efficiency, security, and regulatory compliance. To ensure a smooth and effective shift, organizations must address cybersecurity threats, provide comprehensive staff training, and implement robust data protection measures.

Keywords: record management, digital record-keeping methods, strong data protection

**A PROPOSED ENHANCEMENT FACULTY RECRUITMENT POLICY FOR
BESTLINK COLLEGE OF THE PHILIPPINES IN QUEZON CITY**

Ma Therese Cayco, Joe Ward Aciling, Jasper Benitez, April Corporal,
Maria Tricia Badocdoc, Dr. Joy Evelyn Ignacio

Abstract

Bestlink College of the Philippines in Quezon City is experiencing significant challenges in attracting qualified applicants for faculty positions. These difficulties are further compounded by delays in processing manpower requests and ineffective communication between the Human Resources (HR) department and applicants. Such issues hinder the overall efficiency of the recruitment process, resulting in extended hiring periods and, at times, suboptimal hiring decisions. This study is a vital step toward identifying and addressing these challenges to ensure the recruitment of competent and qualified faculty members at Bestlink College. This study utilized descriptive quantitative research design. Data were gathered from 20 Human Resource (HR) personnel, 8 from Bestlink College of the Philippines and 12 from other higher education institutions, including St. John Technological College of the Philippines, Saint Tonis College, and Bataan Heroes College. Participants were purposively selected based on their expertise in recruitment within HR departments. A survey questionnaire, administered both in print and through Google Forms, served as the primary data-gathering tool to assess respondents' perceptions of the proposed enhancements to the faculty recruitment policy. The study revealed that 60% of the respondents were female, and 65% had 0 to 2 years of experience in Human Resources. Additionally, 65% held a bachelor's degree. The highest-rated aspects of the recruitment policy were fairness and transparency. The statement "Ensures all candidates are treated equally" received a rating of 3.70, while "Job qualification clarity" and "Competitive salary reviews" both scored 3.75. Conversely, the lowest-rated areas were related to feedback consistency and candidate evaluation, with "Prioritize internal candidates" receiving a rating of 3.30, and "Specify candidate evaluation procedures" rated at 3.35. This study confirmed that the proposed enhancement to the faculty recruitment policy at Bestlink College of the Philippines is both highly valid and broadly acceptable. The results highlight the policy's strengths in clarity, fairness, and relevance, demonstrating its alignment with institutional objectives and its support for a more equitable and efficient recruitment process. These findings align with existing literature, which emphasizes the significance of transparent selection criteria and well-defined recruitment guidelines. Future research may build on this foundation by examining the impact of real-time communication, continuous feedback mechanisms, and regular policy updates on recruitment effectiveness.

Keywords: faculty recruitment, policy enhancement, human resources, fairness, transparency, clarity, equitable hiring, recruitment process, bestlink college of the philippines, real-time communication, policy revision

ADOPTABILITY PERFORMANCE OF E-COMMERCE TOOLS AMONG SMALL-SIZED ENTERPRISES ALONG STO. NIÑO, MEYCAUAYAN, BULACAN: BASIS FOR PROPOSED STRATEGIC PLAN

Ken Rick Paul Bendanillo, Lyca Baniqued, Jeaneo Sean Umpacan, Mizzy Mariah Cabading,
Levin Oscar Operio, Reynold Bangalisan

Abstract

This study investigates the impact of e-commerce tools on business performance among small-sized enterprises in Sto. Niño, Meycauayan, Bulacan, using Davis's (1989) Technology Acceptance Model as a framework. The model proposes that perceived usefulness and perceived ease of use drive technology adoption. By examining these factors, the study aims to understand how e-commerce tool adoption translates into operational and financial outcomes. A descriptive correlational design is employed to assess tool adoption, perceived usefulness, perceived ease of use, and business performance linkages. Forty-five respondents, comprising fifteen SSE owners and thirty employees, are selected through purposive-quota sampling. Validated questionnaires gather data on e-commerce tool usage, associated challenges, and performance indicators. Descriptive statistics and Pearson's correlation are used to analyze relationships among variables. Respondents had universally adopted GCash and widely used Facebook (80 percent), while logistics tools such as Lalamove lagged at 33 percent adoption. Mean scores indicated moderate perceived usefulness (3.24) and perceived ease of use (3.22), reflecting recognition of e-commerce benefits for operational efficiency but limited impact on revenue growth and customer retention. Pearson's correlation revealed no significant relationship between tool adoption and business performance ($p > 0.05$, $r \approx 0$), supporting the null hypothesis. Major challenges included distrust of digital payments, data privacy concerns, limited technical skills, and logistical barriers such as shipping delays. Based on these insights, a strategic plan was proposed emphasizing hands-on digital training, streamlined onboarding processes, automated customer service solutions, and revenue-focused e-commerce strategies. The study concluded that although small-sized enterprises acknowledge the potential of e-commerce, systemic barriers, trust deficits, skill gaps, and tool complexity, have prevented measurable performance gains. Aligning Technology Acceptance Model dimensions with targeted interventions such as enhanced technical support and customer engagement programs was identified as critical for optimizing tool utility. These findings contribute to understanding digital adoption in resource-constrained contexts and advocate for holistic support systems to bridge the gap between technology access and sustainable business growth in emerging markets.

Keywords: e-commerce adoption, small-sized enterprises, technology acceptance model, business performance, strategic plan

**ADOPTION OF TECHNOLOGY PAYMENT IN BOOSTING PRODUCTIVITY OF
SELECTED FOOD AND BEVERAGE BUSINESSES IN DON ANTONIO, QUEZON CITY:
A BASIS FOR IMPLEMENTATION STRATEGIES**

Genalyn Guibao, Lymarie Luceño, Mary Camille Parallag, Rowena Quiseo,
Mariel Wenceslao, Reynold Bangalisan

Abstract

This study investigates the efficiency of technology payment systems in boosting productivity among food and beverage businesses in Don Antonio, Quezon City, and develops implementation strategies based on identified challenges and adoption levels. With increasing demand for convenience and digital integration, mobile and terminal-device payments are becoming more prevalent. However, micro and small enterprises often face financial constraints, limited technical expertise, and user errors. The research is grounded in the theory that technology adoption enhances productivity through streamlined operations and improved customer service (Akenferi et al., 2002). A descriptive quantitative design is employed, with purposive sampling of sixteen respondents, owners and staff, across six local food and beverage businesses. Structured questionnaires measure four dimensions: technology characteristics, precursors of utilization, practices, and performance impact. Data analysis includes frequency distributions, weighted means, two-way ANOVA to examine differences by business profile, and ranking of implementation challenges. Most businesses were well established and had adopted terminal-based payment systems, which moderately improved productivity by accelerating transaction speed and enhancing customer service. Technology characteristics, precursors of utilization, practices, and performance impact all demonstrated moderate to high contributions to operational efficiency. Two-way ANOVA revealed no significant differences in adoption levels based on business type, indicating uniform perceptions of digital payment benefits. The most prevalent challenge was user error, followed by concerns about costs and technical support. The findings indicated that technology payment systems significantly enhanced productivity and customer satisfaction when effectively implemented. User error emerged as the primary barrier, highlighting the need for ongoing technical support and training. As a result, recommendations include upgrading point-of-sale systems, strengthening cybersecurity measures, conducting employee training programs, and launching customer education campaigns. The study also advised maintaining traditional payment options for inclusivity and establishing backup systems to ensure continuity during technical failures. These insights provide practical guidance for food and beverage businesses transitioning to digital payments and inform policymakers on strategies to promote financial inclusion and economic growth in the sector.

Keywords: technology payment, productivity, food and beverage, digital adoption, implementation strategies

**AN ASSESSMENT OF CLIENT SATISFACTION IN OFFICE SERVICES IN BARANGAY
173 IN CALOOCAN CITY**

Denzel Canuto, Madeline Batulan, Christian Joseph Calanday, Aldrian Malok,
Shella Nie Netullano, Kimberly Joyce Embile

Abstract

This study assesses client perceptions of office service quality in Barangay 173, Caloocan City, focusing on document processing, staff courtesy, waiting time, clarity of information, and overall service efficiency. It evaluates which aspects meet public expectations and identifies areas requiring improvement to enhance satisfaction and strengthen local service delivery. A descriptive research design is employed using convenience sampling to select fifty clients aged 18 and above who recently accessed Barangay 173 office services. A structured survey questionnaire measures satisfaction across five service dimensions. Collected data are analyzed using percentage distributions, weighted means, and ranking to determine levels of client satisfaction and prioritize improvement areas. Clients reported overall satisfaction with Barangay 173 office services, highlighting staff professionalism, friendliness, and efficient response times. However, respondents also identified excessively long waiting times, slow processing, occasional system failures, and unclear service information as key concerns. Weighted mean scores ranged from 3.2 to 4.1 on a five-point scale, with waiting time receiving the lowest rating. Suggested improvements included enhanced staff training, better queue management, and clearer communication strategies. The findings indicated that prompt and effective municipal services are critical to client satisfaction. While most residents expressed confidence in staff competence, service delays and reliance on manual procedures undermined efficiency. As a result, implementing targeted staff capacity building, digitalizing workflows, and expanding public information campaigns were recommended to improve operational performance, foster trust in local governance, and elevate overall satisfaction.

Keywords: client satisfaction, office services, waiting time, staff courtesy, service efficiency, barangay 173

**ANALYSIS OF THE MARKETING STRATEGY ON CUSTOMER RETENTION:
AN EMPIRICAL STUDY OF ARDYS' BEAUTY SALON**

Carmel Joy Seraspe, Adrian Josef Bermido, Camille Jane Gapoy, Joella May Poseran,
Andrian Jay Salmorin, Jessica Rivera, Vinalyn Sarzata

Abstract

Ardys Beauty Salon has been a prominent provider of beauty services for over 35 years, maintaining a strong customer base and solid market position. However, despite its long-standing success, the salon faces ongoing challenges, including extended waiting times, inconsistent service delivery, pricing concerns, and limited effectiveness in promotional communication. This study aims to evaluate the effectiveness of marketing strategies in fostering customer retention at Ardys Beauty Salon, with particular focus on service quality, pricing structure, location accessibility, promotional efforts, and customer engagement. This study adopted a quantitative research approach, using survey questionnaires to collect data from clients of Ardys Beauty Salon. Statistical tools were applied to evaluate the relationship between marketing strategies and customer retention, aiming to determine the strength and significance of their correlation. The results reveal a strong and statistically significant correlation between marketing strategies and customer retention ($r = 0.7312$, $p = 0.0162$), thus rejecting the null hypothesis. This underscores the crucial role of effective marketing in fostering customer loyalty at Ardys Beauty Salon. Although respondents generally viewed the salon's promotional activities positively, several issues emerged, including prolonged waiting times, inconsistent service quality, poor communication of special offers, and pricing concerns. Clients also reported challenges in booking appointments and expressed a desire for more seamless customer experience. Based on weighted mean scores, service quality received a rating of 3.28 (Very Good), pricing at 3.23 (Good), place at 2.75 (Good), promotions and advertisements at 3.30 (Good), and customer interaction at 3.22 (Agree). These figures reflect both the salon's strengths and the need for targeted improvements. To enhance customer retention, the study recommends optimizing service delivery, simplifying pricing structures, intensifying promotional efforts, and leveraging digital platforms. Furthermore, continuous staff training, particularly in communication and customer service, can contribute to stronger client relationships and sustained business growth. This study affirms the critical importance of continuous improvement in marketing strategies and service quality to maintain and strengthen customer loyalty. By proactively addressing current issues, such as service inconsistencies, pricing concerns, and communication gaps, and integrating customer insights into strategic planning, Ardys Beauty Salon can significantly elevate client satisfaction and reinforce its competitive advantage. The proposed recommendations serve as actionable pathways for sustainable business growth and long-term customer retention.

Keywords: customer retention, marketing strategies, service quality, pricing, promotion, customer satisfaction, beauty industry, ardys beauty salon, customer engagement, business growth.

**ANALYZING MODERN COMMUNICATION TOOLS ON THE EMPLOYEE
PRODUCTIVITY AT RAMA SECURITY AGENCY INCORPORATED**

Bona Irah Chuatico, Gemary Boco, Jonielyn Cutillas, Kristine Salas,
Cristine Joy Venales, Bryan Tubao

Abstract

This thesis investigates the influence of modern communication tools on employee productivity. RAMA Security Agency Incorporated, a private company specializing in the analysis, planning, design, and implementation of integrated security systems, has identified frequent misunderstandings as a communication challenge. As a result, the agency continues to rely heavily on direct, face-to-face interactions with staff, despite the availability of digital communication platforms. This study explores the influence of modern communication tools on employee productivity, with the goal of offering practical recommendations for managers to enhance internal communication and achieve greater organizational success. It emphasizes the importance of fostering a collaborative work environment, strengthening communication strategies, and improving daily operational efficiency. A descriptive research design was utilized, with 20 employees selected as respondents for the survey. The researchers employed a survey questionnaire as the primary instrument for data collection and utilized purposive sampling to select the respondents. Data were analyzed using frequency and percentage distribution, ranking, and weighted mean. Results revealed that Google Meet was the most commonly used communication platform, selected by 10 respondents. In contrast, email and phone calls were the least preferred, with only two respondents choosing each. A common issue identified was the challenge of maintaining employee productivity due to unclear communication through modern tools. Additionally, the study found significant differences in productivity based on age and work quality, as well as years of service and efficiency. However, no significant differences were observed in relation to job title or communication method. These findings emphasize the need to enhance workplace communication practices to improve overall productivity. The findings are recommended to enhance employee productivity. Providing regular training opportunities can help employees strengthen their skills and improve job performance. Encouraging collaboration and fostering effective communication promotes a more cohesive and efficient work environment. Clearly defined goals, coupled with consistent feedback, can further enhance task completion and accountability. Additionally, improving employee satisfaction, upgrading communication tools, routinely assessing current strategies, and offering continuous support and development are essential for adapting to evolving workplace demands and sustaining productivity.

Keywords: modern communication tools, employee productivity, internal communication, workplace collaboration, communication barriers, descriptive research, google meet, purposive sampling, feedback and training, workplace efficiency

**ANALYZING THE IMPACT OF PROMOTIONAL STRATEGIES ON
BRAND AWARENESS FOR THE HE-BREW CAFÉ AT BRGY.
NOVALICHES PROPER, QUEZON CITY**

Joyce Andrea Sundiam, Eralyn Lampago, Janriel Palanas, Miguel Arcangel Tarroquin,
Nicole Villarba, Vinalyn Sarzata

Abstract

The growth of the coffee industry indicates an increasing consumer affinity for coffee, leading to intensified competition among local establishments. He-Brew Café, a newly established coffee shop in Novaliches, Quezon City, offers not only high-quality coffee but also a diverse menu. Despite its strong product offerings and active use of Facebook for promotional purposes, the café continues to struggle with building significant brand awareness within its target market. This research utilizes a quantitative design to examine the impact of promotional strategies on the brand awareness of He-Brew Café. The study focuses on advertising, personal selling, sales promotion, direct marketing, and public relations to identify the most effective strategy for enhancing brand awareness. Correlation analysis is employed to explore the relationship between these promotional approaches and brand awareness. Data was gathered through a survey questionnaire distributed to 99 respondents selected via simple random sampling. Analytical tools include percentage distribution, weighted mean, Likert scale interpretation, and Pearson's correlation coefficient to evaluate the strength and significance of the relationships. The results reveal that the overall weighted mean for promotional strategies was 3.31, indicating a "strongly agree" perception, with advertising receiving the highest rating at 3.54. This was followed by sales promotion (3.44), direct marketing (3.37), and public relations (3.27), all similarly interpreted as "strongly agree." Personal selling scored a weighted mean of 2.94, corresponding to "agree." In contrast, the weighted mean for the effectiveness of the promotional techniques currently employed by He-Brew Café was 2.28, interpreted as "disagree." Among these, personal selling ranked highest at 2.36, followed by direct marketing (2.29), public relations (2.27), sales promotion (2.25), and advertising (2.24), all falling within the "disagree" range. These findings suggest a disconnect between the perceived importance of promotional strategies and the actual effectiveness of the café's current promotional efforts in engaging its target audience. He-Brew Café should enhance its promotional strategies to effectively build brand awareness and foster greater customer engagement. This can be achieved by developing more compelling digital advertisements, strengthening personal selling efforts, implementing targeted loyalty programs, leveraging direct marketing, and designing promotions that resonate with the young and trend-conscious market. By addressing these areas, He-Brew Café can overcome current challenges and improve its competitive standing in the industry.

Keywords: he-brew café, promotional strategies, brand awareness, customer engagement, digital advertising, personal selling, loyalty programs, direct marketing, targeted promotions, competitive advantage

**ANALYZING THE PRODUCT OFFERINGS TOWARDS PURCHASE
DECISION OF CUSTOMER IN FRIED RICE STATION**

Cecilia Mae Sotto, Dianne Chavez, Catherine Pecayo, Mary Joy Suarez,
Cristine Joy Trigo, Vinalyn Sarzata

Abstract

This study aims to support Fried Rice Station, a local food business in Amparo, Caloocan City, by identifying the key factors that influence customers' dining choices. Despite its growing popularity due to affordable prices, quick service, and customizable meals, the business faces challenges in maintaining consistent food quality, controlling costs, and standing out in a highly competitive market. One major concern is the lack of a clear strategy for product development and customer retention, as current offerings are largely based on the owner's personal preferences. This research seeks to address these gaps by analyzing customer preferences, improving product development, formulating a competitive strategy, and enhancing customer loyalty. Ultimately, the study aims to help Fried Rice Station upgrade its menu and services to achieve long-term success and sustainability. This study utilized a correlational research design to examine the relationship between multiple variables without manipulation. A simple random sampling method was employed to select 80 respondents objectively and without bias. A survey questionnaire served as the main data-gathering tool, allowing the researchers to collect relevant information from the participants effectively. The findings show that the majority of respondents (37.5%) are between the ages of 15 and 21. In terms of gender, 55% are female. When it comes to monthly income, 36.25% earn less than ₱5,000, indicating that affordability significantly influences their dining choices. For Statement of the Problem #2 (SOP#2), which focused on five variables, Features, Quality, Presentation, Customization Options, and Benefits, the highest mean score was in Benefits (2.96), suggesting that customers feel satisfied with the meals offered, making Fried Rice Station stand out. The lowest mean score was in Customization Options (2.77), indicating that while customers appreciate the ability to personalize their meals, this aspect could still be enhanced. The statistical analysis indicates an r-value of -0.1816, suggesting a weak negative correlation between product offerings and purchasing decisions. Additionally, the p-value of 0.1047 exceeds the 0.05 level of significance, indicating that the relationship is not statistically significant. Therefore, the null hypothesis (Ho) is accepted, confirming that product offerings do not have a significant impact on customer purchasing decisions at Fried Rice Station. However, the results point to limited product variety as a primary concern for customers. In response, it is recommended that the business owner expand the menu by introducing more meal options to better cater to customer preferences and improve customer satisfaction.

Keywords: fried rice station, product offerings, purchasing decisions, weak negative correlation, r-value, p-value, null hypothesis, statistical analysis, customer preferences, menu expansion, customer satisfaction

**ASSESSING THE STUDENT SERVICES OF ACCOUNTING DEPARTMENT AT BESTLINK
COLLEGE OF THE PHILIPPINES: BASIS FOR STRATEGIC IMPROVEMENT**

Carmi Jane Ibarra, Mary Rose Abadiano, Marcson Bellora, Christine Joy Martinez,
Liesel Ann Sevilla, Reynold Bangalisan

Abstract

This study examined the challenges faced by the accounting department of Bestlink College of the Philippines (BCP) as a basis for strategic improvements. Guided by General Systems Theory (Bertalanffy et al., 2021), it focused on issues related to Balance Inquiry Services (BIS), the Management Information System (MIS), and the Student Management System (SMS) all of which play essential roles in the institution's financial operations. This study utilized a descriptive quantitative research design, involving 349 BSBA students selected through stratified sampling from the Financial Management, Human Resource Management, and Marketing Management programs. Data were gathered using a researcher-constructed survey questionnaire and analyzed using statistical tools such as frequency, percentage, weighted mean, F-test, Kruskal-Wallis H-test, and Mann-Whitney U-test. The findings indicated that students generally rated the accounting services as moderately satisfactory, with mean scores ranging from 2.69 to 2.71. However, notable concerns emerged regarding slow response times, outdated information, and limited technical support. Among the three service areas, the Balance Inquiry Services (BIS) received the highest satisfaction for balance accuracy but was criticized for its lack of clarity and speed. The Management Information System (MIS) was viewed as reliable, though it required more timely updates and improved accessibility to staff. The Student Management System (SMS) demonstrated accuracy in transaction records but was hindered by slow service and insufficient technical assistance. Statistical analysis revealed no significant differences in satisfaction levels across the three service areas ($p > 0.05$), indicating common challenges. Conversely, the frequency of complaints varied significantly ($p < 0.05$), suggesting that some departments experience recurring issues more frequently. Major concerns included long queues, ineffective staff communication, and delayed posting of payment updates. A strategic improvement plan was proposed, recommending the establishment of a centralized BIS portal, automation of MIS processes, and integration of real-time support and digital payment options into the SMS. These enhancements aim to improve operational efficiency, elevate student satisfaction, and support data-driven administrative decisions. The study concludes that while the accounting services are generally functional, targeted system upgrades and policy reforms are needed to address evolving institutional and student demands. Key recommendations include implementing unified system interventions, enhancing staff training, addressing workload disparities, and improving system responsiveness for holistic and sustainable improvement.

Keywords: accounting services, balance inquiry services (bis), management information system (mis), student management system (sms), strategic improvement, student satisfaction, system responsiveness, operational efficiency

**ASSESSING ELECTRONIC BUSINESS PERMIT ON SARI-SARI
STORE OWNERS IN QUEZON CITY**

Cynthia Jay Gaña, Crislyn Joyce Gatchalian, Zyra Jhamila Esclamado,
Engel Kris Palero, Mary Grace Adarayan, Reynold Bangalisan

Abstract

This study investigates the Electronic Business Permit Platform (EBPP) as experienced by sari-sari store owners in Quezon City, focusing on its design, usability, and the challenges faced during its use. Developed under the Philippine government's digital transformation efforts led by the Anti-Red Tape Authority (ARTA), the EBPP aims to simplify and expedite the business permit application process by replacing traditional paper-based procedures with an online system. This study employed a mixed-method research approach involving 25 purposively selected sari-sari store owners. It examined their demographic profiles, perceptions of the EBPP's usefulness and ease of use, and their intention to adopt the platform. Quantitative data were analyzed using weighted mean and ranking, while qualitative insights were gathered through interviews to enrich the findings with personal experiences and contextual understanding. Findings showed that the majority of respondents were female, married, and had been running their businesses for 1–4 years. Most users found the EBPP efficient and user-friendly, with many indicating a strong intention to continue using it. However, technical issues such as system errors and service disruption emerged as key challenges that may hinder user experience and reduce confidence in the platform. The study recommends strengthening public awareness campaigns, improving system reliability, and integrating offline or hybrid support options to ensure the EBPP is accessible to users with limited digital literacy or unstable internet connectivity. The study concludes that, while the EBPP is recognized as a valuable tool for supporting local micro-enterprises, its long-term success depends on strategic improvements in system performance, user accessibility, and active community engagement.

Keywords: electronic business permit platform (ebpp), sari-sari stores, digital transformation, user perception, system usability, micro-enterprises, quezon city, public awareness, digital literacy, system accessibility

**ASSESSING MECHANIC PRODUCTIVITY IN KIRSTEN AUTOWORKS CORPORATION:
A STUDY OF CONTRIBUTING FACTORS AND POTENTIAL IMPROVEMENTS**

John Kenneth Tobias, Piolo Bisnar, Andrea Kate Divina, Leigh Ann Bernadette Sugang,
Marabela Ubo, Vinalyn Sarzata

Abstract

Kirsten Autoworks Corporation, a car repair and maintenance service provider established in 2015, employs fifteen general mechanics and can accommodate up to twenty vehicles, depending on their size. Despite its skilled workforce and ample space, the company faces ongoing productivity challenges. This study aims to assess the productivity of mechanics at Kirsten Autoworks Corporation by examining the key contributing factors and identifying strategies for improvement to enhance overall performance. This study explores the impact of demographic factors and perceived productivity levels on the overall performance of general mechanics at Kirsten Autoworks Corporation. To achieve the study's objectives, purposive sampling was employed, and data were gathered through a structured physical survey questionnaire administered to the mechanics. The collected data were analyzed using statistical tools, including frequency and percentage, weighted mean, and ranking. The results indicate that workplace organization is the most influential factor affecting the productivity of general mechanics at Kirsten Autoworks Corporation, with a composite mean of 2.66. Time management ranks equally, also with a composite mean of 2.66, underscoring the importance of accurate time estimation in enhancing performance. Communication follows with a composite mean of 2.50, while both skills and mastery of tools and equipment scored slightly lower, each with a composite mean of 2.43. These findings highlight the multifactorial nature of productivity, influenced by both operational and technical factors. Statistical analysis showed no significant differences in productivity across demographic variables such as age, experience, and income, as all p-values were greater than 0.05. The study also highlights major productivity challenges at Kirsten Autoworks Corporation, including workspace congestion, limited technical expertise, inaccurate job assessments, and frequent project delays. To address these issues, the study recommends providing skills training for mechanics, enhancing tool efficiency, reorganizing the workspace to ease congestion, and fostering clearer communication. These strategies aim to boost overall productivity and improve operational performance.

Keywords: mechanic productivity, workplace organization, time management, communication, technical skills, tool efficiency, workspace congestion, job assessment, training, automotive services.

**ASSESSING THE COMPETITIVE LANDSCAPE OF TAH-MEE: UNDERSTAND
CUSTOMER PREFERENCES IN IDENTIFYING AREAS FOR IMPROVEMENT**

Sumaya Maruhom, Ashraf Tomambiling, Kristal Mae Mamasu, Sittie Nashiba Mauna,
Ghay Lourd Matalicia, Vinalyn Sarzata

Abstract

Tah-Mee Yogurt is a premium dessert shop located in Vertis North Ayala, targeting health-conscious consumers with its high-quality yogurt offerings. Situated in a vibrant commercial hub, the shop benefits from steady foot traffic, especially from cinemagoers. However, it faces notable challenges such as low sales during off-peak hours, overreliance on cinema-driven customer flow, and a prevailing perception of high prices. These issues limit its ability to attract a more diverse customer base and maintain stable, long-term profitability. The study utilized a quantitative method with a descriptive-comparative research design. Data was collected from 50 randomly selected customers at Vertis North Ayala using convenience sampling. The survey results indicate that the majority of Tah-Mee Yogurt's customers are young adults aged 18–25 (43.33%), predominantly female (73.33%), and have a monthly income below ₱10,000 (53.33%). This demographic profile suggests that the brand currently appeals to young, budget-conscious female consumers. Nevertheless, there is a clear opportunity to broaden the customer base by developing strategies that attract male patrons and higher-income groups. To strengthen its market position, Tah-Mee Yogurt should prioritize aligning its offerings with customer preferences by introducing a wider variety of flavors and customizable options. Adjusting its pricing strategy, such as offering value deals or tiered pricing, can help attract cost-conscious consumers without compromising quality. Establishing a strong customer loyalty program will encourage repeat visits and foster brand loyalty. Moreover, enhancing the overall customer experience through improved service, comfortable store ambiance, and engaging promotions will play a vital role in attracting and retaining a broader customer base.

Keywords: customer preferences, pricing strategy, customer loyalty, customer experience, yogurt shop, value deals, market expansion, brand retention, consumer engagement

**ASSESSING THE INVENTORY AND HAZARD MANAGEMENT ON THE SELECTED
MICRO-ENTERPRISES ALONG BARANGAY BAGONG SILANGAN, QUEZON CITY**

Mary Daisy Reen Conwi, Judy Ann Flores, Ramela Mae Jutic,
Shelica Ombao, Raissa Oserin, Vinalyn Sarzata

Abstract

Inventory management involves controlling stock levels to meet demand while minimizing costs and waste. Hazard management encompasses the proactive identification, assessment, and mitigation of risks to protect people and assets. This study assesses inventory and hazard management practices in five micro-enterprises along Barangay Bagong Silangan, Quezon City, and examines the relationship between these two operational dimensions. A quantitative correlational design is employed, with purposive sampling used to select five micro-enterprises. A structured survey questionnaire is administered to gather data on inventory control procedures and hazard mitigation measures. Scores for each practice area are calculated using weighted mean, and the relationship between inventory and hazard management is assessed via Pearson's correlation. The micro-enterprises demonstrated very high performance in inventory management (overall weighted mean = 3.68) and hazard management (overall weighted mean = 3.55). Pearson's correlation yielded a low positive relationship ($r = 0.332$) between inventory and hazard management. The two-tailed significance test produced a p-value of 0.422, indicating that the relationship was not statistically significant at the 0.05 level. These findings supported the null hypothesis of no significant relationship between inventory and hazard management. Reported challenges included overstocking, inconsistent tracking, fluctuating demand, limited resources, delayed hazard recovery, and lack of preparedness. An improvement plan is proposed to enhance both inventory controls and hazard mitigation practices, focusing on demand forecasting, record-keeping systems, resource allocation, emergency response protocols, and regular safety training.

Keywords: inventory management, hazard management, micro-enterprises, correlational study, improvement plan

**ASSESSING THE LEVEL OF BRAND PROMOTION AT
THE CRUNCH IN BATASAN, QUEZON CITY**

Jhann Cathleen Arbas, Anna Marie Breis, Chresha Mea Luceño,
Saffiyah Mangompia, Mariza Marie Abalayan, Randy Villaseñor

Abstract

This study examines the effectiveness of brand promotion strategies employed by The Crunch, a boneless fried chicken business in Batasan, Quezon City. Grounded in Keller's Brand Equity Model, it assesses how promotional activities influence brand awareness, brand differentiation, and customer engagement. It explores the current mix of traditional and digital marketing tactics to determine their role in shaping consumer perceptions and driving repeat patronage. A quantitative survey design is employed to gather data from 100 purposively sampled customers of The Crunch. The questionnaire measures perceptions of brand awareness, differentiation, competitive advantage, promotional processes, and loyalty initiatives, using a four-point Likert scale. Demographic information and satisfaction ratings are collected to analyze variations across age and gender. Data analysis includes frequency distributions, percentages, weighted means, z-tests, and ranking to identify strengths and areas for improvement. Respondents were predominantly female (68 percent) and aged 21–30 years (51 percent). High scores were recorded for brand awareness (mean = 3.45), differentiation (mean = 3.42), competitive advantage (mean = 3.40), and feedback responsiveness (mean = 3.38), indicating strong customer perceptions in these areas. However, promotional processes (mean = 2.88) and loyalty initiatives (mean = 2.74) received lower ratings, revealing inconsistencies in campaign execution and reward mechanisms. Z-test results confirmed that these weaknesses were statistically significant relative to overall satisfaction. The findings indicated that while The Crunch successfully established a clear brand identity and competitive edge, its digital marketing presence and customer retention programs were underutilized. As a result, opportunities were identified to expand social media activity, introduce welcome promotions for new customers, and implement a regular loyalty rewards scheme. A targeted action plan was proposed to enhance digital campaigns, streamline promotional timing, and strengthen loyalty programs, with the aim of increasing customer engagement and sustaining brand growth.

Keywords: brand promotion, brand awareness, customer engagement, digital marketing, loyalty programs

**ASSESSING THE PROFITABILITY OF FOOD STALLS AT BESTLINK COLLEGE OF
THE PHILIPPINES FOOD COURT: A BASIS FOR SUSTAINABILITY**

Adrian James Calagos, Olive Cordial, Lyka Maimot, Jemarie Taganas,
Jenica Villaruel, Reynold Bangalisan

Abstract

Profitability is a key indicator of performance and long-term viability in food service operations. Food stalls at Bestlink College of the Philippines Food Court serve a diverse campus community by offering quick, affordable meals that reflect changing market trends and consumer preferences. Ensuring consistent profitability requires effective resource management, cost control, and the adoption of sustainable operational practices. This study assesses the factors influencing the profitability of these food stalls to inform strategies for maintaining financial health and service quality. This study employs a descriptive quantitative design to gather numerical data on profitability drivers and challenges. A structured questionnaire is administered to stall owners and managers, with items measured on Likert scales. Purposive sampling is used to select respondents who have detailed knowledge of daily operations and financial outcomes. Data analysis involves computing weighted means to determine average ratings for each factor and ranking items to identify the most critical issues affecting profitability. Findings revealed that menu innovation and customer preference were rated highest as drivers of revenue, with weekly featured items and unique food combinations attracting increased patronage. Cost control measures such as bulk purchasing and portion management also received strong support as means to maintain profit margins. Time-limited promotions and loyalty programs were implemented by several stalls and were associated with a noticeable uptick in repeat purchases. Conversely, challenges related to labor scheduling and fluctuating ingredient prices were identified as primary threats to sustained profitability. The study concluded that strategic menu differentiation and targeted promotions effectively boosted customer patronage and revenue at food stalls in the college food court. Cost management practices, particularly bulk procurement and precise portioning, were associated with improved profit margins. However, labor inefficiencies and variable supply costs undermined overall financial performance. As a result, stall operators who combined innovative offerings with disciplined cost controls achieved greater sustainability. Recommendations include leveraging sales data for demand forecasting, optimizing workforce scheduling, and negotiating stable supply contracts to mitigate price volatility.

Keywords: profitability, food stall, menu innovation, cost control, sustainability

**ASSESSING THE SWOT ANALYSIS OF ONLINE SELLERS: BASIS
FOR ENHANCING STRATEGIC PLATFORM SUPPORT**

Shaina Mae Ympal, Ana Rose Antonio, Yhanize Ahrel Benitez,
Ryan Duarte, Nathalie Gatton, Reynold Bangalisan

Abstract

The rapid expansion of e-commerce platforms such as Shopee is reshaping the retail landscape in Southeast Asia by enabling small and medium-sized enterprises to reach broader markets. Despite these opportunities, online sellers encounter challenges, including logistical inefficiencies, limited product visibility, evolving consumer preferences, and intense competition. This study assesses the strengths, weaknesses, opportunities, and threats (SWOT) faced by Shopee sellers in Novaliches, Quezon City, to inform the development of enhanced strategic support mechanisms based on the SWOT framework proposed by Kumar and Praveena. This study employs descriptive quantitative design, administering structured questionnaires to 30 purposively selected Shopee sellers in Novaliches. Data analysis includes frequency distributions, percentages, weighted means, Kruskal–Wallis H tests for group comparisons and ranking of identified SWOT factors to determine their relative importance. Most respondents operated with start-up capital and monthly revenues below ₱50 000 and had one to two years of online selling experience. Sellers reported strong pricing strategies, high customer satisfaction, and positive review management as key strengths. Negative reviews, shipment delays, and deep platform discounts emerged as primary weaknesses. Live selling features, influencer marketing, and round-the-clock customer access were identified as top opportunities. Major threats included unstable internet connections, policy suspensions, and fierce market competition. The Kruskal–Wallis H test found no significant differences in SWOT factor ratings based on capital size, years of operation, or income level. Unstable internet connectivity, high competition, logistics delays, and adverse customer feedback were ranked as the most critical barriers. The findings suggested that targeted strategic enhancements, such as seller loyalty programs, live-stream sales initiatives, influencer collaborations, and platform-led training, could bolster seller competitiveness. Recommendations also included integrating multiple logistics providers and deploying chatbot-based customer support to streamline operations. As a result, Shopee sellers would be better equipped to navigate dynamic market conditions. This study offers practical insights for entrepreneurs and platform developers aiming to strengthen the online retail ecosystem.

Keywords: e-commerce, swot analysis, online sellers, strategic support, shopee

**ASSESSING THE UTILIZATION OF CHATBOT ON ENHANCING CUSTOMER
EXPERIENCE AT RNB 1 UPHOLSTERY SHOP IN QUEZON CITY**

Rodel Monterola, Frezel Artezuela, John Kenneth Diaz, Jay Carlo Lausa,
Jay-M Quimque, Reynold Bangalisan

Abstract

This study assesses the utilization of chatbots in enhancing customer experience at RNB 1 Upholstery Shop in Quezon City, focusing on efficiency, response time, and user satisfaction. It draws on the framework proposed by Misischia et al. (2022), which links chatbot functionality to improvements in service quality and customer engagement. A descriptive quantitative design is employed to evaluate customer interactions with the chatbot. Twenty-five patrons were selected via purposive quota sampling and surveyed using a structured questionnaire. The analysis incorporates weighted means to gauge chatbot performance, independent t-tests to compare subgroup responses, and ranking to identify priority areas for improvement. The chatbot demonstrated moderate effectiveness, with efficiency, response time, and user satisfaction each receiving a weighted mean of approximately 70.25%. Customer experience dimensions also registered moderate scores: interaction (70.25%), entertainment (68.00%), problem-solving (70.50%), trendiness (73.50%), and customization (71.25%). Correlation analysis revealed a moderate positive relationship ($r = 0.5075$, $p < 0.05$) between perceived chatbot quality and overall customer satisfaction, indicating that chatbot performance had a significant impact on user experience. Respondents reported difficulties navigating the chatbot and noted its inability to handle complex or multi-layered queries. Limited adaptability across devices further constrained its usefulness. As a result, existing chatbot features were deemed insufficient in responsiveness and contextual understanding. An enhanced AI-powered chatbot was therefore proposed, capable of technical support, human-resources assistance, and research guidance, with seamless escalation to human agents for intricate issues. The integration of multimedia elements and lighthearted responses was recommended to boost engagement. Ultimately, while the current chatbot moderately improved customer experience, targeted enhancements are required to fully realize its potential and align automation with evolving customer expectations in the upholstery sector.

Keywords: chatbot utilization, customer experience, service efficiency, response time, user satisfaction

**ASSESSMENT OF FILING AND RECORD-KEEPING PRACTICES OF FEEDS COMPANY
IN QUEZON CITY: BASIS FOR IMPROVEMENT PLAN**

Jo-anne Pasamba, Shaira Joi Saldua, Terrenz Angelo Siban, Fionna Liezel Flores,
French Flamiano, Kimberly Joyce Embile

Abstract

This study assesses the filing and record-keeping practices of a feeds company in Quezon City by evaluating employees' satisfaction with document retrieval, record filing, and system accessibility. It examines the efficiency, security, and compliance of the current processes and seeks to identify areas for enhancement. Findings will guide the development of an improvement plan aimed at creating more accessible, streamlined, and user-friendly practices for both digital and physical records. A descriptive quantitative design is employed to gather relevant data from employees responsible for filing and record-keeping at the feed company. Thirty staff members are selected through purposive sampling to ensure that participants have direct experience with document management. A structured survey questionnaire measures perceptions of retrieval speed, accuracy of filing, system security, and regulatory compliance. Respondents reported frequent challenges with document retrieval and occasional misplacement of records, which impeded efficient workflow. Despite these issues, employees agreed that the existing system effectively protected records from unauthorized access and complied with relevant regulations. The weighted mean for system security and compliance was notably high, whereas the mean for retrieval efficiency and accuracy of filing fell below the satisfactory threshold. The study confirmed that inefficiencies in retrieval and occasional record misplacement were significant barriers to productivity. In response, an improvement plan was proposed, featuring the implementation of an automated search and indexing system to accelerate document retrieval, comprehensive training for staff to standardize filing procedures, and assignment of a dedicated records coordinator to oversee document log-ins and log-outs. A digital indexing solution using unique QR codes for physical file bundles linked to a cloud-based repository is also recommended to enhance accuracy and traceability. These interventions aim to reduce retrieval times, minimize lost documents, and strengthen overall record-keeping integrity.

Keywords: filing practices, record-keeping, document retrieval, system accessibility, process improvement

**ASSESSMENT OF INVENTORY MANAGEMENT ON STOCK-FLOW
AT CORY'S GROCERY STORE**

Pamela Nadores, Abegael Gabriel, Cynthia Pascua, Antonio Jr Villanue,
Fumiya Kim, Vinalyn Sazarta

Abstract

Cory's Grocery Store, established in 2000 along Republic Avenue in Novaliches, Quezon City, serves the local community with essential items at affordable prices. The rise of large supermarkets and online retailers, coupled with shifting consumer buying habits, challenges small neighborhood grocers. Cory's Grocery Store continues to employ traditional inventory practices manual record-keeping and fixed reorder levels which impede operational efficiency, stock accuracy, and overall performance. This study assesses the current inventory management system with the aim of enhancing stock flow, reducing losses, and better meeting customer demand. A descriptive correlational design is used to examine the relationship between inventory management practices and stock flow at Cory's Grocery Store. Snowball sampling identifies store employees qualified to complete a structured survey questionnaire. The instrument measures methods of stock monitoring, replenishment procedures, and overstock management. Data analysis employs frequency and percentage distributions and weighted means to evaluate system effectiveness and Pearson correlation to assess the strength of association between inventory practices and stock movement. All respondents indicated that inventory monitoring was conducted exclusively through manual records, with none using spreadsheets or dedicated software. Ninety percent reported reliance on fixed reorder levels for replenishment, while 10 percent used automated alerts. To address overstock, every participant utilized discount sales, whereas options such as supplier returns or emergency restocking were not employed. The inventory system received high effectiveness ratings for documentation and timely reorder processes (weighted mean = 4.00), though its ability to minimize losses via accurate tracking scored slightly lower (weighted mean = 3.50). Identified challenges included frequent stockouts, excess inventory, inaccurate records, and sluggish restocking. Pearson correlation analysis revealed a perfect positive relationship between inventory management quality and stock flow efficiency ($r = 1.00$, $p < 0.00001$), underscoring that robust inventory practices directly enhanced product movement and operational effectiveness. Findings supported the need to modernize the inventory system at Cory's Grocery Store. As a result, the study recommended adoption of a digital inventory platform, routine stock audits, clear stock rotation guidelines, and comprehensive staff training in inventory procedures. Implementing these measures was expected to mitigate errors, improve customer satisfaction, and bolster the store's competitiveness in a rapidly evolving retail environment.

Keywords: inventory management, stock flow, manual recording, reorder levels, retail operations

**ASSESSMENT OF MARKETING MIX OF CYCLEMER ENTERPRISES:
BASIS FOR MARKETING STRATEGIES**

Roy Bangit, Kyle Adriel Altabano, Bench Bolaños, Jeneve Espelita,
Princess Rea Lovendino, Lyka Serdoncello, Vinalyn Sarzata

Abstract

This study analyzes the marketing mix of Cyclemer Enterprises by examining the four P's: product, price, place, and promotion, to identify strategies that can enhance sales and customer satisfaction. With rising demand for motorcycles and related services, motor shops face increasing competition and operational challenges. Evaluating each element of the marketing mix provides insights into how Cyclemer Enterprises can better meet customer needs and differentiate themselves in the market. This study employs a descriptive quantitative research design to assess customer perceptions of Cyclemer Enterprises' marketing mix. Stratified random sampling selects 30 respondents, divided equally between product purchasers and service users. Data is collected through expert-validated questionnaires and follow-up interviews. Statistical analyses include frequency and percentage distributions, weighted means to gauge satisfaction levels, the Kruskal–Wallis H test to examine differences across age groups, and the Mann–Whitney U test to assess gender and visitation-frequency effects. The majority of product purchasers (66.7% male) reported monthly visits, while most service users (80% male) visited weekly. High satisfaction emerged with product quality (weighted means of 3.60 and 3.61), pricing (3.63 and 3.67), and location convenience (3.53 and 3.48). Promotion scored lower (2.96 and 2.92), indicating weak social media engagement and communication channels. Additional challenges included unclear product and service descriptions (3.40 and 3.53), perceived value and price competitiveness concerns (3.47 and 3.60), and insufficient parking or service-area capacity (3.27 and 3.13). Significant differences by age were found for both purchaser groups ($p < 0.0052$) and for service-user visitation frequency ($p < 0.0344$), while gender showed no significant effects. The findings indicated that Cyclemer Enterprises excels in product quality, pricing strategies, and accessibility but requires stronger promotional efforts. Addressing parking constraints, implementing queue-management systems, adjusting pricing structures, improving inventory management, and expanding product offerings were identified as key improvement areas. Enhancing social media advertising and communication channels was recommended to boost brand awareness and customer engagement. These measures are expected to strengthen the overall marketing strategy and drive sustainable performance improvements.

Keywords: product quality, pricing strategy, distribution channels, promotional efforts, customer satisfaction

**ASSESSMENT OF ON-THE-JOB TRAINING IN DEVELOPING ADMINISTRATIVE
SKILLS AMONG BACHELOR OF SCIENCE IN OFFICE ADMINISTRATIVE STUDENTS**

Ernesto Baldres Jr, Angelyn Ambeguia, Shairy Marie Aniciete, Beatrice Jinayon,
Stephen Adrian Olasso, Ma Catherine Poblete, Bryan Tubao

Abstract

On-the-job training (OJT) is instrumental in providing hands-on experience that develops the practical skills required for office administration. This study assesses the effectiveness of OJT in enhancing administrative competencies specifically communication, organization, and problem solving among Bachelor of Science in Office Administration (BSOA) students. A descriptive survey was conducted among 150 BSOA students who completed OJT in various administrative settings. Participants rated their perceived improvement in key skill areas using a structured questionnaire. Descriptive statistics, including means and standard deviations, were calculated to evaluate the extent of skill development attributable to OJT. Students reported significant gains in communication and organizational skills, with mean ratings of 4.10 and 4.05 out of 5, respectively. Problem-solving ability also improved (mean = 3.95). However, fewer students indicated substantial growth in management and decision-making skills (mean = 3.40), suggesting limited exposure to supervisory responsibilities during OJT. The findings demonstrated that OJT effectively strengthened core administrative skills but provided insufficient opportunities for experience in management and strategic decision-making. As a result, institutions should enhance OJT programs by incorporating formal workshops and rotating assignments that expose students to a broader range of administrative tasks. Such improvements will better prepare graduates for the demands of professional office environments.

Keywords: on-the-job training, administrative skills, communication, organization, problem solving

**ASSESSMENT OF THE FOOD HANDLING PROCEDURES TOWARDS PRODUCT
QUALITY OF SUPREMACY INTERNATIONAL FOODCART FRANCHISING**

Jan Andrei Retamar, Remmar Bersabe, Jennifer Callos, Paul Angelo De Guzman,
Neil Andre Naelgas, Vinalyn Sarzata

Abstract

This study examined the food handling procedures of Supremacy International Food Cart Franchising in West Avenue, Quezon City, focusing on their impact on product quality. Given the importance of safety and consistency in the food service industry, especially in franchise operations, the research explored how storage and handling practices influence product standards. The objective was to identify procedural strengths and weaknesses and recommend improvements to ensure consistent quality and safety across all franchise locations. The study employed a quantitative descriptive research design. Data was collected through a structured survey administered to 20 employees of Supremacy International Food Cart Franchising. The questionnaire included demographic information and focused on five major areas: environmental conditions, storage and handling practices, personal hygiene, equipment and utensils, and food handling procedures. A 4-point Likert scale was used to quantify responses. Statistical tools such as frequency and percentage, weighted mean, Kruskal-Wallis test, and ranking were applied to analyze the data and identify significant differences based on the respondents' profiles. The study revealed a strong overall agreement among respondents regarding food handling practices at Supremacy International. The highest mean ratings were observed in the categories of equipment and utensils, and environmental factors (mean = 3.392), followed by food preparation (3.37), handling and storage, and personal hygiene (3.338). Key strengths included effective temperature control in storage, proper hygiene practices, and well-maintained ventilation systems. However, certain areas such as waste management and regular monitoring of product expiration dates received comparatively lower ratings, indicating a need for improvement. Age was found to significantly affect perceptions of food handling practices, while gender showed minimal influence. The most frequently reported issues were insufficient training (28.17%), inadequate supply of hygiene materials (19.5%), and substandard storage facilities (17.33%). Overall, the findings suggest that Supremacy International maintains generally effective food handling procedures, but targeted improvements in waste management, training, and facility resources are recommended to ensure consistency and safety across operations. The study recommends developing training programs that align with the needs of the primarily young workforce, making them more relevant and engaging. It also suggests improving the availability of hygiene supplies and enhancing monitoring systems to ensure compliance with food safety standards. Addressing issues such as poor waste management and inadequate documentation can further strengthen overall food handling practices. These improvements will contribute to higher product quality and sustain customer satisfaction. Moreover, the findings provide valuable insights into food franchise operations and serve as a strategic guide for stakeholders and future researchers focused on food safety and quality management.

Keywords: food handling procedures, product quality, supremacy international, food safety, hygiene practices, storage and handling, franchise operations, environmental factors, training programs, food service industry, monitoring systems, waste management.

**ASSESSMENT OF THE RETENTION PROGRAM OF AN ACCOUNTING FIRM IN
QUEZON CITY: BASIS FOR IMPROVED RETENTION STRATEGIES**

Sandra Montero, Jennelyn Dedase, Luz Clarissa Fontamillas,
Mary Jane Luchavez, Benica Sarza, Riva Manalo

Abstract

Employee retention has become a critical issue for organizations, given its significant influence on operational stability, overall performance, and cost management. This study seeks to assess the effectiveness of current retention programs by focusing on factors such as employee achievement, recognition, job content, responsibility, career advancement, and growth opportunities. Furthermore, it aims to identify the obstacles employees face within the organization that may hinder retention efforts. The insights gained from this research will provide valuable guidance for designing customized retention strategies that effectively attract and retain skilled talent in a competitive business landscape. This study utilized a descriptive research design to collect relevant data. The sample comprised twenty-two (22) employees from EM Management and Accounting Services in Quezon City, chosen through purposive sampling to ensure alignment with the study's objectives. Data were gathered using a researcher-developed survey questionnaire. The responses were then analyzed using frequency and percentage distributions, weighted mean calculations, and ranking techniques. The findings indicate that most respondents are young professionals (59.09%) and female employees (68.18%), primarily serving as accounting staff (68.18%). A notable portion has been employed for six to ten years (31.82%). Employees exhibit a strong sense of responsibility, with a composite weighted mean of 3.32, and find their work meaningful and challenging. However, opportunities for career growth, development, and strategic involvement are limited. To address these issues, the company should introduce formal mentorship programs, continuous learning opportunities, leadership training, and a rewards system that recognizes innovation and strategic contributions. The study also identified repetitive and monotonous work as a common challenge, which affects employee motivation. The study underscores the importance of tailored institutional support for the professional growth of teaching staff as a key factor in boosting employee engagement. Drawing from these insights, an enhanced retention plan is recommended to facilitate career advancement. By offering mentorship programs and ongoing learning opportunities, the organization can help employees strengthen their skills and achieve meaningful career progression.

Keywords: employee engagement, professional development, teaching personnel, retention plan, career growth, mentorship programs, continuous learning, skill enhancement, career advancement

**ASSESSMENT ON INVENTORY MANAGEMENT PRACTICES OF JOLLIBEE
PUREGOLD LUZON COMMONWEALTH, QUEZON CITY: BASIS FOR ENHANCEMENT**

Andrea Monica Dequina, Marielle Adrias, Michaela De Leon, Camelle Neverio,
Rejane Soleybar, Reynold Bangalisan

Abstract

Effective inventory management is essential in the fast-food industry to maintain a balance between product availability and customer demand, while preventing challenges such as overstocking and stockouts. Studies show that poor inventory control leads to operational inefficiencies and financial losses. A descriptive research design was employed, using purposive sampling to select 30 Jollibee employees directly involved in inventory management. Data was collected via a structured questionnaire and analyzed using weighted mean and ranking techniques. The findings show that employees strongly believe their organization effectively manages inventory, especially in controlling overstocking (mean = 3.70) and minimizing waste through FIFO methods (mean = 3.60). Strengths were noted in inventory tracking and accurate reporting, though some minor concerns about system usability and training emerged. The study also identified persistent challenges, including the lack of real-time error detection, insufficient notifications for expiring stock, and difficulties coordinating across departments. These issues threaten operational efficiency and customer satisfaction. The study concludes that, although the inventory systems at Jollibee Puregold Luzon perform well overall, focused enhancements are necessary to improve efficiency and effectiveness. The study advises adopting real-time monitoring and error-checking systems, bolstering staff training, fostering better team communication, and incorporating automated notifications for soon-to-expire stock. These improvements are expected to minimize waste, enhance inventory accuracy, and maintain consistent service quality. Overall, the research offers important perspectives on inventory management in fast-food operations and highlights the need for flexible, technology-based solutions. Further studies are recommended to assess long-term effects and to benchmark sophisticated inventory systems across comparable businesses for wider industry relevance.

Keywords: inventory management, fast-food industry, overstocking control, fifo method, waste reduction, real-time tracking, employee training, communication, automated alerts, operational efficiency, service delivery, technology integration

**ASSESSMENT ON THE MARKETING MIX OF BOBA HOUSE MILKTEA SHOP
TOWARDS CUSTOMER SATISFACTION**

Florence Mae Balaoing, Jezter Espinosa, Riza May Galicia, Rhea Mae Narvaez,
Jean Nicanor, Vinalyn Sarzata

Abstract

Established in 2017 during the peak of the milk tea craze, Boba House was founded by Mrs. Katrina, who saw a business opportunity in offering a wide variety of flavorful and refreshing milk tea beverages. In the competitive landscape of the milk tea industry, the strategic application of the marketing mix, product, price, place, promotion, and people, is crucial for achieving customer satisfaction and ensuring long-term business success. This study focuses on analyzing how Boba House utilizes the marketing mix to meet customer needs while identifying key challenges the business faces, including limited flavor options and outdated product presentation. The primary goal of this research is to evaluate the effectiveness of Boba House's current marketing strategies and to propose an implementation plan based on insights and recommendations gathered from customer respondents. This study employed a descriptive research design to examine the relationship between the marketing mix and customer satisfaction. The descriptive method was selected to accurately present and interpret the characteristics of the variables involved. Primary data were collected through structured survey questionnaires distributed to 80 customers of Boba House. The sample size was determined using Slovin's formula, ensuring a representative and reliable subset of the customer population for analysis. The study findings indicate that the majority of Boba House customers are young adults aged 18 to 25, showing a high level of engagement and frequent patronage, with 38.8% purchasing milk tea daily. An evaluation of the marketing mix revealed that product quality had the most significant influence on customer satisfaction, with a weighted mean of 2.71, followed by place (2.65) and price (2.64). In contrast, promotion received the lowest average score (2.58), followed by people, with a weighted mean of 2.45. Respondents expressed satisfaction with the variety of flavors and the quality of ingredients offered. However, concerns were raised regarding the effectiveness of promotional strategies and the lack of sufficient staff, which affects transaction speed. Although overall customer satisfaction was observed, specific elements of the marketing mix, such as limited menu options, pricing, interior ambiance, and promotional efforts, were identified as areas needing improvement. This study recommends several strategic actions to enhance customer satisfaction and strengthen Boba House's competitive advantage. These include introducing new product offerings to diversify the menu, improving the interior ambiance to create a more inviting customer experience, and implementing effective promotional strategies such as loyalty rewards and seasonal discounts to encourage repeat patronage. Additionally, hiring additional staff is advised to expedite service and improve overall customer experience. The results emphasize the critical role of a well-integrated marketing mix in driving customer loyalty and ensuring the long-term growth and sustainability of the business.

Keywords: marketing mix, customer satisfaction, product quality, pricing strategy, promotional strategy, place, people, boba house, milk tea business, consumer behavior, brand loyalty, business growth, service efficiency, customer experience, competitive advan

**ASSESSMENT ON THE OPERATIONAL ASPECT OF WASH ME (MOBILE CARWASH)
IN TAGUIG CITY: BASIS FOR PROPOSED IMPROVEMENT PLAN**

Crisanta Fariñas, Jove Mendiola, Nicolai Carreon, Carl Myer Leona,
Joan Verana, Reynold Bangalisan

Abstract

This study examines the operational effectiveness of Wash Me Mobile Carwash in Taguig City, focusing on key areas such as equipment upkeep, inventory and supply management, employee performance, and waste disposal procedures. This study employed a descriptive quantitative research design to assess customer perceptions of Wash Me Mobile Carwash's operational efficiency. A total of 50 customers were selected using purposive sampling. To analyze the data, the study utilized statistical methods such as the weighted mean to measure central tendencies, along with the Kruskal-Wallis and Mann-Whitney U tests to determine significant differences between variables. The study revealed that most respondents were males aged 36–45, with 68% owning compact cars and 52% being first-time users, indicating potential for enhancing customer retention strategies. Respondents expressed high satisfaction with equipment maintenance (mean = 3.38) and supply quality (mean = 3.32), reflecting dependable service delivery. Staff performance also rated favorably (mean = 3.26), demonstrating professionalism and competence. Waste management received a comparatively lower score (mean = 3.20), suggesting a need for more eco-friendly practices. Statistical tests revealed significant differences in equipment maintenance satisfaction across age groups ($p = 0.0256$), and a notable impact of service frequency on supply efficiency ($p = 0.0406$), emphasizing the importance of customized operational strategies to meet varying customer needs. To strengthen customer trust and long-term satisfaction, the mobile carwash should maintain consistent preventive equipment maintenance and invest in modernizing outdated tools to ensure top-tier performance and service reliability. Ensuring the continued use of premium, effective cleaning supplies will reinforce the quality of service and align with customer expectations. To elevate the customer experience, the business should provide ongoing staff training focused on professionalism, efficiency, and responsiveness. Environmental sustainability can be enhanced by implementing improved waste management practices, such as reducing water consumption, adopting eco-friendly cleaning agents, and ensuring proper waste disposal protocols. Moreover, the carwash should introduce more flexible scheduling options, including weekend and evening services, and establish clearer communication regarding service delays, particularly those caused by inclement weather, to maximize customer convenience and satisfaction.

Keywords: mobile carwash, customer satisfaction, equipment maintenance, cleaning supplies, staff performance, waste management, eco-friendly practices, service quality, scheduling flexibility, descriptive quantitative research, taguig city, service efficiency,

**ASSESSMENT ON THE SERVICE QUALITY OF SAKALAM KOPI:
BASIS FOR PROPOSED IMPROVEMENT PLAN**

Bernardita Rosacay, Darwin Deuna, Mirshenedee Allam, Rachelle Echaluze,
Jan Marc Mamansag, Vinalyn Sarzata

Abstract

Sakalam Kopi, established on July 15, 2022, has gained recognition as a rising coffee shop in Bagong Silang, Caloocan City. It distinguishes itself not only by offering high-quality coffee but also through its active community engagement and social initiatives, creating a welcoming space for coffee lovers seeking both excellent products and meaningful experiences. Despite its potential, Sakalam Kopi faces a significant challenge: a shortage of staff, which results in prolonged service times, often taking 10 to 15 minutes to prepare just two drinks. This issue leads to longer wait times, causing customer frustration, dissatisfaction, and a potential loss of trust in the shop's quality of service. Moreover, the business has not yet placed sufficient emphasis on improving service quality as a means to enhance customer satisfaction and attract new clientele. This study seeks to evaluate Sakalam Kopi's performance based on the five dimensions of service quality, tangibility, reliability, responsiveness, assurance, and empathy, in order to identify key areas for improvement. The goal is to recommend effective strategies that will elevate customer satisfaction, strengthen brand reputation, and position Sakalam Kopi as a leading choice for coffee enthusiasts within the community. This study employs the SERVQUAL model developed by Parasuraman et al. (1985) to evaluate the service quality of Sakalam Kopi, focusing on five key dimensions: tangibility, reliability, responsiveness, assurance, and empathy. The aim is to identify gaps between customer expectations and perceptions that may affect overall satisfaction. A quantitative research approach was adopted, utilizing a structured survey questionnaire to collect data from seventy-six (76) respondents regarding their experiences and preferences related to the shop's service quality. To interpret the data, the study applied appropriate statistical treatments, including frequency distribution, percentage, weighted mean, and Analysis of Variance (ANOVA) to determine significant differences and trends in customer responses. The findings of this study reveal that all five service quality dimensions were rated positively by the respondents, each receiving a verbal interpretation of "Agree." The Empathy dimension received the highest overall weighted mean of 3.07, followed by Tangibility with 3.05. Responsiveness scored an overall weighted mean of 2.82, while Assurance received 2.79. The Reliability dimension obtained the lowest weighted mean at 2.66. These results suggest that while Sakalam Kopi is generally meeting customer expectations across all service quality areas, particular attention should be given to improving reliability and assurance to further enhance customer satisfaction. The outcome of this study presents a comprehensive enhancement plan aimed at addressing the primary challenges faced by Sakalam Kopi, including slow service delivery, issues related to ambiance and cleanliness, and the inconsistency of customer experiences.

Keywords: sakalam kopi, service quality, servqual model, customer satisfaction, tangibility, reliability, responsiveness, assurance, empathy, slow service, cleanliness, ambiance, customer experience, enhancement plan, caloocan city.

**BARANGAY BEST PRACTICES: A COMPARATIVE STUDY OF
SELECTED BARANGAYS IN QUEZON CITY**

Arabela Nobresala, Gweneth Burce, Irish Cardinoza, Ma Jhossana Esplana,
Josephine Garcia, Kimberly Joyce Embile

Abstract

This study aims to compare and evaluate the best governance and administrative practices implemented by three selected barangays in Quezon City: Barangay Bagong Silangan, Barangay Pasong Putik, and Barangay Kaligayahan. It seeks to identify the key factors that contribute to their effectiveness, focusing on aspects such as transparency, operational efficiency, and community engagement. Through this comparative analysis, the research intends to highlight exemplary practices and provide evidence-based recommendations that can assist other local government units in enhancing their governance frameworks and administrative efficiency. The researchers utilized a comparative-descriptive research design, gathering data from barangay employees through carefully structured survey questionnaires. The study examined three primary dimensions: the extent of technology utilization, levels of employee productivity, and overall administrative efficiency within the selected barangays. The findings highlighted notable variations in governance strategies among the barangays. While certain barangays demonstrated proficiency in integrating digital services to enhance administrative processes, others emphasized robust community engagement and strategic decision-making as their primary strengths. However, common challenges, such as constrained resources, technological limitations, and operational inefficiencies, were identified as significant impediments to optimal service delivery. This study highlights the vital role of implementing standardized best practices in barangay governance, with particular emphasis on leveraging technology and boosting employee productivity. Enhancing administrative frameworks, investing in comprehensive training programs, and fostering a culture of transparency are essential to achieving effective and responsive service delivery. Accordingly, the researchers advocate for the adoption of a unified governance model that integrates cutting-edge digital technologies alongside ongoing professional development initiatives, thereby strengthening barangay operations and elevating the quality of public services provided to the community.

Keywords: barangay governance, administrative efficiency, technology utilization, employee productivity, public service delivery, digital integration, community engagement, local government units, professional development, governance best practices

**BUYING BEHAVIOR ON THE BUYING PREFERENCE OF THE CONSUMER OF
MIXUE ICE CREAM AND TEA SHOP**

Kristine Joy Verdadero, Marianne Joy Prieto, Nicole Santiago, Czrina Joyce Pacis,
Creslyn Kate Cabañero, Jennylene Abalos

Abstract

This study examines consumer purchasing behavior to understand how customers make decisions regarding product choices, which is vital for marketing and business operations. It focuses on Mixue Ice Cream and Tea Shop, a prominent brand recognized for its affordable, high-quality offerings. This study explores factors that influence consumer decisions, including marketing strategies, demographic characteristics, and consumer attitudes, especially in the context of recent food safety concerns that have affected brand trust. The objective is to generate insights that enable Mixue to enhance customer satisfaction, optimize marketing efforts, and refine operational strategies to meet consumer demands more effectively. This study employs purposive sampling to select respondents who have direct experience with Mixue products. Data are collected through a structured survey questionnaire designed to capture customer insights. Statistical analyses, including frequency and percentage distributions, weighted means, and t-tests, are applied to interpret the data and fulfill the study's objectives. Respondents from the employee group reported feeling relaxed and happy each time they visited Mixue, and they expressed a desire to return. They showed a preference for ordering tea or lighter options such as sorbet rather than creamy ice cream. Additionally, they indicated that they often visited Mixue during family outings or celebrations to enjoy a treat together. In contrast, the student group also reported feelings of relaxation and happiness during each visit, citing Mixue's affordability and promotional deals, such as buy-one-get-one-free offers, as primary motivators for patronage. Hypothesis testing revealed a statistically significant difference between the two groups' buying behavior and preferences, with weighted means of 2.45 and 2.37 respectively. A t-test yielded a t-value of 0.2509 and a p-value of 0.8102, indicating that the variance between groups was not statistically significant.

Keywords: buying behavior, buying preference, consumer behavior, mixue ice cream and tea shop, psychological factors, social factors, personal factors, situational factors

**COMPARATIVE ANALYSIS OF CUSTOMER EXPERIENCE:
ONLINE VERSUS OFFLINE STORE**

Cielo Jean Tubeza, Keziah-Anne Genetiano, Camille Palattao,
Marc Darelle Pillonar, Lalaine Vitales, Arianne Astudillo

Abstract

Customer experience obstacles include difficulties in understanding and meeting customer expectations, managing multiple communication channels, and resolving concerns promptly. This study assesses and compares customer experience in online and offline purchases at Hannah's Food Hub in Phase 2 Urban Payatas B, Quezon City. By identifying areas of strength and weakness in both channels, this study aims to inform strategies for enhancing overall satisfaction and loyalty. This study employs a quantitative descriptive design. Fifty customers who purchased from both the online and offline stores received structured survey questionnaires. The instrument measured dimensions of ease of purchase, service quality, responsiveness, and overall satisfaction. Collected data were analyzed using descriptive statistics and paired sample t-tests to compare experiences across shopping environments. This study provides a brief yet informative overview of the research issue by focusing on the objective measurement and analysis of data. The research population consists primarily of individuals aged 19–25 years, with a majority being male. The study assessed these components to gain a deeper understanding of consumer preferences and perspectives when purchasing through both online and offline stores. The findings aim to support the improvement of overall customer experience and enhance Hannah's Food Hub services across both sales platforms. The findings indicated that customer experiences in online and offline stores were comparable, suggesting that Hannah's Food Hub has achieved uniform service standards across its channels. Maintaining this consistency is crucial for building trust and encouraging repeat business. It is recommended to continue monitoring customer feedback in both environments and to leverage best practices identified in one channel to enhance the other.

Keywords: customer experience, online shopping, offline shopping, service quality, customer satisfaction, multichannel retailing.

**COMPARATIVE ANALYSIS OF REMOTE WORK AND TRADITIONAL
OFFICE SETTING ON EMPLOYEES JOB SATISFACTION**

Ismael Daniela Rose, Shiela May Brazil, Kyla Buhion, Jake Capongcol,
John Vilmon Monares, Janine Verde, Kimberly Joyce Embile

Abstract

The transition between remote work and traditional office settings is a key focus in understanding employee job satisfaction. Remote work offers flexibility and an improved work-life balance, while traditional office environments provide structure and direct supervision. This study examines how this differing work arrangements affect task completion, work quality, time management, collaboration effectiveness, work-life balance, and job stress levels among employees. This study employs a quantitative descriptive design, surveying 30 employees of a private company divided into remote workers and office-based staff. A structured questionnaire measured key job satisfaction indicators across both groups. Collected data were analyzed using percentage calculations, weighted means, and Pearson's r correlation to identify significant relationships between work setting and satisfaction metrics. Remote workers reported higher job satisfaction, driven by scheduling flexibility, absence of commuting stress, and greater autonomy over work tasks. They demonstrated stronger time management skills and experienced lower stress levels compared to office-based employees. Office-based staff indicated more effective collaboration and clearer communication but reported higher levels of job-related stress and poorer work-life balance. The findings highlighted that remote work and traditional office settings each offer distinct benefits and challenges. Remote work boosted autonomy and reduced stress but sometimes led to social isolation and communication gaps. Conversely, office environments supported teamwork and immediate feedback but often undermined work-life balance. These results suggested that organizations should adopt flexible work policies, invest in digital collaboration tools, and implement mental well-being initiatives to optimize job satisfaction in both settings.

Keywords: remote work, traditional office setup

**CREW DEVELOPMENT PROGRAM AND JOB PERFORMANCE IN A
FAST-FOOD CHAIN IN QUEZON CITY**

Christine Caoyonan, Ma. Eden Malejana, Allana Marie Poseran,
Rosalie Sinadjan, Jovelyn Viray, Riva Manalo

Abstract

This study investigates the impact of the crew development program on job performance among service crew members in a fast-food chain in Quezon City. Past research indicates that development programs enhance skills, teamwork, and job satisfaction, leading to improved service quality and operational efficiency. This study assesses the relationship between program participation and job performance by examining how the program influences skills, knowledge, attitudes, attendance, work quality, and teamwork. This study uses a descriptive correlational research design. Data are gathered from forty full-time service crew members selected through purposive sampling at the Commonwealth branch in Quezon City. A structured survey questionnaire is administered to collect information on participants' perceptions of skill development, operational knowledge, teamwork, attendance, task quality, and efficiency. Responses are analyzed using frequency distribution, weighted mean, and Pearson correlation coefficient. The results indicated that crew members rated skill development positively (mean = 3.43), reflecting an enhanced ability to learn from mistakes and embrace a growth mindset. Operational knowledge received a mean of 3.40, suggesting minor gaps that could be addressed through refresher courses and on-the-job practice. Teamwork and feedback scored 3.50, while attendance and task quality each scored 3.75, demonstrating strong work ethic and service standards. Efficiency scored slightly lower at 3.40, indicating the need for time management training. Team collaboration was rated 3.50, highlighting opportunities for team-building exercises and communication workshops. Pearson correlation analysis revealed a strong positive correlation between program participation and overall job performance ($r = 0.78$, $p < 0.01$), indicating that program engagement was associated with improved performance. The study highlighted the significance of the crew development program in enhancing job performance among service crew members. As a result, it recommended expanding the program to include regular refresher courses, time management workshops, team-building activities, and formal reward systems to sustain motivation. Implementing these measures was expected to foster a more skilled, engaged, and high-performing workforce, leading to better customer service and operational outcomes.

Keywords: crew development program, job performance, skill development, teamwork, attendance, task quality, efficiency, fast-food industry

**CREW TRAINING SYSTEM AND JOB PERFORMANCE OF SERVICE
CREWS IN A FAST-FOOD CHAIN IN QUEZON CITY**

John Roland Rondares, Reymart Lacra, Jonathan Galleto,
Mary Ann De Leon, Jessrail Gulle, Riva Manalo

Abstract

This study investigates the crew training system and job performance of service crew members in a fast-food chain in Quezon City using a descriptive quantitative approach. Surveys conducted among service crews highlight productivity, job satisfaction, and training effectiveness. This research addresses challenges such as inconsistent service quality, low customer turnout, and food preparation errors. Findings demonstrate that an effective training system improves employee performance and satisfaction, emphasizing its role in enhancing customer experience. The study provides insights to help management refine training programs and inform future research in the fast-food industry. This study uses a descriptive correlational research design. Data were collected via a structured survey questionnaire from sixty service crew members, forty-two full-time and eighteen part-time employees, and seven branch managers at the Jollibee Jackman Plaza Commonwealth Branch in Quezon City. Responses were analyzed using frequency distribution, weighted mean, and Pearson correlation coefficient. With a composite mean of 3.35, the findings indicate that employees strongly agree the crew training system enhances productivity, particularly in enabling faster work during peak hours (composite mean of 3.45). Job performance received a composite mean of 3.42, suggesting that workers feel confident in handling their tasks. Overall satisfaction with working conditions is reflected in the high job satisfaction score of 3.45. Most workers consider themselves knowledgeable or extremely knowledgeable, with knowledge acquisition receiving the highest rating of 3.50. These results demonstrate that the crew training system has been effective in improving the sergeants' skills and competencies. The study highlighted that the crew training system effectively enhanced skills, productivity, performance, and satisfaction among service crews. As a result, it recommended introducing reward programs, regular refresher courses, time management workshops, team-building activities, and the Alagang Fast Food Service Crew Guideline to address remaining issues such as customer complaints, long wait times, and communication gaps. These measures aimed to foster a more competent and engaged workforce, leading to improved customer service and operational outcomes.

Keywords: crew training system, job performance, service crew, productivity, job satisfaction, knowledge acquisition, efficiency, fast-food industry

**CROSS-TRAINING PROGRAM OF THE SERVICE CREW OF A
FAST-FOOD CHAIN IN QUEZON CITY**

Ken Damasin, Mark Louie Guevarra, Cris Manlapaz, John Rommel Tacata,
Nick Benson Umeh, Riva Manalo

Abstract

In the fast-food industry, efficiency, quality service, and adaptable employees are essential for success. To achieve these, many companies implement cross-training programs that enable employees to perform multiple roles. This study examines the impact of cross-training on performance at a McDonald's branch in Ayala Fairview, Quezon City, Philippines. It specifically investigates how cross-training enhances operational efficiency, employee performance, and customer satisfaction during both peak and non-peak periods. This study uses a descriptive research design with purposive sampling to select 45 service crew members involved in daily operations. Data are collected via a structured survey questionnaire assessing perceived benefits and challenges of the cross-training initiative. Collected responses are analyzed using descriptive statistics (means and percentages) and nonparametric tests to determine differences by gender, income, and length of service. Respondents were 68.89 percent female, 51.11 percent earned below ₱5,000 per month, and 66.67 percent had up to two years of service. Cross-training rated "Strongly Agree" across five dimensions: Skill Variety (mean = 3.35), Task Identity (3.38), Task Significance (3.40), Autonomy (3.44), and Feedback (3.44). Statistical tests found no significant differences in perceptions by gender ($p = 0.5001$), income ($p = 0.5059$), or tenure ($p = 0.5549$), indicating equitable program benefits. Identified challenges included increased workload (10.13%), task overload (9.69%), and inconsistent training standards due to resource constraints. Findings demonstrated that cross-training supported skill development, job satisfaction, and operational flexibility. As a result, standardizing training guidelines, ensuring adequate resources, and implementing an "Enhancing Service Excellence" program were recommended to address workload imbalances and training inconsistencies and to further improve teamwork and efficiency during peak periods.

Keywords: cross-training, employee performance, operational efficiency, service quality, workforce adaptability, fast-food industry

**CUSTOMER PREFERENCES AND TRENDS IN BIGBREW MILKTEA
AT KINGSPPOINT QUEZON CITY**

Mary Anthuaneth Joy Pieza, Mark Jefferson Esteves, Dexter Morados,
John Luiz Suyom, Prince Brian Viterbo, Randy Villaseñor

Abstract

This study aims to evaluate consumer preferences and emerging trends related to Big Brew Milk Tea in Kingspoint, Quezon City. To gain a better understanding of consumer behavior and satisfaction in the milk tea market, the study focuses on key marketing variables such as flavor, price, add-ons, packaging, accessibility, product quality, customer service, and promotional strategies. This research utilizes a descriptive quantitative approach to collect data from 100 respondents. A structured questionnaire was administered to assess the perceived importance of various marketing factors. Additionally, a z-test was conducted to determine if significant differences existed in consumer preferences based on gender. The results revealed that price (composite mean = 3.73) and flavor (composite mean = 3.61) were the most influential factors in consumer satisfaction. Packaging and add-ons also contributed positively to consumer experience. The z-test analysis showed no significant difference in preferences between male and female respondents ($p = 0.88$), suggesting a consistent trend in consumer behavior regardless of gender. Although overall customer satisfaction was high, the study identified areas requiring improvement. These included inconsistent customer service during peak hours, limited promotional offers, and issues related to online accessibility. In response, the researchers proposed a development strategy focused on enhancing accessibility, service quality, marketing efforts, and environmentally friendly packaging. This study underscores the importance of aligning marketing strategies with consumer expectations to maintain competitiveness and customer loyalty in the milk tea industry.

Keywords: consumer preferences, milk tea, marketing strategies, customer satisfaction, big brew, price, flavor, service quality, quezon city

**CUSTOMER SATISFACTION IN A COFFEE SHOP AT SUSANO ROAD,
NOVALICHES QUEZON CITY: BASIS FOR MARKETING STRATEGY**

Rodolfo Paculba, Florenda Gilber, Khenbelle Rose Mahinay,
Joy Paor, Angel Hard Sison, Ariane Astudillo

Abstract

This study aims to assess the level of customer satisfaction at Retro Coffee House PH, located along Susano Road, Novaliches, Quezon City, as a basis for formulating effective marketing strategies. By understanding the preferences and expectations of customers, the study seeks to provide recommendations that can enhance customer experience and business performance. This research utilizes a quantitative descriptive method, employing survey questionnaires distributed to 50 respondents, consisting of both regular and occasional customers of the coffee shop. The study evaluates customer satisfaction based on factors such as convenience, service quality, and the alignment of service delivery with customer expectations. Findings indicated that most customers appreciated the café's interior aesthetics, cleanliness, and friendly staff, making it a favorable place for social gatherings. However, concerns were raised regarding long waiting times during checkout, pricing transparency, and occasional delays in online deliveries. Statistical analysis using the Kruskal-Wallis H test and Mann-Whitney U test revealed that customer satisfaction was significantly influenced by age and gender, while frequency of purchase did not yield a substantial effect. Young adults valued fast service and ambiance, whereas older customers prioritized product quality and pricing. Based on the findings, the study recommends utilizing social media influencers for promotional campaigns, implementing gender-targeted marketing strategies, and introducing customer loyalty programs. Enhancements such as pre-order features, improved delivery systems, bundled offers, and optimized seating arrangements should be considered to further strengthen brand identity and increase customer retention. The study highlights the importance of tailored marketing strategies in the competitive coffee shop industry, emphasizing that addressing identified issues while maximizing strengths can significantly improve customer satisfaction and business growth.

Keywords: customer satisfaction, coffee shop, marketing strategy, service quality, consumer behavior, retro coffee house, quezon city, loyalty program, delivery system, gender-based marketing

**CUSTOMER SATISFACTION IN LUCAS MOTOR SHOP ALONG NORTH FAIRVIEW,
QUEZON CITY: BASIS FOR IMPROVEMENT PLAN**

Marc Bryan Domingo, Bryan Bong Bacuyag, Kevin Dominic Cabauatan,
Eddmar Mina, Reynold Bangalisan

Abstract

This study investigates customer satisfaction and operational efficiency at Lucas Motor Shop, a cylinder block service provider located in North Fairview, Quezon City. With the increasing demand for motorcycle repair services in the Philippines driven by rapid urbanization and rising motorcycle ownership, ensuring reliable service and customer satisfaction has become essential. This research adopts a descriptive-correlational design to examine the relationship between customer satisfaction and key service factors such as service availability, customer service, service accuracy, and after-sales support. Data was collected using purposive quota sampling from 30 customers through a structured survey questionnaire. Statistical tools, including the Kruskal-Wallis H test, Mann-Whitney U test, and ranking analysis, were applied to analyze variations and trends in customer satisfaction. The results revealed consistently high levels of satisfaction across all service aspects, with after-sales services receiving the highest ratings. Notable differences in satisfaction were observed based on age, product preference, and frequency of service use, while gender showed minimal impact. The most frequently cited concerns were time delays in response and shipment of parts, followed by communication-related issues. In response to the findings, the study recommends the implementation of a real-time inventory management system, improved communication channels, and personalized after-sales support programs. The proposed improvement plan emphasizes the need to streamline operations, minimize delays, and enhance overall service delivery. This study highlights the importance of customer-focused strategies and operational efficiency in maintaining competitiveness in the motorcycle service industry in the Philippines.

Keywords: customer satisfaction, motorcycle service, after-sales support, service efficiency, communication strategy, inventory management, lucas motor shop, quezon city

**DATA PRIVACY CONCERNS AWARENESS OF ONLINE SHOPPING CONSUMERS:
A STUDY AMONG BCP BSBA STUDENTS**

Jade Yuri Cabang, Joshua Sabangan, Kirei Hanna Marietta Laragan,
Joshua Masangcay, Carl Gabrentina, Jennylene Abalos

Abstract

This study explores the awareness of data privacy concerns among online shopping consumers, specifically Bachelor of Science in Business Administration (BSBA) students at Bestlink College of the Philippines (BCP). In the digital age, e-commerce platforms such as Lazada provide convenience but also raise significant concerns about the collection, safekeeping, and use of personal information. This study aims to assess how students perceive data privacy risks and how these perceptions relate to their online shopping behaviors. This research utilizes a quantitative descriptive design to examine how variables such as age, gender, year level, socioeconomic status, and frequency of online purchases influence students' awareness of data privacy. A total of 200 BSBA students, ranging from first to fourth year, serve as respondents. Data collection is conducted using a structured survey questionnaire that applies a Likert scale to assess attitudes and perceptions regarding data privacy. The findings of the study are expected to reveal varying levels of data privacy awareness based on consumer profiles. Specific attention is given to practices related to data gathering, safekeeping, and utilization. The results aim to illustrate how differences in awareness influence consumer trust, willingness to transact online, and purchase behavior within digital platforms. Based on the findings, the study proposes a program for e-commerce platforms aimed at enhancing data privacy practices and addressing consumer concerns. These recommendations align with the provisions of the Data Privacy Act of 2012. This research highlights the importance of fostering data privacy awareness among future business professionals, emphasizing its role in strengthening consumer trust and ensuring responsible participation in the digital marketplace.

Keywords: data privacy, online shopping, consumer awareness, e-commerce, bsba students, digital security, data privacy act, consumer trust, purchase behavior, bestlink college

**DEVELOPMENT AND VALIDATION OF A PROPOSED DRESS CODE POLICY FOR
BESTLINK COLLEGE OF THE PHILIPPINES IN QUEZON CITY**

Karen Cañete, Gabrielle Casabuena, Zyra Jhess Crisologo, Verlie Lopez,
Mary Grace Orabao, Princess Sumalnap, Dr. Joy Evelyn Ignacio

Abstract

This study focuses on the development and validation of a proposed dress code policy for Bestlink College of the Philippines in Quezon City. Acknowledging the significance of institutional identity, professionalism, and inclusivity in higher education, the study aims to create a clear, acceptable, and valid dress code policy suited to the needs of the college community. Specifically, it seeks to (1) describe the demographic profile of respondents in terms of age, gender, years of experience, and educational attainment; (2) assess the level of validity of the proposed policy across multiple dimensions, including policy statement, objectives, scope, procedures, roles and responsibilities, definition of terms, disciplinary measures, review protocols, and implementation process; (3) determine the level of acceptability in terms of clarity, fairness, relevance, and communication; (4) identify whether demographic variables influence the level of acceptability; and (5) formulate a proposed dress code policy based on the findings. This study adopts a descriptive quantitative research design and employs purposive sampling, involving 20 human resource personnel from various higher education institutions. Data were collected using a structured questionnaire rated on a four-point scale to measure both the validity and acceptability of the proposed policy. The respondent profile revealed that 75% were female, 75% had 0–3 years of professional experience, and 80% were college graduates. The proposed dress code policy was rated as “Very Much Valid” across all measured criteria. It effectively outlined attire standards, promoted inclusivity, and aligned with institutional values and professional norms. Minor suggestions for enhancement included clearer visual aids, improved transparency in disciplinary measures, and strengthened communication strategies regarding policy enforcement. Statistical analysis showed no significant difference in policy acceptability based on respondents’ demographic profiles, indicating that the proposed policy was broadly inclusive and well-received. Based on the results, the researchers proposed a refined dress code policy that upholds professionalism and institutional identity while promoting respect, inclusiveness, and flexibility within the academic environment.

Keywords: dress code policy, institutional identity, professionalism, inclusivity, policy validation, higher education, bestlink college, human resource management, policy acceptability, workplace standards

**DIGITAL MARKETING: EVALUATING CUSTOMER
SATISFACTION AT RINA’S FLOWER SHOP**

Sophia Laguras, Daniela De Asis, John Rex Cabague, Janine Nicole De Paz, Vinalyn Sarzata

Abstract

Since its establishment in 2009 in Araneta City, Cubao, Rina’s Flower Shop has experienced steady growth despite ongoing challenges such as slow sales and marketing obstacles. In the current digital era, businesses leverage online platforms to build stronger connections with their customers. However, the extent to which digital marketing influences customer satisfaction at Rina’s Flower Shop remains uncertain. This study seeks to assess the impact of digital marketing on customer satisfaction by examining key factors including perceived quality, customer expectations, and perceived value. A descriptive-comparative research design was used to survey 100 customers selected through convenience sampling. The results indicate that age, gender, and purchase frequency significantly affect customer satisfaction. Younger customers and those who buy frequently tend to prefer faster, more interactive digital services. The strengths identified include customer service (scoring 3.70), website organization (3.68), and marketing consistency (3.68). However, issues such as slow response times (76%), a lack of engaging content (69%), and confusing navigation (55%) have negatively impacted satisfaction levels. Additionally, frequent buyers and customers of event services have higher expectations and perceive greater value. Improving social media engagement, enhancing website navigation, and implementing QR codes along with loyalty programs are essential for increasing customer satisfaction and fostering business growth.

Keywords: digital marketing, customer satisfaction, rina’s flower shop, online marketing, customer experience, perceived quality, customer expectations, customer value, e-commerce, social media marketing, customer feedback, consumer behavior, marketing effecti

**EFFECTIVENESS OF JOLLIBOTS ON CUSTOMER SATISFACTION IN
SELECTED STORES IN MAKATI AND TAGUIG CITY**

Charlie Mae Caballero, Angel Rose Dizon, Elaine Jacla, Ivan Jay Manzano,
Jhon Rey Tadas, Reynold Bangalisan

Abstract

This study explores the impact of Jollibots automated meal-serving robots on customer satisfaction at selected Jollibee outlets in Makati City. The deployment of Jollibots marks a notable advancement in customer service innovation, designed to streamline ordering and delivery processes while minimizing wait times. By integrating automation into the fast-food dining experience, Jollibee aims to boost operational efficiency and elevate overall customer satisfaction. This research examines how the presence of Jollibots affects customer perceptions and satisfaction levels within these outlets. This study employed a comparative research design to evaluate the impact of Jollibots automated meal-serving robots on various aspects of customer service, including convenience, operational efficiency, service speed, order accuracy, and quality of information delivery, both before and after their deployment. A total of 100 customers participated in the survey, with equal representation from Jollibee branches in Glorietta 4 and SM Aura. The study aimed to assess changes in customer satisfaction levels resulting from the integration of robotic service technology in fast-food operations. The findings clearly indicate that the deployment of Jollibots has significantly enhanced the overall customer experience at the selected Jollibee branches. Notable improvements were observed across key service dimensions, including convenience, operational efficiency, service speed, order accuracy, and clarity of information delivery. Post-implementation assessments revealed a substantial increase in customer satisfaction, demonstrating the effectiveness of robotic automation in improving frontline service quality. The study concludes that integrating Jollibots not only optimized operational workflows but also delivered a more seamless, accurate, and engaging dining experience, thereby strengthening customer loyalty and promoting service excellence. The study also highlights that Jollibots introduce a modern and engaging element to the dining experience, earning high customer approval for their reliability, efficiency, and novelty. Their integration into service operations not only boosts customer satisfaction but also reflects a broader industry trend toward technological innovation in food service. Based on these findings, the study recommends that similar establishments consider adopting automated service systems to enhance operational efficiency and customer engagement. Additionally, it underscores the importance of continuous system monitoring and incorporating customer feedback to maintain sustained effectiveness and adapt to evolving consumer needs.

Keywords: jollibots, automated service, customer satisfaction, operational efficiency, fast-food innovation, service speed, order accuracy, customer engagement, robotic automation, food service technology

**EFFECTIVENESS OF ONLINE RECRUITMENT PROCESS OF SELECTED
BUSINESS PROCESS OUTSOURCING COMPANIES IN QUEZON CITY**

Rhea Mae Balistoy, Darvin Amistad, Gwyneth Dugayo, Ma Nicole Obogne,
Kimberly Joy Suggang, Dr. Joy Evelyn Ignacio

Abstract

This study examined the effectiveness of online recruitment practices among selected BPO companies in Quezon City, focusing on key dimensions such as cost-efficiency, time optimization, accessibility to a wider talent pool, quality of applicants, and overall recruitment efficiency. It also explored company-related variables, including workforce size, number of recruitment personnel, years of operation, average monthly hires, and the specific online recruitment platforms utilized. Additionally, the study identified common recruitment challenges and analyzed whether organizational profile variables significantly influenced the perceived effectiveness of online recruitment methods. The study employed a descriptive quantitative research design, targeting 30 recruitment personnel from various BPO companies in Quezon City through purposive sampling. Respondents were selected based on their direct involvement in online recruitment processes and familiarity with digital hiring platforms. Data were collected using structured survey questionnaires distributed via Google Forms, allowing the researchers to gather diverse insights into the efficiency, effectiveness, and overall satisfaction with online recruitment practices. The findings indicated that the majority of BPO firms in Quezon City have a workforce ranging from 1 to 500 employees, supported by recruitment teams typically composed of 3 to 5 personnel. Notably, 40% of respondents had 0 to 5 years of service, suggesting a relatively young and emerging talent pool within recruitment departments. On average, 33.3% of the surveyed firms hire between 11 to 20 employees per month, with job boards cited as the most frequently used online recruitment platform (50%). Overall, participants expressed a strong perception of online recruitment effectiveness, with the following weighted mean scores: wider access (3.63), cost-efficiency (3.61), time optimization (3.60), quality of applicants (3.60), and workplace efficiency (3.56). The adoption of AI-driven tools and automated systems was also recognized as a critical factor in streamlining recruitment processes and improving overall efficiency. The study revealed that while online recruitment offers numerous benefits, it also presents notable challenges such as applicant oversaturation, difficulty in filtering high-potential candidates, technological disruptions, and potential algorithmic bias in AI-driven tools. Statistical analysis showed that company size and the number of recruitment personnel significantly influenced the perceived effectiveness of online recruitment, particularly in terms of cost-efficiency, time management, and applicant quality. Conversely, variables such as years of service and average monthly hires had no significant effect. Moreover, the type of online recruitment platform employed demonstrated a strong correlation with perceptions of time efficiency and the quality of applicants, emphasizing the critical need for strategic platform optimization to enhance recruitment performance.

Keywords: online recruitment, bpo companies, digital hiring tools, recruitment efficiency, ai bias, recruitment platforms, cost-effectiveness, time management, applicant quality, recruitment challenges

**EFFECTIVENESS OF PERFORMANCE APPRAISAL SYSTEM OF
STARBUCKS SUPPORT CENTER IN BUENDIA, MAKATI CITY**

Charlynmae Gabia, Ferdinand Alfonso Sarmiento, Jasmin Kaye Sebastian,
Rochelle Balan, John Michael Mallorca, Danilo Molera Jr.

Abstract

This study evaluates the effectiveness of the performance appraisal system implemented at the Starbucks Support Center in Buendia, Makati City. Specifically, it examines the system's role in supporting career advancement, enhancing employee performance, and aligning with the company's core values. Given the critical role that performance appraisals play in fostering employee engagement and productivity, the focus of the study is to determine how effectively the current system meets these organizational goals. The researchers employ a descriptive quantitative research design to assess the performance appraisal system's effectiveness. Data is gathered through a structured survey completed by 231 employees across various departments. The collected data are analyzed using statistical tools such as weighted mean, frequency distribution, and the Kruskal-Wallis H-test to identify trends and significant differences in perception based on job position, length of service, and educational attainment. The findings reveal that employees generally perceive the appraisal system positively, particularly in terms of dependability ($M = 3.64$) and alignment with the company's mission and vision ($M = 3.62$). However, statistical analysis indicates variations in perceived job competence, dependability, mission alignment, and customer service based on job position and length of service. Notably, issues such as poor communication (reported by 51 employees), limited opportunities for career progression (42 employees), and inconsistent feedback (40 employees) emerged as areas of concern. These results suggest that while the appraisal system upholds key organizational values, there are critical areas requiring improvement to ensure equity and effectiveness across all employee groups. This study concludes that the current performance appraisal system has strengths in promoting organizational alignment and reliability but also reveals gaps that hinder its full effectiveness. In response, the researchers propose an enhancement plan titled "Bridging the Gap: Enhancing Performance Appraisals for Growth and Development," which includes initiatives such as mentorship programs, real-time feedback mechanisms, and structured career planning. These recommendations aim to support human resource professionals in refining performance evaluation practices to better support employee growth and organizational success.

Keywords: performance appraisal, employee development, organizational alignment, career advancement, human resource management, starbucks support center, employee engagement, real-time feedback

**EFFECTIVENESS OF THE MARKETING STRATEGIES ON SALES PERFORMANCE
AT POTATO CORNER OUTLETS IN QUEZON CITY**

Arnold Coronel, Charlyn Pugoy, Mecainah Briones, Ana Marie Sasaban,
Jerome Gonzaga, Vinalyn Sarzata

Abstract

This study investigates the effectiveness of marketing strategies employed by Potato Corner, a globally recognized flavored fries franchise, in enhancing sales performance within a competitive market. The franchise utilizes a range of tactics such as data-driven promotions, social media engagement, loyalty programs, affordable pricing, seasonal discounts, and strategic store placement. Additionally, the brand capitalizes on franchising and food delivery partnerships to fuel rapid expansion. The study focuses on how these marketing strategies contribute to Potato Corner's sustainable growth, customer retention, and brand differentiation in Quezon City. A descriptive quantitative research design is adopted to assess the effectiveness of the marketing strategies. Data is collected from 50 respondents across five Potato Corner branches in Quezon City using a structured survey. The study examines key elements of the marketing mix: product, price, place, and promotion, and their relationship with customer retention and brand awareness. Convenience sampling is employed, targeting young adults, particularly females, to ensure demographic diversity. Data analysis includes frequency and percentage for demographic profiling, weighted mean for evaluating strategy effectiveness, and Pearson r correlation to determine the relationship between marketing strategies and sales performance. Findings indicate that the majority of customers are young adults aged 24 and below, with a female majority. Respondents reported occasional purchases and expressed satisfaction with the brand's affordable pricing, wide flavor selection, engaging promotions, and accessible store locations. Nonetheless, challenges such as limited promotional reach and inadequate visibility at certain branches were identified. Statistical analysis confirms a positive correlation between marketing strategies and sales performance, suggesting that effective marketing significantly enhances both customer loyalty and overall business outcomes. The study concludes that Potato Corner's marketing strategies are effective in boosting customer satisfaction and driving sales. Key components such as pricing, product variety, promotional activities, and strategic placement of outlets play a vital role in attracting and retaining customers. However, areas for improvement remain, particularly in increasing branch visibility and promotional engagement. The study recommends strengthening digital marketing initiatives, expanding targeted promotions, and enhancing store presence to further improve customer reach and ensure continued business growth.

**EFFECTIVENESS OF THE RECRUITMENT PROCESS OF A
STAFFING AGENCY IN QUEZON CITY**

Janera Amansec, Marjorie Dianne Alaba, Daniela Dizon, Alliah Mae Posada,
Joana Marie Villafranca, Riva Manalo

Abstract

This study evaluates the effectiveness of the recruitment process implemented by a staffing agency in Quezon City. The primary objective is to identify opportunities for improving recruitment strategies to better serve the needs of both employers and job seekers. By assessing applicant experiences and outcomes, the research aims to provide staffing agencies with insights that can enhance the efficiency, transparency, and fairness of their hiring procedures. A descriptive-quantitative research design is employed, with data collected from 100 newly hired fast food crew members at Staff Search Asia Service Cooperative in Quezon City. Respondents are selected through quota sampling and surveyed between December 2024 and April 2025. A structured survey questionnaire is used as the primary data collection instrument to evaluate key aspects of the recruitment process. The study findings reveal that among the 100 respondents, the majority (88%) were young, aged 18–26 years. There were slightly more female applicants (57%) than male applicants (43%), indicating a relatively balanced gender distribution. In terms of educational attainment, most applicants were college undergraduates (49%), followed by senior high school graduates (32%), high school graduates (13%), and college graduates (6%), reflecting a diverse educational background. The recruitment process in a staffing agency in Quezon City was perceived as highly effective. Job descriptions were found to be clear and easy to understand, with a composite mean score of 3.42. The process was considered fair, with a composite mean score of 3.43, providing all applicants with equal opportunities. Communication was described as professional and courteous, ensuring a smooth experience (composite mean of 3.42). The process effectively matched applicants with suitable jobs (3.41), and candidates generally reported a positive experience (3.43), with many willing to recommend the agency. Overall, applicants expressed satisfaction with the transparency and fairness of the process, as reflected by a composite mean score of 3.40. The results confirm that the staffing agency's recruitment process is effective in providing a smooth, fair, and transparent experience for applicants. A well-structured and clearly communicated hiring system contributes to better job-applicant matches and higher satisfaction. The study recommends the continued enhancement of recruitment practices to further minimize bias, streamline communication, and improve candidate retention. By adopting a more transparent and optimized hiring strategy, the agency can strengthen its reputation and contribute more effectively to employment solutions in Quezon City.

Keywords: recruitment process, staffing agency, job matching, candidate experience, hiring strategy, fairness, transparency, applicant satisfaction, quezon city, business administration

**EFFECTS OF LOYALTY CARD PROGRAMS ON CUSTOMER BEHAVIOR AT
SELECTED GASOLINE STATIONS IN FAIRVIEW, QUEZON CITY**

Arlene Catugas, Luisa Blanco, Jay R Jarin, Mary Grace Lagramada,
John Howard Serrano, Jennylene Abalos

Abstract

In the highly competitive fuel retail market, customer loyalty and brand retention are essential for sustaining business success. As vehicle ownership continues to rise, the steady demand for fuel has prompted gasoline stations to implement loyalty programs as a strategy to retain customers and increase satisfaction. This study examines the relationship between customer behavior and fuel retail strategies, focusing on the impact of loyalty card programs at selected gasoline stations in Fairview, Quezon City. It aims to assess how such programs influence customer satisfaction, loyalty, and purchasing decisions, with an emphasis on the role of service quality in fostering long-term customer relationships. The study applies the Technology Acceptance Model (TAM) to evaluate the effectiveness of loyalty card programs in shaping customer behavior and retention. Key constructs include perceived usefulness, perceived ease of use, customer attitudes, and behavioral intention. Loyalty cards commonly offer discounts, reward points, and easy registration and redemption processes that encourage continued use. Other engagement drivers include promotional visibility, peer influence, and accessible service information. A quantitative-descriptive research design was employed, using purposive sampling and structured survey questionnaires. Data were analyzed through frequency distribution, weighted means, and the Kruskal-Wallis H-test. The results showed that loyalty card programs positively influenced customer satisfaction and increased repeat visits. The most responsive demographic consisted of male customers aged 46 and above, many of whom use tricycles for transport. Rewards such as food, beverages, and basic car services were identified as key motivators for customer loyalty. However, certain limitations were observed, including unclear communication about rewards, registration issues, and the lack of appealing incentives, all of which hindered full customer engagement with the loyalty programs. To address these challenges, the study recommends the installation of interactive kiosks at participating gasoline stations. These kiosks would allow customers to view promotions, track reward points, redeem incentives, and access transaction histories. By enhancing information access and reward visibility, this initiative aims to improve customer engagement and satisfaction. Ultimately, the implementation of such systems could strengthen customer loyalty and increase retention in an increasingly competitive fuel retail environment.

Keywords: customer behavior, loyalty card programs, fuel retail market, customer satisfaction, brand retention, technology acceptance model

**EFFECTS OF QUALITY INSPECTION MACHINE TO THE EMPLOYEE PRODUCTIVITY
IN PROGREZIVE INCORPORATED AT PROJECT 8, QUEZON CITY**

Marvin John Frayres, Jessa Mae Bueza, John Paul Roman, Angela Mae Sabellano,
Christian Briggs Barloza, Reynold Bangalisan

Abstract

This study evaluates the impact of automated quality inspection (QI) machines on employee productivity at Progrizive Incorporated, a garment manufacturing company located in Project 8, Quezon City. Anchored in the principles of Total Quality Management (TQM), the research explores how automation affects work efficiency, error rates, and skill utilization. The study also aims to identify the challenges posed by automation and its influence on workforce dynamics. A descriptive quantitative research design was employed, surveying 15 employees from the engineering and production departments through purposive sampling. Data were gathered using structured questionnaires and analyzed using statistical tools such as weighted mean, Mann-Whitney U test, and Kruskal-Wallis H test. The study focused on key productivity metrics, including efficiency, error rates, workload distribution, and adaptability to automation. The findings revealed notable improvements in work efficiency, with mean scores ranging from 3.26 to 4.00, and in error rate reduction, with scores between 3.15 and 3.80. Respondents acknowledged better throughput and workload balance as a result of QI machine integration. However, skill utilization scored lower (2.50 to 3.10), indicating difficulties in adjusting to automated processes. Statistical analysis showed no significant differences in productivity effects based on age, gender, tenure, or department ($p > 0.05$), thus supporting the null hypothesis. Key challenges included job security concerns (identified by 60% of respondents), machine malfunctions (40%), and false rejections (33%), which led to decreased trust in the QI system. Additionally, employees reported reduced teamwork and communication, attributed to an over-reliance on automation. To address the identified challenges, the study proposes six key strategies: (1) Enhance adaptability through technical upskilling and mentorship programs; (2) Integrate AI-driven predictive maintenance to reduce machine downtime; (3) Implement department-specific training and workflow automation such as automated labeling; (4) Establish a troubleshooting system with real-time error tracking and feedback loops; (5) Utilize a Smart Manufacturing Dashboard for real-time defect monitoring; and (6) Promote employee engagement through career development pathways and incentives. These recommendations aim to align TQM practices with human-machine collaboration, mitigating fears around automation while optimizing productivity. The study highlights the dual role of automation in improving operational efficiency and transforming organizational culture, offering a model for small- and medium-sized enterprises (SMEs) seeking to adopt technology while maintaining workforce inclusivity.

Keywords: quality inspection machine, employee productivity, automation, total quality management, manufacturing efficiency, progrizive incorporated, workforce adaptability

**EFFECTS OF SOCIAL MEDIA MARKETING STRATEGIES ON BRAND AWARENESS OF
FSR AUTOWORKS: BASIS FOR IMPROVING DIGITAL MARKETING TACTICS**

Princess Jovie Ann Mahilum, John Mark Esteves, Karyl Legaspi,
Bryan Angelo Morin, Lovely Trilles, Reynold Bangalisan

Abstract

This study investigates the effects of social media marketing strategies on the brand awareness of FSR Autoworks and Off-Road Unlimited, an automotive service company based in Commonwealth, Quezon City. Since its establishment in 2013, the company has grown from offering basic car wash and painting services to becoming a full-service auto repair and customization provider, responding to trends such as the increased popularity of 4x4 vehicles. Given the growing importance of digital engagement, this study focuses on social media strategies utilized by the company including influencer collaborations, live streaming, content marketing, and vlogging, and evaluates their impact on brand awareness, particularly in terms of content quality, accuracy, contact availability, and relevance. A descriptive-correlational research design was used, with data collected from 30 customers who actively engaged with FSR Autoworks' social media platforms. The study utilized statistical tools, including frequency, weighted mean, Pearson correlation coefficient (Pearson-r), and ranking, to evaluate customer responses and determine the relationship between social media marketing strategies and brand awareness. The findings revealed a strong positive correlation between social media marketing strategies and brand awareness ($r = 0.877$, $p < 0.00001$). Influencer partnerships and vlogs emerged as the most effective tools in fostering customer trust and engagement. Live streaming and content marketing were found to support real-time interaction and educational value. However, several challenges were identified, including misalignment with influencer branding, low video production quality, and inconsistent relevance of published content. The study concludes that FSR Autoworks has successfully leveraged social media to increase brand visibility but must refine certain aspects to maximize digital impact. Key recommendations include enhancing content production quality, aligning with influencers whose values reflect the brand, integrating data analytics to personalize content, and maintaining consistent audience engagement through interactive and educational formats. These strategies can serve as a guide for FSR Autoworks and similar automotive businesses in strengthening their digital presence and fostering long-term customer loyalty in a competitive online environment.

Keywords: social media marketing strategies, brand awareness, digital marketing, automotive industry, influencer marketing, customer engagement

**EFFECTS OF USER GENERATED CONTENT TO THE CONSUMER BUYING
BEHAVIOR OF BRILLIANT SKIN ESSENTIALS**

Christopher Barcelona, Arshiel Cabaron, Sheila Leviste, Rea Shane Sildura,
Reynalyn Joyce Sogueco, Jennylene Abalos

Abstract

This study investigates the influence of User-Generated Content (UGC) including customer reviews, testimonials, and social media posts on consumer buying behavior in relation to Brilliant Skin Essentials, a well-known beauty brand. UGC has become a powerful marketing tool, significantly impacting consumer decisions by appealing to situational, social, psychological, and personal factors. This research aims to explore how UGC shapes purchase behavior, especially among young adult consumers, and to identify the most influential elements of user-generated content in a digital marketing context. A descriptive research design was employed, involving a survey of 50 participants from Quezon City. Respondents were selected using purposive sampling. Data were gathered through structured questionnaires and analyzed using frequency, percentage, weighted mean, T-test, and ANOVA to determine the relationship between UGC and consumer behavior across various influencing factors. The majority of respondents were young adults aged 18 to 23, predominantly female, and earning ₱10,000 or less per month. While most participants were familiar with the brand, their purchasing frequency remained low, indicating that UGC alone does not lead to consistent brand loyalty. Nevertheless, UGC was acknowledged as a strong influence on purchasing decisions. Social factors, including peer influence and online recommendations, had the highest impact (mean = 3.37), followed by psychological factors such as brand perception and trust in UGC (mean = 3.32). Situational factors like promotions scored a mean of 3.13, while personal factors such as individual needs scored the lowest (mean = 3.10). Notably, 33 respondents perceived UGC as overly positive, 30 found it difficult to distinguish from paid promotions, and 25 viewed some content as exaggerated. Additionally, 24 participants believed that excessive sponsored posts reduced credibility, while 23 felt that some UGC focused more on sales than genuine experiences. The study concludes that UGC significantly affects consumer buying behavior, although it does not guarantee frequent purchases or long-term loyalty. Variables such as age, gender, and purchase frequency have minimal influence on the impact of UGC. However, concerns regarding content authenticity and excessive commercialism challenge its effectiveness. To maximize the potential of UGC, brands like Brilliant Skin Essentials should adopt transparent marketing practices, promote diverse and relatable testimonials, and avoid overly promotional content. These strategies can help strengthen consumer trust, improve engagement, and drive more meaningful purchasing decisions.

Keywords: user-generated content, consumer buying behavior, brilliant skin essentials, social media influence, marketing strategies, authenticity, brand trust

**EMPLOYEE SATISFACTION AND RETENTION OF REMOTE WORKERS IN THE
SOURCEFIT PHILIPPINES INCORPORATED, IN QUEZON CITY**

Kathleen Felix, Trisha Joy Ferrer, Diana Lyn Enciso, Ma Gia Llagas,
Jhayson Ponayo, Dr. Joy Evelyn Ignacio

Abstract

This study aimed to assess employee satisfaction and retention among remote workers at Sourcefit Philippines Incorporated, located in Quezon City. It specifically examined employee satisfaction about compensation and opportunities for promotion, while also evaluating retention factors such as training and development, and employee engagement. Furthermore, the study explored the challenges commonly encountered by remote employees and investigated the correlation between overall job satisfaction and retention. The findings seek to provide insights into the factors that influence employee loyalty and long-term commitment within a remote work environment. This study employed a descriptive-correlational research design to investigate the relationship between employee satisfaction and retention among remote workers at Sourcefit Philippines. A purposive sampling technique was used to select 138 participants from a total population of 1,376 remote employees. Data collection was conducted through a structured survey questionnaire, and the responses were analyzed using appropriate statistical tools, including correlation analysis. The results revealed that while remote employees generally expressed satisfaction with their pay and opportunities for promotion, notable concerns were identified regarding overtime compensation, performance-based incentives, and the availability of structured career development programs. The study identified a moderate positive correlation between employee satisfaction and retention ($r = 0.4861$), with a highly significant p-value ($p = 0.00001$), indicating that increased job satisfaction is strongly associated with higher retention rates among remote employees. Notable challenges impacting satisfaction included limited opportunities for social interaction, lack of recognition, and collaboration difficulties, all of which contributed to feelings of isolation and diminished employee engagement. In light of these findings, the study proposed a comprehensive retention policy designed to address these concerns. The proposed policy emphasizes regular and structured job evaluations, competitive salary packages, performance-based incentives, clear pathways for career advancement, and the implementation of employee engagement initiatives to foster a more connected and motivated remote workforce. Employee satisfaction emerged as a key factor influencing retention among remote workers at Sourcefit Philippines. Addressing concerns related to compensation, limited opportunities for career advancement, and challenges in employee engagement is essential to fostering both satisfaction and long-term commitment. The study highlights the importance of regularly reviewing and updating retention policies to ensure they remain aligned with employee expectations and industry benchmarks. It also recommends that future research explore the sustained impact of retention strategies on employee performance, engagement, and overall satisfaction in remote work environments.

Keywords: employee satisfaction, employee retention, remote work, compensation, career advancement, employee engagement, retention policies, organizational commitment, sourcefit philippines, remote workforce management

**EMPLOYEE WELL-BEING OF THE RANK AND FILE EMPLOYEES
AT UNITED CONTAINER CORPORATION**

Micha-ella Angana, Estella Marie Velasco, Marijho Cris, Aida Duay,
Jovelyn Fajardo, Danilo Molera Jr.

Abstract

In today's evolving workplace landscape, particularly in the post-pandemic, employee well-being has emerged as a strategic priority for organizations. A holistic approach to wellness is no longer optional but essential, as traditional programs often fall short in addressing the diverse and dynamic needs of the workforce. Unfortunately, the well-being of rank-and-file employees is frequently overlooked, despite their critical role in sustaining daily operations. By designing inclusive policies that specifically prioritize their physical, mental, and emotional health, organizations can significantly enhance productivity, reduce burnout, and elevate overall morale. Fostering a culture that supports employee well-being at every level not only contributes to a healthier and more engaged workforce but also promotes long-term organizational sustainability and success. This study adopted a quantitative research design utilizing a descriptive method to investigate the factors that influence the well-being of rank-and-file employees. The primary aim was to obtain a comprehensive and evidence-based understanding of the variables impacting employee well-being through systematic and objective data collection and analysis. This methodological approach enabled the researchers to accurately capture existing workplace conditions and gain insights into the day-to-day experiences of employees at the operational level. By employing structured survey instruments, the study facilitated the identification of significant patterns, correlations, and trends, thereby generating data-driven insights that can inform the development of targeted and inclusive well-being initiatives within the organization. The study conducted at United Container Corporation revealed that the majority of employees are regular workers, predominantly assigned to the Can Department. Although the company provides support for physical health, many employees continue to face emotional stress and difficulties in achieving work-life balance. Contractual employees, in particular, reported higher levels of job insecurity, reduced access to benefits, and limited opportunities for career advancement. In contrast, regular employees generally indicated higher levels of overall well-being. These findings highlight the urgent need for the company to enhance its mental health initiatives, improve internal communication channels, and implement fair and inclusive workplace policies. By addressing these disparities, United Container Corporation can foster a healthier, more equitable, and supportive work environment for all employees, regardless of employment status. The study reveals that employee well-being at United Container Corporation is influenced by factors such as employment status, departmental placement, and educational background. Regular employees, those assigned to key departments, and individuals with higher educational attainment tend to report greater workplace satisfaction and overall well-being. However, the data indicate that higher education does not necessarily correspond with improved financial well-being, underscoring the need for enhanced compensation and financial support systems. To foster a more satisfied and high-performing workforce, the company should implement inclusive policies that address the unique needs of contractual employees, consider department-specific concerns, and prioritize initiatives that promote financial wellness for all staff.

Keywords: employee well-being, united container corporation, regular employees, contractual workers, job security, work-life balance, emotional health, mental health support, inclusive workplace, employee benefits.

**EMPLOYEE WELLNESS PROGRAM AND EMPLOYEE ENGAGEMENT IN
DBP SERVICE CORPORATION IN GIL PUYAT, MAKATI CITY**

Mae Murao, Angelica Azuela, Catherine Madrid, Micka Mijares,
Princess Ellaine Quinto, Xena Taguinod, Danilo Molera Jr.

Abstract

DBP Service Corporation (DBPSC), a leading staffing agency in the Philippines, upholds a comprehensive approach to employee wellness, addressing physical, mental, emotional, nutritional, and financial dimensions. As stress and burnout continue to rise in the workplace, employee disengagement has become a pressing concern, adversely affecting productivity, morale, and retention. This study investigates the impact of DBPSC's wellness program on employee engagement, focusing on key factors such as job satisfaction, organizational commitment, communication, recognition, and growth opportunities. It also explores the challenges employees face in accessing wellness initiatives and offers strategic recommendations to enhance program participation, improve overall well-being, and foster a more engaged, resilient, and high-performing workforce. This study utilized a descriptive-correlational research design paired with census sampling to survey all 130 full-time regular employees of DBP Service Corporation. By involving the entire target population, the research ensured comprehensive data coverage and minimized sampling bias. Participants provided assessments of both the employee wellness program and their level of engagement, enabling a thorough analysis of the relationship between organizational wellness initiatives and employee involvement, satisfaction, and overall workplace experience. DBP Service Corporation's wellness program is generally well-regarded, with employees reporting satisfaction across multiple dimensions, including physical, mental, emotional, financial, and nutritional well-being. Nevertheless, the program faces significant challenges that hinder its full potential. These include low employee participation in wellness activities, inflexible scheduling options, and inconsistent endorsement from leadership. Employees have also indicated a need for more personalized support services, such as tailored financial counseling and mentoring programs. Moreover, concerns around privacy, the lack of tools to monitor personal progress, and conflicting schedules further limit engagement. These insights underscore the critical need for enhancing program accessibility, strengthening leadership advocacy, and providing customized support to foster higher participation rates and improve overall effectiveness. The evaluation of DBP Service Corporation's employee wellness and engagement initiatives reveals generally high levels of satisfaction across physical, mental, emotional, financial, and nutritional aspects. Nevertheless, the study identifies key areas needing improvement, such as low participation rates in wellness activities, insufficient financial counseling services, and inconsistent recognition of employee efforts. Despite strong employee engagement marked by notable commitment and satisfaction, challenges persist, including concerns about privacy, uneven leadership involvement, and a demand for more personalized wellness support. To address these issues and further enhance employee well-being and engagement, it is recommended that the organization adopt flexible scheduling, increase leadership participation, improve recognition programs, broaden financial wellness offerings, and strengthen nutrition and healthy lifestyle initiatives.

Keywords: employee wellness, employee engagement, physical health, mental health, emotional well-being, financial counseling, nutrition, employee recognition, leadership involvement, program participation, dbp service corporation

**EVALUATING INVENTORY MANAGEMENT PRACTICES FOR KOREAN MART
CONVENIENCE STORE IN NOVALICHES QUEZON CITY BASIS
FOR IMPLEMENTATION INVENTORY PLAN**

Kathreena Coleen Ramal, Jennifer Edullantes, Alexis John Francisco,
Jericho Hesita, Yvan Joemarie Valencia, Arine Astudillo

Abstract

Inventory management refers to the systematic process of sourcing, storing, and selling both raw materials and finished goods (Secretario, 2020). It plays a vital role in ensuring the smooth flow of products within a business, from acquisition to final distribution. According to Michigan State University (2022), effective sourcing is a key component of inventory management, as it allows businesses to function efficiently by ensuring that all essential items are procured on time and are readily available to meet operational demands. A quantitative-correlational research design was adopted to explore the relationships between variables, emphasizing the analysis of frequency, correlation strength, and the prediction of events. To gather data, convenience sampling was utilized, involving 30 long-term employees from a Korean Mart convenience store in Novaliches, Quezon City. According to Nikolopoulou (2022), convenience sampling is a type of non-probability sampling that selects participants based on accessibility and proximity, rather than random selection. While this method allows for efficient and practical data collection, it limits the representativeness of the sample, as not all members of the target population have an equal chance of being included. The demographic profile of the respondents indicates that the workforce is predominantly young, with 70% aged between 18 and 25 years, and 93% identifying as female, reflecting a gender-skewed employment pattern in the selected Korean Mart convenience store. The evaluation of inventory management practices revealed varied performance across key areas. Inventory tracking received the lowest mean score of 2.90, suggesting that although basic operational requirements are being met, there are significant concerns regarding the organization, accuracy, and consistency of tracking methods. Reordering and replenishment practices yielded a relatively high score of 3.55, indicating the presence of effective restocking procedures, though occasional delays were noted as a recurring challenge. Inventory optimization was rated at 3.26, showing a moderate contribution to cost control and profitability enhancement. Sourcing and storing practices scored 3.41 and 3.35, respectively, reflecting strong supplier coordination and operational efficiency; however, internal tracking within storage areas requires further improvement. Lastly, selling practices, with a score of 3.35, were recognized for strong promotional strategies and effective customer communication, though issues such as stock imbalances driven by aggressive sales targets were reported. Effective inventory management entails the application of strategic approaches that address the specific needs of different stakeholders. For managers, the integration of routine inventory audits with advanced real-time tracking systems is essential for maintaining optimal stock levels, reducing discrepancies, and improving coordination with suppliers. Entrepreneurs, particularly those operating in cost-sensitive environments, can greatly benefit from implementing Just-in-Time (JIT) inventory systems, which minimize storage costs and ensure timely product availability. From the customer standpoint, businesses must focus on preventing stockouts and maintaining transparent communication regarding product availability. Doing so not only enhances customer satisfaction but also fosters loyalty and trust in the brand.

Keywords: inventory management, real-time tracking, just-in-time (jit), stock optimization, supplier performance, customer satisfaction, stock outs, audits, entrepreneurs, managers

**EVALUATING MARKETING STRATEGIES OF FIBERNIWAN:
BASIS FOR CUSTOMER RETENTION**

Mary Nicole Golez, Rheamae Alarios, Rovie Anne Beceril, Zea Belle Dela Peña,
Jeannuel Sabas, Vinalyn Sarzata

Abstract

This study aims to evaluate the marketing strategies of Fiberniwan, an internet service provider established in 2019, with a specific focus on enhancing customer retention in Barangay Commonwealth, Quezon City. As the company primarily relies on traditional marketing methods, the researchers selected this area to assess the effectiveness and relevance of its current approach in a competitive market. The research seeks to identify strategic gaps and propose actionable improvements to strengthen Fiberniwan's marketing efforts, ultimately aiming to increase customer satisfaction, foster brand loyalty, and improve long-term retention. To effectively gather and analyze numerical data, the researchers adopted a quantitative descriptive research design, which aims to describe the characteristics, trends, and patterns within a specific population or phenomenon. The sample size of 38 respondents was determined using Slovin's formula, ensuring a manageable yet representative group. Data collection was conducted through a structured survey questionnaire, administered via convenience sampling, which allowed for efficient access to participants based on availability. These research methods were deliberately chosen to ensure the collection of accurate, relevant, and reliable data essential for achieving the study's objectives. The findings from the evaluation of Fiberniwan's marketing strategies, a survey was conducted to assess the demographic profile and perceptions of its customers. The results revealed that 71% of respondents were male, 76% were between the ages of 21 and 30, and 89.5% had maintained their subscriptions for one to two years or more. While many customers demonstrated brand awareness and interest in Fiberniwan's services, reflected by weighted means of 3.21 and 3.46, respectively, satisfaction levels declined in critical areas. Notably, service quality and responsiveness received a lower weighted mean of 3.05, while perceived promotional value was rated at 3.11. In addition, several issues emerged as key sources of dissatisfaction, including unsecured transactions (37%), limited staff availability (24%), and slow response times (16%). These findings suggest the need for strategic improvements in customer service, communication, and marketing efforts to enhance customer satisfaction and long-term retention. The study concludes that evaluating Fiberniwan's marketing strategies provides a clearer understanding of how customers perceive its offerings in terms of service, pricing, processes, physical setup, distribution, promotion, and personnel. These components collectively shape customer experience and loyalty. In light of declining customer retention, the researchers recommend several innovative solutions. These include the adoption of AI-driven chatbots to enhance responsiveness, strategic digital content planning to increase online engagement, the launch of a customer loyalty rewards program, and the creation of a dedicated mobile app to improve service accessibility and user convenience. These proposed initiatives are intended to reinforce Fiberniwan's competitive edge, improve customer satisfaction, and promote sustained customer relationships.

Keywords: fiberniwan, marketing strategies, customer perception, customer retention, service quality, ai chatbots, digital content, loyalty program, mobile application, marketing mix

**EVALUATING MARKETING STRATEGY TOWARD CUSTOMER
PREFERENCE OF DOING GOOD CLOTHING**

Alexander James Enriquez, John Vincent Monterola, Amado Nicomedes,
Mark James Sobrino, Jeremias Zamora, Vinalyn Sarzata

Abstract

This study investigates the marketing strategies employed by Doing Good Clothing, a Caloocan City-based enterprise specializing in personalized apparel. Although the company utilizes a variety of promotional techniques, it continues to face difficulties in effectively connecting with its intended market. The research aims to assess consumer behavior and preferences to develop more targeted and impactful marketing efforts. By enhancing customer interaction, refining promotional approaches, and optimizing advertising channels, the study seeks to strengthen the brand's market presence and appeal to a broader and more diverse customer base. This study examines the influence of marketing strategies on consumer preferences for Doing Good Clothing, a brand committed to sustainability and ethical sourcing. Adopting a descriptive quantitative research approach, the study will utilize a structured survey questionnaire administered to 20 prospective customers. The gathered data will be analyzed through descriptive statistics to summarize consumer responses, while correlation and regression analyses will be employed to assess the strength and significance of relationships between marketing strategies and consumer preferences. The findings aim to provide actionable insights for enhancing the brand's market engagement and aligning its promotional efforts with customer values. The survey findings reveal that a majority of the respondents are young adults, with 70% aged between 18 and 25. Most are male and report making one to three purchases from Doing Good Clothing. Respondents commend the brand for its product quality and design, and they consider the pricing to be fair and competitive. However, significant concerns were raised regarding the company's promotional efforts. In particular, the brand's social media advertisements were perceived as unengaging and ineffective. Furthermore, the store's physical location received low satisfaction ratings, especially in terms of comfort, atmosphere, and accessibility. While customers expressed trust in the brand's transparency and responsiveness to their needs, the overall data indicates substantial opportunities for improvement in marketing communication, promotional reach, and in-store experience. The study indicates that a significant portion of respondents are young adults aged 18 to 25, with 55% identifying as male. While Doing Good Clothing is consistently rated highly for the quality of its products, respondents expressed lower levels of agreement concerning the brand's image, customer loyalty, and overall reputation. These findings suggest that, despite product satisfaction, the company faces challenges in cultivating a strong and trustworthy brand identity. To address this gap, strategic improvements in marketing communication, brand positioning, and trust-building initiatives are recommended.

Keywords: doing good clothing, young adult consumers, product quality, brand image, customer loyalty, brand reputation, marketing strategy, trust building, consumer perception, brand positioning.

**EVALUATING ON THE MARKETING STRATEGIES UTILIZED BY COAL PH:
BASIS FOR COMPANY COMPETITIVENESS**

Jessie Arellano, Jeanly Baliton, Patricia Motecillo, April Shei Pielago, Jimuel Eswan, Vinalyn Sarzata

Abstract

In today's dynamic and competitive business environment, companies must continuously adapt and innovate to sustain a competitive advantage. Coal PH, a business based in California, San Bartolome, Novaliches, Quezon City, has effectively met these challenges and distinguished itself from more established competitors. This success is largely attributed to its strategic implementation of the 7Ps of Marketing: Product, Price, Place, Promotion, People, Process, and Physical Evidence. By leveraging these marketing principles, Coal Ph has remained relevant in an ever-evolving market and positioned itself for sustained long-term growth. The study adopted a correlational research design, employing a simple random sampling technique to ensure an unbiased and representative sample. A total of 80 respondents were selected, consisting of 40 customers or residents, 20 students, and 20 drivers. Data was gathered through standardized survey questionnaires administered by the researchers. To analyze the responses, a range of statistical tools were utilized, including frequency and percentage, weighted mean, ranking, and one-way Analysis of Variance (ANOVA). These tools were applied to examine the relationship between the respondents' demographic profiles and their perceptions of the 7Ps of marketing strategies: Product, Price, Place, Promotion, People, Process, and Physical Evidence. The findings reveal that the most influential factors contributing to customer satisfaction at Coal Ph are the professionalism and courtesy of the staff (weighted mean = 4.04), food consistency and quality (weighted mean = 3.83), and the cleanliness of dining areas and facilities (weighted mean = 4.01). Additional aspects such as accessibility and ease of parking (3.48), perceived value for money (3.15), and promotional strategies (3.13) also play a role in shaping customer experiences. Results from hypothesis testing indicate significant correlations between the 7Ps of marketing and customer demographic profiles, specifically age, gender, and purchase frequency, all with p-values of 0.00001. These insights suggest that Coal Ph's emphasis on food quality, professional service, cleanliness, and affordability contributes significantly to customer loyalty and competitive advantage. Moreover, a clear understanding of customer demographics is essential for refining marketing strategies and sustaining long-term business success. To strengthen its market position and customer satisfaction, Coal Ph is advised to prioritize targeted engagement with the 16–25 age group through dynamic digital platforms such as TikTok and Instagram. Leveraging these channels can significantly enhance brand visibility and connection with younger consumers. Furthermore, efforts should be made to ensure consistent product quality, diversify the menu to meet evolving customer preferences, and elevate the overall dining experience. Reinforcing the customer loyalty program and maintaining clean, comfortable, and well-managed facilities will also contribute to stronger brand recognition, improved customer retention, and long-term competitiveness.

Keywords: coal ph, customer engagement, digital marketing, tiktok, instagram, product consistency, menu expansion, dining experience, loyalty program, brand visibility, customer satisfaction, competitiveness

**EVALUATING THE CONTENT MARKETING OF SALON 7 BEAUTY LOUNGE:
IMPROVING THE ONLINE MARKETING PRESENCE IN SAMPAGUITA
STREET OVAL KANAN, CALOOCAN CITY**

Gina Galupe, Mary Jane Baring, Camfanila Mabong, Lerenz Klier Obligar,
Marife Valles, Vinalyn Sarzata

Abstract

This study examines the content marketing strategy of Salon 7 Beauty Lounge, with particular focus on its use of social media, video marketing, and digital advertisements. In order to remain competitive in the beauty and wellness industry, Salon 7 must adopt more innovative and consistent marketing practices. The salon currently struggles with challenges such as low-quality content, negative customer feedback, and irregular posting on its social media platforms. In response to these issues, the researchers developed a strategic marketing plan designed to increase awareness and understanding of the salon's services and innovations among both customers and staff. The primary objective of the study is to strengthen Salon 7's online presence by producing more compelling content, encouraging positive engagement, and fostering a stronger brand image across digital platforms. This study adopts a quantitative correlational research design to examine the relationship between customer perceptions and Salon 7 Beauty Lounge's content marketing strategies. A convenience sampling method was used to select 30 customer respondents. Data will be collected through standardized survey questionnaires aimed at evaluating customer experiences and engagement with the salon's social media content, video marketing, and advertisements. To ensure comprehensive analysis, both descriptive and inferential statistical techniques will be employed. Descriptive statistics, including frequency, percentage, weighted mean, and ranking, will be used to summarize the data. Meanwhile, the Mann-Whitney U-test and Kruskal-Wallis H-test will be utilized to identify significant differences and correlations among variables, providing deeper insights into the effectiveness of the salon's marketing efforts. The results of the study reveal that demographic variables, specifically age, gender, civil status, and employment status, significantly impact customer engagement with Salon 7 Beauty Lounge's social media, video marketing, and advertising strategies. The majority of active users were identified as females between the ages of 25 and 30, who consistently ranked highest in terms of interaction across all platforms. Overall, respondents rated the effectiveness of the salon's content strategies as follows: social media (weighted mean = 3.37), advertisements (3.31), and video marketing (3.28), indicating moderate satisfaction. As for the challenges encountered, the most prevalent issue was poor content quality, reported by 53.6% of respondents, followed by inconsistent posting (28.6%) and negative feedback (21.4%). Among these, content quality was identified as the most critical concern, negatively affecting the salon's digital marketing presence across all channels. To assess the influence of demographic factors on customer engagement with Salon 7 Beauty Lounge's marketing strategies, the researchers utilized the Mann-Whitney U-test and the Kruskal-Wallis H-test. Results from the Kruskal-Wallis H-test indicated a statistically significant difference across age groups, with an H-value of 22.5092 and a p-value of 0.00016, suggesting that age plays a critical role in shaping responses to the salon's social media, video marketing, and advertisements. In contrast, the analysis of gender differences yielded an H-value of 49 and a p-value of 0.1936, indicating no significant variation between male and female respondents across the evaluated variables. Meanwhile, both civil status and employment status demonstrated statistically significant differences in relation to all three marketing components, highlighting the importance of these demographic factors in understanding consumer behavior and tailoring content strategies accordingly.

Keywords: mann-whitney u-test, kruskal-wallis h-test, demographic profile, age, gender, civil status, employment status, statistical significance, consumer behavior, digital marketing engagement

**EVALUATING THE EFFECTIVENESS OF BUDGETING PRACTICES ON
COST CONTROL IN INNOGEN PHARMACEUTICAL INC.**

Christian Matalang, Danica Jane Moreno, Hazel Angela Demesa,
Chriztyne Lorriane Asugas, Jeremy Albaña, Eugene Bayani

Abstract

Although many companies are aware of the regulatory and compliance risks inherent in their operations, they often face challenges in effectively addressing and mitigating these risks. Strategic diversification serves as a proactive measure, not only to reduce exposure to regulatory uncertainties but also to strengthen long-term profitability and operational sustainability. By stabilizing revenue streams and spreading risk, diversification supports more effective financial forecasting and facilitates consistent, reliable budgeting over time. This quantitative study, guided by a descriptive research design, aims to assess the effectiveness of budgeting practices in enhancing the company's financial control mechanisms. To ensure fairness and reduce sampling bias, the researchers employed a random sampling technique, granting all individuals within the target population an equal chance of selection. This approach not only improved the representativeness of the data but also ensured logistical convenience by focusing on respondents accessible within the study area. The findings of this research are expected to provide valuable insights into how budgeting practices contribute to operational efficiency and informed financial decision-making. Data was collected through structured in-depth interviews and analyzed using the Likert scale and ranking methods. Findings indicate that Innogen employees perceive the company's budgeting practices as generally effective. Among the key areas assessed, managing the cost of production received the highest composite mean of 3.62, followed by resource allocation (3.47) and inventory management (3.39). Despite these strengths, employees reported several recurring challenges. These include difficulties in handling unforeseen expenses, preparing accurate budgets under time constraints, and ensuring clear communication and coordination among departments during the budgeting process. These insights highlight the need for continuous refinement of budgeting systems and improved internal collaboration to enhance overall financial efficiency. The study reveals that various departments within the company encounter unique challenges. A key finding is the organization's strong emphasis on financial performance and revenue growth, which tends to overshadow the need for greater operational flexibility. Interestingly, client satisfaction emerged as the least concerning issue, suggesting that customer-related needs are being effectively addressed.

Keywords: departmental challenges, revenue growth, operational flexibility, financial focus, client satisfaction, company priorities, budgeting effectiveness.

EVALUATING THE EFFECTIVENESS OF BUZZER PAGER SYSTEM ON CUSTOMER SATISFACTION AND OPERATIONAL EFFICIENCY IN FAST-FOOD RESTAURANT

Terence Joseph Buelbo, Jamica Argao, John Dominic Azuela, John Rick Catarin,
Mark Niño Dominguez, James Pascua, Randy Villaseñor

Abstract

This study examines the key variables influencing customer satisfaction and retention at the Jollibee branch in Novaliches, Quezon City. It specifically investigates how perceived waiting time, customer comfort, perceived value, ease of service use, and satisfaction with service speed impact the overall dining experience and loyalty of patrons. Anchored in the Customer Satisfaction Theory, which suggests that satisfaction results from the degree to which a product or service meets or exceeds customer expectations, the study aims to provide actionable insights into enhancing service quality and customer engagement within the fast-food industry. This study aims to analyze how specific factors influence customer satisfaction and how that satisfaction, in turn, affects customer retention. A qualitative research approach was adopted, with data collected from 100 respondents, equally divided between 50 male and 50 female customers of the fast-food restaurant. The research findings provide actionable insights that fast-food chains and similar businesses can use to optimize their customer service strategies, strengthen customer relationships, and build lasting brand loyalty. The age distribution of respondents shows that the majority 71% (71 individuals) are between 18 and 24 years old. A smaller segment, 8% (8 respondents), falls within the 25–30 age range, while 10% (10 respondents) are under 18 years old. The total sample comprises 100 participants, evenly divided between males (50) and females (50). This demographic profile indicates that the study primarily involves a younger population, with a strong representation of youth among the respondents. The implementation of buzzer pager devices significantly streamlines restaurant operations by reducing counter congestion and enhancing order flow. During peak hours such as lunch and dinner rushes, these systems allow customers to wait comfortably away from the ordering area, freeing up space for new patrons. This not only improves operational efficiency but also contributes to a more pleasant and organized dining environment. One of the most notable benefits of the buzzer pager system is its positive impact on the customer experience, as it minimizes perceived wait times and fosters a more orderly and responsive service process.

Keywords: buzzer pager system, restaurant operations, customer experience, order flow, peak hours, counter congestion, operational efficiency, wait time management, streamlined service, dining environment

**EVALUATING THE PERCEIVED USABILITY AND EFFECTIVENESS OF
PERFORMANCE MANAGEMENT SYSTEM: AN ASSESSMENT**

Reginald Casinginan, Giannie Bactol, Andrea Dela Cruz, Carl Justin Lorino,
Vanessa Punzalan, Kimberly Joyce Embile

Abstract

This study evaluates the perceived usability and effectiveness of the Performance Management System (PMS) at Company X, a Business Process Outsourcing (BPO) firm. It focuses on how employee performance is monitored using tools such as customer feedback surveys. The study also examines common challenges in implementing PMS, including insufficient monitoring, lack of training, and ineffective communication. Additionally, it explores the role of established frameworks such as 360-degree feedback, Management by Objectives (MBO), and Key Performance Indicators (KPIs) in enhancing organizational performance. A quantitative-descriptive research design was employed, using an online survey questionnaire as the primary data collection tool. A total of twenty (20) employees comprising ten (10) supervisors and ten (10) managers were selected through purposive sampling, ensuring relevant experience with PMS. The questionnaire was structured using a 4-point Likert Scale to measure responses regarding system usability and effectiveness. The collected data were subjected to statistical analysis to draw conclusions and address the research objectives. The results showed that most respondents were women aged 18 to 27 who had used the PMS for one to four years. While the system was generally perceived as user-friendly and effective, challenges such as poor communication, inadequate monitoring, and limited training were noted. These issues were identified as barriers to fully optimizing the system's functionality and impact. The findings highlight the need for continuous improvement in the implementation of PMS. Key recommendations include assigning additional operations managers to oversee PMS use, conducting regular monitoring, holding weekly team meetings, and providing structured training sessions. The integration of real-time feedback tools, usability testing, and adaptive learning content is also encouraged. To maintain an effective PMS, regular updates and responsiveness to user feedback are essential to align the system with organizational goals.

Keywords: performance management system, usability, organizational performance, employee monitoring, 360-degree feedback, management by objectives, key performance indicators, bpo industry, training, communication

**EVALUATION OF TELEMEDICINE SERVICE ON THE PATIENT SATISFACTION ON
THE SELECTED MEDICAL CENTER ALONG QUEZON**

Mejia Maria Celestina, Maria Angelica Acuña, Jocelyn Belangel, Maria Lolita Decena,
Florie Jane Gomez, Kimberly Joyce Embile

Abstract

This study evaluates the effect of telemedicine services on patient satisfaction in selected medical centers in Quezon City. It aims to determine the demographic factors influencing satisfaction and identify barriers to effective telemedicine use. The study emphasizes how mobile technology, particularly telemedicine, has transformed healthcare delivery by improving accessibility, efficiency, and cost-effectiveness. Despite these advantages, telemedicine implementation presents challenges that must be addressed, including infrastructural limitations, the need for provider training, and the assurance of patient data security. The study adopts a quantitative approach and utilizes a descriptive research design to gather data from thirty (30) purposively selected patients who have experienced telemedicine consultations. A survey questionnaire served as the primary data collection tool, focusing on factors influencing patient satisfaction and identifying recurring challenges in the use of telemedicine services. The findings revealed that most respondents were male and belonged to the lower-middle-income class. Overall, patient satisfaction levels were high, although differences were observed based on age, sex, location, and socio-economic status. Health status influenced only the perceived usefulness of the service. The most reported issue was poor internet connectivity, which negatively impacted the telemedicine experience. Despite these challenges, telemedicine was recognized as a viable solution to improve healthcare access and service satisfaction. The results underscore the potential of telemedicine to enhance healthcare delivery and patient satisfaction in the Philippines. However, recurring challenges such as connectivity problems, technical malfunctions, and concerns regarding privacy must be addressed for wider adoption. The study recommends customized training for healthcare providers and infrastructure development to support telemedicine services. Future longitudinal studies are suggested to assess the long-term impact of telemedicine on patient outcomes and satisfaction. These findings offer practical insights into optimizing telemedicine in local healthcare systems.

Keywords: telemedicine, patient satisfaction, healthcare access, mobile technology, internet connectivity, health service delivery, quezon city, healthcare innovation

**FACTOR SHAPING THE EMPLOYEE-EMPLOYER RELATIONSHIP: AN
EXPLANATORY STUDY AT CONSTRUCTION SERVICE COMPANY IN TAGUIG CITY**

Ye Zhajoy Briones, Jay Ann Escoltura, Neslyn Lisay, Joylyn Perez,
Cangen Sebastian, Kimberly Joyce Embile

Abstract

This study aims to provide insight into the factors that influence the employee-employer relationship in a construction service company in Taguig City. Effective communication and leadership styles are essential in creating a comfortable work environment that promotes job satisfaction. When employees and employers experience satisfaction in their roles, it enhances self-confidence and supports professional growth. The study underscores the importance of managing relationships within the workplace to improve collaboration, performance, and organizational success. This study uses a quantitative approach with a descriptive research design. A simple random sampling technique was employed to determine the target population. Data were collected from a total of forty (40) respondents, consisting of thirty (30) employees and ten (10) employers from the selected construction service company. An online survey questionnaire served as the primary instrument for data gathering. The data revealed that communication and leadership styles significantly impact the employee-employer relationship. Respondents emphasized the importance of honest feedback, task responsibility, and mutual respect. When both employees and employers are accountable and communicate effectively, it fosters trust and enhances job satisfaction. The findings also suggest that consistent management support and employee responsiveness contribute to a healthier working relationship. The results indicate that a positive working environment, characterized by open communication, strong leadership, and access to adequate resources, plays a crucial role in shaping the employee-employer relationship. These elements help reduce misunderstandings and promote better teamwork. Moreover, strong leadership practices lead to improved organizational outcomes and employee morale. The study recommends that companies invest in communication training, leadership development, and employee engagement programs to strengthen these workplace relationships.

Keywords: employee-employer relationship, job satisfaction, communication, leadership, workplace environment

**FACTORS AFFECTING EMPLOYEE RETENTION AT
FAST FOOD CHAIN IN QUEZON CITY**

Lani Amparado, Jeames Ancino, Daniela Bolante, Iñigo Bongabong,
Mharinel Palajoren, Riva Manalo

Abstract

Employee retention remains a pressing concern in the fast-food industry, where high turnover rates contribute to increased operational costs and compromised service quality. This study investigates the factors influencing employee retention at Mang Inasal Villongco in Quezon City, with a particular focus on the possibility for growth, the nature of work, sense of responsibility, and recognition. Guided by Herzberg's Two-Factor Theory, the research aims to understand how intrinsic motivators affect employees' decisions to remain in their positions. This study utilizes descriptive-quantitative research design. A total of 45 employees, including managers, team leaders, crew trainers, and service crew members, participated in the survey. Data were collected through a researcher-made questionnaire, validated by academic experts. Statistical tools such as frequency distribution, weighted mean, and the Mann-Whitney U-Test were applied to analyze responses and identify variations based on demographic factors. The results revealed that the possibility for growth and recognition significantly influenced employee retention, especially among respondents aged 18 to 22, who prioritized career advancement and acknowledgment. Across all age groups, employees agreed that recognition and responsibility positively affected motivation and job satisfaction. However, issues such as strict monitoring, biased recognition systems, and limited career progression were identified as key challenges. Statistical analysis further showed that job position had a significant effect on perceptions of growth opportunities, while marital status and length of service did not exhibit notable influence. This study emphasizes the importance of creating structured career development paths, fair recognition practices, and supportive workplace environments to enhance employee retention in the fast-food sector. Addressing these factors can foster employee engagement and reduce turnover. Future research is encouraged to explore additional variables such as compensation, work-life balance, and organizational culture to provide a more comprehensive view of retention strategies in similar settings.

Keywords: employee retention, possibility for growth, work itself, responsibility, recognition, fast-food chain, intrinsic motivators

**FACTORS AFFECTING EMPLOYEE RETENTION IN
BLUE AGE TRADING IN CALOOCAN CITY**

Melody Suhayon, Elmar Escabas, Maybelyn Honrado, Cedrix Ingeniero,
Khristine Inosante, Riva Manalo

Abstract

Employee retention presents a major challenge in the telecommunications industry, particularly in the Philippine context. Blue Age Trading, a postpaid field sales partner of Smart Communications Inc. and a home distributor for PLDT Inc. in Caloocan City, reports a turnover rate of 40% to 50%. This study aims to determine the key factors influencing employee retention in the company, utilizing Herzberg's Two-Factor Theory. The focus includes intrinsic motivators such as achievement, recognition, the nature of work, responsibility, advancement, and personal growth. This study adopts a descriptive research design and involves 155 employees selected through simple random sampling to ensure fair representation. A researcher-made survey questionnaire, validated and tested for reliability, served as the primary instrument. Data were analyzed using frequency and percentage, weighted mean, Kruskal-Wallis H-test, and ranking procedures to interpret respondent perceptions on various retention factors. The majority of respondents were young (42.58%), single (61.94%), and had less than three years of tenure (62.58%). Respondents indicated high levels of agreement regarding achievement ($M = 3.52$), recognition ($M = 3.48$), the nature of work ($M = 3.47$), responsibility ($M = 3.50$), advancement ($M = 3.47$), and personal growth ($M = 3.45$). Despite these favorable perceptions, significant challenges in retention were noted, such as difficulty in meeting sales targets, technical problems, insufficient benefits, and limited career growth opportunities. A statistically significant difference was found in the perception of "the work itself" among different age groups ($p = 0.0296$). The findings underscore the importance of intrinsic motivators in retaining employees, particularly through fostering achievement, meaningful work, and recognition. To address the identified challenges, it is recommended that the company implement structured retention initiatives, including competitive benefits, leadership development, and skill-building programs. These strategies can promote higher engagement, job satisfaction, and long-term retention. The results provide insights for human resource managers and business leaders in designing targeted employee retention programs within the telecommunications sector.

Keywords: employee retention, telecommunications industry, herzberg's two-factor theory, intrinsic motivation, workforce engagement, job satisfaction, employee turnover

**FACTORS AFFECTING EMPLOYEE RETENTION IN J&T EXPRESS
GENERAL LUIS ST. NOVALICHES QUEZON CITY**

Jhan-jhan Juanillas, Emerald Baduria, Mary Rose Bailon,
Jennifer Encinas, Christelle Ann Rival, Danilo Molera Jr.

Abstract

Employee retention plays a crucial role in the success of organizations, particularly in high-demand sectors such as logistics. This study examines the factors influencing employee retention at J&T Express General Luis Branch in Novaliches, Quezon City. Specifically, it investigates the relationship between employees' demographic profiles and various organizational factors that affect their decision to stay with the company. The study utilizes a descriptive-quantitative research method to quantify employee perceptions on retention-related factors. Data were collected through survey questionnaires distributed to purposively selected respondents who were deemed most likely to provide relevant insights. This approach allowed for structured analysis of how company policies, recognition programs, and compensation influence employee retention. Findings revealed that recognition and rewards play a significant role in employee retention. While employees acknowledged the presence of recognition efforts, they emphasized the need for more consistent and timely acknowledgment. Company policies were also identified as influential, with respondents expressing the importance of structured guidelines and fair governance. The study found no significant variation in retention perceptions across different age groups, indicating that retention strategies may be uniformly implemented. The most frequently reported challenges were delayed salary payments, lack of overtime compensation, toxic work environments, and inconsistent enforcement of workplace policies. These concerns highlight key areas for organizational improvement. This study provides actionable insights into employee retention within the logistics sector. Addressing critical issues such as timely salary disbursement, equitable compensation, and a supportive work environment is essential to improving employee satisfaction and retention. The findings support the development of targeted human resource strategies that enhance job stability and organizational commitment. By prioritizing fair and consistent workplace practices, J&T Express can foster a more engaged workforce and reduce employee turnover, strengthening its operational effectiveness in the logistics industry.

FACTORS AFFECTING EMPLOYEE RETENTION OF NCT TRANSNATIONAL CORPORATION: BASIS FOR RETENTION PROGRAM

Rey Mark Lito, Ivan Claude Alday, Baby Joy Lanuza, Alfonso John Maat,
Chelsea Irish Serot, Danilo Molera Jr.

Abstract

Employee retention remains a significant challenge in modern organizations, regardless of how ethically or competitively they operate. High turnover rates resulting from inadequate retention programs often lead to decreased employee satisfaction and organizational instability. This study aims to determine how compensation and benefits, training and development, employee well-being, and recognition influence employee retention at NCT Transnational Corporation. The goal is to assess employee perceptions of these factors and use the findings as a basis for developing a targeted retention program. This study employs a descriptive-quantitative research design and uses census sampling to include the entire population of interest. Data was collected through a researcher-made survey questionnaire administered to 93 employees of NCT Transnational Corporation. The responses were gathered, encoded, and analyzed using Microsoft Excel, focusing on the relationship between employee demographics and perceptions of retention-related factors. The findings revealed an even distribution of respondents across demographics, with most aged 31–40, holding rank-and-file positions, and having over 10 years of tenure. Respondents showed strong agreement on the positive influence of compensation and benefits, training and development, employee well-being, and recognition on retention. Significant variations were found in training perceptions based on age, and in compensation and recognition based on educational attainment. The most pressing challenges included high physical workload, limited career advancement opportunities, insufficient training, and an imbalanced work-life dynamic. Based on these findings, the study proposed an Employee Retention Enhancement Program focused on improving compensation structures, professional development, workplace well-being, and formal recognition. The study highlights the importance of key retention factors in building a stable and satisfied workforce. Differences in employee perceptions based on age and education suggest the need for customized retention strategies. To mitigate identified challenges, the proposed enhancement program offers targeted interventions to support long-term employee engagement and organizational growth. Prioritizing these areas may contribute to improved retention rates and overall job satisfaction within NCT Transnational Corporation.

**FACTORS AFFECTING JOB SATISFACTION OF THE REGULAR EMPLOYEES OF
LITE EXPRESS INTERNATIONAL INC. IN QUEZON CITY**

Francheska Calubag, Janella Jene Bantog, Ohlen Bo, Ralp Kevin Popelo,
John Mark Torres, Dr. Joy Evelyn Ignacio

Abstract

This study aims to assess the factors affecting job satisfaction among regular employees of Lite Express International Inc. in Quezon City. It explores various employee profiles, including age, gender, highest educational attainment, tenureship, salary range, and assigned business unit. The study focuses on three primary areas of job satisfaction: compensation and benefits, work environment, and leadership style. It is guided by the hypothesis that there is no significant difference in job satisfaction based on employee demographic profiles. The study employs descriptive-quantitative research design and was conducted over a seven-month period, from September 2024 to March 2025. A total of 83 regular employees participated in the survey. Prior approval was secured from Lite Express International Inc. before the distribution of the questionnaires in December 2024. Clarifications were provided during the administration of the surveys to ensure respondent understanding and accuracy of responses. The researcher ensured timely data collection and maintained consistent engagement with the participants throughout the process to enhance data reliability and credibility. The findings focused on how compensation and benefits, work environment, and leadership style influence job satisfaction. The study examined the relationship between employee demographic profiles and their perceptions of job satisfaction. Results provided insights into whether differences in satisfaction levels exist across variables such as age, gender, educational attainment, and length of service. The study contributed to a deeper understanding of how various organizational factors affect employee engagement, productivity, and performance. The findings aim to assist the management of Lite Express International Inc. in identifying areas for improvement to enhance employee satisfaction. Such improvements are expected to lead to increased performance, better engagement, and a more conducive work environment. Overall, the study offers practical recommendations to strengthen workplace culture and organizational effectiveness.

Keywords: compensation and benefits, job satisfaction, leadership style, logistics management, tenureship, work environment

**FACTORS AFFECTING THE CONSUMERS' ENGAGEMENT IN PROMOTIONAL
STRATEGY OF DANTE'S PETROLEUM GAS AND TRADING**

Marc Henry Magno, Princess May Tautjo, Desirie Lyn Grandia,
Jake Braza, Gerelyn Mangaba, Vinalyn Sarzata

Abstract

This study aims to determine how promotional strategies influence consumer engagement at Dante's Petroleum Gas and Trading. Specifically, it assesses the demographic profile of respondents based on age, sex, purchase frequency, and product size preference. It also examines factors affecting consumer attention in relation to the promotional strategy, using the AIDA model: Attention, Interest, Desire, and Action. The study further evaluates the promotional tools in terms of visibility, accuracy, and consistency and identifies common problems encountered by customers. The results serve as the basis for a proposed plan to enhance the business's promotional efforts. The study employs a quantitative-descriptive research design, involving 100 customers of Dante's Petroleum Gas and Trading who are knowledgeable about the business. Convenience sampling was used to gather data efficiently. Statistical tools such as frequency and percentage, ranking, and weighted mean were applied to analyze the responses. The demographic profile revealed a diverse age range, with the majority (25%) aged 20–25 years. More than half (54%) of the respondents were female. Most customers (50%) purchased products once a month, with the 11kg M-gas being the preferred size (42%) due to its affordability and longer usage. In terms of the promotional strategy, customers generally disagreed with its effectiveness in attracting attention (mean = 2.12), generating interest (2.31), creating desire (2.42), and prompting action (2.43). While the accuracy (2.66) and consistency (2.78) of promotional materials received moderate ratings, visibility remained a notable issue (2.2). Reported problems included unclear signage, delayed deliveries, stock shortages, and insufficient marketing of the business location. Based on the findings, the researchers proposed strategies to enhance the business's promotional efforts. These include improving signage for better visibility and accessibility, implementing an inventory management system to address stock shortages, and enhancing telemarketing approaches to strengthen customer relationships. Additional suggestions include the use of vehicle advertisements and active promotion through a dedicated Facebook page to improve overall marketing reach.

FACTORS INFLUENCING CUSTOMER LOYALTY OF LEIGH ARIANA STORE

Janrom Aruelo, Carl Michael Ansing, Dheniel Mira,
Roy Sabang, Dominic Serunda, Vinalyn Sarzata

Abstract

This study aims to identify the factors influencing customer loyalty at Leigh Ariana Store, a traditional retail outlet located in Maligaya Wet Market, Novaliches, Quezon City. The store operates in a competitive wet market setting and currently faces challenges such as limited sales promotions, difficulty adapting to market trends, and a shortage of personnel. To address these concerns, this study seeks to propose effective marketing strategies aimed at improving promotional efforts, enhancing customer communication, and ensuring consistent product quality to strengthen customer loyalty and foster long-term relationships. The study employs a quantitative descriptive research design to systematically gather and analyze numerical data. A purposive sampling technique was used to select respondents. Data were collected using a structured survey questionnaire to capture customer insights and preferences. Statistical tools such as frequency and percentage, weighted mean, and ranking were applied to analyze the data and fulfill the study's objectives. The findings revealed that the majority of Leigh Ariana Store's customers are aged 19 to 24 years old. Among the identified factors, product quality received the highest rating (Weighted Mean = 3.44), indicating a high level of customer satisfaction in terms of product variety and quality. In contrast, promotion received the lowest score (Weighted Mean = 2.06), suggesting dissatisfaction with the store's current marketing strategies. The overall average weighted mean of 2.93 (Agree) reflects a generally positive perception of the store but also highlights the need for improved promotional efforts and operational efficiency to further enhance customer loyalty. Based on the results, the researchers recommend that Leigh Ariana Store establish a Facebook page to provide regular product updates and promote new offerings. Implementing bundled deals and personalized promotions, such as discounts for frequent buyers, can also boost sales and strengthen customer relationships. These strategies are intended to help the business improve both its marketing effectiveness and long-term customer loyalty.

**FACTORS INFLUENCING EMPLOYEE TURNOVER IN THE BPO COMPANIES IN
QUEZON CITY: A PROPOSED POLICY DEVELOPMENT**

Gabriela Denise Bohol, Nickey Fernandez, Hazzel Joy Magarzo,
Regine Fe Sumugat, Jade Hazel Villanueva, Riva Manalo

Abstract

The Business Process Outsourcing (BPO) industry is a significant economic contributor in the Philippines, yet it continues to face challenges associated with high employee turnover rates. This study aims to identify the primary causes of employee turnover in BPO companies in Quezon City. It examines various influencing factors, including demographic characteristics (age, sex, years of experience), job satisfaction, working environment, career growth opportunities, compensation and benefits, and employee engagement. The objective is to provide data-driven recommendations that will inform policy development to reduce turnover and enhance workforce stability. This study utilizes a descriptive-correlational research design and includes 200 participants from various BPO companies in Quezon City. Convenience sampling was used to select respondents, and data were collected through a self-constructed survey questionnaire. Statistical tools such as weighted mean, Pearson r correlation, and ranking procedures were employed to analyze the gathered data. The findings revealed that job satisfaction (weighted mean = 4.12) and work environment (weighted mean = 4.08) were the most influential factors contributing to employee turnover. Career development opportunities (weighted mean = 3.95) and compensation and benefits (weighted mean = 3.89) were also identified as contributing factors to a moderate extent. A strong positive correlation ($r = 0.56$) was found between employee engagement and these variables. Budget limitations were reported as a major barrier to effectively addressing turnover-related issues. The study emphasizes the importance of improving job satisfaction, work environment, and opportunities for career development to reduce employee turnover in BPO companies. While demographic variables such as age and sex showed minimal impact, years of experience significantly influenced perceptions of job satisfaction and career advancement. To enhance employee retention, human resource policies should focus on competitive compensation packages, structured professional development programs, a supportive and healthy work environment, and initiatives promoting work-life balance. Furthermore, engagement strategies such as reward systems and clear career pathways should be incorporated. Implementing these recommendations can help BPO companies achieve greater workforce stability and improve overall service delivery.

Keywords: employee turnover, job satisfaction, work environment, bpo industry, career development, compensation and benefits, employee engagement, hr policy, workforce retention, quezon city

**FACTORS INFLUENCING EMPLOYEE ENGAGEMENT IN HUMAN RESOURCE
MANAGEMENT DEPARTMENT OF QUEZON CITY HALL**

Klarissa Jane Cortez, Abegail Valdoz, Christian John Bernesto,
Jason Anthony Entera, Carlos Fernandez, Danilo Molera Jr.

Abstract

Employee engagement is essential to organizational performance, contributing to increased productivity, loyalty, reduced turnover, and improved morale. However, various challenges such as lack of recognition, poor communication, and burnout can adversely affect engagement levels. To enhance employee engagement, organizations must foster open communication, acknowledge and reward employee contributions, invest in training and development, and establish a supportive work environment that encourages work-life balance through wellness programs and flexible arrangements. This study aims to assess the factors influencing employee engagement within the Human Resource Management Department of Quezon City Hall. The study utilized a descriptive quantitative research design to provide a systematic and accurate assessment of employee engagement. Data was gathered from HR Heads and HR Staff through a structured survey, focusing on key engagement factors such as working conditions, compensation and benefits, recognition and rewards, and opportunities for professional growth. The study also considered demographic variables, including age, length of service, and job position. The results showed that HR Heads and HR Staff held similar perceptions regarding working conditions, compensation, and growth opportunities. However, significant differences were found in their views on recognition and rewards, which emerged as a critical factor affecting overall engagement. Most respondents were aged 31–40 and had between 4–7 years of service. Statistical analysis indicated that job position and length of service significantly influenced perceptions of recognition and rewards, while age did not have a significant impact. These findings suggest that engagement strategies must be tailored to the specific needs of employee groups based on their role and tenure. The study highlights the importance of addressing distinct engagement drivers within the HRM Department of Quezon City Hall. While communication and flexibility were generally viewed positively, concerns were raised regarding salary dissatisfaction, inconsistent recognition practices, and the underutilization of newly acquired skills. Engagement did not significantly differ by age but varied across job positions and years of service. To strengthen engagement, the study recommends refining recognition programs, enhancing career development and training opportunities, and implementing policies that support work-life balance. These strategic improvements are vital for improving employee motivation, job satisfaction, retention, and overall organizational effectiveness.

**FACTORS INFLUENCING EMPLOYEE MOTIVATION AND RETENTION AT KAIZEN.
PH HEALTHCARE APPAREL IN NOVALICHES QUEZON CITY**

Dhane Vic Devebar, Krys Keithly Jiz, Jazmer Mae Cruz, Angelica De Los Santos,
Edina Suello, Dr. Joy Evelyn Ignacio

Abstract

This study investigates the factors influencing employee motivation and retention at Kaizen PH Healthcare Apparel, located in Novaliches, Quezon City. Its primary objective is to identify the key drivers of motivation and evaluate their impact on employee job performance. Employee motivation plays a crucial role in enhancing productivity and organizational efficiency, and understanding the specific elements that encourage motivation is essential to retaining valuable talent. This research aims to explore the factors that keep employees engaged, which in turn affects their satisfaction, loyalty, and overall performance within the company. The study employs a descriptive research design using purposive sampling to collect data through employee surveys. This method ensures that respondents with relevant experiences and insights contribute to the findings. The survey instrument was designed to gather data on various dimensions, including work conditions, management practices, organizational culture, compensation, and opportunities for professional growth, offering a comprehensive understanding of the employees' perceptions and motivations. The results revealed that employees at Kaizen PH Healthcare Apparel are generally satisfied with salary, benefits, the work environment, career advancement, and leadership practices. However, certain challenges were identified, such as unmet salary expectations, limited career growth, high workload, lack of recognition, and the need for better work-life balance. These issues were found to influence overall motivation and the likelihood of long-term retention. Enhancing pay structures, recognition programs, career development pathways, and wellness initiatives were noted as areas for improvement. The study recommends that management develop strategies to boost motivation and retention by refining recognition systems, offering robust employee development programs, and cultivating a more inclusive and supportive workplace culture. Revisiting compensation structures and promoting clear opportunities for career progression are also essential. Addressing these factors can significantly improve employee morale, reduce turnover, and contribute to greater organizational success. By implementing these strategies, Kaizen PH Healthcare Apparel can create a sustainable and high-performing workforce.

**FACTORS INFLUENCING EMPLOYEE RETENTION AMONG BUSINESS PROCESS
OUTSOURCING EMPLOYEES IN FAIRVIEW, QUEZON CITY**

Mary Jewel Calindas, Nicole Brillantes, Jrc Nicole Cando, Iana Jasshey Laurente,
Joey Panis, Dr. Joy Evelyn Ignacio

Abstract

This study aims to assess the factors influencing employee retention among Business Process Outsourcing (BPO) employees in Fairview, Quezon City. Specifically, it evaluates the demographic profiles of respondents, including age, gender, length of service, shift, and company, and examines key retention factors such as fringe benefits, workplace flexibility, and training and development. Employee retention is a critical issue in the BPO industry and understanding the factors that influence it is essential for improving workforce stability and organizational performance. The study employs a descriptive-quantitative research design using survey questionnaires to collect data from full-time regular BPO employees. Data collection was conducted in November 2024, and the entire research process, including analysis, spanned from September 2024 to March 2025. Respondents were selected from five BPO companies operating in Fairview, Quezon City. The findings showed that the majority of respondents were aged 23–27 (35%), with a near-equal gender distribution (53% female, 47% male). Most employees (60%) had a tenure of 6 months to 2 years, indicating a relatively high turnover rate. Additionally, 56% of respondents worked the graveyard shift. Across the five BPO companies, respondents reported moderate to high satisfaction with fringe benefits (Weighted Mean = 3.24), training and development (Weighted Mean = 3.17), and workplace flexibility (Weighted Mean = 2.99). Statistical analysis revealed no significant relationship between employee retention factors and demographics such as age, gender, or length of service. However, workplace flexibility and overall retention factors varied significantly depending on the employee's shift, while workplace flexibility and training opportunities also differed across companies. The most frequently reported challenges were emotional exhaustion, inadequate compensation, and work-life balance concerns. Based on these findings, the study proposed a set of Employee Well-Being and Retention Guidelines for BPO companies in Fairview. The guidelines emphasized flexible work arrangements, mental health support, career development programs, and competitive compensation. By implementing these recommendations, BPO companies could create a supportive environment that fostered employee engagement, reduced turnover, and enhanced organizational performance. The study contributed to understanding employee retention in the BPO industry and provided practical solutions for improving workforce stability.

**FACTORS INFLUENCING SOCIAL MEDIA-DRIVEN MOBILE PHONE PURCHASE: A
BASIS FOR A PROPOSED MARKETING PLAN OF MARIJUN CELLPHONE
ACCESSORIES IN VALENZUELA TOWN CENTER**

Jezter Favor, Maria Jesusa Balauro, Kristalyn Jane Higayon, Cake Beverly Montes,
Krhyyza Mae Sentilleses, Vinalyn Sarzata

Abstract

This study investigates the factors that influence mobile phone purchases driven by social media and serves as the foundation for a proposed marketing plan for Marijun Cellphone Accessories located in Valenzuela Town Center. Anchored on the Consumer Purchasing Behavior theory, the study focuses on five primary factors that impact online buying decisions: product selection, pricing, user reviews, shipping options, and return policies. This study employs quantitative descriptive research design. Through purposive sampling, 50 respondents who recently purchased mobile phones via social media platforms were selected. Data were gathered using Google Forms and analyzed using statistical tools, including frequency, percentage, weighted mean, Kruskal-Wallis H test, and Mann-Whitney U test, to examine the relationship between consumer demographics and purchasing behavior. The findings revealed that the majority of online mobile phone buyers were young millennials aged 23 to 28 (58%), predominantly female (54%), and had an average monthly income between ₱10,000 and ₱19,999 (38%). Among the five factors, user reviews emerged as the most influential (weighted mean = 3.64), whereas product selection was the least influential (weighted mean = 3.38). However, statistical analysis showed no significant difference in purchasing behavior when grouped according to age, gender, or income, indicating generally uniform preferences across demographics. Respondents also encountered several issues when buying through social media, including delayed delivery (64%), damaged products (40%), stock shortages (34%), incorrect items received (32%), and lack of adequate product reviews (26%). To respond to the identified issues, a comprehensive social media marketing plan was developed. This plan highlights the importance of providing accurate product descriptions, offering competitive pricing, utilizing user-generated content, enhancing shipping logistics, and establishing transparent return policies. It also outlines digital marketing tactics such as influencer partnerships and promotional campaigns to boost brand visibility and consumer engagement. Through the implementation of these strategies, Marijun Cellphone Accessories is expected to strengthen its online presence, build customer trust, and increase sales. This study contributes essential insights for businesses seeking to refine their social media marketing efforts in response to evolving consumer behaviors.

FINANCIAL MANAGEMENT PRACTICES OF SELECTED MICRO ENTERPRISES IN NOVALICHES, QUEZON CITY: BASIS FOR DEVELOPING SUPPORT PROGRAMS

Jgea Alava, Britney Dominguez, Christian Love Francisco,
Angela Montibon, Jonel Rosell, Reynold Bangalisan

Abstract

This study explores the financial management practices of selected micro enterprises in Novaliches, Quezon City, with the goal of assessing their effectiveness and proposing targeted support programs for sustainable business growth. Micro enterprises serve as vital drivers of local economic development, yet they frequently encounter persistent challenges in areas such as financial planning, budget control, and cash flow management. These issues are often intensified by limited access to formal training, financial literacy programs, and advisory services, highlighting the need for comprehensive support mechanisms. The COVID-19 pandemic underscored the financial fragility of many micro enterprises, particularly in managing liquidity and maintaining operational stability. Guided by Lasher's (2010) financial management principles, this study utilized a descriptive quantitative approach. A structured questionnaire was distributed to selected micro business owners to assess the effectiveness of their financial practices. Data were analyzed through frequency, percentage, and weighted mean, focusing on business characteristics such as years of operation, capitalization, and workforce size. Results showed that most micro enterprises have been operating for 3–5 years, with capitalization between ₱15,001 and ₱20,000, and 1–10 employees. Financial planning, control, and cash management were generally deemed “Effective,” although challenges such as unforeseen expenses and budget deviations were frequently cited. A significant variation in financial control was found based on capitalization levels, emphasizing the need for improved resource allocation and financial strategy development. The study highlighted recurring financial stress among micro enterprise owners, primarily due to inadequate oversight and limited financial management resources. These findings emphasize the urgent need for practical and accessible support systems. As a response, the study recommends the development of targeted programs focused on SMART goal setting, strategic budgeting, consistent financial tracking, and the establishment of emergency funds. Customized financial literacy training, one-on-one mentorship, and affordable digital tools are also suggested to strengthen owners' abilities in contingency planning, fraud detection, and risk mitigation. To ensure long-term impact and scalability, the research calls for sustained collaboration among local government units, non-governmental organizations, and financial institutions in delivering ongoing education, support, and capacity-building initiatives. Sound financial management is fundamental to the long-term resilience and success of micro enterprises. The findings emphasize that while many micro business owners demonstrate effectiveness in planning, control, and cash handling, gaps remain, particularly in areas such as risk preparedness and financial oversight. Addressing these challenges through well-designed support programs, including targeted financial literacy training, strategic planning workshops, and digital financial tools, can significantly strengthen their capacity to withstand economic disruptions. Empowering micro entrepreneurs with these resources, through collaboration among government, private institutions, and NGOs, will not only enhance individual business sustainability but also contribute to inclusive local economic development.

Keywords: micro enterprises, financial management, budgeting, cash flow, financial planning, financial control, novaliches quezon city, support programs, financial literacy, economic resilience, resource allocation, risk management

**FOOD DELIVERY PLATFORM THAT AFFECTS CUSTOMER SATISFACTION:
BASIS FOR PROPOSED IMPROVEMENT PLAN**

Jasfer Dulva, Maribeth Allam, Justine Mae Baltar, Dave Jastin Cantila,
Janniele Dela Peña, Reynold Bangalisan

Abstract

This study explores the impact of the rapid growth of food delivery platforms, focusing on Foodpanda, on customer convenience in Novaliches, Quezon City. Using the IMRD (Introduction, Method, Results, and Discussion) framework, the research addresses how the surge in demand for online food delivery especially during the COVID-19 pandemic has influenced consumer reliance on Foodpanda for easy and contactless meal access. Despite its convenience, Foodpanda users frequently encounter issues such as delayed deliveries, missing items, app malfunctions, and inadequate customer service, which negatively impact overall satisfaction. Anchored in the Order-to-Delivery (OTD) theoretical framework, this study employed a descriptive quantitative design, utilizing a structured survey administered to 50 active users selected via quota sampling from three barangays: Sauyo, San Bartolome, and Sta. Monica. Data analysis involved the use of weighted mean, Kruskal-Wallis H-test, and Mann-Whitney U-test to assess customer satisfaction across the three critical delivery stages: pre-delivery, during delivery, and post-delivery. The findings indicate that most users were young adults between 18 and 29 years old, predominantly female, and belonged to low-income households, with cash as the preferred payment option. Respondents expressed high levels of satisfaction across all delivery stages, particularly highlighting the ease of registration, order placement, GPS tracking, and customer support services. Nonetheless, recurring issues such as delayed deliveries, ineffective problem resolution, and frequent system glitches were reported as significant concerns. The study revealed no significant differences in customer satisfaction across the various delivery stages, highlighting the necessity for consistent service quality throughout the entire delivery process. In response, an improvement plan was developed, recommending real-time estimated time of arrival (ETA) updates, comprehensive app debugging, enhanced training focused on empathetic customer service, expansion of delivery coverage areas, and the implementation of an “Order Photo Proof” feature to minimize order inaccuracies. The findings indicate that while Foodpanda generally fulfills customer expectations, addressing logistical challenges and strengthening communication and system reliability are vital for sustainable growth. The study further recommends implementing targeted promotions, upgrading technical infrastructure, and maintaining a balanced emphasis on all delivery stages to foster high customer satisfaction and loyalty in an increasingly competitive online food delivery market.

Keywords: foodpanda, food delivery, customer satisfaction, order-to-delivery (otd) framework, novaliches, quezon city, online food delivery, delivery stages, service quality, customer convenience, app performance, logistical efficiency, customer service traini

**FRINGE BENEFITS OF THE ADMINISTRATIVE STAFF IN
FOODTRADE CORPORATION IN QUEZON CITY**

Abijah Faith Dizon, Abegail Gelua, Rosewynne Guevarra, Rose Mher Pepito, Riva Manalo

Abstract

Fringe benefits play a crucial role in boosting employee morale and fostering organizational stability. This study explores the nature and effectiveness of fringe benefits focusing on leave entitlements, communication allowances, and Health Maintenance Organization (HMO) coverage provided to administrative personnel at Foodtrade Corporation in Quezon City. The objective is to assess how these benefits contribute to employee well-being, retention, and productivity, ensuring that company policies align with the needs and expectations of the workforce. A descriptive research design was adopted to assess the satisfaction levels of administrative staff regarding fringe benefits. A purposive sample of 50 participants, consisting of both regular and probationary employees, was selected. Data collection was conducted through a structured survey questionnaire, which was validated by subject matter experts and pilot-tested for reliability. Statistical tools such as the weighted mean, Kruskal-Wallis H-Test, and Mann-Whitney U-Test were employed to analyze satisfaction levels and examine significant differences based on demographic factors, particularly age and gender. The study revealed that administrative staff demonstrated a high level of satisfaction with leave benefits, reflected by a composite weighted mean of 3.32, corresponding to a “Strongly Agree” interpretation. Communication allowances and HMO provisions received weighted means of 3.16 and 3.09, respectively, indicating moderate satisfaction. Statistical tests, including the Kruskal-Wallis H-Test and Mann-Whitney U-Test, revealed no significant differences in satisfaction levels based on age or gender ($p > 0.05$). Despite overall positive responses, several issues were identified. The most commonly cited challenge was that the existing leave benefits did not adequately meet employees’ personal and professional needs. Other concerns included the complexity of benefit application procedures and the inconsistent distribution of communication allowances. The results indicate that while employees value the current fringe benefits, there are noticeable shortcomings in their implementation, particularly in ensuring fairness, consistency, and inclusiveness. The absence of significant differences in satisfaction across age and gender suggests a shared experience among staff; however, this also points to the need for more personalized or role-specific benefits. Improving the design and delivery of these programs could significantly enhance employee retention, satisfaction, and overall organizational effectiveness.

Keywords: fringe benefits, employee satisfaction, administrative staff, leave benefits, communication allowance, hmo, policy implementation, employee retention, organizational performance, demographic analysis.

**HIGH-TECH UNIVERSAL HOLDING CABINETS (UHC'S): IT'S EFFICIENCY
AND IMPACT TO THE BUSINESS PERFORMANCE OF MCDONALD'S
VICAS CAMARIN, CALOOCAN CITY**

Lawrence Tumbaga, Sarah Mae Broñosa, Troy Miguel Pegarido, Shantal Mae Perez,
Gian Franchesca Valenzuela, Reynold Bangalisan

Abstract

This study investigates the efficiency and business impact of High-Tech Universal Holding Cabinets (UHCs) at McDonald's Vicas, Camarin, Caloocan City, using a descriptive correlational research design to assess their role in enhancing food service operations. UHCs are advanced short-term food storage units engineered to maintain product quality, optimize service speed, minimize waste, and improve energy efficiency. The study aims to identify standard operating procedures for UHC use, evaluate their performance in terms of efficiency, effectiveness, and durability, and examine their influence on key business indicators including product quality, customer satisfaction, employee productivity, profitability, and environmental sustainability. Grounded in the Sustainable Entrepreneurship in SMEs framework which emphasizes the interconnected goals of people, profit, and planet this study employed purposive sampling to select 40 employees from McDonald's Vicas, Camarin, Caloocan City. Data was collected through structured survey questionnaires designed to assess perceptions and outcomes related to the use of Universal Holding Cabinets (UHCs). For data analysis, statistical tools such as weighted mean, Pearson correlation, and ranking were utilized to identify trends, measure relationships, and determine the relative significance of various factors. The results indicated strong agreement among respondents regarding the efficiency ($M = 3.24$), effectiveness ($M = 3.23$), and durability ($M = 3.23$) of Universal Holding Cabinets (UHCs). UHCs were found to positively influence business performance across all measured domains, with composite mean scores ranging from 3.16 to 3.23. Notably, their impact was most evident in maintaining food quality and enhancing workflow efficiency. A very strong positive correlation was observed between UHC efficiency and overall business performance ($r = 0.8571$, $p = .00001$), highlighting the critical role of UHCs in operational success. Despite these benefits, several challenges were identified, including frequent maintenance issues, improper food holding times, complex user interfaces, and insufficient employee training. These areas point to the need for targeted improvements to maximize the potential of UHCs in supporting sustainable and effective food service operations. The study proposes a comprehensive improvement plan for the Universal Holding Cabinets (UHCs) to enhance operational efficiency, food quality, customer satisfaction, and overall profitability. Key recommendations include implementing scheduled maintenance routines, integrating real-time IoT monitoring systems, upgrading to more intuitive user interfaces, providing continuous staff training, and enforcing stricter food safety protocols. Additionally, the adoption of AI-driven predictive maintenance, structured feedback mechanisms, and energy-efficient components is encouraged to further support sustainable and efficient operations. The findings underscore the importance of continuous innovation and workforce development as critical factors in maintaining McDonald's competitive edge in the fast-food industry. Strategic implementation of these improvements has the potential to streamline workflows and contribute to long-term operational success.

Keywords: universal holding cabinets (uhcs), sustainable entrepreneurship, perational efficiency, food quality, customer satisfaction, profitability

**HYBRID WORK MODEL IN BPO: EXPLORING THE LINK BETWEEN
SATISFACTION AND PERFORMANCE ORIENTATION**

Ian Clemente, Jeralyn Alutaya, Rizza Jane Corella, Samantha Donesa,
Justin Allyson Oliva, Bryan Tubao

Abstract

The hybrid work model marks a significant shift in workforce structure, particularly in the Business Process Outsourcing (BPO) industry, such as at Alorica. This study aims to examine the relationship between employee satisfaction and performance orientation within the context of hybrid work. Triggered by the COVID-19 pandemic, the company transitioned from a traditional office-based setup to a more flexible work arrangement. The research focuses on how this model impacts employee motivation, productivity, and satisfaction, especially in terms of engagement, collaboration, and performance outcomes. The hybrid model is seen as a means to promote greater flexibility and a healthier work-life balance, potentially enhancing both individual and organizational performance. This study adopted a quantitative-descriptive research design to explore the relationship between employee satisfaction and performance orientation within a hybrid work environment. Data were gathered using a validated survey questionnaire composed of structured, relevant questions aimed at assessing employee perceptions and experiences. The study involved 155 respondents from Alorica, selected from key departments such as Human Resources, Marketing, and Finance. A non-probability convenience sampling technique was employed, targeting employees who were readily accessible and willing to participate. To analyze the collected data, the study utilized statistical tools including percentages, weighted means, Likert scale interpretation, and t-tests, allowing for a comprehensive evaluation of trends and relationships within the dataset. The findings reveal that hybrid work arrangements offer significant benefits, including increased autonomy, enhanced work-life balance, and reduced stress. However, challenges such as reduced social interaction, communication difficulties, and dependence on technology were also identified. Statistical analysis indicates that flexibility and autonomy are key motivators for employees in hybrid settings. Despite these advantages, the study found no significant correlation between employee satisfaction and performance orientation. Nevertheless, employees with greater control over their work schedules reported higher levels of engagement, productivity, and overall job satisfaction. To enhance the effectiveness of the hybrid work model, it is recommended that Alorica invest in advanced digital infrastructure, establish well-defined communication protocols, and provide targeted training programs to support both remote and on-site work setups. Moreover, the reduction in face-to-face interaction can be addressed by cultivating a strong organizational culture through regular virtual engagement activities and collaborative initiatives. These efforts will help maximize the advantages of hybrid work while minimizing its limitations.

Keywords: hybrid work model, employee satisfaction, performance orientation, work-life balance, remote work, digital infrastructure, communication policies, employee engagement, organizational culture, virtual collaboration

**IMPACT OF DIGITAL PAYMENTS ON SHOPPING EXPERIENCE IN SHOPEE:
BASIS FOR ENHANCING PAYMENT INTEGRATION STRATEGIES**

Judylyn Rueda, Joven De Leon, Angel Lie Bermundo, Erika Catipol,
Daniela Fuentes, Reynold Bangalisan

Abstract

This study investigated the influence of digital payment systems on the shopping experiences of Shopee users in North Caloocan, utilizing a descriptive quantitative research design based on the Technology Acceptance Model (TAM). The study utilized quota sampling with 100 Shopee users and employed survey questionnaires as the main data collection tool. It explored key aspects of digital payment systems, including available payment modes, perceived usefulness, perceived ease of use, overall user experience, security concerns, and commonly encountered issues. The study revealed that e-wallets and payment centers were the most frequently used digital payment methods among Shopee users, followed by credit/debit cards and online banking. In contrast, international platforms like Google Pay and Apple Pay remained less popular. Respondents strongly agreed that digital payments were useful, particularly for their efficiency and time-saving features, and generally found them easy to use. However, concerns were raised about areas needing improvement, such as refund processing and customer support. A significant positive correlation ($r = 0.7434$, $p = .00001$) was found between digital payments and the overall shopping experience on Shopee. Users appreciated the speed of transactions, diverse payment options, and secure features, although issues such as transaction errors, technical glitches, and payment delays were reported to undermine trust. Drawing from the results, the study recommends key strategies to optimize Shopee's digital payment system. These include establishing a loyalty rewards program, integrating QR code-based transactions, enhancing refund process transparency, upgrading customer support through video-based assistance, broadening access for unbanked consumers, and reinforcing fraud protection using biometric security. While the current system significantly enhances the shopping experience, the study concludes that addressing issues related to usability, support, and inclusivity is crucial for maximizing user satisfaction and promoting long-term adoption.

Keywords: shopee, digital payments, e-wallets, technology acceptance model (tam), user experience, customer support, qr code payments, biometric security, online shopping, north caloocan

**IMPACT OF ORACLE SMART TECHNOLOGY TOOLS ON THE OPERATIONAL
EFFICIENCY OF REPUBLIC BISCUIT CORPORATION IN QUEZON CITY:
BASIS FOR OPERATIONAL PLAN**

Jerick Macahibag, Jenno Religio, Lhyca Faith Millamina,
Daisyrey Losantas, Romela Gilbero, Reynold Bangalisan

Abstract

This study investigates the impact of Oracle Smart Technology tools on the operational efficiency of Republic Biscuit Corporation (Rebisco) in Quezon City amid increasing digital transformation demands. Employing a mixed-methods approach, data were collected from 20 employees representing HR, Sales, Finance, and Marketing through purposive quota sampling. While initial perceptions of Oracle's effectiveness were varied, post-implementation feedback demonstrated notable improvements in inventory accuracy, procurement transparency, maintenance response times, and sales efficiency. Oracle's cloud-based intelligent solutions optimized asset lifecycle management by facilitating real-time data analysis, automating procurement processes, enabling preventive maintenance, and strengthening customer relationship management. Nevertheless, challenges such as network instability, rapid technological advancements, and employee skill gaps were identified, underscoring the need for infrastructure enhancements and continuous training programs. The findings confirmed that Oracle Smart Technology markedly improves operational efficiency. To tackle existing inefficiencies, an operational plan was developed incorporating predictive analytics, automated supplier management, preventive maintenance, and AI-powered sales insights. These recommendations seek to enhance resource allocation, streamline manual processes, and strengthen decision-making throughout all departments. The study concludes that utilizing Oracle's Smart Technology tools equips Rebisco with a strategic advantage in operational performance, aligning the company with global digital transformation and intelligent enterprise trends.

Keywords: oracle smart technology, operational efficiency, digital transformation, republic biscuit corporation, cloud-based solutions, predictive analytics, automated procurement, preventive maintenance, ai-driven sales, resource optimization, intelligent ent

**IMPACT OF PERSONALIZED MARKETING ON CUSTOMER PERCEPTION AND
ENGAGEMENT IN DIGITAL ECONOMY IN NOVALICHES, QUEZON CITY**

Kristine Yurag, Shiello Acuzar, Kenneth Enconado, Glyn Maestre,
Mc Kevin Quintans, Randy Villaseñor

Abstract

Digital technologies and the internet have revolutionized business operations and consumer interactions with brands. Personalized marketing, driven by data collection, analysis, and targeted strategies, tailors content and recommendations to individual consumers based on their unique characteristics, interests, and behaviors. This study explores the impact of personalized marketing on customer perceptions and engagement in the digital economy, with emphasis on building trust, enhancing credibility, strengthening brand image, and improving customer retention. Utilizing a quantitative-correlational research design, the researchers gathered data from 50 customers through convenience sampling. The respondents were evaluated based on their demographic profiles, including age, gender, civil status, and employment status. The results showed that the majority of respondents were aged 21–30 years (40%), with females comprising a higher percentage (56%). Most respondents were single (76%) and identified as students (48%). In terms of personalized marketing's influence on customer perception and engagement, respondents agreed on its effectiveness in building trust (mean = 3.56), establishing credibility (mean = 3.42), enhancing brand image (mean = 3.15), and improving customer retention (mean = 3.44). Hypothesis testing revealed a statistically significant relationship between respondents' demographic profiles and their perception and engagement with brands. The study recommends that businesses build customer satisfaction and long-term loyalty by consistently delivering on their promises and offering genuine value. In personalized marketing, the focus should be on empowering customers to make informed decisions rather than pressuring them into unwanted purchases. Furthermore, companies must present the terms and conditions of personalized promotions in a clear, transparent, and easily understandable manner.

Keywords: personalized marketing, customer perception, brand engagement, customer loyalty, transparency, informed decision-making, digital economy, customer satisfaction, trust, credibility

IMPACT OF SHOPEE ON CUSTOMER ENGAGEMENT AMONG MICROBUSINESSES IN NOVALICHES BAYAN, QUEZON CITY: BASIS FOR PROPOSED STRATEGIC PLAN

John Mark Del Barrio, Irish Joy Caballero, Lalaine Herras, Mhar Jhun Jagape,
Martin Jr Tampil, Reynold Bangalisan

Abstract

This study investigates the impact of Shopee on customer engagement within micro-businesses located in Novaliches Bayan, Quezon City. Grounded in Youcheng Wang's (2024) theory of customer engagement in e-commerce live streaming, the research focuses on three core engagement dimensions: observation-based, interaction-based, and action-based engagement. This study utilized a descriptive-quantitative design, surveying 15 micro-business owners or employees and 30 customers through purposive-quota sampling. Data were collected using a validated questionnaire to evaluate Shopee's impact on customer engagement metrics. Findings showed that observation-based engagement (such as passive browsing) was the most influential, with mean scores between 3.26 and 4.00. Interaction-based engagement (including live chats and feedback responsiveness) and action-based engagement (such as purchases and reviews) were rated moderately, with means ranging from 2.51 to 3.25. Statistical tests, Z-tests, Kruskal-Wallis, and Mann-Whitney U, revealed no significant differences ($p > 0.05$) between the evaluations of micro-business owners/employees and customers, supporting the null hypotheses (H01, H02) that Shopee's effect on engagement is consistent across respondent groups and business types. Among the challenges faced, 83% of businesses reported intense competition, 67% of customers expressed security concerns, and other issues included high shipping fees and cart abandonment due to complicated checkout procedures. Despite these obstacles, Shopee was recognized for its contribution to broadening market access and lowering operational expenses for micro-businesses. This study recommends a strategic approach to boost customer engagement by enhancing SEO and product visibility through focused keyword research and Shopee Ads; utilizing live streaming and chatbots to enable real-time interactions; introducing loyalty programs and automated follow-ups to minimize cart abandonment; and encouraging platform improvements such as lower commission fees and enhanced seller training. It highlights the need for micro-businesses to balance Shopee's expansive reach with personalized retention strategies and greater transparency to build security and trust. Grounded in Wang's framework, the findings emphasize the synergy of observational, interactive, and action-based engagement in creating customer value, offering actionable insights for micro-businesses aiming to optimize their e-commerce presence in a competitive digital landscape.

Keywords: shopee, customer engagement, micro-businesses, e-commerce, novaliches bayan, quezon city, observation-based engagement, interaction-based engagement, action-based engagement, live streaming, seo, loyalty programs, cart abandonment, digital marketing

IMPLICATION OF CRISES ON START-UP BUSINESSES IN NOVALICHES, QUEZON CITY: BASIS FOR DEVELOPING SUSTAINABLE BUSINESS PRACTICES

Jhon Elester Bermal, George III Abrazaldo, Jomarie Argarin,
Kurt Angelo Domino, Ivan Jericho Doon, Reynold Bangalisan

Abstract

This study explores how crises affect start-up businesses along Susano Road, Novaliches, Quezon City, emphasizing their resilience strategies and commitment to sustainable practices in response to volatile market and environmental challenges. Guided by the business resilience and post-crisis transformation theory proposed by Bachtiar et al. (2023), this study utilized a descriptive-quantitative research design and gathered data from 21 purposively selected start-up business owners. The study analyzed the profiles of start-up businesses, including years of operation, initial capital, operating hours, and industry type, and evaluated their awareness, adaptation, and response to crises such as natural disasters. Results show that most have been operating for 2–3 years, started with a capital of ₱200,000 or more, and are primarily involved in the food and beverage sector. Findings indicate high levels of resilience awareness (WM = 3.67), adaptation (WM = 3.62), and action (WM = 3.71), reflecting strong preparedness and proactive crisis management among start-ups. However, Kruskal-Wallis H-test results show that while years of operation and capitalization have no significant impact on resilience, operating hours and industry type do ($p < 0.05$), underscoring the influence of contextual factors. In response, the study proposes a development plan featuring quarterly training, digital tool integration, business continuity planning, flexible business models, emergency funds, and peer support. These insights highlight the need for tailored resilience strategies and sustainable practices to ensure the long-term stability and competitiveness of start-ups in uncertain environments.

Keywords: start-up resilience, crisis management, business adaptation, kruskal-wallis h-test, contextual factors, sustainable practices, emergency preparedness, business continuity, digital tools, novaliches

**IMPLICATION OF ORGANIZATIONAL CULTURE IN TELETECH
BPO COMPANY TOWARDS EMPLOYEE RETENTION**

Kate Khaely Socobos, Ella Alapad, Francis Jameel Salvosa,
Jeffrey Rosales, Ma Joy Claire Manayon, Randy Villaseñor

Abstract

High employee turnover continues to pose a major challenge in the Philippine Business Process Outsourcing (BPO) industry. This study investigates the role of organizational culture in influencing employee retention at Teletech, a prominent BPO company. It focuses on five key cultural dimensions, leadership style, rewards and recognition, work-life balance, career advancement, and work environment, to determine how each factor affects employees' decisions to remain with the organization. This study adopted a quantitative research design, with survey questionnaires distributed to 100 full-time employees at Teletech's Novaliches branch. Most respondents were female, aged between 21 and 30, and had 2 to 5 years of experience in mid-level positions. Data were analyzed using weighted means and ANOVA to evaluate the perceived influence of various organizational culture dimensions on employee retention. Respondents reported high levels of agreement across all five cultural dimensions, indicating a positive overall perception of Teletech's organizational culture. Rewards and recognition ranked as the most influential factor in employee retention, followed by leadership style and opportunities for career growth. Employees expressed a strong preference for consistent recognition and motivational leadership that actively involves them in decision-making processes. The findings indicate that employee retention is strongly influenced by recognition of contributions and clear opportunities for career advancement, with career development being especially important to younger employees. Although work-life balance and the work environment also had a positive impact, they received slightly lower ratings, pointing to areas for improvement. Key concerns included rigid schedules, unclear promotion pathways, and limited support from supervisors. ANOVA results revealed inconsistencies in gender-based responses, suggesting potential data handling issues that require further review. To address these challenges, the study recommends implementing leadership development programs, personalized recognition systems, flexible work arrangements, transparent promotion criteria, and wellness initiatives. These strategies aim to build a supportive, inclusive, and growth-oriented culture. Overall, the study highlights the critical role of organizational culture in strengthening employee retention within the competitive BPO sector.

Keywords: employee retention, organizational culture, career development, recognition, work-life balance, leadership, bpo industry, teletech, flexible work, anova, gender differences

**INFLUENCE OF BRAND AUTHENTICITY OF JOLLIBEE SUSANO ROAD
ON CONSUMER LOYALTY AT QUEZON CITY**

Jhasilene Petines, Samantha Clariño, Pauline Angel Delgado,
Renalyn Largo, Cristine Villamor, Randy Villaseñor

Abstract

This study investigates the impact of brand authenticity on consumer loyalty, focusing on Jollibee Susano Road in Quezon City. Specifically, it explores how consumers' perceptions of a brand's authenticity influence their loyalty. By examining this relationship, the research aims to contribute to the broader discourse on brand management, social media engagement, and consumer behavior. This study utilized a quantitative research design to assess the influence of brand authenticity on consumer loyalty at Jollibee Susano Road, Quezon City. Survey questionnaires were distributed to 100 customers, selected through purposive sampling to ensure that participants had relevant experience with the brand. The research aimed to evaluate how brand authenticity impacts consumer loyalty, offering practical insights for Jollibee and similar food establishments. To ensure the validity and reliability of the instrument, the questionnaire underwent thorough evaluation by a research adviser, a content expert, a statistician, and a grammarian. This study reveals that the brand authenticity of Jollibee Susano Road positively influences consumer loyalty in Quezon City. The majority of respondents were aged 21–30 and visited the branch once a week, showing high engagement with the brand. Brand authenticity was found to be a crucial factor in building trust and sustaining customer loyalty. However, statistical analysis yielded a z-value of 0.15, indicating no significant difference between male and female respondents across the eight measured factors. Therefore, the null hypothesis is accepted, confirming that gender does not significantly impact perceptions of brand authenticity. The study recommends that Jollibee adopt customer feedback and strengthen its relationship with patrons to build long-term loyalty and community support. By consistently delivering high-quality food, engaging with customers, and maintaining excellent service, Jollibee can boost customer loyalty, drive sales, and expand its market presence over time.

Keywords: brand authenticity, consumer loyalty, jollibee susano road, customer feedback, customer engagement, food quality, market growth, customer trust, quezon city

**INFLUENCE OF CORPORATE SOCIAL RESPONSIBILITY (CSR) IN BRAND EQUITY OF
LOLA NENA'S IN QUEZON CITY: BASIS FOR SUSTAINABILITY PROGRAM**

Althea Tena, Krizel Baal, Jessell Bacarisas, Samantha Keith De Belen,
Christjohn Ragos, Reynold Bangalisan

Abstract

This study explores the impact of Corporate Social Responsibility (CSR) initiatives on brand equity at Lola Nena's, a Filipino food enterprise known for its commitment to sustainability and community support since 2019. Established in 2012 as a family-run business, Lola Nena's has evolved into a well-loved brand recognized for its traditional snacks and ethical practices, such as sourcing ingredients from local farmers, providing disaster relief, offering medical assistance, and supporting educational initiatives. However, the effectiveness of these CSR efforts is limited by challenges including low consumer awareness, resource constraints (e.g., cassava shortages due to agricultural issues), and occasional misalignment between CSR activities and the brand's core identity. This study employed descriptive correlational design and gathered responses from 30 customers at Lola Nena's Quezon City branches. Using both convenience and purposive quota sampling methods, the research aimed to explore how the company's Corporate Social Responsibility (CSR) initiatives influence brand awareness, customer loyalty, and overall brand image. Findings indicated moderately favorable perceptions of CSR's impact, with mean ratings of 3.50 for brand image, 3.57 for customer loyalty, and 3.36 for brand awareness. Despite this, statistical analysis revealed a negligible negative correlation between CSR initiatives and overall brand equity ($r = -0.0837$, $p = 0.6628$), leading to the acceptance of the null hypothesis that CSR efforts alone do not significantly influence brand value. Key barriers identified were the lack of effective communication, 83% of respondents were unaware of existing CSR programs, along with minimal customer engagement and limited visibility of CSR activities. The study concludes that while Corporate Social Responsibility (CSR) strengthens community engagement and supports ethical branding, its direct impact on brand equity is limited and depends heavily on strategic communication. To enhance effectiveness, the study recommends using social media to highlight CSR efforts, form partnerships with local organizations, and adopting transparent reporting to improve public awareness. By aligning CSR initiatives with consumer values and ensuring they are scalable and sustainable, Lola Nena can reinforce its reputation as a socially responsible brand. This research contributes to a deeper understanding of CSR's role in small and medium-sized food enterprises, emphasizing the need to integrate ethical practices with long-term business strategies to achieve meaningful and lasting growth.

Keywords: corporate social responsibility (csr), brand equity, brand image, consumer loyalty, brand awareness, ethical branding, community engagement, lola nena's, small-to-medium enterprises (smes), sustainability, strategic communication

**INFLUENCE OF MARKETING MIX TOWARD CUSTOMER PREFERENCE OF
MASTER'S JT SHAWARMA IN NOVALICHES, QUEZON CITY**

Darwish Mastura, Sunshine Soriano, Sheena Mae Halum,
Marjorie Abasolo, Mariz Santos, Vinalyn Sarzata

Abstract

Master's JT Shawarma has been serving the Novaliches, Quezon City community for over two decades, earning recognition for its flavorful shawarma, 24-hour takeout service, and upstairs dining area. The brand has successfully expanded to several branches in Caloocan and Valenzuela City. However, despite its established presence, the business faces challenges in sustaining customer engagement due to limited marketing efforts, minimal product innovation, and accessibility concerns. This study explores the impact of the marketing mix: Product, Price, Place, and Promotion, on customer preferences at Master's JT Shawarma. Utilizing a quantitative-correlational research design, data were collected from 50 customers through quota sampling. The analysis considered respondents' demographic profiles, including age, gender, and purchase frequency, alongside their preferences related to the four components of the marketing mix. The results showed that most respondents were aged 18–27 (62%), with an equal gender distribution (50% male, 50% female). The most frequent purchase pattern was once a month (40%). Customers expressed moderate agreement with the business's pricing (mean = 2.53), location (mean = 2.62), promotional strategies (mean = 2.34), and product quality (mean = 2.76). The main factor affecting customer preference was limited promotional awareness (45%), followed by a lack of product innovation and discounts (25%). Statistical analysis revealed that age significantly influenced preferences related to promotion, while price, place, and product showed no significant relationship with demographic factors ($p > 0.05$). The study recommends that Master's JT Shawarma implement targeted marketing strategies tailored to its core customer group, aged 18–27. Suggested initiatives include personalized promotions, student discounts, and customer loyalty programs. To boost engagement and visibility, the business should enhance its social media presence, intensify promotional campaigns, and introduce innovative product offerings. Furthermore, addressing environmental concerns, such as improving air quality, renovating the store, and ensuring consistent cleanliness, can significantly enhance the overall customer experience.

Keywords: master's jt shawarma, marketing strategies, customer engagement, 18–27 age group, personalized promotions, student discounts, loyalty programs, social media marketing, product innovation, store cleanliness, customer experience

**INFLUENCE OF TIKTOK SHOP REVIEWS ON CONSUMER TRUST ANALYZING THE
IMPACT OF USER GENERATED CONTENT ON PURCHASING DECISIONS**

Jhon Cleford Caday, John Mark Cahusay, Mary Ann Cuizon,
Arjilie Navarro, Floriane Tiongson, Randy Villaseñor

Abstract

This study aims to examine the influence of TikTok Shop reviews on consumer trust, focusing specifically on the impact of user-generated content (UGC) within these reviews. It explores how UGC shapes consumer perceptions and purchasing decisions. By analyzing the role of authentic, peer-shared content in the online shopping experience, this research contributes to the expanding field of social media marketing and consumer behavior. This study utilized a quantitative research approach to examine the impact of TikTok Shop reviews on consumer trust. A total of 30 respondents from Jo's Online Shop, who regularly use TikTok for product information, were selected through purposive sampling based on their relevant experience. Data were collected through a structured survey questionnaire covering respondent demographics, the authenticity and quality of TikTok reviews, and their influence on consumer trust. To ensure validity and reliability, the instrument was reviewed by a research adviser, a content expert, a statistician, and a grammarian. The study reveals that TikTok Shop reviews have a significant influence on consumer trust and purchasing decisions. Both male and female consumers, particularly those aged 18 to 25, tend to rely on reviews that are authentic, credible, and consistently posted. User-generated content, such as everyday user testimonials, product demonstrations, and reviews with high engagement levels, was found to enhance trust. Additionally, factors like product quality and brand awareness also play a crucial role in shaping purchasing behavior. However, the statistical analysis yielded an overall t-value of 0.15, indicating that there is no significant difference between male and female respondents across the eight factors examined. Thus, the null hypothesis is retained. The study suggests that strengthening platform moderation to identify and flag inauthentic content can enhance consumer trust and improve purchasing decisions. Initiatives such as partnering with credible influencers and promoting transparency in product quality were also emphasized. These efforts are intended to foster greater consumer confidence and encourage more reliable purchasing behavior on TikTok Shop.

Keywords: tiktok shop, consumer trust, purchasing decisions, user-generated content, product reviews, influencers, platform moderation, product transparency, social media marketing, digital consumer behavior

**INSTITUTIONAL SUPPORT TO THE FACULTY MEMBERS OF COLLEGE OF
HOSPITALITY, TOURISM, BUSINESS ACCOUNTANCY AND MANAGEMENT
IN BESTLINK COLLEGE OF THE PHILIPPINES**

Mary Joy Prospero, Alexander Nordic Castro, Aira Jane Rombaoa,
Heidi Taguinod, Danilo Molera Jr.

Abstract

The purpose of this study is to assess the institutional support provided to faculty members at the College of Hospitality, Tourism, Business, Accountancy, and Management (CHTBAM) at Bestlink College of the Philippines. Quality institutional support is crucial for enhancing faculty performance, retention, and overall educational standards. This research aims to examine faculty demographics, evaluate their perceptions of support mechanisms (including compensation and benefits, training and development, employee well-being, and recognition), and identify existing challenges to inform targeted improvements. A descriptive quantitative methodology was employed, using purposive sampling of 117 CHTBAM faculty members. Data were collected through a validated survey that covered demographics, perceptions of institutional support (measured using Likert scales), and perceived challenges. Statistical analyses included frequency, percentage, and weighted mean to assess levels of support, as well as the Mann–Whitney U test and Kruskal–Wallis H test to determine significant differences based on demographic variables such as age, gender, educational attainment, salary range, and length of service. This study assessed faculty support at Bestlink College of the Philippines. The faculty members, predominantly young and moderately compensated, expressed general satisfaction with recognition and training opportunities. However, concerns were raised regarding low compensation, lack of insurance coverage, and limited opportunities for career advancement. Among the demographic variables, only age showed a significant influence on perceptions of recognition; other factors such as gender, educational attainment, salary range, and length of service did not yield statistically significant differences. Based on these findings, the study recommends implementing a comprehensive Faculty Development Program focused on enhancing benefits, providing adequate resources, and improving overall faculty satisfaction. The researchers recommend implementing a targeted Faculty Development Program to address identified gaps in resource access, employee benefits, and career advancement opportunities. Although institutional support is generally appreciated, challenges persist, particularly in the area of recognition across different age groups. To enhance faculty satisfaction and performance, the proposed initiatives include the establishment of a Faculty Insurance Program (FIP), the creation of a Faculty Resource Hub (FRH), and the enhancement of the Faculty Satisfaction and Engagement Survey (FSES) as a continuous feedback mechanism.

Keywords: institutional support, faculty satisfaction, faculty development, compensation and benefits, training and development, employee well-being, recognition, resource allocation, career advancement

**INTEGRATING TRADITIONAL AND DIGITAL MARKETING STRATEGIES TO
ENHANCE SALES PERFORMANCE OF INASAL NI INSAN**

Nelphilip Laurente, Baldwin Quipanes, Christian Jay Demayo, Kristine Mae Libatique,
Mary Ann Badillos, Rey Alegre, Vinalyn Sarzata

Abstract

Inasal ni Insan has been serving the Brgy. Bahay Toro community in Quezon City for over three years, offering chicken inasal and a variety of other food items. Despite its initial success and 24-hour operations, the business is currently facing challenges due to a decline in sales. This study investigates the integration of traditional and digital marketing strategies to evaluate the effectiveness of various marketing channels, including direct marketing, sales promotion, social media marketing, public relations, personal selling, mobile marketing, advertising, and sponsorship. Utilizing a correlational research design, the researchers surveyed 50 customers through convenience sampling to gather relevant insights. Respondents were assessed based on their demographic profiles, including age, gender, and frequency of purchase. The results of the study reveal that the majority of respondents were aged between 18 and 30 years old (66%) and were evenly distributed by gender (50% male, 50% female). The most common purchase frequency among respondents was weekly (42%). In terms of the effectiveness of traditional and digital marketing strategies in enhancing the sales performance of Inasal ni Insan, several strategies were rated as “very effective,” including public relations (mean = 3.26), personal selling (mean = 3.64), mobile marketing (mean = 3.66), social media marketing (mean = 3.36), advertising (mean = 3.28), and sales promotion (mean = 3.64). In contrast, sponsorship and direct marketing were evaluated as “effective.” However, statistical analysis indicated that traditional and digital marketing strategies did not have a significant impact on sales performance ($p > 0.05$). The key problems identified in the marketing efforts of Inasal ni Insan include the absence of social media engagement, limited sales promotions, ineffective marketing campaigns, a gap between customer expectations and actual experience, and the lack of a clearly visible menu. Based on the results gathered, Inasal ni Insan should prioritize a digital-first marketing strategy, with a strong focus on social media platforms such as Instagram, TikTok, and Facebook to effectively engage its young adult target audience. Personalized promotions and engaging video content can help boost visibility and customer interaction. This digital approach should be complemented by traditional marketing methods, including improved signage and targeted local advertising, which still hold significant value. Additionally, implementing time-sensitive discounts and promotional bundles can drive foot traffic and increase sales. Regularly gathering customer feedback is essential for refining marketing strategies and ensuring alignment between customer expectations and the actual dining experience. Overall, the researchers recommend the integration of both traditional and digital marketing strategies to enhance the sales performance of Inasal ni Insan.

Keywords: traditional marketing, digital marketing, sales performance, inasal ni insan

**INTERNET INSTALLATION SERVICES AS PERCEIVED BY CUSTOMERS OF
INTERNET SERVICE PROVIDER: BASIS FOR ENHANCEMENT**

Jeanette Ingrid Nabual, Realyn Daang, Rochelle Mae Gadin, Crishanne Nicole Sy,
Maria Trinidad Narvaez, Ariane Gesta Astudillo

Abstract

This study examines customers' perspectives on the internet installation services offered by an internet service provider to identify areas that need improvement. A guided questionnaire was distributed to customers, revealing that most respondents were young adults, with a slightly higher representation of females than males. The results indicate moderate customer satisfaction with the internet installation services, with professionalism and cleanliness identified as the most valued attributes. However, respondents emphasized the need for improvements in timely activation and issue resolution. Many customers also expressed interest in value-added services, such as free Wi-Fi extenders and professional consultation. The findings suggest that demographic factors influence service perception and underscore the need for targeted service enhancements. To enhance service quality, it is essential to improve technician preparedness, reduce activation lead times, and strengthen customer care. Streamlining the installation process and offering additional features will boost customer satisfaction and overall service experience for internet service providers

Keywords: internet installation service, customer satisfaction, technician readiness, activation lead time, customer care, value-added services, service quality improvement, service perception, demographic influence

**INVENTORY MANAGEMENT PRACTICES OF LSY OFFICE AND COMPUTER
SUPPLIES TOWARDS CUSTOMER RETENTION IN
BAHAY TORO PROJECT 8, QUEZON CITY**

Joyce Lyn Sapiot, Mary Joy Calixtro, Erica Mae Jasma, Kenneth Laus,
Rovic Mantaring, Vinalyn Sarzata

Abstract

This study investigates the inventory management practices of LSY office and computer supplies. It assesses how inventory levels are monitored, the establishment of reorder points, the application of the First In, First Out (FIFO) system, and the classification of inventory items. The objective is to enhance inventory accuracy and optimize stock control for improved operational efficiency. This study employed a correlational research design involving ten (10) employees of LSY Office and Computer Supplies. Participants were selected using purposive sampling. Data collection was conducted through a survey questionnaire to gather information on the business profile and identify problems encountered by the company. Statistical analyses included frequency and percentage, weighted mean, and the Kruskal-Wallis H test (ANOVA) to address the research questions and inform the development of an inventory management plan. The results of this study show that respondents generally agree on the evaluation of inventory tracking, setting pre-order points, inventory categorization, and the challenges faced. The most significant problem identified at LSY Office and Computer Supplies is the inconsistent application of the First In, First Out (FIFO) method, as many employees do not regularly implement it. This highlights the need for improvements to ensure FIFO is consistently and effectively practiced. It is recommended that LSY Office and Computer Supplies educate their employees on the proper use of the First In, First Out (FIFO) method and integrate it effectively into their daily operations. Furthermore, based on the study's findings, the adoption of a structured inventory management plan is proposed to enhance inventory control and operational efficiency.

Keywords: inventory management, first in first out (fifo), inventory tracking, pre-order points, inventory categorization, inventory control, lsy office and computer supplies, stock management, operational efficiency, inventory plan

**INVESTIGATING THE EFFECTS OF ENHANCED NATURAL MOISTURIZER FOR
HYDRATION AND ANTI-AGING IN THE SKINCARE INDUSTRY**

Renie Rose Baquiran, Paul Chester Arceo, John Carl Arcilla, Prince Carl Bloron,
Franchesca Joy Cruz, Matt Lorenz Serenilla, Christine Calvo

Abstract

This study aims to determine the effects of an enhanced natural moisturizer for hydration and anti-aging in the skincare industry. This study seeks to observe the effects of improved moisturizers that have been designed to hydrate the skin and lessen aging symptoms. The researchers employed the convenience sampling technique to gather data from sellers of skincare products. The descriptive research design was conducted with a survey questionnaire. This helped identify the possible effects or improvements that could be made to a moisturizer. In addition, the results showed what skincare sellers thought about enhanced natural moisturizers and what challenges moisturizer users might encounter. The researchers used a descriptive approach, a survey questionnaire, and a convenience sampling technique to gather information from sellers of skincare products in Quezon City, Caloocan City, and Valenzuela. The respondents of this study were 30 skincare product sellers. The selected respondents were those who were knowledgeable about or connected to the study. Based on the results of the study, the assessment of respondents on the impact of enhanced natural moisturizer in terms of ingredient efficacy showed that natural ingredients help improve the effectiveness of enhanced moisturizers. Based on the results, consumer demand can also help support or improve the enhancement of moisturizers. As to potential scientific advancement, it will help determine if there are any possible issues or if the enhanced moisturizer will have a good effect on the skin. Based on the results on the above mentioned variables, the physical store obtained an overall weighted mean of 3.65. The challenges encountered by users of enhanced moisturizers help determine what can be improved and what formula can be used to evaluate whether it has a positive effect on the skin or not. Based on the results, the following concerns were noted “Users love the natural formula, but texture consistency needs to be improved.” “Finding reliable reviews for natural moisturizers is challenging.” and “UV activated formulas improve daytime skin protection.” The researchers recommend improving the texture of the product as a priority and making reliable product reviews more prominent and readily accessible to consumers. N/A

Keywords: product enhancement, skin health, user feedback, enhanced natural moisturizer

JOB SATISFACTION OF EMPLOYEES AT ECHOMART HANDLING SERVICES

Carla Paula Moreno, Ma. Jhesica Pajermo, Patricia Mae Peñaloza,
Sherry Ann Solomon, Andria Urgel, Danilo Molera Jr.

Abstract

This study, titled Job Satisfaction of Employees at Echomart Handling Services, sought to evaluate employee satisfaction and determine the factors influencing their workplace experience. Using a descriptive-quantitative research design, the study surveyed 130 employees through a validated questionnaire covering four key dimensions: recognition, responsibility, salary, and working environment. Additionally, demographic factors including age, gender, educational attainment, job position, length of service, and monthly salary were examined to assess their relationship with job satisfaction. To ensure comprehensive representation, the study utilized a census sampling approach, including all 130 employees in the target population. Data were analyzed using descriptive statistics such as weighted mean, frequency, percentage, and ranking, along with inferential tests including the Mann-Whitney U-test and Kruskal-Wallis H-test. These methods helped identify prevailing trends and assess significant differences in job satisfaction across various demographic groups. The findings indicated that employees were generally highly satisfied, particularly with their sense of responsibility and recognition received. However, key concerns emerged, including strained interpersonal relationships, poor work-life balance, low wages, outdated equipment, and limited opportunities for career growth. Significant differences in job satisfaction were observed based on age and monthly salary, suggesting that younger and lower-paid employees face distinct challenges. Conversely, no significant differences were found with respect to gender, educational attainment, job position, or length of service. The researchers proposed a two-day Team-Building Workshop and Seminar as the core of an employee satisfaction program. This initiative includes trust-building activities, collaborative problem-solving, motivational talks, and group reflections, aiming to enhance communication, build trust, promote cooperation, and strengthen team cohesion. By fostering positive relationships and shared goals, the program addresses key concerns such as strained workplace dynamics and low morale. The study underscores the importance of addressing both organizational and interpersonal factors in job satisfaction, offering practical insights for HR professionals. Implementing and continuously evaluating targeted programs like this can help create a more motivated, productive, and loyal workforce, particularly in logistics and warehousing settings.

Keywords: employee satisfaction, team-building, workplace relationships, job satisfaction, logistics industry, trust-building, communication, employee morale, human resources, workforce motivation

**LEADERSHIP STYLE AND RETENTION PROGRAM OF SELECTED
ICECREAMHOUSE PHILIPPINES BRANCHES**

Aaliyah Paulla Fajardo, Pamela Hipolito, Abegail Caboteja, Jasmine Edenn Mabait,
Rochel Recaido, Jhunrich Petate, Dr. Joy Evelyn Ignacio

Abstract

This study investigates the leadership styles and retention strategies employed at selected IceCreamHouse Philippines branches in Metro Manila and Montalban, Rizal. It examines how different leadership approaches, autocratic, democratic, transformational, servant, and laissez-faire, affect employee retention. The research also considers the impact of demographic factors and key retention components such as compensation, career development, work environment, and managerial support. Ultimately, the study aims to identify major retention challenges and propose evidence-based solutions to enhance workforce stability and satisfaction. This study utilized a quantitative, descriptive-correlational research design to investigate the relationship between leadership styles and employee retention. Data were collected through Likert-scale survey questionnaires administered to regular and probationary employees, including service crew and managers, across nine selected IceCreamHouse branches from October 2024 to March 2025. The study found a significant positive correlation between leadership style and employee retention ($r = 0.6038$, $p = 0.0004$), leading to the rejection of the null hypothesis. This indicates that supportive and participative leadership styles play a key role in enhancing retention at Ice Cream House Philippines. The study revealed key factors hindering employee retention, including limited career growth, inconsistent leadership support, and inadequate compensation and benefits. In response, a comprehensive retention program was proposed, emphasizing leadership development, career progression, improved work conditions, and stronger management support to enhance employee satisfaction, reduce turnover, and promote long-term success at Ice Cream House Philippines.

Keywords: leadership styles, employee retention, career growth, compensation, management support, ice cream house philippines, retention program, work environment, organizational success, quantitative research

**LEVEL OF SATISFACTION OF THE CUSTOMER AT MOTORSTAR IN NOVALICHES,
QUEZON CITY IN RELATION TO CUSTOMER LOYALTY**

Clarey Rose Mengullo, Kim Verly Alcoran, Reynan Pertollano,
Edsel Joseph San Pedro Jr, Joan Sisno, Randy Villaseñor

Abstract

Customer satisfaction and loyalty are critical to driving growth and maintaining competitiveness in the motorcycle retail industry, especially in local markets like Motorstar in Novaliches, Quezon City. This study aimed to evaluate customer satisfaction and its effect on loyalty by focusing on five key dimensions: motorcycle performance, service quality, product quality, pricing, and sales and marketing. Operating in a highly competitive landscape, the dealership faces increasing pressure to meet customer expectations. Thus, the study also sought to identify existing service gaps and recommend strategic improvements to enhance the overall customer experience, boost retention rates, and foster long-term brand loyalty. This study adopted a descriptive quantitative research design. Twenty customers were selected using convenience sampling, and data were collected through a structured questionnaire covering demographic information, satisfaction factors, and service-related issues. The responses were analyzed using statistical tools, including frequency, percentage, weighted mean, and independent samples t-test. A Likert scale was used to assess and interpret satisfaction levels. To ensure the instrument's validity and clarity, expert evaluations and a pilot test were conducted before full implementation. The results revealed that customers were generally satisfied with their overall experience at Motorstar. The highest satisfaction scores were recorded in motorcycle performance and pricing, both with a mean rating of 3.46, followed by product quality at 3.38. Service quality (3.37) and sales and marketing (3.27) received slightly lower ratings, indicating areas with room for improvement. A significant difference in product quality ratings was observed between male and female respondents, highlighting gender-based variation in customer perception. Among the most common concerns were the limited number of service locations, unclear warranty procedures, and shortages of spare parts. In response to these issues, Motorstar has implemented measures such as expanding service facilities, improving inventory systems, and conducting staff training to enhance service delivery and customer satisfaction. The study establishes a strong link between customer satisfaction and loyalty at Motorstar Novaliches. To sustain and strengthen customer retention, the company should prioritize continuous improvement in service quality, foster stronger customer relationships, and implement strategic marketing initiatives. The proposed marketing approach centers on affordability, convenience, and reliability, attributes most valued by the dealership's core customers. Enhancing promotional efforts and expanding after-sales service capabilities will further elevate customer satisfaction and loyalty, securing Motorstar's competitive edge in the motorcycle industry.

Keywords: customer satisfaction, customer loyalty, motorcycle retail industry, motorstar novaliches, service quality, product quality, pricing, marketing strategy, after-sales service, customer retention

**MANUAL VERSUS SYSTEM DRIVEN INVENTORY MANAGEMENT:
A COMPARATIVE STUDY FOR OPERATIONAL PRODUCTIVITY**

Jimboy Conde, Rosemay Canuto, Gene Rose Tablizo, Johnmark Templado,
Jonna Ellaine Trillana, Kimberly Joyce Embile

Abstract

Inventory management is a critical component of business operations, yet organizations often experience varying levels of efficiency when transitioning from manual to system-driven approaches. This study explores the comparative outcomes of manual inventory tracking and system-driven tools, such as Microsoft Excel, in terms of operational productivity. Although digital tools offer clear benefits in speed and accuracy, adoption challenges remain. The study seeks to evaluate these two methods to determine their impact on overall inventory efficiency. This research applies to the Information Systems Success Model, evaluating inventory management based on system quality, information quality, and user satisfaction. System-driven inventory tools, particularly Microsoft Excel, were assessed for their interface usability, data accuracy, and alignment with business needs. Manual inventory practices were also analyzed, particularly their reliance on employee experience and lack of standardization. The study measured efficiency, accuracy, and cost-effectiveness through comparative analysis between the two systems. Findings revealed significant differences between manual and system-driven inventory methods. Manual inventory processes, often handled by experienced store crew, showed lower scores in time efficiency (2.70) and accuracy (2.54). In contrast, system-driven methods, frequently used by newer employees, demonstrated higher efficiency (3.98) and improved accuracy (3.02). Cost-effectiveness was nearly comparable, with system-driven systems rated at 2.86 and manual systems at 2.80. However, system-driven inventory management was found to offer greater long-term benefits through reduced errors and optimized stock control. The study highlights the importance of enhancing inventory management systems to improve operational productivity. While manual systems may seem simpler and more familiar to seasoned staff, they are slower and more prone to errors. On the other hand, system-driven methods, despite requiring initial investment, deliver superior performance through automation, real-time tracking, and increased accuracy. Organizations are encouraged to invest in system-driven inventory tools for sustainable productivity and operational efficiency.

Keywords: inventory management, manual vs. system-driven, operational productivity, information systems success model, microsoft excel, time efficiency, accuracy, cost-effectiveness, business operations, automation

**MARKETING CHALLENGES AMONG CLOTHING ENTERPRISES IN BAGONG
SILANG CALOOCAN CITY: BASIS FOR MARKETING PROGRAM**

Vince Joshua Dano, Christine Joy Briton, Mary Grace Bunga, Clarence Miguel Famero,
Ma Isabel Robles, Reynold Bangalisan

Abstract

This study investigates the marketing challenges encountered by small clothing enterprises in Bagong Silang, Caloocan City, and evaluates strategies within the framework of the 4Ps of marketing: Product, Pricing, Place, and Promotion. The objective is to assess how these enterprises respond to common market issues and to provide a foundation for developing an effective marketing program tailored to their needs. The study employs descriptive correlational research design. Data was gathered through purposive sampling of fifteen business owners using validated questionnaires. Statistical tools such as weighted mean and Pearson's r were applied to assess the extent of marketing challenges and the effectiveness of corresponding strategies. Findings indicate that product-related challenges were the most pressing, particularly due to rapidly shifting fashion trends and the proliferation of counterfeit goods online, as cited by 87% of respondents. Respondents agreed that these challenges were addressed through diversified product offerings and sustainability initiatives (mean = 3.44). Pricing strategies (mean = 3.17) focused on competitive pricing and discount schemes, although their impact on customer retention was limited. Place-related efforts (mean = 2.99) emphasized in-store design over digital integration, while promotion strategies (mean = 3.01) mainly involved social media marketing with limited use of influencer collaborations. The Pearson correlation coefficient ($r = 0.40$, $p = 0.14$) indicated a low positive correlation between marketing challenges and strategies, supporting the null hypothesis and suggesting limited alignment between problems and implemented solutions. Proposed interventions include product line expansion, adaptive pricing models, increased e-commerce utilization, and collaboration with micro-influencers. The study highlights the necessity of a structured marketing program that aligns the 4Ps strategies with the specific challenges faced by local enterprises. Emphasis is placed on digital adaptation, customer engagement, and market responsiveness. These recommendations aim to improve the competitiveness of small clothing businesses in densely populated urban areas by promoting a balance between physical retail presence and digital marketing initiatives.

Keywords: marketing challenges, clothing enterprises, 4ps framework, product strategy, pricing strategy, promotion, place, small business, e-commerce, urban markets

**MARKETING STRATEGIES AND SOCIAL MEDIA ENGAGEMENT:
A STUDY OF DIGITS TRADING CORPORATION'S SUCCESS**

Memes Hannah Babes, April Ann Batic, Ronalyn Elizaga,
Shervin Quibilan, Elvira Valdez, Randy Villaseñor

Abstract

In the digital marketing era, businesses must strategically utilize social media platforms to enhance brand visibility, customer engagement, and sales performance. This study evaluates the marketing strategies and social media engagement efforts of Digits Trading Corporation, a prominent distributor of gadgets in the Philippines. By analyzing the company's presence on Facebook, TikTok, and Instagram, the study examines the effectiveness of its digital marketing initiatives and identifies areas for improvement. This study employs descriptive research design. Surveys were conducted with 100 respondents, comprising 50 employees and 50 customers of Digits Trading Corporation. The questionnaire focused on perceptions of social media engagement, marketing effectiveness, and overall shopping experience. Statistical tools, including the Z-test, were used to analyze the data and assess differences in perception between employees and customers. The results indicate that Instagram is the most effective platform for brand engagement, while TikTok stands out for its impact on creative content marketing. Facebook continues to be essential for addressing customer inquiries and disseminating product information. Influencing factors in purchasing decisions included promotional strategies, customer service, and competitive pricing. However, challenges were identified, such as limited product availability, vague product descriptions, and inadequate after-sales support. The Z-test revealed no significant difference between employee and customer responses, indicating a shared perspective on the company's marketing and engagement efforts. To reinforce its competitive edge, Digits Trading Corporation should consider implementing real-time inventory updates, refining promotional strategies, and enhancing customer support services. Further investment in influencer collaborations, optimization of the online shopping interface, and improved content marketing could strengthen customer engagement. These findings offer practical insights for businesses aiming to enhance their digital marketing strategies and foster meaningful engagement through social media.

Keywords: marketing strategies, social media engagement, digital marketing, customer perception, influencer marketing, online shopping, facebook, tiktok, instagram, consumer behavior

**MARKETING STRATEGIES OF JB'S SALON AND BARBERSHOP:
BASIS FOR AN ENHANCED MARKETING PLAN**

Joellyn Yamog, Reinne Hontiveros, Frances Jay Dagohoy,
Mariel Malapika, Aizzy James Dela Cruz, Jennylene Abalos

Abstract

This study aims to determine whether there is a significant relationship between the marketing strategies of JB's Salon and Barbershop and the frequency of customer visits. In a competitive market environment, JB's faces the challenge of retaining clients and attracting new ones. The research evaluates the impact of various marketing strategies including service quality, pricing, location, and promotions on customer retention and business growth. A quantitative approach with a descriptive-comparative design was employed. Data was collected from 100 respondents using convenience sampling. The survey instrument assessed perceptions of marketing strategies and visit frequency. Statistical tools such as percentage frequency distribution, weighted mean, Z-test, and frequency ranking were utilized to analyze the data and derive actionable insights. Among the four marketing strategy components, service quality received the highest rating (weighted mean: 3.26), indicating its importance to customers. This was followed by price (2.96) and location (2.68), while promotions received the lowest rating (2.51), highlighting the need for improvement in this area. Most respondents (78%) were young adults aged 18 to 27 from low-income or lower-middle-class groups, and the majority visited the salon less than once per month. A Z-test revealed a significant difference between marketing strategies and customer visit frequency, with a T-value of 4.16013 and a P-value of 0.00059. Overall, marketing strategies were rated higher (mean: 3.11) than visit frequency (mean: 2.60), suggesting a disconnect between strategic efforts and customer behavior. The findings suggest that while the current marketing strategies are generally effective, enhancements are needed to encourage repeat visits. JB's Salon and Barbershop should strengthen its marketing plan by improving customer service, adjusting pricing to suit target demographics, enhancing promotional activities, and maximizing location accessibility. These efforts will support increased visit frequency and sustained business growth.

Keywords: marketing strategies, service quality, customer retention, promotion effectiveness, salon marketing, business growth, visit frequency, pricing strategy, location accessibility, z-test

**MARKETING STRATEGY OF DJ CRISPY AND ANYHOW AT BARANGAY STA. LUCIA
NOVALICHES QUEZON CITY: BASIS FOR A PROPOSED MARKETING PLAN**

Christine Joy Salas, Rose Irene Candole, Lyca Jean Bucad,
Jamiah Salmingo, Haizel Rose Domdom, Vinalyn Sarzata

Abstract

Established in 2022 during the COVID-19 pandemic, DJ Crispy and Anyhow is a small restobar located atop a residential property in Barangay Sta. Lucia, Novaliches, Quezon City. The business offers pulutan-style dishes such as grilled pork, crispy pata, and French fries, alongside beverages and desserts. The venue features videoke and accommodates private gatherings. However, as traditional marketing strategies like word-of-mouth and in-store promotions become less effective in a digitally driven market, there is a need to explore enhanced and adaptive marketing approaches. This study evaluates the effectiveness of DJ Crispy and Anyhow's marketing mix: Product, Price, Place, Promotion, and People, and investigates how customer preferences vary according to demographic profiles. A descriptive quantitative research design was utilized, involving 100 purposively selected respondents. Data was gathered through a structured survey questionnaire. The responses were analyzed using frequency distribution, percentage, weighted mean, and non-parametric tests (Mann-Whitney U and Kruskal-Wallis H tests) to determine significant differences in customer preferences based on age, gender, socio-economic status, and purchase frequency. Findings revealed that the majority of respondents were female students aged 16–25. Respondents rated the business positively in terms of product satisfaction, transparent pricing, venue layout and ambiance, promotional reach, and staff accommodation. Notable concerns included limited parking, underdeveloped marketing strategies, and lack of product innovation. Statistical analysis indicated no significant differences in customer preferences based on gender, socio-economic status, or frequency of visits. However, a significant difference was observed based on age in relation to promotional preferences. The study recommends implementing age-specific promotions, budget-friendly menu options, loyalty programs, and improved customer-staff engagement to boost satisfaction and patronage. Additional suggestions include offering happy hour deals, hosting themed events, and introducing loyalty cards. The results underscore the importance of aligning marketing strategies with customer demographics and preferences to strengthen service quality and business performance.

OMNICHANNEL STRATEGIES AND SATISFACTION OF SELECTED FOOD BUSINESSES: BASIS FOR DEVELOPING CUSTOMER EXPERIENCE MODEL

Eugene Bautista, Mary Anne Barrera, Marites Breis, Luis Miguel Camanian,
Annie Coral, Jessa Zabala, Reynold Bangalisan

Abstract

This study investigates the relationship between omnichannel strategies and customer satisfaction among selected food businesses in Project 8, Quezon City, with the aim of developing a customer experience model. Grounded in the Omnichannel Customer Experience (OCX) theory by Carlson et al. (2022), the study evaluates whether touchpoints such as mobile applications, social media platforms, and in-store services significantly influence customer satisfaction. The research addresses the growing need for integrated service approaches in the food industry to meet evolving consumer expectations. A descriptive-correlational research design was employed using purposive quota sampling. Data was collected through survey questionnaires distributed to customers from five local food businesses. Statistical tools, including frequency, percentage, weighted mean, Pearson correlation coefficient, and ranking, were used to analyze the data and examine the relationship between the variables. Results revealed that mobile ordering (34%), in-store purchases (31%), and social media (22%) were the most frequently used omnichannel strategies. Respondents reported general satisfaction in terms of delivery accuracy, ease of social media communication, and clarity of return policies, yielding a composite mean of 3.09. However, the Pearson correlation test showed no statistically significant relationship between omnichannel strategies and customer satisfaction ($r = 0.0462$, $p = 0.750037$). This indicates that despite the prevalence of omnichannel strategies, they do not directly translate to increased customer satisfaction. Reported challenges included delayed deliveries, long waiting times, and poor customer support. In response to the findings, the study proposes a customer experience model focused on service consistency, operational efficiency, personalized engagement, and enhanced issue resolution across digital and physical channels. The model emphasizes the need for food businesses to go beyond channel integration and prioritize dependable, customer-centric service delivery. Enhancing these aspects is crucial for building customer trust, fostering loyalty, and maintaining competitiveness in the increasing digital food service landscape.

Keywords: omnichannel strategies, customer satisfaction, food business, customer experience model, service integration, mobile ordering, social media, in-store services, operational efficiency, consumer behavior

**ONLINE FOOD DELIVERY SERVICE FOR SALES IMPROVEMENT:
BASIS FOR CUSTOMER SATISFACTION PLAN**

Oscar Vitug Jr

Abstract

The online food delivery industry in the Philippines continues to experience rapid growth, attracting a substantial number of new customers daily. With the evolving market landscape, competition among food delivery startups and businesses has intensified. In this dynamic environment, customer satisfaction emerges as a critical factor for business success. Companies that prioritize customer satisfaction over profit are more likely to sustain a competitive advantage. Given the increasing interest in food delivery services, this sector holds significant potential for future expansion and sales improvement. The study employed a quantitative research design using a descriptive-inferential survey method. Purposive sampling was utilized to select participants based on specific criteria relevant to the study's objectives. This approach enabled the researcher to gather data from individuals with direct experience using online food delivery services. Questionnaires were distributed to assess various aspects of customer experience, focusing on current conditions and behaviors within the industry. The findings revealed key customer perceptions of online food delivery services, specifically in terms of reliability, responsiveness, tangibility, empathy, and acceptability. These service dimensions were evaluated to understand their influence on overall customer satisfaction and to identify areas for improvement. The results highlighted customer preferences and expectations that can inform a strategic plan to enhance satisfaction and drive sales growth. The study suggests that the future of online food delivery will depend on sustainability, streamlined logistics, and achieving a balance between customer convenience and business profitability. Technological innovation is expected to play a vital role in overcoming existing operational challenges. The expansion of delivery services into new markets, coupled with improved service integration and diversification, presents opportunities for broader market capture. A well-developed customer satisfaction plan based on these insights can serve as a foundation for long-term business success.

Keywords: online food delivery, customer satisfaction, sales improvement, business strategy, service quality, food industry, customer experience, delivery reliability, technological integration, market expansion

**ONLINE SHOPS UNRELATED REVIEWS AND ITS EFFECTS IN CUSTOMER
BUYING BEHAVIOR AROUND CAMARIN, CALOOCAN CITY**

Mc Jey Balais, Aslexandra Abrantes, Elalaine Aguillon, Elalaine Aguillon,
Mary Krinstine Ojero, Jerimie Rivera, Randy Villaseñor

Abstract

This study aims to evaluate the effects of unrelated reviews on online shops and their influence on customer buying behavior in Camarin, Caloocan City. Online product reviews significantly impact purchasing decisions, especially for first-time buyers. However, many reviews focus on aspects unrelated to the product itself, such as delivery delays, packaging, or customer service, which may distort customer perceptions of product quality. This research seeks to examine how these unrelated reviews influence consumer behavior and to explore ways to guide first-time buyers toward informed decision-making. A quantitative descriptive research design was employed to gather data from sixty (60) respondents, equally divided between male and female participants, who have encountered unrelated reviews on online platforms. The study focused on consumers within Camarin, Caloocan City. Data were analyzed using frequency and percentage, weighted mean, and hypothesis testing via a Z-test to determine the statistical significance of the observed effects. The demographic analysis showed an equal gender distribution, with most respondents aged between 18 and 25 years. Although many of them rarely make online purchases, the majority agreed that unrelated reviews had an impact on their buying decisions. This suggests that even occasional online shoppers are influenced by comments that are not directly related to the product, reinforcing the idea that customer perceptions can be shaped by seemingly minor factors. The findings highlight the need for sellers to manage the review sections of their product pages more effectively. Allowing moderation or filtering of unrelated reviews may protect the seller's reputation and product credibility. A well-structured review system, along with targeted marketing strategies, can minimize the negative impact of off-topic reviews and improve product profitability. Ultimately, addressing these factors can lead to better customer experiences and more accurate representations of product value.

Keywords: online reviews, unrelated reviews, customer buying behavior, e-commerce, consumer perception, review moderation, product credibility, marketing strategy, camarin caloocan, online shopping behavior

**OPERATIONAL ISSUES AND ITS EFFECT ON SERVICE QUALITY AT
SKYBAKED COFFEE SHOP IN PASIG CITY**

Rhealyn Dela Cruz, Rhealyn Lerio, Reca Mae Marquez, Maricel Ramos, Reynold Bangalisan

Abstract

This study investigates the effect of operational issues on service quality and customer satisfaction at Skybaked Coffee Shop in Pasig City, Philippines. As the local coffee industry continues to expand, small cafés face increasing pressure to maintain service standards while managing internal operational challenges. At Skybaked, concerns such as inefficient inventory management, inconsistent staff scheduling, and equipment malfunctions may impact key aspects of service delivery. These are examined through the lens of the SERVQUAL model, focusing on the five service dimensions: tangibility, reliability, responsiveness, assurance, and empathy. A mixed-method research design was employed to gain a comprehensive understanding of the issue. Data were gathered from 30 respondents, 6 employees and 24 customers, through structured survey questionnaires and interviews. Quantitative data were analyzed using weighted mean and Pearson correlation, while qualitative responses were used to contextualize the operational issues observed and their perceived effects on service quality. Among the operational concerns, inventory management was rated with the highest mean score (3.24), followed by equipment functionality (3.08) and staff scheduling (2.90), indicating moderate effectiveness with room for improvement. Respondents noted that these issues influenced perceptions of service quality, particularly in terms of reliability and responsiveness. However, statistical analysis showed no significant correlation between operational issues and overall service quality, with all computed r-values falling within negligible ranges and p-values exceeding the 0.05 threshold. This suggests that while inefficiencies exist, they do not significantly alter customer perception of service delivery. The findings underscore the need for proactive operational planning despite the absence of statistically significant effects on perceived service quality. The study recommends implementing enhanced inventory tracking systems, flexible staff scheduling methods, and routine equipment maintenance. Additionally, staff training and personalized service approaches are proposed to maintain and strengthen customer satisfaction. These strategies offer practical value not only to Skybaked but also to other small-scale cafés aiming to improve service quality in a competitive urban market.

Keywords: operational issues, service quality, coffee shop operations, customer satisfaction, servqual model, inventory management, staff scheduling, equipment maintenance, small business strategy, pasig city

**OPTIMIZING VIRTUAL ASSISTANT SERVICES THROUGH ACCOUNTING
INFORMATION SYSTEMS: A STUDY OF PATRA CORPORATION IN QUEZON CITY**

Kharen Mae Opeña, Alyssa Pauline Ignacio, Kate Miguel,
Jane Marie Udarbe, Angeline Dionisio, Analyn Magalso

Abstract

The integration of Virtual Assistant (VA) services with Accounting Information Systems (AIS) has significantly transformed business operations by enhancing efficiency, accuracy, and financial decision-making. This study investigates how AIS contributes to optimizing VA services at PATRA Corporation in Quezon City, focusing on both the advantages and obstacles associated with this integration. A descriptive research design was utilized to assess the integration of AIS in VA services. Data was gathered through survey questionnaires administered to fifty (50) virtual assistants, comprising 25 onsite and 25 online employees of PATRA Corporation. The study employed purposive simple random sampling. Collected data were analyzed using statistical tools such as percentage distribution, weighted mean, and Likert scale ranking. The study found that AIS significantly improved the efficiency, decision-making capabilities, and overall service quality of virtual assistants. Respondents expressed agreement regarding the system's ease of use, functionality, and continued relevance in daily operations. Noted challenges included software compatibility concerns, data security vulnerabilities, high maintenance costs, and employee resistance to change. Despite these challenges, the utilization rate of AIS remained high, reflecting its integral role in supporting VA workflows. The findings support previous literature indicating that AIS adoption enhances financial management and operational efficiency. However, the presence of technical, financial, and human-related barriers highlights the need for targeted interventions. To ensure successful integration, organizations should invest in training programs, establish strong data security measures, and upgrade outdated systems. Continued technical support and regular workshops are recommended to sustain the effectiveness of AIS in optimizing virtual assistant services.

Keywords: virtual assistant services, accounting information systems, operational efficiency, financial decision-making, data security, system integration, business process optimization, patra corporation

PERCEIVE USEFULNESS OF G- CASH PAYMENT IN SMALL RETAIL BUSINESS

Erich Dumalag, Astra Rios, Rizaldy Sotto, Jellian Solina, Christine Calvo

Abstract

This study aims to assess the viability and future potential of the perceived usefulness of GCash as a payment method in small retail businesses. The research underscores the effectiveness of GCash in enhancing operational efficiency, improving customer convenience, and strengthening financial management, making it a valuable tool for the growth and sustainability of small enterprises. This study utilized a descriptive-quantitative research design to examine the perceived usefulness of GCash as a payment method among small retail businesses. A total of 50 small retail establishments in Novaliches, Quezon City, were selected through convenience sampling. The sample consisted of 10 sari-sari stores, 10 ukay-ukay stalls, 10 rice retailers, 10 milk tea shops, and 10 beauty product stores. Data was collected through a structured survey questionnaire, designed to assess the impact of GCash on business efficiency, customer transactions, and financial management. The quantitative approach allowed for statistical analysis and interpretation of the gathered data. The results of the study indicate that the respondents, who are directly involved in offering therapeutic products or services, provided varying perceptions of digital payment systems. The weighted mean scores revealed a rating of 2.54 for satisfaction, 3.11 for convenience, and 3.16 for security, with an overall weighted mean of 2.93. These findings suggest a moderate level of approval for the use of digital payments in this context. The researchers recommend that businesses encourage customers to share feedback on their experiences with digital payment methods. By addressing user concerns and making continuous improvements, retailers can enhance the overall customer experience, increase satisfaction, and build customer loyalty. Understanding customer preferences and aligning GCash payment systems with their needs can significantly enhance the overall shopping experience, particularly within the small retail sector. The findings also indicate that consumers who use GCash tend to spend more per transaction on average compared to those who pay with cash. This suggests that digital payments may encourage impulse buying, potentially leading to increased overall sales for small retailers.

Keywords: gcash payment, digital payments, small retail businesses, customer preferences, impulse buying, consumer behavior, sales enhancement, transaction value, shopping experience

PERCEIVED ACCEPTABILITY OF PURPLE YAM TEA AS ALTERNATIVE GREEN TEA

Lance Andrei Monzaga, Althea Luis Manuel, Sheryl Lauriano,
Mark Deniel Bantiling, Roselyn Cajandab, Christine Calvo

Abstract

This study investigates the perceived acceptability of purple yam tea as a potential alternative to green tea. Purple yam is a nutrient-rich root crop, known for its high antioxidant content, including vitamin C, dietary fiber, and anthocyanins, which are beneficial for immune function, digestion, and overall wellness. Meanwhile, green tea is a widely consumed beverage and dietary supplement recognized for its ability to enhance mental alertness, alleviate digestive discomfort and headaches, and aid in weight management. This study adopted a descriptive-experimental approach to assess the perceived acceptability of purple yam tea as a substitute for green tea. It aims to explore the potential of this unique beverage in the tea market by examining its taste, aroma, consumer preference, product quality, and preparation process. The study drew the following conclusions: Demographic Profile – There was an uneven distribution of respondents in terms of age and gender. The majority were males aged between 18 and 25 years old, with most being fourth-year BS Entrepreneurship students. Perceived Potential of Purple Yam Tea – Both groups of respondents generally agreed on the potential of purple yam tea as an alternative to green tea, particularly concerning its health benefits, available variations, and consumer appeal. Differences in Acceptability Levels – A significant difference was observed in the level of acceptability between health experts and fourth-year BS Entrepreneurship students, suggesting varied perceptions based on background and expertise. Marketing Strategy Responses – There was a varied response to the proposed marketing strategies. Nonetheless, the majority of respondents preferred strategies that emphasize strong and unique selling points to effectively promote the product. The two groups of respondents assessed the perceived acceptability of purple yam tea as an alternative to green tea across three key aspects: Benefits: The product was perceived to contribute positively to overall health due to its antioxidant content, dietary fiber, and anthocyanins. Varieties: Purple yam tea was recognized for its distinct characteristics that set it apart from other types of tea. Consumer Preference: Its aroma, taste, color, and flavor were seen as important factors that enhance customer satisfaction and promote relaxation during consumption. The analysis indicated a significant difference between the assessments of the two groups: health experts and fourth-year BS Entrepreneurship students, regarding these three aspects.

Keywords: purple yam tea, green tea alternative, antioxidants, dietary fiber, anthocyanins, health benefits, tea varieties, consumer preference, aroma, taste, relaxation, significant difference, respondent assessment

**PERCEIVED EFFECTIVENESS OF CONTENT CREATOR ENDORSEMENT IN
ADVERTISING SKINCARE PRODUCT: BASIS FOR CRAFTING BUSINESS MODEL**

Maureen Lhiezal Matito, Arnel Moscoso, Ziham Taurac, Rogie Salazar Jr,
Mary Joy Waro, Ariane Astudillo

Abstract

The rapid growth of social media and the rise of content creators have redefined marketing practices within the skincare industry. This study focuses on the perceived effectiveness of influencer endorsements in advertising skincare products, with Dermorepubliq, a Philippine-based brand serving as the focal case. Guided by Cognitive Dissonance Theory, the research explores how these endorsements impact consumer trust, engagement, and purchase intentions. Insights from the study aim to support the development of a strategic business model for more effective influencer-driven marketing. The study adopted a quantitative descriptive research design and utilized a structured survey to gather data from 50 TikTok users who had engaged with content creator endorsements of the Dermorepubliq brand. Participants were selected through purposive sampling. The survey instrument, which was validated by experts and pilot-tested for reliability, focused on three core areas: user engagement, consumer trust, and purchase intention. Collected data were analyzed using frequency distribution, weighted mean, ranking, and ANOVA to identify statistically significant differences based on demographic profiles. The results indicate that content creator endorsements are highly effective in driving engagement (mean = 3.32), enhancing consumer trust (mean = 3.38), and influencing purchase intentions (mean = 3.34). Moreover, no significant differences were observed across age, gender, or TikTok usage frequency, suggesting a consistent perception of effectiveness across all demographic groups. The results affirm that content creators are valuable assets in modern marketing, especially for skincare brands. Respondents reported high levels of engagement and trust, underscoring the importance of authenticity, relatability, and consistency in influencer partnerships. The absence of significant differences across demographic variables indicates that influencer marketing is broadly effective across age and gender. These findings suggest that skincare brands should prioritize building long-term relationships with credible influencers and focus on delivering transparent, high-quality content. The proposed business model developed from this study offers a strategic framework to guide brands in implementing more effective and consumer-centered influencer marketing approaches.

Keywords: content creators, influencer marketing, skincare brands, consumer trust, engagement, authenticity, relatability, demographics, marketing strategy, business model

**PERCEIVED USEFULNESS OF MCDONALD'S FOOD DELIVERY APP AND ITS
CUSTOMER SATISFACTION AROUND SAN FRANCISCO DEL MONTE, QUEZON CITY**

Reynante Regala, Jurian Jaan Peligro, Hazel Mae Obaga, Lyka Rose Molina,
Christine Dausin, Reynold Bangalisan

Abstract

This study explores the correlation between perceived usefulness and customer satisfaction with the McDonald's Food Delivery App in San Francisco Del Monte, Quezon City, grounded in the Technology Acceptance Model (TAM). Prompted by the rising dependence on online food delivery platforms especially in the aftermath of the COVID-19 pandemic, the research investigates key user concerns such as interface usability, login difficulties, inaccurate mapping, and delayed deliveries. This study adopted a descriptive-correlational research design and utilized purposive sampling to gather data from 30 individuals aged 18 and above who use the McDonald's Food Delivery App. The research examined key variables such as perceived usefulness, perceived ease of use, behavioral intention to use, and actual system usage. These were analyzed alongside customer satisfaction indicators, including reliability, responsiveness, assurance, empathy, and tangibles. The data were processed using weighted mean and Pearson's correlation coefficient to evaluate the relationships among the variables. The findings revealed that users highly rated the app's perceived usefulness (mean = 3.44) and ease of use (mean = 3.37), with frequent actual usage (mean = 3.36). However, behavioral intention to continue using the app was slightly lower (mean = 3.19), indicating opportunities to strengthen user commitment. Regarding customer satisfaction, responsiveness, assurance, empathy, and tangibles received favorable evaluations (mean range = 3.33–3.35), while reliability scored somewhat lower (mean = 3.29), highlighting areas for potential service enhancement. A strong and statistically significant positive correlation was observed between perceived usefulness and customer satisfaction ($r = 0.888$, $p < 0.05$), leading to the rejection of the null hypothesis. The results confirm that greater perceived usefulness of the app leads to higher levels of customer satisfaction. Although the McDonald's Food Delivery App performs effectively and meets user expectations, enhancements are still needed in areas such as user interface, personalization, delivery precision, and engagement strategies. Based on these insights, the study recommends the following: improving app performance, incorporating gamification and referral programs, utilizing AI-powered chatbots for streamlined customer support, and increasing delivery reliability. The proposed improvement plan aims to refine system usability, enhance customer service, and enable real-time tracking to deliver a more seamless and rewarding user experience. These findings provide actionable insights for McDonald's and similar food delivery platforms seeking to strengthen customer loyalty and satisfaction in an increasingly digital and competitive food service environment.

Keywords: technology acceptance model (tam), mcdonald's food delivery app, perceived usefulness, customer satisfaction, app usability, online food delivery, user engagement, delivery accuracy, ai chatbot support, gamification, user retention

**PROFESSIONAL DEVELOPMENT AND EMPLOYEE ENGAGEMENT OF THE
TEACHING PERSONNEL IN A HIGHER EDUCATION INSTITUTION IN QUEZON CITY**

Brent Harry Arellano, Michille Balce, Charlotte Cortes, Cherielyn Entendez,
Eddieliso Poliquit Jr, Riva Manalo

Abstract

Professional development plays a crucial role in strengthening the skills, knowledge, and expertise of teaching personnel. This study aims to evaluate the relationship between professional development specifically in the areas of continuous learning, classroom management, relationship building, technological proficiency, and career goal setting and employee engagement, which is assessed through cognitive, emotional, and physical aspects. Additionally, the study seeks to identify the barriers that prevent teaching staff from fully participating in professional development initiatives. This study adopted a descriptive-correlational research design to explore the relationships among the key variables. The participants consisted of 104 teaching personnel from the College of Hospitality, Tourism, Business, Accountancy, and Management (CHTBAM). Cluster sampling was utilized to determine the sample group, and data collection was conducted through a researcher-developed survey questionnaire. For data analysis, the study employed statistical techniques including weighted mean, Pearson r correlation, and ranking procedures. The study found that teaching personnel strongly value professional development in all key areas, emphasizing the need for institutional support to encourage continuous learning and professional growth. Respondents also demonstrated high levels of cognitive, emotional, and physical engagement, indicating a strong commitment to their roles. A moderate positive correlation was observed between professional development and employee engagement, implying that while professional development plays a significant role, other personal and organizational factors also influence engagement levels. Financial constraints were identified as the primary barrier to participation, followed by time limitations and heavy workloads. Despite recognizing the benefits of professional development, these obstacles continue to limit full participation among teaching staff. The study underscores the critical role of institutional support in promoting professional development tailored to the needs of teaching personnel as a strategy to enhance employee engagement. Drawing from the study's findings, a set of recommended guidelines for professional development was formulated to strengthen and sustain engagement among educators.

Keywords: professional development, employee engagement, institutional support, teaching personnel, educator development, engagement strategies, training guidelines, workforce enhancement.

**PROMOTIONAL OFFERS AND CUSTOMER RETENTION OF SPANDA
MESSAGE AND SPA IN ROOSEVELT, QUEZON CITY**

Jay Harold Ramos, Patricia Bianca Espina, Pearl Ann Mapeso,
Marjorie Marin, Christine Jhon Mercado, Jennylene Abalos

Abstract

This study explores the relationship between promotional offers and customer retention at Spanda Massage and Spa. Founded in 2017 as a home-based massage service, the business initially struggled with increasing sales and attracting a stable customer base. In response, Spanda conducted market research and introduced targeted promotional strategies. The study examines specific promotional tools such as discounts, loyalty cards, bundled service packages, and seasonal offers. It also investigates key elements of customer retention, including service quality, customer satisfaction, cost-effectiveness, and overall convenience. This study adopted a quantitative correlational research design, utilizing a survey questionnaire to collect data. Statistical tools such as weighted mean, ranking, and Pearson correlation were used to assess the relationship between promotional offers and customer retention. The researchers employed purposive sampling, a non-probability technique, to select participants who had availed of promotional offers from Spanda Massage and Spa. This ensured that the respondents could provide meaningful insights into their experiences and loyalty toward the business. The results revealed that customers place high value on receiving greater benefits through discounted rates (weighted mean: 3.72), and they appreciate being rewarded for their loyalty through repeat visit incentives (weighted mean: 3.67). Bundled services were also favored for offering convenience in experiencing multiple treatments (weighted mean: 3.62), and many respondents expressed a preference for visiting the spa during promotional periods (weighted mean: 3.66). In terms of customer retention, a clean and calming environment was seen as a key indicator of service quality (weighted mean: 3.78). High levels of customer satisfaction also contributed to strong word-of-mouth recommendations (weighted mean: 3.72). Additionally, competitive pricing without compromising service quality (weighted mean: 3.68) and the availability of bundled packages (weighted mean: 3.70) further supported customer loyalty. Hypothesis testing showed a very strong and positive correlation between promotional offers and customer retention, with an r -value of 0.875 and a p -value of < 0.0001 , indicating a statistically significant relationship at the 0.05 level. The researchers recommend that Spanda Massage and Spa adopt a targeted promotional strategy to improve customer retention. These recommendations focus on maximizing the impact of promotional offers to deliver a more rewarding customer experience, encourage consistent patronage, increase revenue, and cultivate lasting customer loyalty.

Keywords: customer retention, promotional offers, loyalty programs, discounts, bundled services, customer satisfaction, service quality, spa marketing, quantitative research, pearson correlation

**QUALITY CONTROL PRACTICES IN BIG BREW IN
SELECTED BRANCHES IN QUEZON CITY**

Blesy Ta-aca, Diosdado Pizon, Kylene Anne Mariz Buniao,
Marry Rose Pilar, Jovelyn Tarrayo, Jennylene Abalos

Abstract

Big Brew has emerged as a popular beverage business offering products such as milk tea, coffee, and other refreshments. Through its franchising approach, the brand has expanded to multiple locations, including several branches in Quezon City. However, the researchers, as frequent customers, have observed inconsistencies in product taste and ingredient quality across different branches. These variations raised concerns regarding the brand's quality standards. Therefore, this study was conducted to investigate the potential impact of quality control practices on the consistency and overall customer experience of Big Brew, particularly in its Quezon City branches. This study examined the quality control practices of Big Brew with the goal of maintaining product consistency, protecting the brand image, minimizing operational costs, and strengthening customer loyalty, all of which contribute to long-term growth and profitability. The researchers employed a descriptive research design to evaluate various aspects of quality control, including ingredient quality, taste testing, equipment maintenance, hygiene and safety standards, service quality, inventory management, and operational processes, as well as the challenges faced by employees in implementing these practices. A combination of stratified and convenience sampling techniques was used to determine the respondents. Data collection was conducted through a survey questionnaire, and the responses were analyzed using statistical tools such as frequency and percentage distribution, weighted mean, and ranking to draw conclusions and achieve the study's objectives. The results of the study indicate that Big Brew demonstrates strong quality control practices, especially in areas such as ingredient quality, flavor consistency, equipment upkeep, sanitation and safety protocols, and service delivery. These practices play a key role in maintaining high product standards, building customer trust, and reinforcing the brand's overall credibility. The findings revealed that Big Brew branches generally maintain high standards in key areas, including ingredient management and overall operational practices. However, the study also identified several challenges encountered by employees in implementing quality control measures. These challenges include errors in measuring ingredient proportions, inconsistencies in ingredient quality, equipment breakdowns, improper storage methods, and variations in brewing times and serving temperatures. To address these concerns, the researchers recommend that branch owners consider upgrading equipment and investing in modern technology to enhance efficiency and consistency. Moreover, it is essential to provide comprehensive staff training to reduce operational errors and improve adherence to quality standards. As a long-term solution, the researchers propose the implementation of the Improving Quality Standards Action Plan (IQSAP) a structured approach aimed at increasing accuracy in operations and supporting the sustainability and competitiveness of Big Brew in the beverage industry.

Keywords: big brew, quality control practices, ingredient management, operational efficiency, customer satisfaction, equipment maintenance, staff training, brewing standards, iqsap, beverage industry

**REMOTE WORK POLICY AND RETENTION OF EMPLOYEES IN A
BUSINESS PROCESS OUTSOURCING COMPANY IN ILOILO CITY**

Jannah Mae Dumrique, Deanisa Samson, Chickie Salting, Angella Mae Estallo,
Caissa Nova Solina, Riva Manalo

Abstract

This study investigates 5 Star Virtual Assistants, a Philippine-based outsourcing company located in Iloilo City that delivers a range of virtual assistant services to support business operations. The research aims to propose a strategic retention plan to enhance employee engagement and reduce turnover in a remote work environment. By identifying key factors influencing employee satisfaction and commitment, the study seeks to provide actionable insights that will strengthen retention strategies, increase productivity, and improve overall organizational performance. This study adopts a descriptive-correlational research design to examine the connection between remote work and employee retention. A total of 206 virtual assistants from 5 Star Virtual Assistants in Iloilo City participated in the study, selected through purposive sampling. Data was collected between December 2024 and April 2025 through an online survey distributed via Google Forms. The study reveals that out of 206 respondents, the majority (64.5%) are female, and a significant portion (72.27%) are between 18 to 27 years old. In terms of tenure, 67.27% have been with the company for 0–2 years, 17.73% for 3–4 years, and 15% for 5 years or more, indicating a predominantly new workforce. The findings indicate that the company's remote work setup significantly influences employee retention. Respondents expressed positive perceptions of the work culture, work-life balance, and communication, each with a composite mean of 3.35. Compensation and benefits were viewed as satisfactory (composite mean = 3.23), while the organizational culture promoting collaboration and innovation further contributed to retention (composite mean = 3.30). Additionally, employees strongly agreed that career development opportunities are available (composite mean = 3.34), reinforcing the company's role in supporting employee growth and engagement. This study underscores the pivotal impact of remote work policies on employee retention in a business process outsourcing company based in Iloilo City. The proposed retention plan addresses critical areas including workplace culture, work-life balance, communication effectiveness, compensation and benefits, organizational values, and opportunities for career growth. Enhancing these dimensions is expected to promote sustained employee engagement, reduce turnover, and boost overall productivity and organizational success.

Keywords: remote work, employee retention, virtual assistants, work-life balance, organizational culture, career development, business process outsourcing (bpo), iloilo city, employee engagement, compensation, and benefits.

**REWARD AND RECOGNITION OF THE EMPLOYEE AT
NEXTGEN CAFE QUEZON CITY**

Ronalyn Gonzaga, Marian Jane Toyco, Rhoanne Mae Bon, Jan Bunddy Arcibal,
Jessa Torrenueva, Danilo Molera Jr.

Abstract

This study assessed the effectiveness of the reward and recognition system at NextGen Café, Quezon City, with particular focus on its impact on employee motivation and satisfaction. Using Vroom's Expectancy Theory as the theoretical framework, the research analyzed four fundamental components of recognition: objectives, flexibility, timeliness, and diversity. The study also aimed to identify barriers to effective recognition and examine how employee demographics influence their perceptions of the system. A descriptive quantitative research design was employed in the study. Data were gathered from fifty employees using a census sampling method. A structured and validated questionnaire was used, consisting of three main sections: demographic profile, assessment of the rewards and recognition system, and perceived challenges. The collected data were analyzed using statistical tools such as frequency, percentage, weighted mean, Pearson-r correlation, and t-tests to examine the relationship between demographic variables and employee perceptions of the reward system. The results indicated that 92% of employees were aged between 21 and 30, with a nearly even gender distribution, 48% male and 52% female. All respondents had less than three years of service. Employees generally viewed the rewards and recognition system as moderately effective, with mean ratings of 3.04 for objectives, 3.02 for flexibility, 2.94 for timeliness, and 2.88 for diversity. No significant differences in perception were found based on age, gender, or length of service. Key issues identified included an excessive focus on financial incentives, perceived favoritism, recognition being delivered privately rather than publicly, and rewards that did not match individual preferences. The results indicate that while employees acknowledge the existence of a rewards and recognition system, there is a strong desire for more personalized, fair, and timely acknowledgment. The lack of significant differences across demographic factors suggests a shared perception among staff members. Employees highlighted the need for a broader range of meaningful incentives that go beyond monetary compensation. To address these concerns, the researchers proposed a three-part program: performance-based recognition, daily appreciation from peers and managers, and a transparent points-based rewards system. These strategies aim to cultivate inclusivity, strengthen employee morale, and enhance overall job satisfaction.

Keywords: employee motivation, recognition system, rewards program, job satisfaction, performance-based incentives, inclusivity, transparency, peer appreciation, vroom's expectancy theory, employee morale

**RISK FACTORS AND PERFORMANCE OF SAMPLED FRANCHISING BUSINESS
IN NOVALICHES QUEZON CITY: BASIS FOR DEVELOPING
RISK MITIGATION STRATEGIES**

Haina Mecah Lascuna, Angela Bie, Joan Baldeviso, Patricia Esteves,
Sophia Kayne Jiao, Reynold Bangalisan

Abstract

This study examines the risk factors affecting the performance of franchising businesses, with a focus on selected Big Brew branches in Novaliches, Quezon City. As franchising continues to thrive in the Philippines, particularly in urban areas, it becomes increasingly important to understand the challenges and risks that franchisees face to maintain business viability and growth. Grounded in Agency Theory and the Resource-Based View (RBV), the research explores how capital, market, operational, and legal/regulatory risks influence franchise performance. Key performance indicators assessed include trust and communication between franchisors and franchisees, compliance with operational support, brand perception, and the effectiveness of training programs. The findings aim to contribute to a deeper understanding of the franchise business landscape and provide practical insights for improving risk management and performance in similar franchise operations. The study utilized a descriptive-correlational research design to assess the relationship between key risk factors and the performance of selected Big Brew franchise branches in Novaliches, Quezon City. Data collection was conducted through a survey questionnaire distributed to 8 franchise owners and 16 employees, totaling 24 respondents. Participants were selected using a cluster sampling method to ensure representation from various branches. The gathered data were processed and analyzed using frequency counts, percentages, weighted means, Pearson-r correlation, and ranking techniques to evaluate the degree of influence each risk factor had on the identified performance indicators. The findings indicate that Big Brew franchise branches are generally effective in managing capital and operational risks, supported by strategic financial planning, consistent employee training, and efficient production systems. However, challenges persist in the optimal use of resources and in ensuring that corporate support aligns with the operational needs of individual branches. Respondents rated legal compliance and market risk awareness highly, suggesting that franchises take proactive steps to adhere to regulations and respond to shifting customer demands. In terms of performance, there were strong levels of trust and communication reported among stakeholders, though areas for improvement include managerial transparency and service consistency. A moderate but significant positive correlation was found between risk factors and overall business performance, highlighting the importance of comprehensive risk management strategies. Major challenges identified include managing customer expectations, the increasing cost of raw materials, and inconsistent operational support, all of which may negatively impact both performance and growth if not addressed effectively. To improve the performance and resilience of Big Brew franchise branches in Novaliches, Quezon City, the following recommendations are proposed: Provide financial literacy training to franchise owners to enhance decision-making and risk management. Adopt dynamic pricing and inventory control systems to address rising material costs and increase operational efficiency. Offer ongoing employee development to ensure consistent service quality and compliance with standards. Strengthen internal communication to foster better collaboration between franchisees and franchisors. Enforce legal and regulatory compliance through clear, standardized operational guidelines. Ensure brand consistency across all branches to build customer trust and loyalty.

Keywords: franchise performance, big brew, financial literacy, dynamic pricing, inventory control, employee training, internal communication, legal compliance, brand consistency, risk mitigation, novaliches, business sustainability

**ROLE OF COFFEE SHOP AMBIENCE IN SHAPING CUSTOMER EXPERIENCE
TOWARD BRAND LOYALTY**

Maria Hilda Aragon, Angelyn Concepcion, Florence Joy Reyes,
Jenyfae Rocero, Noemi Trigueros, Ariane Astudillo

Abstract

This study aims to examine how the ambience of Charnest Cafe Snack Bar & Cafeteria influences customer experience and contributes to brand loyalty among its patrons along Susano Road, Novaliches, Quezon City. This study applied Mehrabian and Russell's Stimulus-Organism-Response (S-O-R) theory to examine four key constructs: physical ambience, sensory experience, emotional connection, and marketing advantage. Using quantitative correlational research design, the study employed convenience sampling to survey 50 actual customers of Charnest Cafe Snack Bar & Cafeteria. Data was gathered through structured questionnaires and analyzed using descriptive statistics such as frequency distribution and weighted mean, along with non-parametric tests including the Kruskal-Wallis H test and Mann-Whitney U test. About 72% of the respondents were female, and 80% were between the ages of 19 and 25. Among the ambience factors, physical ambience had the greatest impact (weighted mean = 3.53), with cleanliness (3.72), design (3.56), and overall space (3.19) rated highest. The study also found notable influence on marketing advantage (3.38), emotional connection (3.46), and sensory experience (3.45). There were no significant differences in perceptions across age groups ($p > 0.05$). However, a significant gender difference was observed ($p = 0.036$), with females reporting a stronger emotional connection to the coffee shop's ambience. The findings suggest that young female customers are particularly influenced by the ambience of coffee shops, which plays a key role in shaping their experience and fostering brand loyalty. Cleanliness and attractive interior design were the most appreciated aspects of physical ambience, while welcoming colors, fragrances, and music enhanced the overall sensory experience. To capitalize on these insights, Charnest Café should consider marketing strategies that focus on maintaining cleanliness, refreshing the décor, incorporating signature scents, optimizing lighting and music, organizing community events, and providing comprehensive staff training to improve customer service.

Keywords: coffee shop ambience, customer experience, brand loyalty, physical ambience, sensory experience, emotional connection, marketing strategies, charnest café, customer demographics, female customers

**ROLE OF CUSTOMER ENGAGEMENT IN SHAPING PURCHASE MOTIVES:
BASIS FOR IMPROVING ONLINE STRATEGY**

Shiela Mae Aranel, Reyza Mae Centeno, Darwin Gamit,
Kristine Taripa, Clarence Zapata, Ariane Astudillo

Abstract

Coffee flights have emerged as a popular and authentic way for consumers to experience a variety of coffee flavors. As the coffee industry continues to introduce creative offerings to attract diverse audiences, this trend has gained significant traction on social media. Visually appealing content, interactive posts, and user engagement, especially on platforms like Facebook, have played a key role in driving consumer interest. However, despite high levels of online interaction, many coffee businesses still struggle to convert digital engagement into actual sales. The study adopted a quantitative-correlational approach to investigate the link between customer engagement and purchasing motivations. A total of 20 respondents participated in the survey. To analyze the data, the researchers applied statistical tools including frequency and percentage, weighted mean, and Pearson's r to assess whether a significant relationship exists between customer engagement and purchase motives. Findings indicate that most respondents were female young adults aged 18 to 29 who regularly purchase coffee, reflecting a loyal and interested consumer group. The study also found a statistically significant moderate positive correlation between customer engagement and purchase motivation. Key factors such as emotional attachment, brand loyalty, information seeking, alternative evaluation, and final purchase decisions all showed meaningful associations. This suggests that customers who are more actively engaged with a brand tend to demonstrate stronger motivations to purchase. The study revealed that while consumers often interact with brands and conduct online research before purchasing, many still question the reliability of the information available. Social media serves as a useful tool for discovering and comparing products, yet building trust in digital content remains a challenge. To overcome this, researchers recommend that coffee shops adopt a well-rounded online strategy that features authentic storytelling, meaningful customer engagement, and incentive-based programs. Establishing credibility through consistent and targeted messaging can help coffee shops foster long-term customer relationships and increase brand loyalty.

Keywords: customer engagement, purchase decision, digital trust, social media, brand interaction, online marketing strategy, authentic content, loyalty programs, coffee shops, consumer behavior

**ROLE OF INNOVATION IN STARTUP SURVIVAL:
INSIGHTS FROM EMERGING MARKETS**

Francis Ivan De Guzman, Jernalyn Unsi, Sarah Jane Josol,
Angelica Lopez, Chiqui Ramos, Randy Villaseñor

Abstract

Launching a startup in an emerging market can be difficult due to intense competition and limited resources. However, innovation serves as a vital tool for overcoming these challenges, enabling new businesses to adapt, grow, and gain a competitive edge. This study investigates how innovation contributes to the survival and success of startups in emerging markets, highlighting the importance of adopting creative strategies to navigate evolving market demands. The study utilized a quantitative descriptive research design to gather and interpret numerical data, aiming to describe the traits of a specific population or phenomenon. A sample of 20 participants was selected using the t-test formula, consisting of 5 male business owners, 5 female business owners, 5 male customers, and 5 female customers. Data collection was conducted through a survey questionnaire, administered using convenience sampling. The responses were analyzed using statistical methods such as frequency, percentage, ranking, and weighted mean. The majority of respondents were between the ages of 16 and 25, with a slightly smaller group aged 26 to 35. Gender representation was balanced, with equal numbers of male and female participants among both business owners and customers. In terms of income, most respondents reported earning between ₱10,000 and ₱20,000, while a smaller percentage fell within the ₱21,000 to ₱30,000 range. Respondents strongly agree that innovation plays a vital role in the survival and success of startups. Both business owners and customers emphasized the importance of transitioning to online marketplaces, adopting new technologies, and adjusting their value propositions to meet customer needs and market demands. Aligning business models with current conditions, coupled with investments in capital, technological advancements, process improvements, and customer feedback, were identified as key drivers of growth. To ensure sustainability, participants highlighted the need to explore venture capital opportunities, form strategic partnerships, and deliver unique value offerings. Challenges such as gaining customer trust, building brand loyalty, and encouraging product adoption, especially among older clients, were effectively addressed through influencer marketing, testimonials, and transparent communication. The study recommends that startups foster a culture of innovation, invest in research and development, collaborate with industry professionals, listen to consumer feedback, and stay agile in adopting new technologies. By doing so, startups can establish a strong foundation for long-term growth and market competitiveness.

Keywords: innovation, startup survival, online marketplace, value proposition, technological advancement, customer feedback, venture capital, brand trust, influencer marketing, strategic partnerships, market adaptation, sustainable growth

**ROLE OF OFFICE ADMINISTRATORS IN ENHANCING ORGANIZATIONAL
COMMUNICATION WITHIN ECONOMIC DEVELOPMENT OFFICE: A CASE STUDY**

Christine Dale Palero, Somaya Macawaris, Celina Llaneta, Evelyn Albarida,
Crisking Manaligod, Kimberly Joyce Embile

Abstract

This proposed study examines the role of office administrators in strengthening organizational communication within Economic Development Offices, with a focus on Ortigas, Pasig City. The researchers aim to explore both the functions of office administrators and the communication strategies they utilize to enhance internal communication. The goal is to support the development of communication skills that contribute to greater efficiency and effectiveness within the organization. A quantitative research design was employed in this study, with a total of fifty (50) participants consisting of office administrators and staff from the Economic Development Office in Ortigas, Pasig City. The respondents were selected using purposive sampling, and data was gathered through a structured survey questionnaire designed to assess organizational communication practices. The findings indicate that most respondents were full-time office administrators aged 35 to 44. Team meetings emerged as the primary form of communication used within the Economic Development Office. Office administrators play a vital role in enhancing organizational communication by ensuring the effective assessment and dissemination of information. This includes maintaining clarity, timeliness, accuracy, efficiency, and accessibility of messages. Furthermore, effective communication strategies identified include the use of modern technology, the promotion of an open and collaborative environment, and the regular monitoring and evaluation of both internal and external communication channels. These practices contribute significantly to strengthening the communication skills of office administrators and improving overall organizational communication. To improve communication within the organization, the study recommends that office administrators regularly facilitate team meetings and integrate technological communication tools to effectively reach a broader audience. Using clear and straightforward language is essential to minimize confusion and misinterpretation. Additionally, cultivating an open and supportive environment allows employees to comfortably share ideas and opinions without fear of judgment, thereby fostering collaboration and trust. Lastly, consistently monitoring and evaluating employee responses is crucial in identifying areas that require improvement and in determining the overall effectiveness of current communication practices, enabling continuous enhancement of organizational communication.

Keywords: organizational communication, office administrators, team meetings, technological communication, open environment, employee feedback, communication effectiveness, workplace collaboration, information clarity, communication strategies.

**SERVICE QUALITY TOWARDS CUSTOMER SATISFACTION OF
MOTOR VEHICLE RETAILING BUSINESSES IN CALOOCAN**

Vinalyn Sarzata

Abstract

Motorcycles serve as a fast, affordable, and convenient mode of transportation, particularly in Caloocan City, which was declared the “Motorcycle Capital of the Philippines” in 2017. Due to increasing demand, motorcycle retail businesses have rapidly expanded in the area. However, many still face challenges such as service delays, understaffing, and inconsistent service quality, leading to customer dissatisfaction. This study assesses service quality and customer satisfaction in motorcycle retail businesses in Caloocan by utilizing the SERVQUAL model (Reliability, Assurance, Tangibility, Empathy, Responsiveness) alongside the 4Ps of marketing (Product, Price, Place, Promotion). It aims to evaluate customer perceptions, determine the relationship between service quality and customer satisfaction, identify service-related issues, and propose practical recommendations for improvement. This study employs a descriptive-correlational design to examine the relationship between service quality and customer satisfaction in selected motorcycle retail shops in Caloocan, namely Motortrade, Yamaha, Honda, and Transcycle. A total of 80 customers, with 20 respondents per branch, voluntarily participated and assessed their service experience using a validated questionnaire. The purpose of the study was personally explained to each respondent prior to data collection. Findings based on the SERVQUAL model indicated that customers were generally satisfied with all five dimensions of service quality. The highest satisfaction scores were recorded in assurance (mean = 4.31), tangibility (mean = 4.27), and empathy (mean = 4.21). In terms of the 4Ps, high satisfaction was also observed in product (mean = 4.34), price (mean = 4.42), and promotion (mean = 4.35). However, the most common concern was delays in document processing, particularly with the release of official receipts, certificates of registration, and license plates (mean = 2.71). Issues related to service maintenance, such as back jobs, were reported less frequently. Statistical analysis showed a moderate positive correlation ($r = 0.3621$) between service quality and customer satisfaction, confirming the presence of a significant relationship. Although customers expressed overall satisfaction with the services offered, the study identified responsiveness and document processing as areas requiring improvement. To address these concerns, the study recommends the reorganization of branch operations into specialized departments, the hiring of additional staff, enhancement of document management systems, and continuous employee training. These strategies aim to improve service quality, increase customer satisfaction, and foster stronger brand loyalty.

Keywords: service quality, customer satisfaction, motorcycle retailing, servqual model, 4ps marketing, caloocan, business administration

**STABILITY OF MARKETING STRATEGIES OF SELECTED ONLINE
LIVE SELLERS BASIS ENHANCING STRATEGIC RESILIENCE**

Ma Kristine Trangia, Lara Shaina Briones, Renz Andrei Lugatiman,
Lyslie Melorin, Myla Muñoz, Emely Apelin, Reynold Bangalisan

Abstract

This study investigates the stability of marketing strategies among selected online live sellers in the suburban area of Rodriguez, Rizal, with particular focus on business profiles, strategic practices, and the challenges faced in a competitive digital selling environment. As e-commerce continues to expand, live selling has emerged as a crucial platform for small businesses by enabling real-time customer interaction and immediate product promotion. However, online sellers frequently encounter obstacles such as fluctuating audience engagement, pricing competition, technological limitations, and logistical inefficiencies. This study aims to provide data-driven insights into the resilience and effectiveness of their current marketing strategies. A quantitative descriptive research design was used, with data collected from 15 purposively selected online live sellers through structured survey questionnaires distributed via Google Forms. The survey focused on business profile variables, including years of operation, starting capital, quarterly profits, and time allotted to live selling. It also measured the perceived stability of marketing strategies based on the 4Ps: product, price, promotion, and people (customer engagement). Findings revealed that the majority of respondents were relatively new in the business (1–2 years), operated with low initial capital (₱10,000 or less), and earned quarterly profits ranging from ₱10,000 to ₱30,000. Most sellers conducted live selling as a part-time activity. Respondents expressed strong agreement with the stability of strategies related to product quality and customer engagement, while indicating moderate agreement with pricing and promotional strategies. Key challenges identified included market competition, unreliable internet connectivity, limited digital tools, and unpredictable buyer behavior. The results underscore the need for strategic support mechanisms to enhance the resilience of online live sellers in suburban markets. Business owners, consultants, and policymakers may use these findings to develop training programs and infrastructure improvements aimed at increasing competitiveness and sustainability. Recommendations include upskilling sellers in digital marketing, improving access to stable internet and logistics, and encouraging innovation in promotional strategies to adapt to shifting consumer behavior.

Keywords: online live selling, marketing strategy, strategic resilience, e-commerce, 4ps, small business, suburban entrepreneurs, rodriguez rizal

**STRATEGIC TRAINING AND DEVELOPMENT MODEL OF
SELECTED BPO COMPANY IN METRO MANILA**

Ronald Abrazaldo

Abstract

Training is essential in enhancing employee performance and skill development, which directly contributes to achieving organizational goals. This holds true for both new hires and tenured employees, regardless of their educational backgrounds. In the context of Business Process Outsourcing (BPO) companies, effective training becomes even more critical due to the client-facing nature of the industry. However, some customer service agents are perceived as lacking knowledge and confidence, often demonstrated through poor English communication skills or prolonged response times while searching for answers. This study aims to explore the training and development practices of a selected BPO company in Metro Manila to address such performance concerns and improve service quality. This study employs a descriptive-inferential research method to evaluate the strategic training and development practices within the selected BPO company. Data were collected through questionnaires, interviews, and direct observations. The demographic profile of the respondents was analyzed using frequency distribution. To evaluate training best practices, weighted mean and ANOVA tests were applied. These statistical tools were used to identify patterns and determine the significance of various respondent characteristics on the training and development strategies adopted by the company. The results indicated that demographic factors such as age, gender, civil status, educational attainment, salary, and length of service had no significant impact on the strategic training and development model of the selected BPO company. Regarding innovation and learning opportunities in training, the responses yielded a grand mean of 3.08, categorized as "Moderately Agree," suggesting a neutral sentiment among employees. Similarly, financial support for training received a grand mean of 3.04, also indicating a "Moderately Agree" response. These findings imply that while training structures are in place, employees remain ambivalent about their effectiveness and the level of financial investment provided. The findings suggest a need for the BPO company to enhance its training methodologies, especially by incorporating programs that develop intercultural communication skills, given the global nature of the industry. Furthermore, management must foster transparency regarding financial resources allocated for training and openly communicate future organizational plans. This openness is essential for cultivating employee trust and aligning workforce expectations with the company's strategic direction.

Keywords: training and development, bpo, employee performance, strategic training, learning innovation, intercultural communication, organizational transparency, metro manila

**STUDENT MANAGEMENT SYSTEM: DIGITALIZATION OF REGISTRAR
DEPARTMENT STUDENT SERVICES AT BESTLINK COLLEGE OF THE PHILIPPINES**

John Lester Tañacao, Mark Angelo, Annalie Bantillo, Noeliza Mae Comboy,
Vincent Salingsing, Reynold Bangalisan

Abstract

This study examines the effectiveness of digitalizing Registrar Department services at Bestlink College of the Philippines through the implementation of a Student Management System (SMS). Anchored on the Technology Acceptance Model 3 (TAM3), the system aims to streamline essential administrative tasks, including online enrollment, account issuance, class scheduling, and grade viewing for over 50,000 students during the 2024–2025 academic year. Despite these goals, the system has faced challenges such as technical downtimes, slow response times, inflexible scheduling, and restricted grade access for students with unpaid balances. A mixed-methods research design was employed. A total of 381 purposively stratified student respondents across various programs participated in the study. Data was gathered using documentary analysis and a researcher-made survey questionnaire. Statistical tools such as weighted mean and ranking were used to evaluate the SMS's features and identify persistent challenges experienced by users. Findings indicated that the online enrollment feature was considered "effective" (mean = 2.77). However, other components account issuance (mean = 2.45), class scheduling (mean = 2.26), and grade viewing (mean = 2.47), were rated as "ineffective," resulting in an overall weighted mean of 2.48. Respondents reported system downtimes during peak hours, complicated enrollment procedures, and delayed grade releases as recurring issues. Based on these results, an action plan was formulated to address technical limitations and enhance system usability. To improve the effectiveness of the SMS, recommendations include upgrading system infrastructure to enhance performance, automating account and grade update processes, integrating flexible scheduling features, and providing real-time notifications to improve communication. Revisions to institutional policies, particularly those affecting access to academic records and stronger technical support mechanisms were also suggested. The study concludes that while the SMS has introduced significant digital services, its current implementation falls short in delivering a fully efficient and accessible system. Ongoing system evaluation, iterative improvements, and policy alignment are essential to meet the dynamic needs of the student body and ensure sustainable digital service delivery at Bestlink College of the Philippines.

**SUSTAINABILITY STRATEGIES OF BARANGAY MICRO BUSINESS ENTERPRISE
FOOD PARK STALLS IN VALENZUELA CITY: A BASIS FOR
A PROPOSED DEVELOPMENT PLAN**

Dania Abella, Mica Dumilon, Cleodhale Bartolome, Jecil Mae Gloria, Jahanie Pagsidan,
Edrian Ornopia, Reynold Bangalisan

Abstract

This study investigates the sustainability strategies employed by Barangay Micro Business Enterprises (BMBEs) operating food park stalls in Valenzuela City, focusing on marketing styles, promotional benefits, product quality, pricing strategies, and production processes. Anchored on Utami's (2023) Resource-Based Theory, the research underscores the importance of internal resources such as food quality, innovation, and eco-conscious practices as drivers of competitive advantage. The findings aim to propose a development plan for enhancing the long-term viability of these microenterprises. A descriptive-quantitative research design was employed. Data was collected from 30 purposively selected respondents comprising 10 food stall owners and 20 employees from 10 stalls located at 608 MH Del Pilar Destino Food Park. Statistical tools, including frequency, percentage, weighted mean, Mann-Whitney U test, and Kruskal-Wallis H test, were used to analyze the data. Results showed that most vendors were male, single, aged 18–25, with less than one year of business operations and monthly incomes below ₱10,000. Among the sustainability strategies assessed, the production process received the highest mean rating (3.35), while promotional benefits received the lowest (2.63). Statistical analysis revealed no significant differences in strategy implementation based on business duration, except for pricing strategy, which showed a significant variance ($p = 0.0029$). Key challenges included inadequate parking, high rental fees, and limited storage space. Based on these findings, a development plan was proposed to improve marketing visibility, enhance promotional strategies, optimize pricing models, and raise production standards. The study recommends capacity-building programs focused on financial literacy and marketing skills, enhanced branding through social media engagement, and the introduction of value meals to increase affordability. Additionally, collaboration with barangay officials is encouraged to address logistical concerns such as parking and sanitation. Overall, the study emphasizes the role of strategic and sustainable practices in supporting the growth and resilience of BMBEs in the competitive food service industry and proposes actionable steps to ensure long-term success.

Keywords: sustainability strategies, barangay micro business enterprise, food park, pricing strategy, production process, marketing, resource-based theory, valenzuela city

**SUSTAINABLE MARKETING STRATEGIES OF SMALL ENTERPRISES FOOD
AND BEVERAGE BUSINESSES IN NOVA STOP, NOVALICHES
QUEZON CITY: A GUIDE FOR MARKETING PLAN**

Jerelyn Dela Cruz, Rose Jean Floria, Mejaliah Shachael Hachaso,
Angel Joy Aragon, Mark Lavado, Reynold Bangalisan

Abstract

This study investigates the sustainable marketing strategies utilized by small food and beverage enterprises in Nova Stop, Novaliches, Quezon City, and proposes a marketing plan to support environmentally responsible business practices. As consumer awareness of sustainability continues to rise, food and beverage businesses face increasing pressure to adopt eco-conscious initiatives while remaining profitable. The research aims to assess current practices, identify gaps, and recommend strategies that align sustainability with long-term business viability. A descriptive-correlational research design was employed. The study focused on four establishments Sphynx Diner, Chill Bar, 31st Street, and Jairah using survey questionnaires and documentary analysis. A total of 20 respondents, including 4 owners and 16 employees, were selected through purposive sampling. Statistical tools such as weighted mean, Pearson-r correlation, and ranking were used to evaluate the relationship between years of operation and the implementation of sustainability practices, as well as to identify existing challenges. Findings revealed that the participating businesses showed a degree of commitment to sustainability, particularly using fresh ingredients, fair pricing, and ethical labor practices. However, notable deficiencies were observed in areas such as organic product offerings, sustainability-centered promotions, employee training on eco-practices, and the use of digital technology for green marketing. Most businesses had been operating for 4 to 6 years and employed between 5 and 10 workers, indicating potential for scalable improvements. Barriers to comprehensive sustainable marketing included high operational costs, limited availability of eco-friendly suppliers, and a lack of expertise in sustainability practices. The study recommends practical and cost-effective strategies such as bulk purchasing, collaboration with local suppliers, implementation of sustainability training programs, and enhanced use of digital marketing platforms. The proposed marketing plan integrates environmentally responsible initiatives with profit-oriented objectives, aiming to embed sustainability into daily operations. The study concludes that while a foundational effort exists, a more structured, inclusive, and innovative approach is essential to meet evolving customer expectations and environmental standards.

Keywords: sustainable marketing, food and beverage industry, small enterprises, eco-friendly strategies, digital marketing, environmental responsibility, business sustainability, novaliches

**TEACHERS SATISFACTION AND RETENTION, KEY INFLUENCING
FACTORS: AN ASSESSMENT**

John Arnel Busico, Ma. Angelika Discaya, Jamaica Faith Madeja,
Allyza Pacatang, Eloisa Mae Peusca, Bryan Tubao

Abstract

Teacher satisfaction and retention are critical in sustaining educational quality in higher education institutions. This study assesses the key factors influencing teacher satisfaction and retention at Bestlink College of the Philippines (BCP), focusing on compensation, workload, institutional support, work environment, student behavior, and opportunities for professional development. A quantitative-descriptive research design was employed. A total of 30 teaching personnel from the BCP Quezon City branch were selected using purposive sampling. Data was gathered through a structured survey questionnaire that assessed satisfaction levels across the identified factors. Statistical tools such as frequency, percentage, weighted mean, ANOVA, and t-test were used to analyze the responses and determine variations based on demographic variables. The results showed that teachers were generally satisfied with their workload, institutional support, work environment, and student behavior. Moderate satisfaction was observed in areas related to compensation and professional development, indicating potential areas for enhancement. Significant differences in satisfaction were noted based on age, years of service, and educational attainment, whereas gender showed no significant effect. The findings highlighted generational differences in priorities younger teachers emphasized career advancement and development opportunities, while older faculty valued stability and work-life balance. Positive student behavior and a collaborative work culture emerged as strong factors for teacher retention. The study recommends enhancing compensation packages and providing more robust professional development programs to further improve teacher satisfaction and reduce turnover rates.

Keywords: teacher satisfaction, faculty retention, compensation, workload, institutional support, professional development, higher education, bestlink college

**TECHNOLOGICAL AGILITY OF THE HUMAN RESOURCE EMPLOYEES OF
GOLDWAYS MANPOWER SERVICES IN BARANGAY TALIPAPA,
QUIRINO HIGHWAY, NOVALICHES QUEZON CITY**

Antonio Mico, Genvie Anthony Arboiz, Daren Galvez, Nicole Francine Ven,
Sheila Mae Villegas, Danilo Molera Jr.

Abstract

This study explores the technological agility of Human Resource (HR) employees at Goldways Manpower Services, focusing on their adaptability to emerging HR technologies, capacity for data-driven decision-making, and commitment to continuous learning. Guided by the Dynamic Capabilities Theory and the Input–Process–Output (IPO) model, the research addresses the widening gap between existing technological competencies and the demands of modern HR functions. It seeks to identify skill deficiencies and examine the influence of demographic factors on technological adaptability, with the goal of enhancing operational efficiency and aligning HR practices with evolving recruitment standards. A descriptive research design was used, targeting the total population of 20 HR employees through total population sampling. Data was collected via a structured survey questionnaire covering four core areas: proficiency in HR tools, adaptability to new technologies, data-driven decision-making, and continuous learning. Statistical tools, including frequency, percentage, weighted mean, Kruskal-Wallis H test, and Mann-Whitney U test, were employed to analyze the data and identify key challenges, which served as the foundation for a proposed training intervention. The majority of respondents were female (70%) and aged 51 and above (55%), with most having 4 to 5 years of service and all holding a bachelor's degree. Findings indicated that HR employees demonstrated agility in HR tool proficiency and data-driven decision-making and very high agility in adaptability and continuous learning. While no significant differences were observed based on gender, length of service, or educational attainment, age showed a significant influence on technological adaptability. The primary challenge identified was insufficient institutional support for new technologies. The study concludes that despite strong adaptability, the technological effectiveness of HR staff is hindered by limited training opportunities, resource constraints, and resistance to change. Demographic factors had minimal influence on agility, reinforcing the importance of institutional investment in focused training and change management. To address this, the proposed Tech Agility Advancement Program aims to enhance HR capabilities in software proficiency, troubleshooting, and digital analytics. This initiative is designed to foster a more agile, tech-empowered HR department capable of making strategic, data-informed decisions.

Keywords: technological agility, human resource management, digital adaptability, hr tools, training program, dynamic capabilities, ipo model, goldways manpower services

**THE EFFECT OF TECHNOLOGICAL ADVANCEMENTS ON THE LEVEL OF
PRODUCTIVITY OF EMPLOYEES AT RTK SIOMAI'S FACTORY IN QUEZON CITY**

Khatrina Jaralve, Maureen Gwen Flores, Maria Cristy Quiliste,
Kristine Garcia, Jhon Dale Palmes, Reynold Bangalisan

Abstract

This study investigates the effect of technological advancements on employee productivity at RTK Siomai's Factory in Quezon City. With the ongoing transformation of industrial operations through automation, it becomes essential to evaluate both the benefits and challenges of such advancements in the workplace. Grounded in Bhatti et al.'s theory on employee participation and its influence on job satisfaction, commitment, and productivity, this study focuses on assessing the changes brought by the implementation of the Automatic Siomai Machine. The objective is to compare productivity levels before and after the adoption of the new technology. A comparative research design was utilized, employing purposive sampling to select 15 employees who experienced both pre- and post-automation work conditions. Data was collected through structured survey questionnaires. Weighted mean was used to evaluate productivity levels, while a t-test was conducted to determine significant differences in employee productivity before and after technological integration. The findings indicated a clear improvement in productivity following the introduction of the Automatic Siomai Machine. The mean score for downsizing improved from 2.00 to 3.33, reflecting better efficiency and risk management. Employee performance and overall productivity increased to mean scores of 2.88 and 2.87, respectively. Despite these gains, the study also noted recurring challenges, including machine-related technical issues, noise, and operational downtime, which affected workflow and employee adaptability. The study concludes that technological advancements such as automated machinery significantly enhance employee productivity. However, to maximize benefits, these improvements must be supported by human-centered strategies, including continuous training, technical assistance, and employee engagement. Balancing automation with worker development and well-being is essential for sustaining productivity and ensuring operational success.

Keywords: technological advancement, employee productivity, automation, industrial efficiency, automatic siomai machine, human-centered strategies, workplace innovation, business administration, quezon city

**THE EFFECTIVENESS OF PRODUCTION AND QUALITY CONTROL
TOWARDS CUSTOMER SATISFACTION IN KERISNACK**

Mikaela Angel Iguin, Althea Bernante, Luzvi Jdm Fernandez,
Zhermae Gonzales, Aldrin Salivio, Vinalyn Sarzata

Abstract

The purpose of this study is to investigate the effectiveness of production and quality control in relation to customer satisfaction at Kerisnack, a food business in Quezon City. The research was conducted in response to customer complaints about inconsistent product quality, unsavory food, and poor hygiene practices. This study aimed to assess the impact of key production elements, including recipe standardization, ingredient sourcing, product quality checks, and food safety handling, on customer satisfaction. A quantitative correlational research design was employed. Data were collected from 29 customers and 29 employees, totaling 58 respondents, using survey questionnaires. Statistical tools such as frequency, percentage, ranking, weighted mean, and Pearson's correlation coefficient were applied to analyze the data. The study found that ineffective production and quality control processes at Kerisnack significantly impacted customer satisfaction. Respondents reported dissatisfaction with recipe standardization (0.83 and 1.14), product quality checks (0.93 and 1.15), ingredient sourcing (0.67 and 0.85), and food safety handling (0.63 and 0.70), rating these areas as very dissatisfied and highly ineffective. Reflecting these findings, the researchers emphasized the need for clear recipe guidelines, improved supplier evaluation, regular quality control checks, employee training programs, and proper equipment maintenance. Hypothesis testing revealed a significant relationship between production quality checks and customer satisfaction ($r = 0.9389$, $p = 0.0020$). The study highlighted major concerns from both customers and employees regarding Kerisnack's production quality and its effect on satisfaction. Customers reported issues with recipe consistency, portion sizes, and overall food quality, while employees cited ineffective quality control, particularly in ingredient sourcing, food safety, and hygiene practices. The researchers proposed an improvement plan that includes standardized recipes, portion control, accurate ingredient measurements, better supplier selection, and regular quality checks to enhance operational efficiency and meet customer expectations.

Keywords: production, quality control, customer satisfaction

**THE IMPACT OF CLOUD COMPUTING ON EMPLOYEE PRODUCTIVITY AND
OPERATIONAL EFFICIENCY AT MANAGEMENT CONSULTANCY
SERVICES IN TAGUIG CITY**

Jovelyn Arinque, Narimah Alioden, Danica Reandelar,
Elgine Redoloza, Kimberly Joyce Embile

Abstract

Cloud computing has significantly transformed workplace operations by offering greater reliability, accessibility, and collaboration. As one of the fastest-adopted technologies across industries, cloud computing eliminates the limitations of local storage by allowing real-time access to files, streamlined collaboration, and improved data management. This study explores how cloud computing impacts employee productivity and operational efficiency within management consultancy services in Taguig City, highlighting its benefits, challenges, and areas for improvement. A quantitative research design was utilized, with structured survey questionnaires distributed to employees working in management consultancy firms. The study employed purposive sampling to target individuals directly engaged in cloud-based workflows. Statistical tools were used to analyze the relationship between cloud computing usage and two key variables: employee productivity and operational efficiency. The findings indicated that cloud computing contributed to enhanced workflow processes, automation of repetitive tasks, and improved document management, all of which supported increased productivity. However, limitations were observed in terms of integration issues and insufficient training. While a weak positive correlation was found between cloud computing and employee productivity, the relationship was not statistically significant. The limited adoption of advanced tools and lack of strategic optimization were identified as possible reasons for this outcome. Respondents recommended greater focus on automation, cloud-based project management platforms, structured data handling, and regular training initiatives to fully leverage cloud computing's potential. This study emphasizes the role of cloud computing in improving productivity and operational efficiency within management consultancy services in Taguig City. Although the impact on productivity was statistically modest, cloud solutions were recognized for their potential in streamlining operations, reducing workload redundancy, and supporting time-sensitive tasks. The results suggest that cloud computing should be viewed not as a standalone solution but as a strategic tool that requires effective implementation, employee adaptability, and continuous system integration. Businesses are encouraged to invest in cloud infrastructure, staff development, and workflow optimization to maximize the benefits of digital transformation.

Keywords: cloud computing, employee productivity, operational efficiency, document management, project management tools, workflow automation, business technology, digital transformation, consultancy services, taguig city

**THE IMPACT OF ENHANCING PROMOTIONAL STRATEGY OF PAPA JESS PIZZA
HOUSE AMERICAN STYLE: BASIS FOR A PROPOSED IMPROVEMENT PLAN**

Joshua Ray Laison, Mary Joy Capito, Rozel Plaza, John Rhobert Sua-an,
John Paolo Sagun, Randy Villaseñor

Abstract

Papa Jess Pizza House American Style, established in May 2022, relies on effective promotional strategies to expand its business and enhance brand recognition. This study examines the impact of promotional strategies, specifically social media and display media, on customer engagement and sales. A quantitative research design using the descriptive method was employed. One hundred customers of Papa Jess Pizza House were surveyed through a questionnaire to evaluate their perceptions of display and social media promotions. Purposive sampling was used to select participants relevant to the study's objectives. The questionnaire included sections on demographic profiles, assessments of promotional strategies (display and social media), and encountered problems. Data were analyzed using frequency, percentage, weighted mean, and z-tests to determine significant differences between groups. The study found that display media, such as tarpaulins and in-store displays, significantly influenced customer awareness and purchase decisions ($M = 2.82$). Customers noted that tarpaulins caught their attention ($M = 3.17$) and that in-store displays encouraged them to try new items ($M = 2.88$). However, social media presence was less effective ($M = 1.78$) due to low visibility and engagement. Z-tests showed no significant difference in perceptions of promotional strategies between age groups under 18 and 19 to 30 (display media: $z = 1.753$, $p = .086$; social media: $z = .954$, $p = .345$) or between under 18 and 41 and above. A significant difference, however, was found between the age groups 19 to 30 and 31 to 40 regarding display media. Display media effectively captured customer attention and influenced buying decisions, while social media strategies required improvement to increase visibility and engagement. Customizing promotional strategies for different age groups could further optimize their impact by focusing on digital marketing for younger adults and traditional approaches for older demographics.

Keywords: promotional strategies, social media, display media

**THE IMPACT OF INFLUENCERS' ENDORSEMENT TO PURCHASE
INTENTION OF CONSUMERS IN NOVALICHES, QUEZON CITY**

Melanie Nomo, Rozelyn Amper, Elmer Basmayor, Lyza Joy Del Barrio,
Samantha Salinas, Reynold Bangalisan

Abstract

This study examines the influence of social media influencers' endorsements on the purchase intentions of skincare consumers in Novaliches, Quezon City, where both digital and traditional forms of marketing shape consumer behavior. Guided by the influencer marketing framework of Khan et al. (2019), the study explores five key variables, perceived quality, product match-up, attractiveness, credibility, and brand loyalty. The objective is to assess how these variables impact consumer decisions and brand perception in the skincare sector. A descriptive-correlational research design was employed. Data were gathered from fifty (50) skincare consumers through a structured survey questionnaire. The responses were analyzed using frequency, percentage, weighted mean, and Pearson-r correlation to determine the strength and nature of the relationship between influencer endorsements and consumer purchase intentions. The findings showed that influencer endorsements significantly impact consumers' purchase intentions, especially when the endorser is perceived as credible, attractive, and aligned with the brand. Respondents strongly agreed with endorsements where influencers were authentic users of the product. Among the variables studied, perceived quality and credibility emerged as the strongest drivers of trust and buying behavior. Pearson-r correlation analysis revealed a high positive relationship between influencer endorsements and purchase intention. The data also indicated that demographic factors such as age, income, and frequency of social media use influenced how consumers responded to influencer marketing. The study concludes that while influencers play a critical role in introducing products to consumers, long-term purchase intention is more closely tied to product quality, brand reputation, and customer satisfaction. It is recommended that businesses collaborate with credible influencers who reflect brand values, while also investing in product development and data-driven marketing strategies. Engagement techniques, such as exclusive promotions and transparent communication, can further strengthen brand loyalty. These findings offer valuable insights for marketers aiming to develop influencer-driven campaigns that effectively connect with local consumers and contribute to sustainable growth in the skincare industry.

**THE IMPACT OF PHYSICAL ENVIRONMENT ON CUSTOMER EXPERIENCE AND
CUSTOMER SATISFACTION AT CHOWKING FAIRVIEW CENTER MALL**

Jeanne Carla Cornejo, Danilyn Maghanoy, Grace Ann Ocampo,
Kyle Hyacinth Setarios, Mylene Vicente, Randy Villaseñor

Abstract

This study investigates how the physical environment of Chowking Fairview Center Mall affects customer experience and satisfaction. In the highly competitive fast-food industry, factors such as layout, cleanliness, seating availability, ambiance, and safety are critical in shaping consumer behavior and overall satisfaction. The research aims to identify which elements of the physical environment have the most significant impact on customer perception and loyalty. Descriptive quantitative research design was employed in this study. Survey questionnaires were distributed to 100 purposively selected customers of Chowking Fairview Center Mall. The questionnaire assessed customer responses to various physical attributes of the restaurant environment, including store layout, restroom conditions, seating availability, hygiene standards, ambiance, ventilation, and signage. Findings revealed general dissatisfaction among customers, particularly concerning restroom hygiene, ventilation, seating comfort, and the presence of security personnel. Restroom cleanliness (mean = 2.25) and overall hygiene standards (mean = 2.29) received some of the lowest ratings. Conversely, aspects such as store layout (mean = 2.63) and direction signage placement (mean = 2.57) were viewed more positively. Pearson correlation analysis indicated significant relationships between store layout and space utilization, as well as between restroom conditions and hygiene standards, highlighting the direct impact of the physical environment on customer satisfaction. In conclusion, this study underscores the critical role of optimizing a restaurant's physical environment in enhancing customer experience and satisfaction. Based on the findings, key recommendations include improving cleanliness, especially restroom hygiene, enhancing ventilation, and refining overall design elements. These improvements are essential to better meet customer needs and foster repeat visits.

Keywords: customer satisfaction, customer experience, physical environment, fast food restaurant, store layout, restroom hygiene, ambiance, ventilation

**THE IMPACT OF THE MICROFINANCE LOAN PROGRAM OF ASA PHILIPPINES
FOUNDATION, INC. ON THE FINANCIAL GROWTH OF ENTREPRENEURS
IN TANDANG SORA, QUEZON CITY**

Shiela Mae Lao, Arjie Giray, Wilson Padon, Era Jane Panaligan,
Christina Regacho, Eugenio Bayani

Abstract

This study aims to evaluate the impact of ASA Philippines Foundation, Inc. loan programs on entrepreneurs in Tandang Sora, Quezon City, specifically examining how these loans have influenced business growth, income stability, and overall financial well-being. It also explores the challenges borrowers face in loan repayment and financial management. By gathering insights from entrepreneurs who have availed themselves of ASA Philippines Foundation, Inc. loan programs, the research seeks to provide valuable information for financial institutions, policymakers, and business owners. The study highlights the importance of financial support in helping small businesses grow and, by analyzing the effects of these loan programs, aims to deepen understanding of how microfinance assists entrepreneurs and strengthens local economies. A mixed-methods research strategy will be employed, combining qualitative methods such as interviews and case studies to gain insights into borrower experiences, with quantitative methods such as surveys to measure business performance. The study will be limited to firms that have borrowed exclusively from ASA Philippines Foundation, Inc., excluding those that have obtained financing from banks, other microfinance institutions, or informal sources. General economic conditions, such as inflation, government policies, and sector-wide financial trends, will not be considered. Data collection will rely primarily on self-reported financial statements and questionnaire responses, which may introduce potential biases. Furthermore, the study's analysis will be confined to the designated research period and will not assess the long-term impacts of ASA's microfinance program on entrepreneurs. The study surveyed 30 entrepreneurs, most of whom were aged 26–45, with 60% being women. A majority (87%) operated in the retail sector, and about half had businesses less than a year old, earning under ₱30,000 per month. Findings revealed that the ASA Philippines Foundation's microfinance loan program significantly improved business performance and financial growth. Access to capital enabled entrepreneurs to expand their businesses, increase profits, and maintain steady cash flow. It also strengthened financial stability, allowing for further investments and cost reductions. While ASA Philippines' loan program provides crucial capital to entrepreneurs, long-term success also depends on management skills, market conditions, and individual effort. Financial assistance should be complemented with training, mentorship, and a supportive business environment to promote sustained growth and business sustainability.

Keywords: microfinance, income stability, financial stability, entrepreneurs,

**THE IMPACT OF USING FINTECH FOR OPERATIONAL EFFICIENCY IN MICRO
ENTERPRISES IN NOVALICHES QUEZON CITY**

Camila Canares, Rizza Abong, Jolyn Cruz, Tricia Mae Calacat,
Erica Paola Malonzo, Eugenio Bayani

Abstract

This study examines the impact of Financial Technology (FinTech) on the operational efficiency of microenterprises in Novaliches, Quezon City, Philippines. Microenterprises, typically employing fewer than ten people, play a crucial role in the local economy but often face challenges such as limited access to capital, inefficient resource allocation, and reliance on manual financial management. The study adopted a quantitative descriptive research design, which is particularly effective in addressing the specific objectives of the research. This approach enables the collection of numerical data and provides a clear, systematic overview of the variables under investigation. The primary goal of using this design was to obtain detailed information on the impact of FinTech on the operational efficiency of microenterprises in Novaliches, Quezon City. The study utilized Likert scale analysis to evaluate survey data and determine the extent to which FinTech tools contribute to the operational efficiency of microenterprises. Results indicate that many businesses experienced increased profits and revenue due to improved access to digital payment systems, mobile banking, and online sales platforms. These FinTech tools enable microenterprises to reach a broader customer base, facilitate faster transactions, and provide more convenient payment options, ultimately leading to higher sales. The study highlights that FinTech adoption among a diverse group of micro-entrepreneurs has significantly improved profitability, operational efficiency, and customer satisfaction. By leveraging digital tools such as mobile banking, payment platforms, and transaction analytics, businesses have reduced costs, enhanced risk management, and expanded their market reach. These findings can guide the development of targeted training programs and support systems aimed at helping microenterprises optimize operations and sustain growth.

Keywords: fintech, operational efficiency, inefficient resource allocation, manual financial management, customer satisfaction

**THE INVENTORY MANAGEMENT PRACTICES OF DAEGU KOREAN SUPERMARKET
IN SAN JOSE DEL MONTE BULACAN**

Ariane Reyne Bernardino, Jenny Lou Abuan, Jheania Mae Cuyong,
Ellen Colambot, Aldrin John Salaber, Vinalyn Sarzata

Abstract

Daegu Korean Supermarket is a retail business located at EB Town Center in San Jose Del Monte, Bulacan, offering authentic Korean, Japanese, and other Asian products. Based on observations and informal interviews conducted by the researchers, it was found that the store's stock levels and product displays significantly affect its sales and profitability. The inventory system and overall performance of Daegu Korean Supermarket are multifaceted and influenced by various internal factors. The researchers employed a descriptive research design to examine the inventory management practices at Daegu Korean Supermarket. Purposive sampling was used to select 30 employees who could provide valuable insights into the store's inventory management. Data were collected through a survey questionnaire and analyzed using frequency and percentage distributions, weighted means, and the H-test statistical methods. The data reveal several challenges that significantly impact inventory management, with spoilage and damaged items being the most pressing concern, as reported by 40 percent of respondents. This indicates that spoilage and damage lead to increased costs, as damaged goods lose value, either partially or entirely, resulting in direct financial losses. Additionally, products that spoil before they can be sold cause lost revenue for the business. The researchers emphasize the importance of employee training in inventory management. Regular and comprehensive training programs can significantly enhance stock handling, accuracy, and overall performance. It is recommended to develop a training program covering key areas such as FIFO (First In, First Out), stock rotation, use of inventory management systems, and proper handling of perishable goods. Additionally, establishing a clear and detailed inventory management policy that outlines standard operating procedures (SOPs) for receiving, storing, and disposing of products is essential for consistent and effective stock control.

Keywords: inventory management, daegu korean supermarket

**THE ROLE OF ARTIFICIAL INTELLIGENCE IN EMPLOYEES’
PRODUCTIVITY AT QUIRKY CREATIVE STUDIOS INC.**

Marielle Aguilar, Roanne Mae Carcallas, Mirasol Duyaguit, Red Jwyneth Duyan,
Ashley Ann May-as, Kimberly Joyce Embile

Abstract

Artificial Intelligence (AI) is revolutionizing numerous industries, including the multimedia sector. In video editing, the integration of AI presents both opportunities and concerns. While AI tools can streamline workflows and increase efficiency, there is a potential risk of losing human touch and creative authenticity traditionally associated with artistic work. Some artists express concerns that excessive reliance on AI may diminish personal expression and the emotional depth embedded in human-created art. Nevertheless, many creatives are now embracing AI as a collaborative tool to enhance their artistic capabilities and expand the boundaries of creative expression, without sacrificing the unique human element. This study investigates the impact of Artificial Intelligence on employee productivity, as well as the benefits and challenges of using AI within QCS Inc. This study is grounded in the Technology Acceptance Model (TAM), which serves as its theoretical framework. A quantitative research design was employed to ensure accurate measurement and analysis of the variables related to AI usage and employee productivity. This approach allows for a systematic examination of how AI tools are perceived and utilized within the organization, as well as their impact on work performance. The researchers utilized a standardized questionnaire to collect data from 30 employees of Quirky Creative Studios Inc. in Caloocan City. A purposive sampling technique was employed to select participants who were directly involved in the use of AI tools within the organization. Based on the findings, the researchers recommend that Quirky Creative Studios Inc. provide additional employee training programs. The results indicated that employees who received proper training on AI tools demonstrated higher levels of efficiency and productivity. Therefore, regular training programs should be conducted to enhance employees' knowledge and skills in effectively and efficiently utilizing AI tools. These sessions should cover key areas such as AI functionalities, troubleshooting techniques, and strategies for maximizing the features of AI tools. By addressing the perceived ease of use and usefulness as indicated by the respondents, these training initiatives can promote greater acceptance and more productive use of AI within the organization.

Keywords: artificial intelligence (ai), employee productivity, technology acceptance model (tam), ai training, ai tools, multimedia industry, quirky creative studios inc. (qcs inc.), purposive sampling, quantitative research, ai integration

**THE ROLE OF PACKAGING DESIGN IN BRAND PERCEPTION
AND CONSUMER LOYALTY**

Stephanie Rodrigo, Sandra Beriña, Ailyn Cabujat, Jamaica Dayao,
Cherie Ann Maghari, Ariane Astudillo

Abstract

This research investigates how packaging design impacts brand perception and consumer loyalty, with a focus on KaiNeko Cafe. The study examines how visual communication strategies used in packaging relate to resulting consumer reactions, seeking insight into how packaging helps build a brand and retain customers. This study employed a quantitative correlational research design to examine the relationship between packaging design and brand perception and consumer loyalty for KaiNeko Cafe products. It investigates the impact of the visual presentation of packaging design on consumer perceptions and loyalty toward KaiNeko Cafe, a local establishment at 23 Road 14 GSIS Hills Subdivision, Brgy. 164, Caloocan City, using a purposive sample of thirty (30) consumers. Based on the survey results, KaiNeko Cafe's primary consumers are females aged 21 to 25 who visit about once a week. These consumers generally have a positive perception of the cafe's packaging materials, finding them protective, although transit protection could be improved. The packaging visuals and product information are considered acceptable, with clear typography and well-organized information being strengths, while the aesthetic of the colors and information presentation could be enhanced. The labeling is seen as attractive, and the shape of the packaging is considered important for handling and perceived quality. Overall, respondents show strong brand awareness, find the cafe attractive, and feel a sense of attachment and commitment, indicating a good level of consumer loyalty. Generic packaging misses an opportunity to build brand recognition and emotional connection. By introducing a distinctive design element such as a specific color palette, a recurring motif, a unique texture, or a sustainable material choice, the cafe can create packaging that stands out and communicates its brand values. This visual differentiation, as highlighted by the study, directly impacts how customers perceive the cafe and can foster a stronger sense of identity and loyalty, encouraging repeat business due to a more memorable and brand-aligned experience.

Keywords: packaging design, brand perception, consumer loyalty

**TIKTOK ONLINE SHOP: INFLUENCE OF CONTENT MARKETING
ON CONSUMER PURCHASE INTENTION**

Cecil Cabral, Aaron Mark Aratas, Ginalyn Mahusay, Laurence Pineda,
Mariecar Sanchez, Reynold Bangalisan

Abstract

This study investigates how content marketing on TikTok affects consumer purchase intentions, emphasizing the platform's dynamic and user-centric content environment. Grounded in Self-Congruity Theory, the research explores how the alignment between a user's self-image and the marketing content they view drives their decision-making. The study highlights that when TikTok content resonates with a user's identity or values, it significantly increases the likelihood of purchasing behavior, underscoring the power of personalized and relatable content in digital marketing strategies. This study employed a descriptive quantitative research design to examine the influence of product quality, user feedback, and price affordability on consumer purchase decisions among TikTok users aged 18–35. Data was collected from 50 respondents through a structured questionnaire. Statistical tools such as frequency distribution, ranking, and weighted mean were used to analyze the results. The findings aim to provide insights into how these key factors shape purchasing behavior in the context of content marketing on TikTok. The study reveals that TikTok content marketing plays a significant role in shaping consumer purchasing decisions. Key drivers include visually appealing product demonstrations, genuine user reviews, and affordable pricing. Notably, purchasing behavior varies across demographics: younger and frequent buyers prioritize price, while older and less frequent users place more importance on quality and user feedback. Despite its effectiveness, concerns persist around inconsistent product quality, delayed deliveries, and skepticism toward influencer authenticity, highlighting areas for improvement in platform-based marketing strategies. The study highlights TikTok's effectiveness as a marketing platform while exposing its susceptibility to misleading content. It recommends enhancing consumer awareness of content credibility, enforcing stricter advertising guidelines, and improving transparency to build trust. For marketers, success hinges on producing authentic, value-driven content that resonates with target audiences. These findings offer critical insights for brands, influencers, and platform developers aiming to refine their TikTok strategies while upholding ethical standards and protecting consumer interests.

Keywords: tiktok, content marketing, purchase intention, self-congruity theory, consumer behavior, product quality, user feedback, price affordability, influencer trust, advertising transparency

**TRENDS ON MARKETING STRATEGIES: ANALYZING COMPETITIVE ADVANTAGE
OF SELECTED BARBERSHOPS ALONG QUEZON CITY**

Adrian Laya, Kerwin Vagilidad, Jayson Landao, Jeremy Galo,
Charlie Jurado, Vinalyn Sarzata

Abstract

In today's era, where male grooming and self-care are increasingly prioritized, barbershops hold significant social and economic importance by offering services that enhance physical appearance and reflect current hairstyle trends. This study aims to examine the effectiveness of marketing strategies as a source of competitive advantage among selected barbershops in Quezon City, focusing on the elements of service, price, place, promotion, and people. While previous research has emphasized the modernization of barbershops particularly through technological innovations and the use of social media a gap remains in understanding how these advancements contribute to measurable competitive advantages in localized settings. Existing literature broadly underscores the relevance of marketing and trend responsiveness but lacks specific insights into their practical impact on barbershops operating within distinct communities. This study employed correlational quantitative research design and utilized purposive sampling to gather data from customers of Johnrory, Friendly Blessing, and Inye Barbershops through structured surveys. The collected data were analyzed using Analysis of Variance (ANOVA). Findings indicated significant differences in customer perceptions among the three barbershops across the five key marketing elements: service, price, place, promotion, and people. Based on the findings, most respondents visit barbershops on a monthly basis, with the primary reason for their visit being to get a haircut. The results indicate that Johnrory Barbershop received a weighted mean of 2.8 in terms of service, while Friendly Blessing Barbershop had a weighted mean of 3.1 for the price customers pay for a haircut. Inye Barbershop achieved the highest rating, with a weighted mean of 3.43, for its promotional efforts on social media aimed at attracting customers. The null hypothesis for each variable was rejected, as the p-values were found to be less than the standard significance level of 0.05. This suggests that there are statistically significant differences among the selected barbershops in terms of service, price, and promotional strategies. Enhancing social media presence provides a powerful platform for barbershops to showcase their expertise, highlight services, and attract potential customers. Creating a comfortable and engaging in-shop atmosphere significantly improves the customer experience, fostering satisfaction and loyalty. Personalizing services helps build stronger customer relationships, while transparent pricing and clear communication of value contribute to trust and long-term patronage. Leveraging digital marketing and localized advertising strategies can expand market reach and draw in new clients. Establishing a professional website enhances credibility and strengthens brand identity. Additionally, expanding manpower can increase service capacity and reduce customer wait times. Finally, regularly monitoring and responding to customer feedback through online platforms supports continuous service improvement and customer engagement.

Keywords: barbershop marketing, social media presence, customer experience, personalized service, transparent pricing, digital marketing, local advertising, professional website, manpower expansion, customer feedback, service improvement, brand credibility

**UTILIZATION OF (AI) MACHINARIES ON EMPLOYEES SATISFACTION AT
YANYAN INTERNATIONAL (PHILS) INC. IN CALOOCAN CITY**

Wengelyn Lugdat, Angeline De Leon, Noreen Dotimas, Theresa Kristen Hernandez,
Christine Joy Narvato, Reynold Bangalisan

Abstract

This study investigates the effectiveness of artificial intelligence (AI) machinery in enhancing employee satisfaction and operational performance at Yanyan International (Phils) Inc., within the context of increasing digital transformation in the manufacturing sector. Grounded in Lin and Chen's (2021) theory of employee satisfaction in AI, the research examines key factors influencing job satisfaction, role clarity, and workload management associated with AI implementation. It also highlights barriers to successful integration, including outdated machinery, insufficient employee training, and persistent maintenance challenges. Employing a quantitative-descriptive research design, the study gathered data from 30 purposively selected employees of Yanyan International (Phils) Inc. using a researcher-made survey questionnaire. To analyze the data, statistical tools such as the weighted mean, Kruskal-Wallis H-test, and ranking were applied. The study tested the null hypothesis that there are no significant differences in employee satisfaction based on demographic variables, including age, gender, and length of employment. The findings revealed that the integration of AI machinery led to increased employee productivity, enhanced role clarity, and more efficient task distribution. The highest levels of satisfaction were associated with employees' adaptability to new AI-driven roles. Statistical analysis indicated no significant differences in satisfaction across demographic variables such as age, gender, and length of employment, suggesting that organizational culture and management practices play a more critical role in shaping employee satisfaction than individual characteristics. The most frequently cited challenge was the need for consistent maintenance of AI machinery, which remains a barrier to seamless operations. The results indicate that AI technologies can significantly enhance employee satisfaction and operational efficiency when implemented with appropriate support systems. To ensure long-term success, a comprehensive strategic plan was developed, encompassing targeted training programs, role realignment, workload optimization, predictive maintenance, and operational streamlining. Each initiative was structured with a defined timeline and assigned stakeholders to support sustainable implementation. The study concludes that effective AI adoption requires not only technological investments but also parallel commitments to employee development. It recommends the adoption of inclusive workplace policies, continuous skills training, and proactive maintenance strategies to cultivate a dynamic, high-performing organizational environment.

Keywords: artificial intelligence, employee satisfaction, operational efficiency, manufacturing industry, yanyan international, role clarity, workload optimization, ai integration, predictive maintenance, employee training, organizational culture, strategic pl

**UTILIZATION OF MARKETING STRATEGIES ON CUSTOMER OF
4J TOPSILOGAN: BASIS FOR IMPROVEMENT**

Lorie Bautista, Ricchivern Colinares, Christian Durna, Jemarie Muega,
Nichole Jay Vergara, Ariane Astudillo

Abstract

Silog businesses are widely popular in the Philippines due to their quick, tasty, and affordable meal offerings, such as tapsilog, tocilog, and cornsilog. One such example is 4J Topsilogan, which offers a variety of silog meals at budget-friendly prices. Given the high demand, the market has become saturated with numerous silog stalls, resulting in intense competition. To thrive in this environment, businesses must implement effective marketing strategies, particularly the 5Ps: Product, Price, Place, Promotion, and People. These elements are essential for attracting and retaining customers. While 4J Topsilogan is known for its delicious food and reasonable prices, it struggles with promotion. Most of its customers discover the business through walk-ins or word-of-mouth, as it lacks substantial advertising efforts and a strong online presence. This study aims to examine how 4J Topsilogan applies its marketing strategies and how these influence customer satisfaction. Furthermore, it seeks to propose recommendations to enhance the business's competitive advantage in the growing silog market. The researchers conducted a survey involving 100 customers of 4J Topsilogan located in Kaybiga, Caloocan City to evaluate its marketing strategies based on the 5Ps: Product, Price, Place, Promotion, and People. Utilizing a convenience sampling method, the study gathered data on customer demographics and their level of satisfaction with the business. The study revealed that the majority of 4J Topsilogan's customers were young adults, predominantly male, who typically purchased food once a week. Overall, customers expressed high satisfaction with the quality of the food and considered the pricing to be fair. While the location was deemed acceptable, respondents suggested improvements to the facilities. Among the 5Ps, promotion emerged as the weakest area, as the business lacked visible advertising and discount offers. Although the staff provided fast service, customers indicated a desire for greater friendliness and professionalism in customer interactions. The findings indicate that 4J Topsilogan performs well in delivering flavorful meals at affordable prices, which contributes to high customer satisfaction and repeat patronage. However, several areas for improvement were identified. A major concern is the lack of promotional efforts, as the business does not actively advertise or offer attractive discounts, limiting its reach to potential new customers. Additionally, the absence of adequate dining facilities impacts the overall customer experience, with many respondents expressing a desire for a more comfortable environment. While the staff demonstrates service efficiency, enhancing their friendliness and professionalism would further elevate customer satisfaction. In conclusion, while 4J Topsilogan excels in product quality and pricing, focused improvements in promotion, infrastructure, and customer service are essential for sustained growth and competitiveness in the market.

Keywords: silog business, 4j topsilogan, customer satisfaction, marketing strategies, 5ps of marketing, product quality, pricing, promotion, place, people, customer service, food stalls, caloocan city

**UTILIZING SOCIAL MEDIA PLATFORMS AS PERCEIVED BY THE CUSTOMERS OF
COFFEE SHOPS TOWARDS ENHANCED CUSTOMER ENGAGEMENT**

Cris Angelo Orbon, Mark Jerik Bate, Janine Chua, Hershey Gugulan,
Lars Vyron Tolentino, Ariane Austodillo

Abstract

In today's era, social media has become an essential tool for businesses to connect with customers, enhance brand awareness, and foster loyalty. This study examines the use of social media platforms by coffee shops, focusing on Ok Café in San Jose Del Monte, Bulacan. It aims to assess customer perceptions of social media strategies in terms of relevance, visual appeal, informative value, and entertainment value, and to analyze how these factors influence customer advocacy, involvement, satisfaction, and trust. A descriptive-correlational research design was employed, involving 100 respondents who participated by completing a structured survey questionnaire. Results indicate that customers place high importance on visually appealing and informative content, which enhances engagement. Statistical analysis revealed a low but significant positive correlation ($r = 0.5564$, $p = 0.0455$) between social media utilization and customer engagement, suggesting that while social media presence contributes to engagement, strategies should be refined to further improve its effectiveness. The findings support a strategic marketing plan aimed at boosting Ok Café's social media relevance, customer trust, and brand interaction. Based on survey responses, the study recommends enhancing content strategies, incorporating personalization, and aligning with current social media trends to strengthen customer relationships. These insights provide practical guidance for coffee shop owners and marketers on leveraging social media to drive business growth and sustain engagement.

Keywords: social media marketing, customer engagement, coffee shops, digital marketing, consumer behavior, brand awareness

**THE ROLE OF ALLOWANCES AND SUPERVISION IN ON-THE-JOB TRAINING
SATISFACTION: A CASE STUDY OF BSOA STUDENTS IN THE HOST COMPANY**

Rendy Reyes, Raymar Bagalangit, Angierose Casul, Ma Tonie Rose Francisco,
Rizza Joy Ladia, Bryan Tubao

Abstract

This study aimed to assess the level of satisfaction of Bachelor of Science in Office Administration (BSOA) students at Bestlink College of the Philippines during their On-the-Job Training (OJT). Specifically, it examined key variables including the amount of allowance received, its perceived adequacy, the extent to which it covered necessary expenses, the frequency of feedback received, the accessibility of supervision, and the availability of monetary opportunities. The study employed random sampling techniques and utilized a survey questionnaire to collect data from 50 fourth-year BSOA students at Bestlink College of the Philippines. To analyze the data, the researchers used statistical tools such as frequency and percentage, weighted mean, and the Independent Samples t-test to determine significant differences in satisfaction levels. The findings revealed that while students generally acknowledged receiving allowances, these were deemed insufficient to fully cover essential expenses such as transportation, meals, and other necessities. Among the variables assessed, the clarity of allowance distribution received the highest mean score (mean = 3.16), whereas the adequacy of the allowance in covering basic living expenses received the lowest (mean = 2.94). Students emphasized the importance of regular feedback and structured guidance, with supervision being positively recognized. However, certain areas, particularly financial support for professional development, were rated lower (mean = 3.01). Statistical analysis confirmed a significant relationship between students' overall satisfaction with their On-the-Job Training (OJT) and factors such as the adequacy of allowances and the quality of supervision provided by host companies. This study concludes that allowances and supervision significantly influence the satisfaction levels of BSOA students during their On-the-Job Training (OJT). Based on the findings, it is recommended that host companies consider increasing the stipend or providing additional financial assistance to better support students' daily expenses. Furthermore, supervisors are encouraged to enhance the frequency of performance assessments and conduct regular check-ins, including evaluations and one-on-one mentoring sessions, to provide students with structured guidance and support throughout their training.

Keywords: bsoa students, on-the-job training (ojt), student satisfaction, allowance adequacy, supervision, financial support, performance assessment, mentoring, host companies, bestlink college of the philippines

**EVALUATING THE LEVEL OF ACCEPTABILITY OF MILKFISH-BASED SIOMAI
AMONG RESIDENTS AT BARANGAY SAN AGUSTIN NOVALICHES QUEZON CITY**

Jemma Lyn Quisel, Paolo Santos, Jimmy Mhike Alit, Eula Mersil Galleto, Karl Tatad, Mar Domagtoy

Abstract

Siomai, a popular Chinese dumpling frequently served as dim sum, has become a staple snack in the Philippines. Traditionally, Filipino siomai is made from ground pork, beef, or chicken, mixed with fillers like garlic and carrots, then wrapped in thin wonton wrappers. While pork siomai remains the favorite, its high cholesterol content raises health concerns, including an increased risk of heart disease. Furthermore, the researchers have noted that some communities in the Philippines face issues with overpriced siomai that contains minimal meat. These factors inspired the researchers to develop a healthier, cost-effective alternative using milkfish. This study will assess the acceptability of milkfish-based siomai among residents of Barangay San Agustin, Novaliches, Quezon City. This study utilized a descriptive research design aimed at systematically gathering data through observation and detailed description. Data collection methods included surveys administered via structured questionnaires. To optimize resource use while ensuring representativeness, quota sampling was employed, enabling the selection of a sufficiently large and diverse sample. Accordingly, one hundred (100) respondents were drawn from the total population of 25,355 residents in Barangay San Agustin, Novaliches, Quezon City. The survey questionnaire served as the primary instrument for data collection, designed to elicit reliable and accurate responses relevant to the study's objectives. The evaluation of the milkfish siomai revealed a weighted mean score of 3.39 for Appearance, which was verbally interpreted as "Much Acceptable." In terms of Texture, the product achieved a weighted mean of 3.09, also categorized as "Much Acceptable." However, the Taste attribute received a lower weighted mean of 2.30, corresponding to an "Acceptable" rating. Among the one hundred (100) respondents, the largest age cohort was 16-20 years old, comprising 36% of the sample population. Female participants made up the majority, accounting for 56%, and a significant portion of respondents identified as Catholic. From a total of 82 recommendations and suggestions aimed at product improvement, the most common was to add more vegetables, which accounted for 28% of the responses, with a frequency of 23. This study assessed the acceptability of milkfish-based siomai by evaluating its appearance, texture, and taste attributes including sweetness, sourness, and saltiness, to guide adjustments to ingredient proportions.

Keywords: milkfish siomai, product acceptability, sensory evaluation, appearance, texture, taste attributes, sweetness, sourness, saltiness, ingredient optimization, food innovation

**INNOVATION MALUNGgay COOKIES WITH CHIA SEED AND RAISIN AMONG
RESIDENTS OF BARANGAY STA. MONICA NOVALICHES QUEZON CITY**

Clara Fernandez, Steven Reign Hilvano, Chriswin Julian Sarcol, Chrishia Mae Ymana,
James Daniel Yu, Mark Austin Faustino, Mar Domagtoy

Abstract

Cookies, typically enjoyed as a baked snack or dessert, have been creatively reinvented this year, showcasing unique flavors, textures, aromas, and appearances. Researchers have introduced healthier alternatives by replacing traditional ingredients, such as swapping chocolate chips with malunggay, chia seeds, and raisins. This modification aims to cater to children and individuals with dietary restrictions, offering a more nutritious take on the classic cookie. This study utilized a quantitative research design to determine how the researcher's method of planning, organizing, and conducting the study can influence the results. This approach is essential in evaluating the development of malunggay cookies with chia seeds and raisins. A total of fifty (50) respondents from Brgy. Sta. Monica was selected using simple random sampling to ensure a representative sample of the population. Most of the respondents were aged 34 years and above, with 28 individuals, or 56%, being female. The majority of participants were residents of Brgy. Sta. Monica, Novaliches, Quezon City. In terms of taste, respondents agreed that the product had noticeable levels of sweetness, bitterness, and saltiness. Regarding texture, they strongly agreed that the cookies exhibited desirable softness, crunchiness, and chewiness. For appearance, the respondents also strongly agreed on the product's freshness, uniqueness, and roundness. Based on their suggestions and recommendations, the researchers noted the following improvements: (1) increase the crunchiness, (2) add more malunggay while reducing hardness, (3) adjust the saltiness, and (4) enhance the sweetness. The results revealed that respondents strongly agreed with the overall quality of the product. In terms of taste, they agreed that the cookies exhibited appropriate levels of sweetness, bitterness, and saltiness. For texture, the respondents strongly agreed that the product was soft, crunchy, and chewy. In terms of appearance, they also strongly agreed on its freshness, uniqueness, and roundness. Based on their suggestions and recommendations, the researchers proposed the following improvements: (1) increase the crunchiness, (2) add more malunggay while reducing hardness, and (3) adjust the saltiness to better suit consumer preference.

Keywords: malunggay cookies, chia seeds, product evaluation, sensory characteristics, taste, texture, appearance, consumer feedback, healthy alternative, food innovation

INNOVATION OF SQUASH INTO SQUASH HALAYA AMONG GRADE 12 HOME ECONOMICS STUDENT AT BESTLINK COLLEGE OF THE PHILIPPINES

Nathaniel Guiao, Karlo Grant Bernal, Paola Angela Española,
Princess Jalang, Zhyrel Tao-on, Mar Domagtoy

Abstract

In this study, a combination of qualitative and quantitative research designs was used to examine the innovation of turning squash into squash halaya. The integration of both approaches allowed the researchers to gather in-depth insights and measurable data, providing a well-rounded perspective on the product's development. This methodological choice highlights how the design, structure, and implementation of a study can significantly influence research outcomes, especially when evaluating food innovations. This study utilized both qualitative and quantitative research designs to examine how the planning, organization, and implementation of a study can influence its findings, particularly in the context of innovating squash into squash halaya. The research involved fifty (50) Grade 12 Home Economics students as respondents. A stratified random sampling technique was employed to ensure fair and representative selection from the population. The majority of the respondents were between 17 and 18 years old. A total of 41 participants, accounting for 82% of the sample, represented a balanced mix of male and female students. Most were from sections HECF1201, HECF1202, HECF1203, and HEHRS1201. In terms of taste, the respondents rated the squash halaya as Very Much Acceptable, particularly highlighting its sweetness, buttery flavor, and creaminess. For texture, it was also rated Very Much Acceptable, especially in terms of spreadability, smoothness, and softness. Regarding appearance, the product was rated Acceptable for its uniqueness, shiny surface, and overall attractiveness. Based on their feedback, the following improvements were recommended: Increase the amount of squash to enhance flavor and consistency. Add food coloring to achieve a brighter and more appealing color. Adjust the quantity of coconut cream for better flavor balance. Add more milk powder to improve richness and creaminess. The findings of the study indicate that respondents generally agreed on the acceptability of the squash halaya as an innovative food product. In terms of taste, the product was rated Very Much Acceptable, particularly for its sweetness, buttery flavor, and creaminess. For texture, respondents also rated it Very Much Acceptable, emphasizing its smoothness, softness, and spreadable consistency. In terms of appearance, the product received an Acceptable rating, with positive remarks on its uniqueness, shiny surface, and visual appeal. Respondents also provided suggestions for improvement. These included: (1) increasing the amount of squash to enhance flavor and texture, (2) adding food coloring to create a brighter, more attractive appearance, (3) adjusting the amount of coconut cream to improve flavor balance, and (4) adding more milk powder to enrich the product's taste and creaminess. Overall, the product was well-received, with feedback pointing to a strong foundation for further refinement and development.

Keywords: squash halaya, food innovation, sensory evaluation, taste and texture, product appearance, student feedback, consumer acceptance, product improvement, qualitative and quantitative research, home economics students.

**LEVEL OF ACCEPTABILITY OF BANANA BLOSSOM PATTY AS SUBSTITUTE TO
BEEF PATTY AMONG RESIDENTS AT BARANGAY PASONG TAMO
LUZON AVENUE QUEZON CITY**

Mark Lester Tabonigao, Marvin Almiranez, Justine Marco Ayaay, John Mark Crum,
Vic Nerie Emplamado, Renz Alfred Lampaya, Jamira Lanezca Otucan, Mar Domagtoy

Abstract

A hamburger typically consists of a ground meat patty placed between sliced buns, often accompanied by various fillings. In the Philippines, burgers are widely popular, especially with fast-food chains such as McDonald's and Jollibee. However, their high saturated fat content poses health risks, including increased chances of heart disease and high cholesterol. In light of these concerns, this study seeks to innovate a healthier yet satisfying alternative. Specifically, it aims to evaluate the acceptability of using banana blossoms as a substitute for beef patties among residents of Barangay Pasong Tamo, Luzon Avenue, Quezon City. This study adopted a quantitative research design to examine the research problem using a theory-based approach supported by statistical analysis. Purposive sampling was employed, allowing the researchers to intentionally select participants who could provide relevant and valuable information aligned with the study's objectives. A total of 100 residents from Barangay Pasong Tamo, Luzon Avenue, Quezon City composed of 47 males and 53 females were chosen as respondents. Data collection was conducted through the use of structured survey questionnaires to ensure accuracy and reliability. The results showed that the banana blossom patty was rated Very Much Acceptable in terms of appearance, with a weighted mean of 3.68. For aroma, it also received a Very Much Acceptable rating, with a weighted mean of 3.67. In terms of taste, the patty earned a weighted mean of 3.33, interpreted as Acceptable. Among the 50 respondents, the largest age group was 37 years old and above, comprising 34% of the sample. In terms of gender, 56% of the respondents were male. Furthermore, among the suggestions for product improvement, the most common recommendation accounting for 30% or 15 responses, was to add more vegetables. This study seeks to assess the acceptability of banana blossom patty as an alternative to beef patty among residents of Barangay Pasong Tamo, Luzon Avenue, Quezon City. It evaluates the product based on appearance, aroma, taste, and texture, including specific flavor attributes such as bitterness, moisture, and crunchiness, to inform possible adjustments in ingredient proportions.

Keywords: banana blossom patty, beef substitute, acceptability, appearance, aroma, taste, texture, healthy alternative, plant-based, quezon city

**LEVEL OF ACCEPTABILITY OF USING SWEET POTATO AS NUTRITIOUS
ALTERNATIVE FILLING OF DONUTS AMONG RESIDENTS OF
BRGY. SAN AGUSTIN, QUEZON CITY**

Reischa Mikaella Intes, Joey Ann Armas, John Patrick Benitez, Krizia Atillo, Kaye Mabeza,
Devine Grace Roman, Renren Saluta, Mar Domagtoy

Abstract

This study examines the potential of sweet potatoes as a nutritious donut filling, offering a healthier alternative to traditional snacks. Packed with essential vitamins, minerals, and fiber, sweet potatoes are assessed for their ability to enhance both the nutritional value and taste of the product. Focusing on residents aged 18 to 34 in Brgy. San Agustin, Philippines, the research evaluates consumer preferences and market viability through surveys and sensory testing. Although sweet potatoes are commonly used in various desserts, their application as a donut filling remains largely untapped. This study aims to determine the product's feasibility and acceptability while encouraging healthier dietary choices. This study employed a descriptive research design to evaluate consumer preferences for sweet potato-filled donuts. A sample of 100 residents from Brgy. San Agustin was selected through cluster sampling to ensure representation across age, gender, and location. Participants assessed the product's texture, taste, and appearance using a Four-Point Likert Scale, and provided additional insights through open-ended responses. The survey instrument was adapted from relevant literature and validated by subject matter experts, including a grammarian and a research advisor. Data collection involved donut preparation, survey administration, and analysis using descriptive statistical methods. The findings were used to determine the overall acceptability of the product. Out of the 100 respondents, most were aged 34 and above (44 respondents), and the majority were female (58 respondents). The donuts were highly rated for their softness and moistness, categorized as "Much Acceptable," while the bread's hardness was noted as an area for improvement. Respondents found the sweetness and saltiness to be well-balanced, and the product's uniqueness was positively received. Recommendations for further improvement included enhancing the texture, adjusting the sweetness, increasing the filling, and improving the overall appearance. These findings offer valuable insights for refining the product's quality and boosting its consumer appeal. The study underscores key factors affecting product acceptability, particularly the significance of soft and moist textures in achieving consumer satisfaction. Bread hardness was identified as a major area for improvement, aligning with local preferences for smoother pastries. While the product's balanced flavor met general taste expectations, suggested improvements in freshness, sweetness, filling quantity, and serving temperature could further enhance its appeal. These findings offer practical insights for food enterprises and entrepreneurs in Brgy. San Agustin aiming to develop healthier and more innovative snack options.

Keywords: sweet potato-filled donuts, product acceptability, consumer satisfaction, texture preference, local snack innovation, brgy. san agustin, healthy snack alternative, food entrepreneurship, sensory evaluation, balanced flavor

**LEVEL OF SATISFACTION OF USING POTATO WITH MEAT AS FILLING IN
CORNDOGS AMONG GRADE 11 HOME ECONOMIC STUDENTS AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Rhea Nazarene Corsiga, Anber Gonzales, Lyka Antonette Lajara,
John Daniel Urias, Kenneth Villarma, Mar Domagtoy

Abstract

The corndog, also known as "wiener on a stick," is a popular street food originating from the United States, typically enjoyed for its crispy coating and savory filling. This study introduces a variation that features a crunchy exterior and a filling made of potato and ground meat, combining traditional flavor with added nutritional value. Potatoes, in particular, are rich in essential nutrients and offer several health benefits, making them an ideal component for a healthier snack alternative. The main objective of this study is to assess the level of consumer satisfaction with using potato and meat as a corndog filling and to explore its potential as a nutritious snack option. Additionally, the study aims to promote the use of affordable and accessible ingredients, specifically ground pork and potatoes, to provide a healthier, budget-friendly alternative for consumers. The study was conducted among Grade 11 Home Economics students at Bestlink College of the Philippines, utilizing a descriptive research design. Quota sampling was employed to ensure adequate representation of the target population. Data collection was carried out through a structured survey questionnaire aimed at evaluating the students' level of satisfaction with the product. This study examined the level of satisfaction with corn dogs filled with potato and meat, focusing on key attributes such as presentation, taste, texture, and aroma. Most respondents found the product visually appealing, with its presentation being positively received by others as well. The combination of meat and potatoes was praised for its well-balanced saltiness. In terms of texture, the crispy outer layer was particularly appreciated. Overall, the majority of respondents rated the taste, texture, and presentation of the corndog as highly satisfactory. The corndog with potato and meat filling was rated positively in terms of presentation, taste, texture, and aroma. Weighted mean scores revealed that respondents found the presentation (2.98), taste (3.03), and texture (2.92) to be acceptable. Overall, the majority of participants agreed that the product was satisfying and enjoyable. Its balanced flavor, pleasant aroma, and smooth yet crunchy texture contributed to a favorable sensory experience, making it a well-received snack alternative.

Keywords: corndog, potato with meat, sensory evaluation, presentation, taste, texture, aroma, student satisfaction, alternative snack, descriptive research

**A COMPREHENSIVE VIDEO TUTORIAL APPROACH TO UNDERSTAND
PRE-CALCULUS FOR GENERAL ACADEMIC STRAND AT
BESTLINK COLLEGE OF THE PHILIPPINES**

John Edan Salundaguit, Vince Xeron Cajucom, Sophia Yshi Louise Clidoro, Joyce Deleon,
James Bryan Nebres, Walter William Velasco, Rica Mae Berja

Abstract

This study examines the effectiveness of video tutorials as a learning tool for General Academic Strand students at Bestlink College of the Philippines. As technology continues to play an increasingly significant role in education, many students struggle to grasp mathematical concepts, often resulting in lower academic performance and reduced confidence. This research addresses that challenge by evaluating the impact of video tutorials on three key areas: student engagement, comprehension, and problem-solving skills. Grounded in Cognitive Load Theory, the study's findings aim to guide educators in creating video content that aligns with students' learning preferences and enhances their academic success. This study examined the impact of video tutorials on Pre-Calculus comprehension among seventy-seven students from the General Academic Strand (GAS) at Bestlink College of the Philippines. Participants were selected using quota sampling to ensure balanced representation from both Grade 11 and Grade 12. Data were collected through a validated survey questionnaire consisting of three sections: (1) examining the relationship between video tutorials and students' understanding of mathematics, (2) evaluating engagement, comprehension, and performance using a Likert scale, and (3) identifying challenges encountered by students in using video-based learning. The results indicate that students generally have a positive perception of video tutorials and believe they make learning mathematics easier. Respondents reported that video tutorials helped them better understand mathematical concepts, solve problems more efficiently, and follow solution steps more clearly. However, a common challenge identified was difficulty maintaining focus during lengthy videos, which can hinder learning. To address this, the study recommends creating shorter, more engaging, and easy-to-follow video content. For instance, incorporating more examples, using colorful visuals, and adding brief breaks or interactive elements may help sustain student interest. The goal is to support both teachers and students in using video tutorials to make math learning more enjoyable and effective. This research is significant as it demonstrates how technology, specifically video tutorials, can enhance student learning. It also provides valuable insights for educators on how to design instructional videos that are both engaging and effective. Future studies may explore the use of video tutorials in other subject areas or across different grade levels. Overall, the findings suggest that while video tutorials are a valuable tool for learning mathematics, they must be thoughtfully designed to maintain student focus and interest.

Keywords: technology in education, modern learning, video learning

**ACADEMIC ENGAGEMENT OF BOARD GAMES ON THE ACADEMIC PERFORMANCE
OF SELECTED GRADE 12 HUMANITIES AND SOCIAL SCIENCES
STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Grace Amidala Simpauco, Yurie Baldo, Jodel Castillon, Ma Elain Gonzales,
Marian Aslie Ostan, Shawn Marthy Ramos, Christopher Azares

Abstract

Board games function not only as recreational activities but also as effective tools for enhancing critical thinking, problem-solving, and strategic planning. This study investigates their impact on academic engagement and performance, focusing on six core areas: skills, strategies, interest, time management, motivation, and communication. Anchored in Csikszentmihalyi's Flow Theory and structured using the Input-Process-Output (IPO) model, the research was conducted among Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. The study aims to provide valuable insights for students, educators, parents, and future researchers on the integration of board games into academic settings. This study utilized a quantitative exploratory-descriptive research design, involving 200 Humanities and Social Sciences (HUMSS) students selected through cluster sampling to ensure unbiased representation. Data was collected through a validated survey questionnaire, with the research process including instrument development, validation, administration, and subsequent statistical analysis. The findings demonstrate that board games have a positive influence on academic engagement. Notably, high mean scores were recorded in the domains of skills (3.28), strategies (3.26), and interest (3.24). Their impact on academic performance was most evident in motivation (3.35), communication (3.34), and time management (3.28). Despite these benefits, the study also highlighted several challenges, particularly limited access to board games and instances of student frustration, which may hinder consistent engagement. When appropriately implemented, board games can significantly enhance students' academic engagement and performance. This study encourages educators to integrate board games into their instructional methods to promote active participation, strengthen motivation, and cultivate vital academic and life skills. To maximize effectiveness, schools should also work to improve accessibility and ensure that the selected games align with students' learning needs and educational goals.

Keywords: board games, academic engagement, academic performance, active learning, motivation, life skills, teaching strategies, accessibility, instructional tools, student-centered learning

**ANALYZING THE LATENT FACILITIES AND EQUIPMENT OF
BPED 2ND YEAR STUDENTS LEARNING PERFORMANCE**

Sushiene Joy Fetilo, Isabel Padrones, Charles David Matondo, Kevin Samson,
Gemalyn Basister, Patrick Hero Yaon, Abraham Muyrong II

Abstract

School facilities and equipment are essential components of the educational process, profoundly affecting the learning environment of students. This study aims to investigate the perceptions of Bachelor of Physical Education (BPED) students regarding their use of school facilities and equipment, focusing on three critical aspects: availability, adequacy, and management and maintenance. Additionally, the research evaluates the learning performance of BPED students in terms of subject mastery, practical skills demonstration, and overall engagement. The study also seeks to identify the challenges faced by BPED students related to existing facilities and equipment and to propose recommendations for their improved utilization. This study utilized a descriptive research design and involved ninety-five (95) Bachelor of Physical Education (BPED) students selected through simple random sampling. Data was collected primarily through survey questionnaires, which provided comprehensive insights into the students' experiences with school facilities and equipment and their perceived influence on learning outcomes. The findings reveal that BPED students generally "agree" (weighted mean of 2.73) that the school facilities and equipment are available, adequate, and properly maintained. Likewise, they "agree" (weighted mean of 2.86) regarding their learning performance in terms of subject mastery, practical demonstrations, and overall engagement. However, 81% of the respondents reported experiencing discomfort due to issues such as broken chairs, malfunctioning fans, and faulty lighting. To address these concerns, the proposed guidelines emphasize improving the maintenance and availability of resources to enhance the learning environment for BPED students. This study highlights the critical role that well-maintained and effectively managed facilities play in fostering a conducive learning environment, particularly for subjects that emphasize practical demonstrations. The challenges reported by students underscore the urgent need to improve facility management and equipment adequacy. Implementing the proposed guidelines and standard procedures will enable schools to optimize resource utilization, thereby enhancing student learning and engagement. The findings provide valuable insights for improving the educational experience of BPED students and offer broader implications for the advancement of hands-on learning methodologies in educational settings.

Keywords: school facilities, educational equipment, bped students, availability, adequacy, maintenance, learning performance, practical demonstrations, student engagement, resource management, standard procedures, hands-on learning

**ARCADEMICS E-MATERIALS IN MULTIPLICATION OF
WHOLE NUMBERS OF GRADE 4 LEARNERS**

Renalyn Gallardo, Roselyn Galo, Jedda Kabigting, Kyla Mae Nepomuceno,
Angel Sinangote, Ryan Christopher Villalon

Abstract

This study examines the effectiveness of Arcademics E-materials in teaching multiplication to elementary students. As technology becomes increasingly integrated into education, digital platforms like Arcademics offer interactive and engaging tools that can improve students' understanding of mathematical concepts. This research highlights how such e-materials support self-paced learning, provide immediate feedback, and supplement traditional teaching methods with a wide range of digital resources, particularly benefiting students who face challenges in learning multiplication. This research adopted a true experimental design using cluster sampling, involving 80 Grade 4 students divided into two groups: the Arcademics group and the Non-Arcademics group. To gather data, the researchers administered pre-tests and post-tests to measure academic performance, along with a survey questionnaire to assess student engagement, motivation, and interactivity. The collected data were analyzed using statistical tools such as frequency and percentage distribution, weighted mean, and z-tests to determine the effectiveness of Arcademics e-materials in teaching multiplication. The results showed that Arcademics had a significant positive impact on student motivation, conceptual understanding, and engagement. Students expressed strong agreement that the use of Arcademics enhanced their learning experience. Initially, both the Arcademics and Non-Arcademics groups demonstrated similar proficiency in multiplication during the pre-test. However, post-test outcomes revealed a substantial increase in performance among the Arcademics group, which recorded a mean score of 17.90, compared to 8.78 in the Non-Arcademics group. Statistical analysis confirmed a significant difference between the two groups ($p < 0.00001$), supporting the effectiveness of Arcademics in improving multiplication skills. These findings align with the MCI E-learning Theory proposed by Jeong Yong Ahn (2023). Despite the success, limited access to devices posed challenges to student participation and engagement. The researchers proposed a set of guidelines to effectively incorporate Arcademics into the curriculum. These guidelines emphasize the importance of providing clear instructions, using follow-up activities that relate multiplication concepts to real-life situations, and applying strategies that promote active student participation. The study underscores the potential of digital learning tools like Arcademics to enhance multiplication skills. It also highlights the critical roles of teacher proficiency, reliable access to devices, and the careful integration of educational technology to achieve optimal learning outcomes.

Keywords: arcademics, multiplication skills, educational games, grade 4 students, interactive learning, student motivation, digital tools, e-learning, mci e-learning theory, experimental design

**ARTIFICIAL INTELLIGENCE (AI) GENERATION: CRUCIAL ROLE IN
HONING STUDENTS' KNOWLEDGE AND SKILLS**

Benjamin Eroy, Richton Austria, Mhon Darlin Dollente, Kyrach Mae Loplop,
McLanrod Marbibibi, Abraham Muyrong II

Abstract

This study examines the integration of artificial intelligence (AI) in education, focusing on its impact on student creativity and teacher collaboration. It investigates how AI tools are being adopted within the Philippine educational system by analyzing the perspectives of both students and educators. The research aims to identify the benefits, challenges, and ethical considerations surrounding AI use in the classroom. The study offers insights that can help enhance AI-driven learning strategies and support the development of critical, creative, and collaborative skills among learners. The study adopts a descriptive quantitative research design and involves seventy (70) second-year Bachelor of Secondary Education students from Bestlink College of the Philippines, selected through stratified random sampling. A researcher-designed survey questionnaire was utilized as the main tool for data collection. The study found that artificial intelligence (AI) significantly enhances student creativity by facilitating access to new ideas and supporting the generation of original content. It also contributes to the development of problem-solving and critical thinking skills, helping students explore multiple solutions to academic challenges. AI further supports time management and multitasking, though it may occasionally present an overwhelming amount of information. Additionally, AI positively influences key academic skills such as communication, digital literacy, and writing. It aids in understanding vocabulary, introduces efficient digital tools, and promotes academic integrity by helping students identify and avoid plagiarism. This study emphasizes the vital role of artificial intelligence in enhancing students' knowledge and skill development. The proposed user-friendly worksheets are designed to facilitate the meaningful integration of AI into the learning process, enabling students to harness its potential as a transformative educational tool. By adopting the study's recommendations, Bestlink College of the Philippines can enrich student learning, foster essential competencies, and better prepare learners for the challenges of an increasingly digital future.

Keywords: artificial intelligence (ai), student creativity, critical thinking, digital literacy, educational technology, ai integration, problem-solving skills, time management, philippine education, skill development

**ASSESSING THE ONLINE DIGITAL TOOL USING MODERN WRITING TO
GRADE 12 HUMANITIES AND SOCIAL SCIENCES AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Yzabel Cortez, Giane Bacotoy, Bhea Mae Cajipo, Angel Famisan,
Jay R Guan, John Henrix Romero, Rica Mae Berja

Abstract

Writing is a fundamental skill in learning a foreign language, particularly for English language learners. It is essential in academic settings, as it enables students to express ideas, emotions, arguments, and plans with clarity and precision. Effective writing requires the ability to analyze information, apply appropriate vocabulary, and use correct grammar, sentence structure, spelling, and punctuation. Although academic writing differs from fiction in style and purpose, both forms demand coherence, organization, and careful attention to language. This study adopted a descriptive-quantitative research design to analyze the perceptions of the respondents. A total of 212 Grade 12 Humanities and Social Sciences (HUMSS) students from Bestlink College of the Philippines participated in the study, selected through a quota sampling technique. Data was gathered using a researcher-made survey questionnaire. To address the research questions, the study employed various statistical tools, including frequency and percentage, mean, ranking, Slovin's formula, and a four-point Likert scale. Responses were interpreted using the following scale: Strongly Agree, Agree, Disagree, and Strongly Disagree. The findings of the study reveal that Grammarly was identified as the most effective digital tool for modern writing, with 196 respondents (18.46%) selecting it. Furthermore, students assessed modern writing in terms of vocabulary, grammar, and critical thinking with an overall weighted mean of 3.43, which falls under the interpretation of Strongly Agree. Lastly, an action plan was proposed to address the challenges encountered in assessing and utilizing digital tools for modern writing among Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines. The study identified Grammarly as the most effective digital tool in modern writing, with 196 respondents (18.46%) selecting it. Students strongly agreed that digital tools enhance writing performance, particularly in vocabulary development, grammar accuracy, and critical thinking. Based on these findings, the study recommends that modern writing instruction should incorporate reliable and relevant digital resources to support academic learning. Educators are encouraged to promote the use of online platforms to help students improve their writing skills, especially in structuring essays and organizing ideas effectively in a digital format.

Keywords: modern writing, digital tools, grammarly, academic writing, vocabulary, grammar, critical thinking, online platforms, writing skills, humss students, bestlink college

**ASSESSING THE LEVEL OF PRODUCTIVITY OF LEARNING PLATFORMS IN
SELECTED GRADE 12 HUMANITIES AND SOCIAL SCIENCE STUDENTS
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Jonel Lyn Rose Diolas, Katrina Mae Bacnat, Princess Bodeña,
Shiela Funa, Jasmine Masujer, Rica Mae Berja

Abstract

Digital technology has transformed education by enabling flexible, interactive learning environments. During the COVID-19 pandemic, institutions shifted from face-to-face classes to online instruction, relying on learning management systems and video-conferencing platforms such as Zoom, Google Meet, and Microsoft Teams. These platforms provide instructional materials, foster student motivation, and support diverse teaching methodologies. This study assesses the productivity of these learning platforms for Grade 12 Humanities and Social Science students at Bestlink College of the Philippines. This study employs evaluative quantitative research design. Purposive sampling selects Grade 12 Humanities and Social Science students who regularly use online platforms for instruction. A structured survey questionnaire measures three dimensions of productivity student interest, interactive learning, and academic performance using a four-point Likert scale. Data are collected online and analyzed through weighted means to determine overall productivity levels. Students had high productivity ratings for learning platforms, with an overall weighted mean of 3.35. Interest in course content scored a mean of 3.34, indicating sustained engagement. Interactive learning features, such as real-time discussions and multimedia resources, also scored 3.34. Academic performance, assessed by self-reported improvement in grades and mastery of concepts, achieved a mean of 3.35. These results underscored the positive impact of digital platforms on learning outcomes during remote instruction. The study found that learning platforms significantly enhanced student productivity by fostering engagement, supporting interactive pedagogies, and improving academic performance. As a result, it was recommended to integrate diverse platform features such as breakout rooms, quizzes, and discussion forums, into regular instruction. Training workshops for both students and instructors were advised to maximize platform effectiveness. Future research could examine long-term effects on learning retention and compare synchronous and asynchronous tools.

Keywords: learning platforms, student productivity, interactive learning, academic performance, digital education, grade 12 humanities

**ASSESSMENT OF DISASTER PREPAREDNESS AMONG GRADE 12 HUMANITIES AND
SOCIAL SCIENCES STUDENTS IN BESTLINK COLLEGE OF THE PHILIPPINES**

Juvylin Ramos, Mark Anthony Carillo, Sep Christian Galonia, Joshua Segui,
Mark Joseph Valenzuela, Christopher Azares

Abstract

This study assesses disaster preparedness among Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines, drawing on Ajzen's Theory of Planned Behavior to understand how attitudes, subjective norms, and perceived control influence readiness. It examines essential preparedness components, learning skills, planning, and securing belongings, and considers how these translate into effective responses during emergencies. The findings aim to inform educators, parents, and policymakers by mapping the flow from inputs (student knowledge and resources) through processes (training and planning) to outputs (actual preparedness behavior). An exploratory descriptive quantitative design is employed to evaluate disaster preparedness in a sample of 200 Grade 12 students selected via cluster sampling to ensure representativeness. A three-part survey questionnaire, covering preparedness strategies, anticipated challenges, and overall assessment, was developed and validated by the research adviser. Data collection involved administration and retrieval of the instrument under standardized conditions, and responses were analyzed using descriptive statistics to derive weighted means and identify prominent challenges. Students reported strong agreement on preparedness strategies, with mean scores of 3.46 for learning skills, 3.42 for planning, and 3.40 for securing belongings. Overall preparedness behavior achieved a composite mean of 3.43, indicating high self-reported readiness. In preparation for imminent disasters, respondents also strongly endorsed measures related to temporary shelter (3.49), communication (3.39), and emergency kit assembly (3.45), yielding an overall composite mean of 3.44 for anticipatory actions. The most frequently cited obstacle was lack of resources (23.23%), prompting the formulation of a targeted action plan. The findings demonstrated that Grade 12 students perceived themselves as well prepared in key domains but were constrained by resource shortages. As a result, an action plan was proposed to strengthen resource allocation and training opportunities. Recommendations include integrating regular disaster drills into the curriculum, ensuring access to essential supplies, and conducting further research to refine evidence-based policies. These measures are expected to enhance students' capacity for effective disaster response and resilience.

Keywords: disaster preparedness, learning skills, emergency planning, resource challenges, grade 12 students

**ASSESSMENT OF LEARNING PLATFORM IN ENHANCING STUDENT
ENGAGEMENT IN HUMANITIES AND SOCIAL SCIENCE AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Libi John Tablada, Prince John Kenneth Delrosario, Ned Goyala, John Lloyd Medoramente,
Aeron Clark Mallari, Raymond Garrido, Rica Mae Berja

Abstract

This study examines how the expansion of learning platforms for Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines is transforming education. These platforms deliver personalized content, interactive activities, and immediate feedback, thereby enhancing academic performance and fostering critical thinking, creativity, and collaboration skills. However, challenges such as digital inequalities, limited resources for platform development, and potential impacts on student well-being are also evident. To optimize platform implementation, digital literacy instruction, educator professional development, and robust data privacy measures are essential. An evaluative quantitative research design is employed to assess the impact of learning platforms on student engagement. A cluster sampling technique is used to select 200 Grade 12 Humanities and Social Sciences students. Data is collected through a structured survey questionnaire designed to measure engagement indicators such as participation, knowledge retention, and technology accessibility. Statistical analysis of weighted means and frequencies is conducted to interpret the results. Findings revealed that the learning platform improved knowledge retention and encouraged active participation in academic tasks. However, many students experienced technical difficulties and uneven access to devices, which hindered their ability to engage fully. A lack of contextually relevant content was also reported, contributing to occasional declines in academic performance. The study highlighted critical gaps in existing platform content and digital access. As a result, content audits were undertaken to correct inaccuracies and update materials, and efforts were made to integrate more contextually relevant resources. Additionally, targeted interventions addressed the digital divide by improving device availability and offering time-management workshops to enhance student productivity. These measures collectively increased critical evaluation skills and engagement levels, demonstrating the importance of continuous platform refinement and support structures in digital education.

Keywords: learning platforms, student engagement, digital literacy, knowledge retention, technology access

**ASSESSMENT OF SOCIAL MEDIA NETIQUETTES AMONG GRADE 11 HUMANITIES
AND SOCIAL SCIENCES STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

John Carlo Benitez, Rainier Acuram, John Phillip Dacillo,
Marich Mae Jamandron, Venice Paja, Christopher Azares

Abstract

Social media plays a vital role in the daily lives of senior high school students, underscoring the need to emphasize social media netiquette as platforms and user behaviors continuously evolve. This study explores students' awareness of appropriate digital conduct, privacy issues, and the influence of their online interactions. It also highlights the advantages of social media through the lens of the Social Media Integration Theory, particularly how peer-to-peer communication fosters stronger brand engagement and interaction. This research specifically investigates the importance of social media netiquette among Grade 11 Humanities and Social Sciences students at Bestlink College of the Philippines. This study employs a descriptive quantitative approach, utilizing cluster sampling and survey questionnaires to gather data on students' perceptions of their social media behavior. The results will provide valuable insights into the effectiveness of current social media netiquette practices and guide recommendations for enhancing digital conduct among students. This summary effectively encapsulates the core findings of the research. The focus on courtesy, privacy, authenticity, and communication skills highlights crucial elements for creating a respectful and secure digital environment. The proposed action plan outlines concrete strategies to combat issues like cyberbullying and misinformation, while emphasizing the importance of educational programs that cultivate digital responsibility and empower users to engage thoughtfully online. This study reviews social media netiquette with a focus on key principles such as courtesy, politeness, accuracy, communication skills, authenticity, and privacy. It highlights the necessity of fostering positive online behavior and adopting strategies to improve digital etiquette. Findings indicate that 22.75% of students experience challenges with oversharing. To combat issues like cyberbullying, the study proposes guidelines and recommends an action plan aimed at encouraging respectful and responsible interactions on social media platforms.

Keywords: social media netiquette, courtesy, politeness, accuracy, communication skills, authenticity, privacy, oversharing, cyberbullying prevention, digital responsibility, online behavior

**ASSESSMENT OF SOCIO-ECONOMIC STATUS AMONG 4TH YEAR BACHELOR OF
SECONDARY EDUCATION STUDENT MAJOR IN SOCIAL STUDIES: BASIS A MODULE**

Garcia Felipe Jr II, James Ryan Oliva, Abigael Mesa, Airalyn Dolo,
Jomari Dela Cruz, Abraham Muyrong II

Abstract

This study explores the demographic and socio-economic characteristics of the respondents, with a particular focus on how these variables impact their academic performance and overall educational outcomes. This study utilized a correlational research design to examine the relationship between socio-economic status and academic performance among fourth-year Bachelor of Secondary Education students majoring in Social Science at Bestlink College of the Philippines. The design was chosen to explore the degree of association between the identified variables without manipulating them. The study underscores the profound influence of socio-economic status on students' academic performance, particularly among those facing financial and resource-related challenges. The results reveal that students from lower socio-economic backgrounds often experience limited access to educational materials, technology, and support systems, which can hinder their learning outcomes. These findings emphasize the importance of implementing targeted interventions, inclusive policies, and resource allocation to bridge the educational gap and promote academic success for all students. The majority of respondents are between the ages of 20 and 22 (59.57%) and are predominantly female (40.43%). A significant portion (59.57%) reported not receiving any form of financial aid or scholarship, suggesting a reliance on personal or familial financial resources, either due to economic self-sufficiency or belonging to higher-income households. In terms of academic performance, 55.32% of the participants have a General Weighted Average (GWA) ranging from 1.26 to 1.50, indicating a strong dedication to academic excellence. When assessing socio-economic status, respondents expressed awareness of its influence on educational outcomes, with a mean score of 3.23 reflecting recognition of the barriers faced by students from low-income backgrounds. Additionally, 55.31% of the participants come from families with a monthly income of PHP 25,000 or less, underscoring a significant representation of economically disadvantaged students whose financial limitations may hinder access to quality education.

Keywords: socio-economic status, academic performance, financial aid, general weighted average (gwa), income level, educational access, student demographics

**ASSESSMENT OF VOCABULARY PROFICIENCY IN ENGLISH AMONG
GRADE 11 HUMANITIES AND SOCIAL SCIENCES STUDENTS AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Mary Eisel Marabillo, Allyson Judy Abungan, Jelly Ann Barrientos,
Xyrille Joy Leoparte, Xyra Elisha Lizardo, Christopher Azares

Abstract

This study aims to promote a deeper understanding of English vocabulary by encouraging students to actively reflect on word meanings, connections, and usage in various contexts. Vocabulary learning strategies play a crucial role in helping students determine the meanings of unfamiliar words and reinforce those they encounter repeatedly, as highlighted by Norbert Schmitt (1997). The research evaluates the vocabulary proficiency of Grade 11 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines, focusing on subject-verb agreement, pronunciation, and syntax. It also investigates the effectiveness of different vocabulary learning strategies, including discovery, social, and metacognitive approaches, as reported by the respondents. This research adopts an evaluative-quantitative approach and uses quota sampling to collect responses from 133 Grade 11 Humanities and Social Sciences students at Bestlink College of the Philippines. A structured survey questionnaire was administered to evaluate their vocabulary proficiency in English. The findings reveal that students demonstrated strong agreement regarding their vocabulary proficiency in English, specifically in subject-verb agreement, pronunciation, and syntax. Additionally, the vocabulary learning strategies applied were deemed effective by the respondents. The proposed action plan includes targeted activities such as vocabulary memorization, pronunciation enhancement exercises, English terminology training, and deeper exploration of word meanings and distinctions. These indicate that students' vocabulary proficiency in English particularly in subject-verb agreement, pronunciation, and syntax is supported by the effective use of vocabulary learning strategies, including discovery, social, and metacognitive approaches. However, memory-related difficulties were identified as the most prevalent challenge among respondents. To address this, an action plan was developed, featuring targeted interventions such as grammar reinforcement, pronunciation drills, and vocabulary retention exercises. The researchers recommend enhancing foundational language skills to build a more advanced vocabulary, enabling students to communicate complex ideas with greater fluency and accuracy.

Keywords: vocabulary proficiency, subject-verb agreement, pronunciation, syntax, vocabulary learning strategies, discovery strategy, social strategy, metacognitive strategy, memory retention, english language skills, communication skills, grade 11 humss, bestl

**ASSESSMENT ON THE VISUAL AND SPATIAL FEATURES AS PERCEIVED BY
GRADE 11 HUMANITIES AND SOCIAL SCIENCES STUDENTS AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Gerson Borca, Gerson Borca, Charlene Kaye Lozada, John Paul Pantila,
Bhejie Cataytay, Johnmark Gane, Christopher Azares

Abstract

This study explores the challenges faced by Grade 11 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines in assessing visual and spatial features, which play a crucial role in their academic performance. Visual and spatial processing are vital cognitive skills that enhance learning across various disciplines. The research specifically examines components such as visual description, spatial perspective, and visual perception. Grounded in Howard Gardner's Theory of Multiple Intelligences, the study highlights the significance of visual-spatial intelligence in supporting students' academic success and overall cognitive development. This study utilized a descriptive-quantitative research design to evaluate the ability of Grade 11 Humanities and Social Sciences (HUMSS) students to assess visual and spatial features. A simple random sampling method was employed to ensure that every student had an equal opportunity to be selected, allowing for an unbiased representation of the population. To analyze the data, frequency and percentage distributions were used to interpret student responses effectively, supported by the appropriate statistical formulas for accurate results. This study explores the key features of visual and spatial understanding among Grade 11 students, with data presented in ranked tables. Results indicate that spatial perspective scored the highest with a mean of 3.19, followed by visual description at 3.12, and visual perception at 3.10. These findings suggest a relative strength in spatial orientation among students. In response, the proposed action plan aims to strengthen visual-spatial skills through early detection of learning difficulties and the implementation of strategies to help students effectively navigate visually complex environments. This study examines the visual and spatial features relevant to Grade 11 Humanities and Social Sciences students, evaluating their level of understanding and the challenges they encounter. Results indicate that students generally acknowledge the influence of these features on their academic performance. One major challenge identified is the boundary problem, which hampers students' ability to accurately interpret proportions and spatial relationships. Based on these findings, the study recommends the implementation of targeted interventions aimed at strengthening students' visual processing and spatial reasoning skills to enhance learning outcomes.

Keywords: visual features, spatial features, boundary problem, visual processing, spatial reasoning, grade 11 humss, cognitive skills, academic performance, descriptive research, targeted intervention

**BENEFITS OF MEDIA AND INFORMATION LITERACY AS PERCEIVED
BY GRADE 12 HUMANITIES AND SOCIAL SCIENCE STRAND**

Lani Diolata, Jowen Ambrocio, Amihan Banila, Aivan Cabe, Althea Rickselle Macatane,
Crystal Mhay Ricafranca, Christopher Azares

Abstract

The study of Media and Information Literacy (MIL) plays a crucial role in empowering individuals to take control of their interactions with information and media. It provides learners with the skills to critically evaluate, create, and responsibly engage with various forms of content. MIL fosters informed decision-making by helping individuals analyze the reliability, accuracy, and intent behind the information they consume daily. This research aims to assess the perceived benefits of MIL among Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines, emphasizing its role in promoting critical thinking, digital responsibility, and active citizenship in a media-saturated environment. To obtain comprehensive data, the researchers conducted a survey involving 200 Grade 12 Humanities and Social Sciences (HUMSS) students from Bestlink College of the Philippines. This study adopted a descriptive-quantitative research design to explore students' perspectives on media and information literacy. A cluster sampling technique was employed to ensure fair representation across the target population. The collected data were analyzed using appropriate statistical tools, including frequency and percentage distribution, ranking, weighted mean, and a 4-point Likert scale, to interpret patterns, assess the level of understanding, and evaluate the perceived benefits of media and information literacy among the participants. To collect the necessary data, the researchers administered structured survey questionnaires to the respondents. The results show a strong consensus among students regarding the positive impact of media and information literacy, particularly in improving communication skills and supporting personal growth. In response to these findings, the proposed action plan highlights the importance of integrating media and information literacy into the curriculum to strengthen critical thinking, enhance fact-checking abilities, and promote holistic personal development among learners. The discussion highlights that respondents' media and information literacy was evaluated in relation to their communication skills and personal growth. The results show that the most pressing concern among students is the widespread issue of fake news and misinformation. To address this, the recommended course of action focuses on enhancing digital literacy, strengthening critical thinking, and improving the ability to assess the credibility of information sources. Ultimately, the study emphasizes the critical role of media and information literacy in empowering students to become responsible, discerning, and informed consumers of media content.

Keywords: media and information literacy, communication skills, personal growth, fake news, misinformation, critical thinking, digital literacy, source credibility, grade 12 humss, bestlink college of the philippines

**BENEFITS OF PEER TUTORING ON ACADEMIC PERFORMANCE OF GRADE 12
HUMANITIES AND SOCIAL SCIENCES STUDENTS AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Blessie Villanueva, Jellian Kelly Austria, Kathleen Barrera,
Ma Louesa Roco, Kathlyn Terrano, Christopher Azares

Abstract

Peer tutoring programs are collaborative learning strategies that allow students to support one another academically by sharing knowledge, clarifying concepts, and reinforcing understanding. These programs not only enhance student learning but also cultivate essential interpersonal and cognitive skills. However, peer tutoring is not without challenges. Variations in knowledge levels, learning styles, and communication skills among students can hinder the consistency and quality of learning. A particularly common issue is the lack of self-confidence and the presence of self-doubt in both tutors and tutees, which can negatively impact engagement and effectiveness. Despite these challenges, peer tutoring has been shown to yield significant educational benefits. It can foster improved academic performance, enhance critical thinking, and strengthen socialization and communication skills. Grounded in Vygotsky's Sociocultural Theory (1978), peer tutoring reflects the principle that cognitive development is deeply influenced by social interaction. Learning occurs more effectively when facilitated by more knowledgeable peers, as such interactions promote awareness, internalization of knowledge, and behavioral development. This study aims to investigate the impact of peer tutoring on the academic performance of Grade 12 students in the Humanities and Social Sciences (HUMSS) strand. Specifically, it seeks to assess how peer tutoring affects students' academic achievement, responsibility, learning quality, communication skills, self-confidence, and cognitive development. The insights gained will serve as the basis for formulating a comprehensive action plan to enhance the design and implementation of peer tutoring programs within the academic setting. This study aimed to evaluate the perceptions of 200 Grade 12 Humanities and Social Sciences (HUMSS) students using an exploratory descriptive-quantitative research design. To ensure representativeness and minimize selection bias, the researchers employed cluster sampling as the sampling technique. Data collection was conducted through a structured survey questionnaire, which served as the primary research instrument. The gathered data were analyzed using descriptive statistical tools, including frequency, percentage, ranking, and mean, to interpret and summarize the respondents' answers effectively. To measure the participants' levels of agreement and perceptions, a five-point Likert scale was utilized, with response options ranging from "Strongly Agree" to "Strongly Disagree." This study explores the impact of peer tutoring on multiple dimensions of student development, including academic performance, sense of responsibility, learning quality, academic achievement, communication skills, self-confidence, and cognitive growth. Results reveal that 20% of the respondents attributed improvements in their academic performance to increased self-esteem and confidence gained through peer tutoring. These enhancements were linked to better grades, stronger critical thinking and problem-solving skills, improved reading comprehension, and more effective time management. The findings further emphasize the significance of a collaborative approach involving students, parents, and teachers in supporting and sustaining the success of peer tutoring initiatives. The findings of the study indicate that peer tutoring plays a vital role in enhancing students' sense of responsibility, time management skills, and intrinsic motivation. Moreover, it significantly improves the overall quality of learning, which positively impacts academic performance. To maximize the benefits of peer tutoring, it is recommended that the program be continuously evaluated and refined. Ongoing assessment and

enhancement of the peer tutoring experience will ensure its effectiveness, relevance, and sustainability in meeting students' academic and developmental needs.

Keywords: peer tutoring, academic performance, responsibility, time management, motivation, learning quality, program evaluation, student development, cognitive skills, educational intervention

**BLENDED LEARNING SYSTEM AND ITS EFFECTIVENESS AS PERCEIVED BY
GRADE 12 HUMANITIES AND SOCIAL SCIENCES STUDENT AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Kristylle Joy Papina, Mohammadnur Sultan, Julieta Espinosa, Rogie May Hernandez,
John Harold Magracia, Marvin Tamayo, Rica Mae Berja

Abstract

This study examines the effectiveness of the blended learning system from the perspective of the students. The introduction presents the background of the study. Students must understand the importance of learning modalities. Learning modality systems are helpful for students to gain knowledge that they can use for their convenience. The Review of Related Literature and Studies presents works that other academics have conducted on the topic. This section introduces and explores concepts that support the research. The theoretical framework contributes to the underlying ideas of the study and establishes the correlation between the study's variables. Conceptually, this study covers the effects of utilizing a blended learning modality system on student engagement among Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines, specifically discussing the independent variable of the system. It also includes the statement of the problem, scope and delimitation of the study, significance of the study, and definition of terms. Chapter 2, or the Methods section, includes the research design, which utilizes an exploratory descriptive quantitative design. The respondents of the study and the sampling technique are also described. The researchers used a cluster sampling method to divide the population into smaller groups. This chapter also presents the instrument used, its construction, validation, administration, and the retrieval of the instrument, as well as the statistical treatment of data. The research tool used was a survey questionnaire, and all Grade 12 Humanities and Social Sciences students were surveyed. The survey data revealed that students generally have a positive perception of the blended learning system, particularly regarding technology access. There are areas for improvement, especially in the consistency of internet connection and the development of digital skills. The research findings highlight the need to address challenges related to internet reliability, enhance digital skills, and further strengthen teacher support. This study examined the blended learning system at Bestlink College, revealing challenges in technology access, teacher support, feedback mechanisms, and student well-being. Recommendations include improving internet connectivity, providing devices, enhancing teacher professional development, improving communication, and implementing structured feedback systems using multiple platforms. Addressing these issues will optimize the blended learning system and improve student outcomes.

Keywords: blended learning system, improvement, consistency, development

**BRIDGING THE DIGITAL DIVIDE: THE ROLE OF TECHNOLOGY IN INCLUSIVE
EDUCATION OF GRADE 11 HUMANITIES AND SOCIAL SCIENCES AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Honey Joy Apolonio, Ash Lhean Dela Cruz, Jessusa Gulapa,
Jan Cesar Sabillo, Davril Robert Cenita, Rica Mae Berja

Abstract

This study examines the role of technology in fostering inclusive education among Grade 11 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines (BCP), with particular emphasis on addressing the digital divide. It highlights the impact of mobile devices, online learning platforms, and adaptive technologies in supporting diverse learning needs and ensuring equal access to educational opportunities. While the integration of technology enhances flexibility, personalized learning, and communication, students continue to face challenges related to digital accessibility, affordability, and ease of use. The research is anchored in the Digital Divide Theory, which frames the analysis of how unequal access to technology affects educational inclusion. This study utilized an evaluative-qualitative research design to assess the role of technology in promoting inclusive education among Grade 11 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines (BCP). The researchers employed cluster sampling to ensure representative participation, with the final sample size of 128 students determined using Slovin's formula. Data was collected through a validated survey questionnaire, which aimed to capture students' experiences, access, and perceptions regarding the use of mobile devices, online platforms, and adaptive learning technologies in their academic environment. This study explores the influence of technology on inclusive education among Grade 11 Humanities and Social Sciences (HUMSS) students, emphasizing its role in enhancing collaboration, personalized learning, and communication. The results revealed that students overwhelmingly acknowledged the positive contributions of technology, particularly in promoting cooperative learning (mean = 3.53), tailoring instruction to individual needs (mean = 3.48), and facilitating effective communication (mean = 3.47). Nevertheless, significant barriers remain, especially limited access to digital devices and unstable internet connectivity, with 22.88% of respondents identifying lack of device access as the most critical issue. In light of these findings, the researchers proposed a targeted, one-month action plan designed to strengthen digital literacy, expand internet availability, and implement affordable technological solutions to promote equitable and inclusive learning opportunities for all students. This study outlines comprehensive recommendations to strengthen key dimensions of inclusive education, particularly in the areas of collaboration, personalized learning, communication, accessibility, internet connectivity, and technology usability. It proposes conducting a systematic needs assessment to accurately identify students who lack access to digital devices, coupled with the development of offline learning materials to ensure educational continuity in low-connectivity environments. Additionally, the study underscores the importance of equipping educators with targeted training to effectively leverage digital tools for inclusive and differentiated instruction. Lastly, it advocates for sustained institutional investment in educational technologies and infrastructure as a strategic approach to promoting equity, enhancing student engagement, and improving overall learning outcomes.

Keywords: inclusive education, educational technology, digital divide, personalized learning, collaboration, accessibility, internet connectivity, technology integration, humss students, teacher training.

**BUDGETING PRACTICES PERFORMED BY THE SELECTED PART-TIME JOB
HUMANITIES AND SOCIAL SCIENCES STUDENTS AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Maureen Francisco, Maureen Francisco, Mark Justin Buriol, Piolo Carreon,
Angelica Momo, Clark Daryl Nogara, Christopher Azares

Abstract

This study examines budgeting practices among part-time working Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines, emphasizing the role of psychological and social factors in shaping financial behaviors. Anchored in Ajzen's (1995) Theory of Planned Behavior, the research explores how students' attitudes, subjective norms, and perceived behavioral control influence their ability to allocate resources efficiently, meet financial obligations, prioritize debt repayment, and develop disciplined saving habits. Given the unique financial challenges faced by students balancing academics and employment, the study highlights the importance of strategic budgeting and self-regulation in their financial decision-making. This study utilized purposive sampling to select 50 Senior High School students from the Humanities and Social Sciences (HUMSS) strand at Bestlink College of the Philippines. Employing an evaluative, descriptive-quantitative research design, the study systematically assessed budgeting practices through the collection of measurable data. A structured survey questionnaire, carefully crafted to align with the research objectives, served as the primary data collection tool to capture participants' financial behaviors. This approach ensured accurate representation of the target population's budgeting experiences, providing a reliable foundation for analysis and interpretation. The study found that part-time Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines view budgeting methods especially zero-based budgeting and the envelope system as effective financial management tools. Key factors influencing their budgeting behaviors include peer influence (16.33%), lessons from past experiences (17%), age and life stage (17.69%), and family influence (21.77%). The most significant motivator, reported by 27.21% of students, was personal financial goals such as saving for future needs and achieving financial independence. These findings indicate that students' budgeting practices are shaped by a combination of social, developmental, and goal-oriented influences, with personal aspirations playing the leading role. This study provides a comprehensive evaluation of budgeting practices among part-time Senior High School HUMSS students at Bestlink College of the Philippines, highlighting the effectiveness of zero-based budgeting and the envelope system in managing limited financial resources. Based on the findings, the researchers developed a proposed action plan aimed at enhancing students' ability to prioritize financial obligations, foster disciplined spending, and make informed budgeting choices. The initiative supports the development of financial literacy and equips students with vital skills to meet their immediate financial needs while pursuing long-term goals.

Keywords: budgeting practices, part-time students, humss strand, bestlink college of the philippines, zero-based budgeting, envelope system, financial literacy, disciplined spending, financial responsibility, action plan

**CHALLENGES ENCOUNTERED AMONG WORKING STUDENTS AND ITS RELATION
TO ACADEMIC PERFORMANCE OF BSED 3RD YEAR IN SOCIAL STUDIES**

Jame Rafael Nimer, Marco Bartolome, Justine Ruan Calvero, Almira Therese Dela Cruz,
Yuri Adrian Fajardo, PJ Ryan Garduce, Abraham Muyrong II

Abstract

This study aims to determine the relationship between challenges encountered by working students and their academic performance in the third-year Bachelor of Secondary Education Social Studies program. It examines specific challenges, such as time management, attendance, performance tasks, and use of the Learning Management System for analysis, application, exploration, evaluation, assignments, and major exams, and highlights the need for institutional guidance to support students facing these obstacles. This study employs a quantitative correlational design using a structured survey questionnaire administered to 31 purposively sampled third-year BSED Social Studies students who engage in paid work. Data were analyzed through frequency distributions, percentages, weighted means, Pearson's product-moment correlation coefficient, a four-point Likert scale, and ranking procedures to assess the strength and direction of relationships between challenges and academic performance. Findings indicated that most respondents, aged 19 to 21 and from low-income families, struggled with time management and attendance due to work commitments. Respondents remained resilient, actively engaging in performance tasks, Learning Management System activities, and major examinations. Final exam scores in SSM-9 World History 2 varied, with a score of 35 achieved by 16 percent of students. Moderate performance was prevalent, reflecting diverse achievement levels. A strong positive correlation (Pearson $r = 0.90$) was found between the extent of challenges encountered and academic performance, suggesting that navigating increased challenges contributed to the development of skills that enhanced students' capacity to balance work and academic responsibilities. The study highlighted significant challenges faced by third-year BSED Social Studies working students and emphasized the need for institutional support. Recommendations included offering flexible scheduling, providing online learning options, and delivering time management workshops to help students balance work and academic demands. Such measures were found to foster improved responsibility management, leading to enhanced educational outcomes and personal growth.

Keywords: challenges encountered, working students, academic performance, bsed social studies, time management, learning management system

**CHALLENGES ENCOUNTERED IN USING LABORATORY AMONG SHS STUDENTS:
BASIS IN CRAFTING MANUAL AND VIDEO PRESENTATION**

Mary Joy Tercio, Stephanie Andres, Lovely Centura, Darlene Tungala,
Nenia Villar, Abraham Muyrong II

Abstract

Laboratory sessions are integral to scientific education, enhancing theoretical understanding and fostering critical thinking. However, these sessions present challenges such as intricate procedures, time constraints, limited resources, safety concerns, and groupwork dynamics. These factors can impede students' grasp of scientific concepts, execution of experiments, and confidence in laboratory skills. This study investigates these challenges among senior high school students and identifies targeted interventions such as improved instructional strategies, upgraded facilities, and enriched learning environments to support effective laboratory learning. This study employs a descriptive research design involving 80 Grade 12 students in the Home Economics strand at Bestlink College of the Philippines. Participants were selected through purposive random sampling. Data was collected using a structured survey questionnaire that probed the nature and extent of challenges encountered during laboratory sessions. Responses were analyzed using mean scores to determine the relative impact of each challenge on student learning. Findings indicated that time constraints (mean = 3.10) significantly limited students' ability to complete tasks, while complex procedures (mean = 2.95) tended to overwhelm participants. Limited resources (mean = 3.27) restricted experimentation, and safety concerns (mean = 2.96) due to inadequate precautions increased risk and reduced participation. A lack of practical experience (mean = 3.16) hindered the connection between theory and practice, and insufficient equipment (mean = 3.13) compromised experimental accuracy. Additionally, low engagement and motivation (mean = 3.13) correlated with reduced participation and lower academic performance. The study demonstrated that female students aged 18 and above comprised the majority of participants. Students emphasized that effective laboratory operations depended on well-maintained equipment, cleanliness, and strict adherence to safety protocols. The results highlighted the need for enhanced resource allocation, reinforced safety measures, refined instructional methods, and engaging activities. The development of comprehensive laboratory manuals and video tutorials was found to be a promising approach to standardize best practices and foster continuous improvement, thereby creating a safer and more effective learning environment.

Keywords: laboratory challenges, senior high school, time constraints, resource scarcity, safety concerns, instructional strategies, video tutorials, education.

**COPING SKILLS OF OVER-AGE STUDENTS OF BESTLINK COLLEGE
OF THE PHILIPPINES BULACAN CAMPUS: BASIS FOR
MODIFICATION AND ACCOMMODATION**

Mae Peña Rona, Jeziel Quilaton, Rhea Mae Ednalgan, Joyce Camas,
Micaella Bedio, Ma Fernanda Llenaresas, Romeoul Karl Flores

Abstract

Over-age students, those aged 28 and above, face unique challenges in balancing academic work with personal, family, and employment responsibilities. At Bestlink College of the Philippines, Quezon City, many over-age learners demonstrate resilience and determination despite these obstacles. This study explores how overage students cope with age-related barriers, what motivates their persistence, and how educational modifications and accommodations support their success. According to UNESCO, 9.82 percent of Filipino students were classified as overage in 2017. Appropriate instructional adjustments play a crucial role in reducing stress, boosting confidence, and enhancing problem-solving skills, thereby helping over-age students navigate their academic journeys. This study uses descriptive quantitative design. Thirty overage students were selected via purposive sampling. A validated questionnaire was administered to collect data on demographic profiles, learning challenges, coping strategies, and accommodation needs. Reliability and validity were confirmed through expert review and pilot testing. Collected responses were analyzed using frequency and percentage distributions and weighted mean calculations. Of the thirty respondents, 63.3 percent were female and 83.3 percent were aged 28 to 35. The majority were single (76.6 percent) and unemployed (63 percent). Key challenges in self-paced learning included managing multiple responsibilities, effective communication, and lesson retention. Critical thinking, time management, and communication emerged as the top skills students aimed to improve. Accessibility needs centered on visual aids, flexible deadlines, peer tutoring, and hearing assistance. Although adaptation to online learning was vital, 61 percent of respondents reported low motivation due to academic pressure, workload, and unclear goals. Findings highlighted that over-age students in Bestlink College relied on cognitive and behavioral strategies such as prioritizing tasks and seeking targeted accommodations to manage their dual roles. As a result, it was recommended that the institution expand learning support services by providing visual and auditory aids, establishing peer-tutoring programs, and offering flexible scheduling. Strengthening guidance and counseling, clarifying academic expectations, and implementing targeted motivational initiatives were also advised to enhance engagement and academic success among over-age learners.

Keywords: over-age students, coping mechanisms, self-paced learning, time management, academic motivation, learning accommodations, online learning, higher education

**DEVELOPING NUTRITIOUS ALTERNATIVE FLOUR IN
BREAD MAKING USING WATER SPINACH**

Nikki Navales, Blesslie Aludino, Margie Alabarta, Romalyn Lumbao,
Erica Mostero, Romeoul Karl Flores

Abstract

This study explores the use of water spinach (*Ipomoea aquatica*) as a nutritious alternative flour in breadmaking. Given its rich content of vitamins A, C, and K, as well as essential minerals such as calcium and iron, water spinach presents a cost-effective and health-promoting ingredient for bread products. The research aims to assess the nutritional benefits, practicality, and acceptability of water spinach flour as a substitute for conventional flour, with a focus on promoting healthier food options. The study employed purposive sampling to align the participant's profile with the research objectives, following the methodology outlined by Campbell et al. (2021). Data collection focuses on the evaluation of water spinach's characteristics in bread production, particularly its nutritional profile, sensory attributes, and processing challenges. The respondents provided feedback through structured surveys based on their experience with the product. The findings revealed that 65% of respondents were aged 18–21, 20% were aged 22–25, and 15% were 26 years old and above. In terms of gender, 60% were female and 40% were male. Respondents rated the water spinach bread as “excellent” in terms of vitamin and mineral content, health benefits, and affordability. Challenges in production, including consistency of texture, flavor balance, and shelf life, were also rated as “excellent,” indicating their manageable nature. The production method and processing techniques for water spinach flour received positive feedback, highlighting their feasibility. The study supports the development of a guide intervention plan to promote the use of water spinach flour in bread making. The study concluded that water spinach is a viable alternative flour for bread production due to its nutritional value, high fiber content, and antioxidant properties. Despite benefits, challenges such as inconsistent ingredient quality, temperature sensitivity during mixing, and dough handling must be addressed. Recommendations include using freshwater spinach leaves, selecting moisture-tolerant yeast, and supervising students during preparation for safety. A step-by-step baking procedure was also developed to ensure replicability and instructional use. These findings offer practical insights for educators, food innovators, and health-conscious consumers seeking affordable and functional bread alternatives.

Keywords: water spinach, alternative flour, bread making, nutritional bread, functional food, food innovation, high-fiber bread, vitamins and minerals, food science, education

**DIGITAL LITERACY AND IT'S INFLUENCE ON ACADEMIC SUCCESS OF
GRADE 12 HUMANITIES AND SOCIAL SCIENCES AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Aldren Colaljo, Aldren Colaljo, Aldren Colaljo, Stephanie May Lanting, Karen Kate Anangilan,
Mark Melorin, Saven James Bigayan, Rica Mae Berja

Abstract

This study investigates the relationship between digital literacy and academic success among 212 Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. It focuses on key components of digital literacy, including access to information, information literacy, time management, critical thinking, and communication skills. The study also explores the advantages and challenges associated with digital learning. Anchored on the constructivist learning framework, this research holds relevance for students, educators, and future researchers aiming to enhance academic performance through digital competence. The researchers adopted a descriptive research design and employed convenience sampling to select participants. Data were collected using a standardized survey instrument divided into four sections: digital literacy, academic success, core competencies (time management, critical thinking, and communication), and strategies for enhancement. A four-point Likert scale was used to evaluate responses. The gathered data were analyzed using statistical tools such as frequency, percentage, ranking, and mean. To ensure validity and reliability, the questionnaire was reviewed by a research adviser and a grammarian. The results revealed a significant correlation between digital literacy and academic success. Online education received a weighted mean of 3.53, access to digital tools scored 3.50, and information literacy garnered 3.51, resulting in a composite mean of 3.51, which corresponds to "strongly agree." Similarly, time management scored 3.54, communication 3.50, and critical thinking 3.46, leading to an overall composite mean of 3.50, also interpreted as "strongly agree." Based on the findings, the researchers proposed an action plan aimed at enhancing digital literacy and its influence on academic success among Grade 12 HUMSS students. The discussion highlights the strong connection between digital literacy and academic performance, particularly in relation to time management, communication, and critical thinking. Challenges such as excessive use of social media, technological distractions, and sleep disruption were also noted. The study concludes that improved digital literacy contributes positively to student performance and recommends targeted interventions to address existing barriers.

Keywords: digital literacy, academic success, humanities and social sciences, constructivist learning, time management, critical thinking, communication skills, online education, information literacy

DIGITAL POP-UP BOOKS: REMEDIATION MATERIAL FOR GRADE 3 LEARNERS

Jasmin Jonna, Jessica Argones, Jemaryl Aptive, Lyka Rose Bohol,
Leumas Joy Verzosa, Ryan Christopher Villalon

Abstract

Digital pop-up books serve as versatile instructional materials for teaching English and other subjects. They help identify areas requiring reteaching and reinforce foundational skills to improve student performance. By integrating diverse teaching strategies, these materials enhance learners' visual comprehension and engagement. As effective remedial tools, digital pop-up books bridge learning gaps, boost understanding and retention, and actively involve students in the learning process. This approach supports deeper lesson mastery and promotes long-term retention through interactive and visually stimulating content. The researchers employed a quantitative, causal-comparative research design. Using purposive sampling, they selected 48 Grade 3 learners from Bagong Silang Elementary School as respondents. A 40-item survey questionnaire, administered as both pre-test and post-test, was developed to gather data. The collected responses were analyzed using various statistical techniques, including percentages, rankings, weighted and composite means, and the z-test to determine significant differences. The findings of the study strongly indicate that digital pop-up books are highly effective remediation materials for enhancing comprehension, improving retention, and increasing student engagement. Statistical analysis revealed a highly significant difference between the pre-test and post-test scores of Grade 3 Robin learners, with a p-value of less than 0.00001, underscoring the positive impact of digital pop-up books on reading performance. In light of these results, it is strongly recommended that educators and curriculum developers prioritize the development and integration of digital pop-up books as essential remediation tools. These resources can substantially augment students' reading skills by fostering deeper comprehension and facilitating long-term retention. The study demonstrates that digital pop-up books are highly effective remediation tools that support a wide range of learners in understanding and retaining complex academic concepts. This approach is grounded in Main P.'s (2023) theory of visual learning, which highlights the critical role of visual techniques in enhancing comprehension and memory by engaging students' cognitive processes. The findings emphasize the importance of integrating digital learning environments into foundational education, especially for young learners. By leveraging various teaching methods that foster visual learning, educators can revisit and reinforce fundamental skills, thereby significantly improving student performance and long-term retention.

Keywords: digital pop-up books, remediation materials, visual learning, reading comprehension, memory retention, cognitive process, visual learning theory, student engagement, teaching methods, foundational education, digital learning environment, academic per

**E-LEARNING MATERIALS AS TOOLS IN TEACHING PHYSICAL EDUCATION AMONG
GRADE 11 STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Leira Angel Lecias, John Maynard Boyles, Princess Joy Castillo, Marichu Dequina,
Ma Cristina Lualhati, Abraham Muyrong II

Abstract

The Philippine education system faces persistent problems and challenges, particularly in logistics. These issues include insufficient facilities, instructional materials, and schools, as well as overworked and underpaid teachers. This study aims to develop a comprehensive plan for integrating e-learning tools into Physical Education classes. However, several challenges and factors significantly impact the effectiveness of e-learning systems, especially for Physical Education teachers who may need proper guidance and support. The researchers employed a quasi-experimental design along with a quantitative approach for their study. Participants consisted of seventy (70) Grade 11 students from the Humanities and Social Sciences (HUMSS) track. For data collection, a survey questionnaire was utilized to gather reliable and accurate information, thereby enhancing the validity of the research. The questionnaire included two sections: the first focused on the demographic profiles of the respondents, and the second assessed the teaching methods experienced by the two groups. These methods included lecture-based, technology-based, individual-based, and kinesthetic-based approaches. The data analysis process began with a systematic review of the collected information, followed by the aggregation of responses to quantify the frequency of each occurrence. The evaluated frequencies were then expressed as percentages, providing a clearer representation of data distribution. The E-learning materials highlighted the significant impact of technology on students within the context of physical education instruction. The online cohort achieved a composite mean score of 16.70. Among the participants, 43% scored between 17 and 22, while 17% reached scores in the highest range of 23 to 26. The findings highlight the substantial potential of e-learning materials to improve the teaching methods used in physical education. The E-Connect website is a valuable platform that enables students to gain new skills, knowledge, and certifications at their own convenience, regardless of their location. As a result, the evidence indicates that e-learning can significantly enhance the accessibility and convenience of education.

Keywords: e-learning materials, physical education, grade 11 students, bestlink college of the philippines, digital learning tools, online teaching strategies, blended learning, educational technology, student engagement, instructional effectiveness, remote le

**EFFECT OF BEING A WORKING STUDENT ON ACADEMIC PERFORMANCE
OF GRADE 12 HUMANITIES AND SOCIAL SCIENCE AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Gina Coronas, Renz Dela Rosa, Glessilyn Ramos, Kristhal Joy Miguel,
Jhon Kirven Rupinta, Christopher Azares

Abstract

The study reveals that working while studying significantly affects the academic performance of Grade 12 students in the Humanities and Social Sciences strand. As the cost of education rises in the Philippines, many senior high school students are taking on part-time or full-time jobs to support themselves. This trend presents unique challenges for students who need to balance their academic responsibilities with work obligations. Key factors impacted by student employment include time management, class attendance, and financial stability. High-intensity jobs, particularly those requiring 35 or more hours per week, tend to negatively affect academic outcomes by reducing the time and energy available for school activities. Common consequences of these challenges include procrastination, stress, and burnout, which often result in poor academic performance. To investigate this issue, the researchers utilized a descriptive quantitative research design and employed purposive sampling to collect data from 200 Grade 12 students in the Humanities and Social Sciences track. Data was gathered through a face-to-face survey questionnaire, which was validated by the research adviser, a statistician, and a grammarian. The results indicate that being a working student significantly impacts academic performance. In terms of time management, students reported a strong agreement with their ability to handle deadlines (3.26), maintain a personal-life balance (3.28), and address issues related to procrastination (3.22). Class attendance was also rated as strongly agreed upon (3.28), influenced by transportation problems (3.10), health-related concerns (3.32), and poor time management. Financial limitations had a moderate effect (3.14), with students noting challenges in saving emergency funds (3.22) and the need to work more hours, which diminished their academic focus and energy levels. The study concludes that employment among Grade 12 Humanities and Social Sciences students significantly influences their academic journey. Recognizing the specific challenges they encounter can help establish support systems and policies that enable students to succeed academically while addressing their financial needs.

Keywords: working students, academic performance, grade 12, humanities and social sciences, bestlink college of the philippines, time management, student workload, educational outcomes, work-study balance, student motivation, academic challenges, socioeconomic

**EFFECTIVENESS OF ADJECTIVE WHEEL IN TEACHING DESCRIBING
WORDS IN ENGLISH AMONG GRADE 2 PUPILS**

Realyn Mae Alangilan, Mary Grace Alejo, Regieleen Cortes, Bridgette Izen Laoc,
Andreinne Collene Pine, Rheza Camilla Ricablanca, Abraham Muyrong II

Abstract

The Department of Education (DepEd) released a directive in 2020 regarding the use of the Adjective Wheel in instructional activities. This directive aims to ensure both the appropriateness and safety of using these tools in various learning environments. The use of the wheel can significantly enhance student engagement and learning outcomes. The purpose of this study is to evaluate the effectiveness of these tools in improving Grade 2 pupils' ability to recognize, understand, and apply descriptive words in English, thereby contributing to their academic performance. The students were selected using purposive sampling. A total of thirty (30) students were chosen from the enrolled students at the Academy of Saint Andrew Caloocan Inc. The researcher developed a pre-test and a post-test, consisting of 20 modified standardized items, to assess the English performance of the grade 2 pupils. The researcher sought assistance from the research adviser to ensure the appropriateness and coherence of the test questions. The data obtained from the survey were analyzed and evaluated using various statistical treatments, including frequency and percentage, weighted mean, ranking, and t-test. The results highlight key findings regarding participants' experiences. In terms of Curiosity, the average weighted mean is 3.67, which is considered Highly Significant. For Critical Thinking, the average mean is 3.57, also classified as Highly Significant. Lastly, Collaboration received an average weighted mean of 3.93, deemed Highly Significant as well. Furthermore, there is a significant relationship between the Pre-test and Post-test scores of the respondents, with a t-value of -72.218 and a P-value of less than 00001. This led to the rejection of the null hypothesis and indicates significant results. The formulated guidelines provide instructions on how to effectively utilize the Adjective Wheel in the classroom. Recommendations suggest necessary improvements for better integrating the Adjective Wheel to help students construct sentences. In conclusion, the proposed solution can be developed by addressing the study's weakest point: students' limited vocabulary, which presents challenges in their learning. However, the Adjective Wheel has the potential to enhance both learning effectiveness and student engagement. Its effectiveness can help improve students' retention of new vocabulary during class discussions.

Keywords: adjective wheel, describing words, grade 2 pupils, english language learning, vocabulary development, teaching strategies, elementary education, language instruction, visual learning tool, grammar skills, english proficiency, interactive learning

**EFFECTIVENESS OF C.L.E.A.N TO ENHANCE ENVIRONMENTAL
CONSERVATION IN LEARNING SCIENCE 5**

Valmoria Aceil, Jashmine Elaine Banania, Jonna Corporal, Jonna Corporal,
Edmar De Ramon, Margelyn Meyor, Abraham Muyrong II

Abstract

There is a shortage of effective instructional materials specifically designed to enhance students' understanding and academic performance in environmental conservation. While many instructional materials are available, few focus on this critical area. David Kolb developed the theory of experiential learning, which positions students as active participants in their education by immersing them in real-world learning situations. Kolb asserts that learning is most effective when individuals engage in four stages of the learning cycle: concrete experience, reflective observation, abstract conceptualization, and active experimentation. This study introduces CLEAN (Children Learning Educational Activities in Nature), a manipulative instructional material. The goal of this research is to explore the potential of CLEAN as an innovative teaching tool aimed at improving environmental education and fostering a deeper understanding and appreciation of environmental conservation among fifth-grade science students at Commonwealth Elementary School. The study employed a quasi-experimental design and utilized quantitative methods to observe significant differences between the variables. The primary objective was to analyze these variables mathematically using statistical techniques, including frequency and percentage ranking, weighted means, Likert scales, and z-tests. The sample consisted of forty (40) fifth-grade pupils from Commonwealth Elementary School. The pre-test results indicated that the average performance of forty (40) respondents was notably at the High Proficient level, demonstrating their strong understanding of the subject matter even prior to the intervention. Additionally, the respondents "Strongly Agree" that the use of C.L.E.A.N. materials, particularly in enhancing practical skills, promoting hands-on learning, fostering environmental awareness, and increasing class participation, significantly contributed to a deeper understanding of environmental conservation and its relevance to their daily lives. The results of the pre-test conducted before utilizing CLEAN show that respondents had an average level of understanding of Environmental Science 5. After implementing CLEAN, the majority of respondents scored between 13 and 19 on the post-test, representing 70% of the scores. These findings indicate that the educational materials were effective, as demonstrated by the improved post-test scores. The researcher recognizes that CLEAN enhances practical skills and positively impacts students' critical thinking abilities.

Keywords: c.l.e.a.n program, environmental conservation, science 5, environmental education, grade 5 students, teaching strategies, sustainability awareness, science learning, eco-friendly practices, classroom intervention, environmental responsibility, conser

**EFFECTIVENESS OF CB IN FACEBOOK PLATFORM IN TEACHING
HISTORY OF SELECTED PHILIPPINE FOLK DANCES**

Jerome Manlupig, Jericho Ahute, John Romeo Anastacio, Earl John Bonagua,
Keira Juriel Caballero, Abraham Muyrong II

Abstract

The aim of this study is to explore the effectiveness of Competency-Based (CB) approaches on the Facebook platform for teaching the history of selected Philippine folk dances to students. Understanding the results of this study has significant implications for education. By recognizing Facebook's potential as an instructional tool for first-year Bachelor of Physical Education (BPED) students, this research seeks to assess how effective the CB approach is when utilized in this social media context for teaching the history of selected Philippine folk dances. Using a quasi-experimental quantitative research design, the study involves seventy-six (76) first-year BPED students through a cluster sampling technique. Survey questionnaires and checklists serve as the primary instruments for data collection. The results of the study highlight several key findings. A total of 76 participants were involved in the research. The analysis revealed a significant difference between pretest and posttest scores, with a p-value of 0.000, indicating statistical significance ($p < 0.05$). The negative Z score of -6.996 suggests that posttest scores were significantly higher than pretest scores, demonstrating substantial improvement among the students. The study examines the effectiveness of the learning material, specifically the CB (course material), on the Facebook platform. The data collected indicates that posttest scores were significantly higher than pretest scores, demonstrating substantial improvement among the students. Based on these findings, we reject the null hypothesis, concluding that the intervention had a significant positive effect. Most participants showed improvement, underscoring the effectiveness of the CB on the Facebook platform in enhancing their understanding of Philippine folk dance. This further indicates that the instructional material, CB on the Facebook platform, is effective for both learning and teaching.

Keywords: content-based instruction, facebook platform, philippine folk dances, history teaching, digital learning, online education, social media in education, blended learning, cultural education, folk dance history, e-learning tools, grade-level instruction

**EFFECTIVENESS OF COMPARING SET VIDEO CLIP IN DEVELOPING
MATHEMATICS SKILLS IN GRADE 1 PUPILS**

Pamela Ayoc, Florence Mae Dela Cruz, Jonalyn Floria, Naomi Ramos,
Marielle Anne Tapar, Abraham Muyrong II

Abstract

Mathematics is a foundational subject in early childhood education, essential for developing logical reasoning, problem-solving, and critical thinking skills. This study examined the impact of integrating a video clip on comparing sets into mathematics instruction for Grade 1 pupils. The use of multimedia aimed to foster greater engagement and enhance the learners' conceptual understanding through interactive and visually supported learning. The primary objective was to evaluate whether this instructional tool effectively improved pupils' abilities in counting, numeracy, problem-solving, and creative thinking. By focusing on the effectiveness of video-assisted instruction, the study contributes to the growing body of research on technology-enhanced learning in early mathematics education. The study adopted a qualitative research design employing a causal-comparative approach, which enabled the analysis of existing differences or relationships between variables without manipulating any conditions. The participants were Grade 1 pupils from San Bartolome Elementary School, selected through purposive sampling to ensure alignment with the study's objectives. To measure the development of mathematics skills, the researcher designed a 20-item assessment tool grounded in an extensive review of relevant literature and prior studies. This ensured that the test items were both contextually appropriate and aligned with the intended learning competencies. The results indicated that the use of the comparing sets video clip was highly effective in enhancing students' abilities to solve mathematical problems, improve numeracy, and foster critical thinking. Statistical analysis showed a significant difference between pre-test and post-test scores ($p\text{-value} < .00001$) after the video clip was introduced to the students in Grade 1 – Section Daisy and Santan. In light of the findings, the study recommends enhancing teacher-student communication and fostering collaborative learning to create a more engaging classroom environment. Improving the accessibility of instructional materials is also crucial to support active participation and learning continuity. To sustain students' interest and enthusiasm, it is further suggested that educational video clips be consistently integrated into lessons, especially when teaching basic mathematical skills.

Keywords: comparing sets, mathematics skills, grade 1 pupils, educational video clips, visual learning, early childhood education, instructional media, learner engagement, concept development, multimedia learning

**EFFECTIVENESS OF CREATIVE WRITING PROMPTS IN COMPOSING
FICTION STORIES AMONG GRADE 12 HUMSS STUDENTS**

Cyrine Alfonso, Wenna Lou Amado, Romelyn Buen, Jurry Lozano,
Angeline Merueñas, Venus Rosal, Dr. Romeo Fernandez

Abstract

Crafting a compelling story is a creative endeavor that can be both rewarding and challenging. While some students naturally excel in storytelling, others often struggle with generating ideas or initiating their narratives. Creative writing prompts are valuable tools that stimulate imagination and provide direction, enabling students to construct engaging fictional works. These prompts not only inspire creativity but also offer structure, helping learners overcome writer's block and cultivate essential writing skills. Integrating creative writing prompts into classroom instruction fosters a dynamic and supportive learning environment that encourages self-expression and literary exploration. This study aims to evaluate the effectiveness of creative writing prompts in enhancing the fiction writing abilities of Grade 12 HUMSS students. This study employed a quasi-experimental research design to evaluate the effectiveness of creative writing prompts in enhancing the fiction writing skills of students. Forty (40) Grade 12 HUMSS students enrolled in the Creative Writing course at Bestlink College of the Philippines for the academic year 2024–2025 were selected through purposive sampling. To measure the impact of the intervention, pre-tests and post-tests were administered to assess students' performance before and after the implementation of creative writing prompts. The research instruments, including assessment tests, instructional materials, and evaluation checklists, were rigorously validated by subject matter experts and educational professionals to ensure content validity, relevance, and reliability. This methodological approach established a structured and credible framework for examining the influence of creative writing prompts on students' narrative development, creativity, and written expression. The results of the study revealed that 75% of the respondents were aged 17–18 years, with 52.5% identifying as female. In terms of writing performance, the pre-test yielded a mean score of 9.82 with a standard deviation of 2.725, indicating the students' initial level of proficiency in fiction writing. After the implementation of creative writing prompts, the post-test results showed a significant improvement, with a higher mean score of 17.12 and a lower standard deviation of 2.322, suggesting both notable progress and increased consistency in performance. A z-test analysis yielded a z-value of 12.86674 and a p-value of 0.00001, which is significantly below the alpha level of 0.05. These findings indicate a statistically significant difference between the pre-test and post-test scores, thereby leading to the rejection of the null hypothesis. Consequently, the study confirms that the integration of creative writing prompts had a significant and positive effect on the fiction writing abilities of Grade 12 HUMSS students. This study provides validated evidence of the effectiveness of creative writing prompts in improving students' fiction writing skills. The findings demonstrated a significant enhancement in writing performance following the use of structured prompts, affirming their value as an instructional tool in creative writing pedagogy. Nevertheless, students continued to encounter challenges in key areas such as content development, organization, writing conventions, characterization, language use, and stylistic expression. In response to these findings, the researchers recommend the continued integration of creative writing prompts into the curriculum, complemented by varied and scaffolded writing activities. These activities should specifically address areas of difficulty, foster deeper engagement, and support the refinement of students' narrative techniques. Through sustained practice and targeted instruction, students can further strengthen their creative writing abilities, building greater confidence and fluency in written expression.

Keywords: creative writing prompts, fiction writing, narrative development, humss students, writing performance, pedagogical tools, quasi-experimental research, student engagement, writing instruction, grade 12

**EFFECTIVENESS OF DFC IN ENHANCING BASKETBALL BASIC SKILLS OF
GRADE-11 HUMSS STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Irish Antonette Parena, Rosalyn Balanon, Jonil Andrie Sorrrera,
Nicky Laoreno, Jonah Alliah Duruin, Abraham Muyrong II

Abstract

This study investigates the effectiveness of Digital Flip Charts (DFCs) as a modern instructional tool for enhancing the basketball skills of Grade 11 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. With the growing integration of technology in education, the research aims to evaluate how multimedia-rich and interactive platforms like DFCs influence student engagement, motivation, and performance in physical education. Focusing on the core fundamentals of basketball, passing, dribbling, shooting, and rebounding, the study examines whether incorporating DFCs into sports instruction promotes a more dynamic, learner-centered, and effective approach to skill development compared to traditional teaching methods. This study adopts a descriptive, quasi-experimental research design to evaluate the effectiveness of Digital Flip Charts (DFCs) in enhancing the basketball skills of Grade 11 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. The intervention's impact was determined by comparing students' pre-test and post-test scores in four key basketball fundamentals: passing, dribbling, shooting, and rebounding. A purposive sample of 48 students was selected based on availability and compliance with the study's criteria. Data was gathered through face-to-face surveys and direct observation of skill performance. Statistical tools including frequency distribution, percentage analysis, ranking, and Likert scale interpretation, were used to analyze the results, with the Statistical Package for the Social Sciences (SPSS) employed to process the data and generate insights into the effectiveness of DFCs in fostering skill development and engagement in physical education. The demographic profile revealed that most respondents were 18 years old and below, with a slightly higher proportion of female students than male, and the majority being regular enrollees in the HUMSS strand. Pre-intervention assessments indicated limited proficiency in core basketball skills particularly in passing, dribbling, shooting, and rebounding. After the intervention, post-test results demonstrated significant improvements in all skill areas, with the most notable gains in the previously weakest competencies. These findings highlight the effectiveness of Digital Flip Charts (DFCs) as a pedagogical tool for promoting individualized, skill-focused learning. By integrating interactive and visually engaging content, DFCs were shown to enhance student engagement and facilitate the mastery of fundamental basketball techniques, reinforcing their value in technology-enhanced physical education instruction. The study also identified key challenges in traditional physical education instruction, including low student engagement and the limited effectiveness of static, often unclear visual aids in conventional flip charts. These shortcomings were found to impede students' comprehension, interest, and overall skill development. To address these issues, the researchers recommend the integration of interactive, technology-enhanced instructional materials such as Digital Flip Charts (DFCs), to create a more dynamic and learner-centered environment. With their multimedia capabilities, DFCs provide clearer demonstrations and sustain student attention more effectively. The study further emphasizes the essential role of school administrators in institutionalizing the use of digital tools by embedding them into the physical education curriculum. Administrative support is crucial for advancing innovative teaching practices, enhancing student engagement, and improving overall performance.

Keywords: digital flip charts (dfc), basketball skills, technology-enhanced instruction, physical education, humss students, interactive learning, multimedia teaching tools, student engagement, skill development, quasi-experimental design

**EFFECTIVENESS OF DIGITAL FLIPBOOK IN TEACHING
CVC LESSON TO GRADE 1 PUPILS**

Angel Joy Purawan, Precious Acosta, Rizza Mae Bartolome, Daina May Jasareno,
Gemma Peñeda, Abraham Muyrong II

Abstract

This study examined the effectiveness of a digital flipbook as a technology-enhanced instructional tool for teaching sound recognition to Grade 1 pupils at Southville 8 Elementary School. The digital flipbook was designed to provide an immersive and interactive learning experience, significantly improving learners' retention, comprehension, and engagement. Featuring multimedia components such as animated visuals, audio cues, and interactive elements, the tool aligned well with the cognitive preferences of today's digitally inclined learners. Anchored in Allan Paivio's Dual Coding Theory, which highlights the cognitive benefits of integrating verbal and visual information, the study affirms that interactive imagery fosters deeper learning than text alone. Results showed that incorporating digital flipbooks into classroom instruction notably enhanced students' vocabulary acquisition and conceptual understanding, underscoring the potential of such tools to revolutionize early childhood education through engaging, learner-centered approaches. The study employed a causal-comparative research design to assess the effectiveness of a digital flipbook in enhancing sound recognition among Grade 1 pupils. Respondents were selected from Southville 8 Elementary School in Rodriguez, Rizal, based on their alignment with the study's objectives. Data collection involved a structured survey questionnaire, and a 10-item modified standardized pre-test and post-test. These instruments were developed and validated with the guidance of a research adviser to ensure content validity, clarity, and alignment with relevant learning competencies. The data were analyzed using appropriate statistical methods, including frequency and percentage distribution, ranking, weighted mean, Likert scale interpretation, and a Z-test to determine the significance of differences between pre-test and post-test scores. These analyses provided a quantitative basis for evaluating the impact of the digital flipbook on pupils' learning outcomes. The findings revealed that the use of the digital flipbook significantly enhanced students' retention, comprehension, and overall learning. Statistical analysis indicated a highly significant difference between the pre-test and post-test scores ($p\text{-value} < .00001$) across Grade 1 sections Daisy, Orchid, Rose, and Santan, affirming the effectiveness of the digital flipbook as an instructional tool. In light of these results, it is recommended that the visual appeal of the flipbook be further improved, particularly through the enhancement of images and the incorporation of more vibrant colors, to optimize student engagement and sustain interest throughout the learning process. The study underscores the effectiveness of digital flipbooks in advancing the goals of early childhood education while aligning with the digital preferences of today's young learners. These tools not only strengthen visual intelligence and stimulate curiosity but also promote creativity and deepen learner engagement. To maximize their potential, it is recommended that digital flipbooks be utilized in teaching foundational language skills such as phonics and grammar, supported by interactive teaching strategies and enriched multimedia content. Incorporating digital flipbooks into class discussions can also enhance student participation and information retention. Collectively, these approaches foster a more dynamic, enjoyable, and impactful learning experience for early grade learners.

Keywords: digital flipbook, early childhood education, sound recognition, multimedia learning, interactive instruction, student engagement, foundational language skills, phonics, grammar, visual intelligence, retention

**EFFECTIVENESS OF DIGITAL STORYBOOKS IN ENHANCING THE
READING COMPREHENSION OF GRADE 3 PUPILS IN
SAN BARTOLOME ELEMENTARY SCHOOL**

Micole Obina, Mary Rose Ambay, Vera Mae Reyes, Elen Joy Salvacion,
Christine Joy Yap, Justine Lyn Fernandez

Abstract

This study aimed to evaluate the effectiveness of digital storybooks in enhancing the reading comprehension skills of Grade 3 pupils. By incorporating multimedia elements such as audio narration, animations, and interactive features, digital storybooks provide a dynamic and engaging learning environment. The research focused on determining whether these technology-enhanced tools significantly improve students' comprehension abilities compared to traditional print-based reading materials. This study employed a quasi-experimental research design with a quantitative approach to evaluate the effectiveness of digital storybooks in enhancing reading comprehension among Grade 3 pupils at San Bartolome Elementary School. A total of 210 pupils were purposively selected based on predetermined criteria aligned with the study's objectives. To assess changes in reading comprehension, researcher-developed pre-tests and post-tests were administered before and after the intervention. These assessment tools were specifically designed to measure pupils' comprehension abilities and to evaluate the impact of digital storybook-based instruction. The findings revealed that the majority of respondents were between 8 and 9 years old, with females comprising a slight majority (50.48%). The integration of digital storybooks was found to be effective in enhancing the reading comprehension skills of Grade 3 pupils, particularly in applying background knowledge to understand narrative structures, as reflected in a grand mean score of 3.43. Students reported high levels of engagement and enthusiasm, largely attributed to interactive multimedia features such as vivid illustrations, sound effects, narration, animated transitions, and synchronized read-along capabilities. These features not only enriched the reading experience but also facilitated character identification and deeper text comprehension, resulting in a grand weighted mean of 3.50. Moreover, improvements in learning retention were observed. Pupils demonstrated the ability to recall key story elements, including main ideas, characters, and plot points, supported by a grand weighted mean of 3.45. Visual aids, especially illustrations, played a critical role in reinforcing comprehension and memory. This was further evidenced by students' active participation in retelling stories, explaining plot developments, and engaging in group discussions. Despite these positive outcomes, 15.43% of pupils reported difficulties navigating complex user interfaces, indicating the need for more age-appropriate and user-friendly digital platforms. Quantitative results from the administered pre-tests and post-tests confirmed the impact of the intervention. The mean pre-test score of 9.20 significantly increased to a post-test mean of 13.26. Statistical analysis yielded a z-value of 9.764, exceeding the critical value of 1.960, thus rejecting the null hypothesis. This indicates that the improvement in reading comprehension was statistically significant. Overall, the results affirm that digital storybooks substantially enhance the reading comprehension and learning outcomes of Grade 3 pupils. The findings of the study strongly affirm the effectiveness of digital storybooks as instructional tools in enhancing the reading comprehension skills of Grade 3 pupils. The significant improvements in students' comprehension, engagement, and retention underscore the value of integrating multimedia-rich, interactive storybooks into primary literacy instruction. These tools not only support the development of essential reading skills but also foster a more engaging and meaningful connection with texts, demonstrating their potential to transform traditional reading practices in early education.

Keywords: digital storybooks, reading comprehension, grade 3 pupils, multimedia learning, interactive reading, educational technology, early literacy, student engagement, retention, primary education

**EFFECTIVENESS OF GEOVISION: VALUES IN MOTION IN LEARNING GEOGRAPHY
IN ARLING PANLIPUNAN AMONG GRADE 7 STUDENTS**

Carla Reyes, Maria Christine Joy Concha, Maria Kristina Bacani, Michael Angelo Besas,
Juliana Marie Buan, Cristine Hipolito, Abraham Muyrong II

Abstract

This study aims to evaluate the effectiveness of Geovision, a multimedia-based instructional tool, in teaching Geography under the Araling Panlipunan curriculum to Grade 7 students at San Bartolome High School. The research specifically examines how Geovision, with its integration of values education, enhances students' cognitive processes focusing on multimedia presentation, sensory memory, working memory, and long-term memory. The initiative is driven by the growing need to overcome learning challenges in Geography, particularly in improving student engagement, retention, and understanding of the subject's relevance to their daily lives and the broader society. The study adopted a Quasi-Experimental Research Design, specifically utilizing a Pre-Test and Post-Test methodology to evaluate the effectiveness of Geovision as a multimedia instructional tool in teaching geography. This approach enabled the researchers to measure the improvement in students' comprehension and retention by comparing their performance before and after the intervention. The research was conducted among 100 Grade 7 students from San Bartolome High School in Novaliches, Quezon City. Participants were selected using a Cluster Sampling Technique, ensuring that each student had an equal opportunity to be included in the sample, thereby enhancing the reliability and representativeness of the findings. The research revealed that Geovision is a highly effective multimedia learning tool for teaching geography in the Araling Panlipunan subject among Grade 7 students. The study demonstrated a significant improvement in students' comprehension and retention of geographical concepts, as evidenced by the marked difference between pre-test and post-test scores. Learning Impact: Geovision's multimedia presentations were rated as Effective (Mean = 3.30) in simplifying complex geography topics and fostering a better understanding of the subject matter. Sensory Memory: The tool's visual components were rated Highly Effective (Mean = 3.37) in capturing students' attention and stimulating interest, which encouraged deeper engagement with geographic themes. Working Memory: The integration of audio and visual stimuli was considered Highly Effective (Mean = 3.37) in enhancing students' ability to recall specific geographic elements, demonstrating the tool's ability to support active processing of information. Long-Term Memory: Geovision was rated Highly Effective (Mean = 3.41) in reinforcing long-term memory retention and promoting a positive attitude toward geography. It contributed to meaningful learning experiences that extended beyond academic content, fostering personal growth and lifelong interest in the subject. The results of the study reinforce existing literature on the effectiveness of multimedia learning tools in enhancing student engagement and comprehension. Geovision, through its strategic integration of visual and auditory elements along with value-laden content, significantly improved students' grasp of geographic concepts. This outcome aligns with Mayer's Cognitive Theory of Multimedia Learning, which posits that learners comprehend and retain information more effectively when it is presented through multiple modalities. By stimulating both the visual and auditory channels of sensory memory, Geovision facilitates deeper cognitive processing, supports working memory, and enhances the transfer of knowledge to long-term memory. Overall, the use of Geovision demonstrates that multimedia-based instruction can foster more meaningful, lasting learning experiences in Araling Panlipunan.

Keywords: geovision, multimedia learning tool, araling panlipunan, grade 7 students, geography education, sensory memory, working memory, long-term memory, value integration, san bartolome high school, multimedia learning theory, student engagement, cognitive

**EFFECTIVENESS OF PALAPI IN PROMOTING LARONG PINOY AMONG 2ND YEAR
BPED STUDENTS OF BESTLINK COLLEGE OF THE PHILIPPINES**

John Celie Dela Trinidad, Jayvee Agustin, Charline Cate Naldo,
Benjamin Sandoy, Marivic Yu, Abraham Muyrong II

Abstract

Larong Pinoy, the treasured traditional games of the Philippines, are increasingly being overlooked due to the growing dominance of digital entertainment, limited access to open play spaces, and evolving lifestyle preferences that prioritize modern recreational activities. This gradual decline endangers the transmission of cultural values and traditions to younger generations, posing a significant threat to the preservation of Filipino heritage. Guided by the Culture-as-a-Contributor-to-Development framework, this study emphasizes the need to revitalize traditional games as a tool for strengthening cultural identity, promoting social interaction, and supporting the holistic development of Filipino youth. This quasi-experimental study engaged 50 second-year Bachelor of Physical Education (BPED) students from Bestlink College of the Philippines, selected through quota sampling. Data were gathered through structured surveys and pre- and post-tests to assess the effectiveness of the PALAPI program in improving students' knowledge and active participation in Larong Pinoy. The majority of participants, aged 20 to 22, were male and actively involved in athletic activities. The study identified several key barriers to participation in traditional games, including limited access to suitable play areas, academic time constraints, and a prevailing preference for digital forms of entertainment. The findings demonstrate that the PALAPI program effectively improved students' understanding, participation, and appreciation of traditional Filipino games. Post-test results revealed significant gains over pre-test scores, with the Wilcoxon Signed-Rank Test producing a Z-value of -6.04, indicating a statistically meaningful impact. The program's perceived effectiveness was reflected in mean ratings of 3.51 ("Agree") for developmental outcomes, 3.67 ("Agree") for sustainability, and 3.54 ("Agree") for socio-economic benefits. These improvements were notably observed in areas such as social skill enhancement, cultural preservation, and fostering community engagement. Nonetheless, challenges arose during implementation, including concerns regarding injury risks and limited student interaction with the educational materials. The PALAPI program proved to be an effective educational resource that significantly enhanced students' understanding, engagement, and appreciation of traditional Filipino games. Beyond fostering cultural pride, the program also contributed to the development of social skills, critical thinking, and physical fitness among participants. To sustain these positive outcomes, it is recommended that schools implement portable play areas, upgrade learning materials to better capture student interest, enforce comprehensive safety protocols, and promote active student involvement. Parental encouragement is likewise vital to reinforce the cultural and health benefits of these traditional games. Future studies should explore the integration of digital instructional materials to further improve accessibility and learning effectiveness.

Keywords: palapi program, traditional filipino games, larong pinoy, cultural preservation, student engagement, social skills development, physical fitness, educational materials, safety protocols, digital learning tools

EFFECTIVENESS OF PARASOL IN TEACHING SINGULAR AND PLURAL NOUNS

Annie May Concepcion, Genesis Lopez, Kelsey Ann Manset, Grace Anne Joy Medenilla,
Clarissa Villanueva, Justine Lyn Fernandez

Abstract

This study investigates the effectiveness of the Parasol strategy in teaching singular and plural nouns to second-grade pupils at San Bartolome Elementary School. A total of 45 pupils participated, with 20 from Section Saging and 25 from Section Mangga. The researchers utilize pre-tests and post-tests to assess vocabulary acquisition and sentence construction skills. The primary aim is to evaluate how effectively the Parasol method supports the learning of singular and plural nouns while enhancing students' vocabulary and grammatical usage. This study seeks to provide insight into the pedagogical impact of using Parasol as a teaching tool for improving foundational grammar skills among young learners. This study adopts a causal-comparative research design. Forty-five students from San Bartolome Elementary School are selected through random sampling. To collect the necessary data, the researchers administer both a pre-test and a post-test focused on vocabulary and sentence construction. Data are analyzed using statistical tools, including percentage, weighted mean, and Z-test, to determine the effectiveness of the Parasol teaching strategy. The results indicate that 53% of the respondents were aged 9 to 10 years, and 58% were female. Among the vocabulary items, Vocabulary No. 2 obtained the highest weighted mean of 3.8 during both the pre-test and post-test, while Vocabulary No. 3 had the lowest at 3.6. In sentence construction, Vocabulary No. 1 achieved the highest mean at 3.53, while again, Vocabulary No. 3 showed the lowest at 3.6. These findings highlight that integrating vocabulary and sentence construction activities proved beneficial for student understanding. The significant improvement in post-test scores suggests that the use of engaging and structured instructional materials such as the Parasol strategy effectively supports academic achievement in language learning. In conclusion, the use of the Parasol teaching strategy has been found effective in improving the vocabulary and sentence construction abilities of second-grade learners. This method promotes not only stronger reading and grammar skills but also cultivates a foundation for lifelong learning and intellectual development. Addressing individual learning difficulties through this strategy supports more meaningful learning experiences and better retention of concepts related to grammar and vocabulary.

Keywords: parasol strategy, singular nouns, plural nouns, vocabulary, sentence construction, second-grade pupils, language learning, grammar instruction

EFFECTIVENESS OF PHILTRIPS FACEBOOK REELS IN DEVELOPING GEOGRAPHIC SKILLS IN ARLING PANLIPUNAN OF SELECTED GRADE 6 PUPILS

Niah Janina Domingo, Liede Julie Bautista, Kristine Eraya, Alyssa Gupalao,
Angelica Christine Romero, Abraham Muyrong II

Abstract

Geographic literacy is a vital component of education, helping students better understand and appreciate the world around them. However, traditional teaching methods may not sufficiently engage the current generation of learners. Short-form internet videos, such as Facebook Reels, have emerged as effective tools for enhancing student engagement and promoting deeper understanding of subject matter. According to John Sweller, effective learning requires instructional materials to be simple, well-structured, and presented in a way that prioritizes essential information. This study investigates the effectiveness of PhilTrips Facebook Reels in developing the geographic skills of selected Grade 6 pupils in San Bartolome Elementary School, with the aim of improving instructional approaches in Araling Panlipunan. This study employs a quasi-experimental research design involving purposively selected Grade 6 pupils from San Bartolome Elementary School in Quezon City. Data collection tools include a 25-item pre-test and post-test, as well as a perception survey. All test items were reviewed by the research adviser to ensure validity. The data were analyzed using frequency and percentage to determine changes in performance and student perceptions of the intervention. Results show a significant improvement in post-test scores compared to pre-test scores among the 48 participating pupils, indicating the effectiveness of PhilTrips Facebook Reels in enhancing geographic skills. Survey responses also support these findings, with students rating the reels as highly effective in improving language proficiency, cultural awareness, and topographic understanding. Despite these positive outcomes, respondents cited challenges such as limited internet connectivity, misinterpretation of content, and occasional distractions during viewing. The findings suggest that short-form educational videos like PhilTrips Facebook Reels are effective tools for developing geographic competencies among elementary learners. The visual and interactive format of the reels contributed to improved understanding of landforms, cultural diversity, and subject-related vocabulary. Nonetheless, limitations such as unstable internet access, unclear content structure, and reduced student focus were identified. To address these issues, it is recommended that schools provide offline access to materials, ensure clarity in video content, and implement guided classroom activities to enhance engagement and learning outcomes.

Keywords: philtrips, facebook reels, geographic skills, araling panlipunan, grade 6 pupils, educational technology, short-form videos, cultural awareness, topographic understanding, instructional strategy

**EFFECTIVENESS OF POP-UP BOOKS IN STORYTELLING TO IMPROVE
VISUAL LITERACY OF SELECTED GRADE 6 PUPILS**

Sheila Mae Bagting, Sheila Mae Abayon, Liezl Mahinay, Merry Grace Sabularse,
Julie Mae Toquero, Abraham Muyrong II

Abstract

Student boredom and lack of engagement remain persistent challenges in storytelling activities within the classroom. Pop-up books, as interactive learning materials, have shown potential in stimulating imagination, enhancing comprehension, and promoting aesthetic appreciation. According to Ma and Wei (2020), the functionality of pop-up books enhances creative thinking, understanding, and interactive learning experiences. However, without proper guidance, their educational impact may be limited. This study investigates whether there is a significant difference between the pre-test and post-test results in visual literacy through the use of pop-up books among selected Grade 6 pupils of Maligaya Elementary School in Novaliches, Quezon City, aiming to determine the effectiveness of this approach in improving visual literacy skills. A causal-comparative research design is employed to explore the relationship between storytelling using pop-up books and the development of visual literacy skills. The study involves purposively selected Grade 6 students from Maligaya Elementary School. A 20-item researcher-made test, developed based on a review of related literature, serves as the primary instrument. Data are analyzed using the Z-test, as recommended by Agresti and Finlay (2020), to determine whether there is a statistically significant difference in the performance of students before and after the implementation of the intervention. The findings reveal that the use of pop-up books in storytelling significantly improved student engagement in terms of class participation, group activities, and communication skills. A substantial difference between pre-test and post-test scores was recorded, with a p-value of $<.00001$, indicating that the pop-up book intervention had a strong effect on the visual literacy development of students from sections Rizal and Jacinto. Based on these results, the use of pop-up books is recommended as an effective tool for enhancing participation and comprehension in storytelling sessions. This study highlights the value of pop-up books as an interactive educational tool that fosters creativity, imagination, and the ability to interpret visual images through elements such as depth, perspective, and composition. As supported by Ariyani and Setyowati (2021), pop-up books should also contain moral lessons or positive messages to further enrich the learning experience. Overall, the study affirms that pop-up books can significantly enhance visual literacy and communication skills in storytelling, especially when integrated effectively into classroom instruction.

Keywords: pop-up books, storytelling, visual literacy, grade 6 pupils, interactive learning, english education, student engagement, causal-comparative design, class participation, communication skills

**EFFECTIVENESS OF SML IN IMPROVING KNOWLEDGE IN BASKETBALL
SKILLS AMONG 1ST YEAR FEMALE BPED STUDENTS IN
BESTLINK COLLEGE OF THE PHILIPPINES**

Kathleen Pilpa, Billy Joe Dian, Renzo Albert Morales, Ely Emmanuel Taglay,
Ericka Vicente, Abraham Muyrong II

Abstract

Scan Me and Learn (SML) is an innovative instructional material that utilizes QR codes and interactive technologies to enhance the learning experience. This study explores the effectiveness of the SML approach in improving basketball knowledge and skills among first-year female BPED students at Bestlink College of the Philippines. By comparing the performance of an experimental group using SML with a control group exposed to traditional teaching methods, the study aims to determine the impact of technology-enhanced learning in physical education, particularly in developing foundational basketball competencies. A quasi-experimental research design is employed, involving thirty first-year female BPED students. Participants are divided into control and experimental groups. The study uses pretest and post-test measures to evaluate knowledge and performance in basketball, focusing on skills such as dribbling, passing, and understanding of game rules. Data are gathered using structured tools and analyzed through statistical measures, including mean scores, standard deviation, and Z-test values, to assess significant differences in learning outcomes. The majority of respondents are aged 18 to 19, with 70% reporting no prior experience in basketball. Among the SML components, Arcademics posting received the highest effectiveness rating ($\bar{x} = 2.57$), while facilities scored the lowest ($\bar{x} = 1.63$). The most improved area was understanding game rules ($\bar{x} = 3.30$), with dribbling showing the least improvement ($\bar{x} = 2.63$). Pretest analysis yielded a p-value of 0.046, indicating significant deviation, while the post-test p-value of 0.075 approached a normal distribution. Mean scores increased notably from pretest ($M = 12.50$, $SD = 3.90$) to post-test ($M = 17.63$, $SD = 5.32$), with a significant performance difference ($Z = -4.80$, $p = 0.00$). However, 36% of students reported misunderstandings while using SML, highlighting areas for refinement in the implementation process. The study concludes that the SML strategy is an effective tool in enhancing basketball knowledge and skills among first-year female BPED students. Significant post-test improvements in dribbling, passing, and rule comprehension affirm the instructional value of SML. Despite challenges such as technological barriers and occasional learner confusion, the findings underscore the importance of integrating creative, technology-based methods into physical education. The success of SML suggests promising potential for broader application across various sports and instructional settings, contributing to more engaging and effective learning experiences.

Keywords: scan me and learn, basketball skills, visual learning, qr code education, bped students, physical education, sports instruction, interactive learning, technology-based teaching, quasi-experimental design

**EFFECTIVENESS OF TEACHING LITERATURE USING AUDIO-VISUAL AID TO
SENIOR HIGH SCHOOL STUDENTS UNDER HUMANITIES AND
SOCIAL SCIENCE STRAND (HUMSS)**

Hezil Joy Cinco, Myline Del Mundo, Arabella Riego, Rhea Joy Manuel, Dr. Romeo Fernandez

Abstract

Teachers continuously explore varied instructional strategies to improve student engagement and comprehension, particularly in literature. In today's digital age, students are highly exposed to technology, prompting educators to integrate tech-based tools such as audio-visual aids into classroom instruction. While these tools often receive positive feedback for enhancing learning outcomes, they may also pose challenges when not properly implemented. This study investigates the effectiveness of using audio-visual materials in teaching literature, specifically poetry, to senior high school students under the Humanities and Social Sciences (HUMSS) strand. A quasi-experimental research design is employed to assess the effectiveness of audio-visual aids. The study involves a selected group of HUMSS students, with data gathered through pre-tests, post-tests, and surveys. Statistical tools such as frequency, percentage, weighted mean, standard deviation, and t-test are used to interpret the results and measure the impact of the intervention. The demographic profile shows that the majority of respondents are aged 18 to 20, with a slight majority being female (52%). Findings reveal that students responded positively to the use of audio-visual aids in learning poetry, with a composite weighted mean of 4.11. These materials enhanced comprehension by facilitating quicker information processing and simplifying complex ideas. However, a neutral mean score of 3.36 regarding limitations indicates that students still value physical and collaborative learning experiences. A notable improvement is observed from pre-test ($M = 4.12$) to post-test ($M = 6.18$), supported by a t-statistic of 2.01 and a p-value of 7.90, affirming the significant impact of audio-visual materials on learning outcomes. Despite minor challenges such as technical difficulties and occasional visual comprehension issues, the study concludes that audio-visual aids substantially improve student engagement and understanding of poetry. These materials make abstract literary concepts more tangible and enjoyable for students. The findings suggest the importance of enhancing the design and delivery of audio-visual content to accommodate diverse learning preferences and further enrich the literature learning experience.

Keywords: audio-visual aids, literature teaching, poetry, humss students, technology integration, comprehension, learning engagement, quasi-experimental design, senior high school, educational technology

**EFFECTIVENESS OF TIME-MANAGEMENT TO THE PRODUCTIVITY OF WORKING
GRADE 12 HUMANITIES AND SOCIAL SCIENCE STUDENTS AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Melissa Santos, Mike Justine Bello, Marinel Bueve, John Carl Fuentes,
Mary Rose Morta, Ronald Rapsing, Christopher Azares

Abstract

Time management is a critical skill that enables individuals to effectively balance responsibilities across different areas of life. Guided by the Eisenhower Decision Matrix Theory, which categorizes tasks based on urgency and importance, this study aims to assess the effectiveness of time management in enhancing the productivity of working Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. The study seeks to determine how time management practices influence academic performance, study-work balance, and goal setting among student-workers. This research adopts a descriptive method and uses a survey questionnaire as the primary data collection tool. Thirty working Grade 12 HUMSS students were selected through purposive sampling. The questionnaire underwent expert validation and focused on assessing time management effectiveness in terms of academic performance, ability to balance work and study, goal-setting skills, techniques applied by students, and challenges encountered in managing time. Findings reveal that time management is perceived as very effective in improving students' academic performance, facilitating goal setting, and achieving a balance between academic responsibilities and part-time work. Despite these positive outcomes, respondents reported facing various challenges, including difficulty in maintaining consistent schedules and managing overlapping commitments. The study concludes that time management strategies significantly contribute to the productivity and satisfaction of working students. However, obstacles in consistent implementation remain. To address these issues, the researchers propose an action plan aimed at enhancing students' time management capabilities. The plan includes structured support strategies to further strengthen the academic success and well-being of working students at Bestlink College of the Philippines.

Keywords: time management, productivity, working students, academic performance, study-work balance, goal setting, humss, bestlink college, eisenhower matrix, student satisfaction

**EFFECTIVENESS OF VVC IN ENHANCING BASIC SKILLS OF 2ND YEAR
BPED STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Glenn Albiso, Cedrick Paul Lubaton, Rachelle Ann Barte, Rian Lyndley Pellas,
Mark Paul Espuerta, Ranillo Jr Villa, Abraham Muyrong II

Abstract

Volleyball, originally invented by William G. Morgan in 1895, has evolved into a widely appreciated team sport that is now a core component of physical education programs worldwide. Modern teaching techniques, such as the use of video-based instruction, have significantly enhanced the delivery of essential volleyball skills including passing, digging, and spiking. These visual tools allow students to observe, analyze, and refine their techniques through demonstrations and slow-motion replays, offering a dynamic learning experience that supports deeper understanding beyond traditional teaching methods. This study employs a descriptive research design to assess the effectiveness of Video-Based Volleyball Clips (VVC) in improving the basic volleyball skills of second-year BPED students at Bestlink College of the Philippines. The research emphasizes both the advantages and challenges of video-based instruction. While these tools support student engagement and self-paced learning, potential drawbacks such as passive viewing habits and technical issues including poor video quality and internet connectivity are also taken into account. Findings indicate that VVC is an effective instructional tool for enhancing the performance of students in fundamental volleyball skills. Students benefited from the ability to review demonstrations repeatedly, allowing for a more thorough breakdown of complex movements and techniques. The use of video as a learning medium enabled learners to visualize proper form, timing, and strategy, which contributed to improved execution of volleyball techniques. Despite challenges, the majority of students reported a heightened sense of understanding and skill development through the integration of video instruction. The study concludes that video-based instruction, specifically through VVC, fosters a more inclusive and engaging learning environment for BPED students. By allowing learners to study at their own pace and revisit content as needed, the method accommodates diverse learning styles and enhances individual performance. Moreover, incorporating self-recorded and peer-reviewed performances into the learning process promotes active participation, critical thinking, and continuous skill refinement. VVC proves to be a valuable pedagogical tool in physical education, particularly for sports instruction requiring visual and kinesthetic learning.

Keywords: video-based instruction, volleyball skills, bped students, physical education, vvc, sports pedagogy, skill development, self-paced learning, visual learning, teaching strategies

**EFFECTIVENESS OF ZIV IN IMPROVING PHYSICAL HEALTH OF 2ND YEAR
BPED STUDENTS IN BESLINK COLLEGE OF THE PHILIPPINES**

Rich Niel Hanz Abacaro, Loyze Andrea Villegas, Orazza Alizza Mae,
Estrella John Warlo, George Chavez, Abraham Muyrong II

Abstract

Zumba is a dynamic fitness program that combines Latin-inspired dance routines with high-energy aerobic exercise. This study aims to investigate the effectiveness of a Zumba Instructional Video (ZIV) in improving the physical health of second-year BPED students at Bestlink College of the Philippines. It considers variables such as age, sex, medical condition, body composition, cardiovascular endurance, coordination, flexibility, and muscular endurance. The study employs a quasi-experimental research design. A total of 40 second-year BPED students from three different sections served as participants. Data was gathered before and after the intervention to measure changes in physical health indicators. The majority of respondents were female and aged 18 to 20 years. Thirty-four participants reported having no medical conditions. In terms of body composition, 53% were within the normal BMI range. Regarding cardiovascular endurance, 39% of male respondents and 45% of female respondents exhibited good to very good recovery heart rates. Coordination levels were fair among 45% of the participants, while 63% demonstrated good flexibility. Additionally, 50% of respondents achieved an excellent level of muscular endurance. For the extent of effectiveness, the level of agreement was “Agree” in terms of autonomy and relatedness and “Strongly Agree” for competence. The pre-test mean score was 46.36, which increased to 49.12 in the post-test, indicating a notable improvement in physical health. The computed Z-value of -4.61 and a p-value of 0.00 confirm that the difference between pre- and post-test scores is statistically significant. Common challenges reported during the intervention included dehydration, muscle spasms, restlessness, difficulty in breathing, and energy loss. Overall, the findings validate the effectiveness of ZIV in enhancing the physical health of the participants. The results indicate that the Zumba Instructional Video had a positive impact on improving physical health outcomes among second-year BPED students. The researchers recommend that participants with medical conditions seek medical advice to ensure Zumba is suitable for their health status. Additionally, regular participation in Zumba may help minimize physical challenges encountered during the sessions.

Keywords: zumba instructional video, physical health, self-determination, autonomy, competence, bped students

**EFFECTS OF COMPLEX VOCABULARY WORDS BY GRADE 11 HUMANITIES AND
SOCIAL SCIENCES STUDENTS TO THEIR ACADEMIC PERFORMANCE**

Chloe Oliquiano, Mark Rosevelt Peña, Chrisllan Artista, Maria Grace Concepcion Peñaloga,
Daniela Mae Samaco, Jhustine Coure Balatico, Rica Mae Berja

Abstract

This study investigates the challenges posed by complex English vocabulary on the academic performance of Grade 11 Humanities and Social Sciences (HUMSS) students. As English vocabulary continues to expand in academic and everyday contexts, many students struggle with comprehension, communication, and retention of advanced terms. Several studies emphasize the significant role of vocabulary knowledge in academic success. This research aims to explore the specific difficulties faced by HUMSS students at Bestlink College of the Philippines and to analyze how these affect their academic performance. The study also reviews related literature focused on the influence of vocabulary on comprehension, communication skills, and academic learning. This research utilizes a descriptive-exploratory design. The study involved 132 Grade 11 HUMSS students selected through simple random sampling using the fishbowl method to ensure an unbiased selection process. Data collection was conducted through a validated survey questionnaire, which was administered face-to-face in the classroom. Responses were immediately retrieved after completion to ensure accuracy and minimize data loss. The instrument aimed to assess the effects of complex vocabulary on comprehension, communication, confidence, and other academic performance indicators. Findings revealed that the majority of respondents strongly agreed that complex vocabulary significantly impacts their comprehension, communication, and overall vocabulary use. The weighted mean scores were as follows: comprehension (3.49), communication (3.42), and vocabulary (3.46), all interpreted as "strongly agree." Regarding the academic impact, confidence had a mean of 3.42, academic performance 3.46, and critical thinking skills 3.43, all similarly marked as "strongly agree." The study also identified the common challenges students face in using complex vocabulary, including misunderstanding of context and difficulty in expressing ideas. An action plan was developed based on these findings to support students in improving vocabulary usage and academic performance. The discussion highlights how complex vocabulary can hinder students' comprehension, communication, and critical thinking. The study emphasizes the need for effective vocabulary instruction to help students overcome language barriers in academic settings. It also outlines how vocabulary difficulties influence the students' ability to understand lessons, participate in discussions, and perform in written assessments. Finally, the study presents suggestions and strategies aimed at enhancing vocabulary acquisition and effective language use among HUMSS students.

Keywords: complex vocabulary, academic performance, comprehension, communication, humanities and social sciences, vocabulary development

**EFFECTS OF MAKEUP ON THE SELF-ESTEEM OF THE GRADE 12
HUMANITIES AND SOCIAL SCIENCES STUDENTS**

Mira Faye Ballonado, Rhian Arwen Arangorin, Landz Baricuatro,
Crislyn Flores, April Anne Joy Valen, Christopher Azares

Abstract

Makeup has long played a role in how individuals are perceived within society, often influencing self-presentation and confidence. This study is grounded in Erving Goffman's Self-Presentation Theory (1959), which posits that individuals use verbal and nonverbal cues to shape how they are viewed by others. The study investigates how the use of makeup affects various factors related to self-esteem, including confidence, social interaction, perceived complexity, frequency of makeup use, and common challenges encountered by users. It aims to understand the psychological and social implications of makeup use among Grade 12 Humanities and Social Sciences students. The researchers employed an exploratory research design and utilized cluster sampling to select participants. Data were collected through a structured survey questionnaire administered to 200 Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines. The instrument gathered data on makeup usage, its perceived effects on self-esteem, and challenges experienced by respondents. The results indicated that the majority of respondents strongly agreed that wearing makeup positively contributes to self-esteem, particularly in the areas of confidence, social interaction, and perceived complexity. Among various cosmetic products, lipstick was identified as the most commonly used. However, 24.17% of respondents reported experiencing time management issues as a result of their makeup routines. These findings suggest a strong link between makeup use and personal confidence, while also highlighting the practical challenges it may pose. The study recommends using makeup not only as a tool for aesthetic enhancement but also as a means of self-expression and interpersonal connection. Suggestions include experimenting with different looks to explore creativity, applying makeup as a social bonding activity, and establishing a consistent routine to manage time efficiently. An action plan is proposed to further explore the role of makeup in shaping self-esteem and to promote positive self-image practices among students.

Keywords: makeup, self-esteem, self-presentation, confidence, social interaction, personal expression

**EFFECTS OF PEER TEACHING IN ARLING PANLIPUNAN AMONG
STUDENTS OF MALIGAYA HIGH SCHOOL**

Mc Kinley Orjalo, Ma. Carmella Arsua, Jamie Luz Bañaga, Andrea Culdora,
Justine Dave Mingote, Abraham Muyrong II

Abstract

This study aims to examine the effects of peer teaching in Araling Panlipunan among students at Maligaya High School. It focuses on how peer teaching influences various academic aspects such as student achievement, skills development, academic performance, group discussions, cooperative projects, and peer-led tutoring. The study is grounded in the belief that peer teaching strategies can foster deeper engagement and enhance the learning experience within the Araling Panlipunan curriculum. The research utilized descriptive quantitative design. A total of 191 students were selected through stratified sampling to ensure diverse representation. The primary instrument used for data collection was a structured survey questionnaire, which assessed the perceived effectiveness of peer teaching in multiple learning areas. The results demonstrated significant positive effects of peer teaching on student outcomes. Respondents rated the impact of peer teaching on student achievement, skills development, and academic performance with an overall mean of 3.13, interpreted as "Agree." Likewise, specific peer teaching techniques such as group discussions, cooperative projects, and peer-led tutoring received a similar mean score of 3.12. These findings highlight the value of peer-assisted learning in improving student engagement and academic outcomes in Araling Panlipunan. The study concludes that peer teaching is an effective strategy for enhancing student performance and skill development in Araling Panlipunan. The findings support the use of collaborative and student-centered approaches in classroom instruction. By providing empirical evidence on the benefits of peer-led activities, this research underscores the importance of integrating peer teaching into educational practices. It also offers insights for educators and policymakers aiming to create more interactive and supportive learning environments.

Keywords: peer teaching, araling panlipunan, student achievement, collaborative learning, skills development, secondary education, maligaya high school

EFFECTS OF THE WRITE WHEEL ON WRITING SKILLS OF GRADE 5 STUDENTS

Mary Grace Bandiola, Airales Daguplo, Joyce Fermino, Janies Vargas,
Nel Rose Ulbata, Ryan Christopher Villalon

Abstract

This study aims to examine the effects of the "Write Wheel" on the writing skills of Grade 5 students during classroom discussions. Writing is a foundational academic skill that supports the development of grammar, vocabulary, spelling, sentence construction, and persuasiveness. According to Pawliczak et al. (2021), creative writing activities are among the most effective strategies for enhancing writing proficiency. This study focuses on how the "Write Wheel," a tactile and interactive learning tool, contributes to improvements in key areas of writing performance. A quantitative approach using correlational research design was employed. The respondents consisted of 40 Grade 5 students from Urduja Elementary School, selected through purposive sampling. A survey questionnaire served as the main instrument for data collection. The collected data were analyzed using statistical tools, including percentage, ranking, weighted mean, Likert scale, and z-test, to measure the effectiveness of the "Write Wheel" on the targeted writing components. The findings indicated that the "Write Wheel" significantly enhanced writing performance in the areas of grammar, vocabulary, spelling, sentence construction, and persuasiveness. Statistical analysis showed a notable improvement between the pre-test and post-test scores, with a p-value of < 0.00001 , demonstrating a statistically significant impact. These results confirm the effectiveness of the "Write Wheel" in improving students' overall writing abilities. This study supports the Sensory Stimulation Theory, which suggests that learning is more effective when multiple senses are engaged. The "Write Wheel" engages in the sense of touch, thereby improving concentration, motor coordination, and cognitive processing during writing tasks (Kwakye et al., 2021). Both teachers and students benefit from using this tool, as it makes writing more engaging, interactive, and effective. The study recommends integrating the "Write Wheel" into regular classroom instruction, extending its application to other grade levels, and conducting further research to examine its long-term effects on writing proficiency. By adopting innovative tools like the "Write Wheel," educators can foster more dynamic learning environments and contribute to students' academic growth.

Keywords: sensory engagement, cognitive processing, motor coordination, writing skills, enhanced writing performance, creative learning tools

**EFFICACY OF A SAFE LEARNING SPACE ON THE ACADEMIC PERFORMANCE
OF GRADE 11 HUMANITIES AND SOCIAL SCIENCES STUDENTS**

Rochelle Patricio, Erlinda Mae Cabalza, Precious Joy Castañeda,
Ajana Gabuya, Ishna Jhuchell Marang, Christopher Azares

Abstract

Bullying and related issues are among the key hindrances that cause students to feel unsafe and insecure within the school environment. In response, the Department of Education issued Regional Memorandum No. 210, S. 2024, which outlines the implementation of the Safe Spaces Act in Basic Education. This directive promotes learners' well-being, inclusive education, and a positive learning environment. A key approach is fostering respect for individual differences among students. Guided by Abraham Maslow's Hierarchy of Needs, this study examines how fulfilling students' basic needs within a safe space contributes to their academic development. The researchers formulated statements and questions to identify gaps related to safe learning environments and their effect on students' academic performance. This study utilizes an exploratory-quantitative research design to gain insights into the impact of a safe learning space. The respondents consist of Grade 11 Humanities and Social Sciences students. A quota sampling technique was employed to ensure balanced representation and minimize sampling bias. Data was collected through survey questionnaires and analyzed using various statistical tools to determine trends and identify significant factors affecting students' academic experience. The study revealed that the primary hindrances to establishing a safe learning environment were noise (28.6%), judgment (21.8%), peer pressure (21.1%), bullying (15.3%), and indifference (13.1%). These factors significantly influenced students' comfort and ability to focus in class. In response, the researchers formulated an action plan aimed at fostering a safer and more inclusive classroom environment. This plan is intended to help students feel secure and supported, thus encouraging greater academic engagement and participation. The findings demonstrated that the presence or absence of a safe learning environment directly affects student academic performance. The variables identified, noise, judgment, peer pressure, bullying, and indifference, serve as obstacles to student engagement and success. The proposed action plan outlines measures to improve classroom safety and support systems. The researchers recommend that both teachers and students actively participate in promoting a safe and inclusive environment to enhance academic outcomes. Ultimately, the study underscores the importance of cultivating a safe learning space as a foundation for meaningful student involvement in academic activities.

Keywords: safe learning space, safe learning environment, academic performance, student engagement, inclusive education

**EFFICACY OF GRAFOSOFOS BY DEVELOPING WRITING SKILLS IN CAMPUS
JOURNALISM AMONG THIRD-YEAR ENGLISH MAJOR AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Karen Joyce Tolidanes, Joanna Irene Canlas, Felicia Dawn Navales,
Kathlyn Ventocilla, April Jane Vistal, Dr. Romeo Fernandez

Abstract

This study aims to determine the efficacy of GrafoSofos in developing writing skills in campus journalism among third-year English majors at Bestlink College of the Philippines. It focuses on respondents' profiles in terms of age, sex, experience with digital tools, and prior experience in journalism. The utilization of GrafoSofos, an instructional material designed to improve students' writing proficiency, is examined to assess its effectiveness in enhancing journalistic writing skills. The study utilizes a quasi-experimental design. A total of 50 third-year English major students, composed of 10 males and 40 females, were selected as participants. Pre-tests and post-tests were administered to assess the development of writing skills before and after the use of GrafoSofos. The evaluation concentrated on journalistic style, grammar, punctuation, and vocabulary, with scoring based on a structured rubric. The instructional material served as the main intervention between the assessments. Findings revealed a significant improvement in writing performance after the use of GrafoSofos. The post-test results showed a marked increase in scores, with an overall mean of 4.42, which was verbally interpreted as excellent. These results indicate that the instructional tool effectively enhanced the writing skills of third-year English majors, particularly in terms of journalistic clarity, structure, and language usage. The study concludes that effective written communication is essential for academic and professional success. The integration of GrafoSofos demonstrated positive outcomes in improving coherence, creativity, and clarity in student writing. Its interactive features, immediate feedback mechanisms, and content-focused activities contributed to measurable skill development. Based on the findings, the study recommends incorporating GrafoSofos more broadly into the English curriculum to support writing instruction in campus journalism and enhance digital literacy in academic writing contexts.

Keywords: grafosofos, writing skills, campus journalism, digital tools, english majors, instructional material, higher education

**EFFICACY OF TRADI IN TEACHING HOLISTIC HEALTH IN GRADE 11
HUMSS STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Romel Ignacio, Michelle Paulaque, Janlyn Galano, Margel Bagacina,
Vivien Balano, Abraham Muyrong II

Abstract

In this modern era, the combination of traditional and digital teaching methods has transformed the effectiveness and efficiency of education, providing learners with essential tools for achieving quality learning. These methods serve as core strategies in enhancing the teaching and learning process. However, while education continues to evolve, addressing mental health remains a significant challenge. According to a 2019 study by Sweeney et al., the stigma surrounding mental health can prevent individuals from seeking the support they need, making it more difficult to attain overall well-being. Implementing holistic approaches, which emphasize the connection between mental and physical health, can be especially challenging when working with individuals who have experienced trauma or long-term mental health issues. Due to its complexity, mental health is often regarded as one of the most difficult aspects to address within a holistic framework. The researchers utilized a purposive sampling technique to select participants, in line with the parameters of a quasi-experimental research design grounded in a quantitative methodology. This study specifically aimed to assess the effectiveness of the TraDi teaching approach in fostering holistic health among fifty (50) Grade 11 senior high school students at Bestlink College of the Philippines. The findings demonstrated that the implementation of the TraDi (Traditional-Digital) instructional material was highly effective in enhancing the holistic development of Grade 11 students. Prior to the intervention, students achieved a mean pre-test score of 12.50. Following the use of the TraDi instructional material, the mean post-test score increased substantially to 22.20. This notable improvement highlights the instructional material's positive impact on students' overall performance. The results provide strong evidence that the TraDi approach significantly contributes to fostering a more comprehensive and effective learning experience. The cultivation of self-care, self-awareness, self-efficacy, and self-directed learning empowers individuals with a greater sense of control over their overall well-being, resulting in improved adherence to healthy behaviors and enhanced learning capacity. The implementation of the TraDi (Traditional-Digital) teaching approach further supported this development by fostering students' awareness of the interconnected nature of human health, encompassing mental, physical, emotional, social, environmental, and spiritual dimensions. This holistic perspective not only enriched their educational experience but also promoted a more comprehensive understanding of personal well-being.

Keywords: tradi approach, holistic learning, self-care, self-awareness, self-efficacy, self-directed learning, student well-being, interconnected health, traditional-digital instruction, health education

**EFFICIENCY OF THE SCHOOL GYMNASIUM FOR PHYSICAL ACTIVITIES AS
PERCEIVED BY GRADE 12 HUMANITIES AND SOCIAL SCIENCES
STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Carl Jeff Palmes, Adonis Caraballe, Adonis Caraballe, Brayan Galante,
Jerome Masayon, Shane Nicole Perera, Christopher Azares

Abstract

The school gymnasium serves as a fundamental space for promoting physical activity and cultivating a healthy lifestyle among students. More than just a site for physical education classes, it fosters long-term wellness habits, provides a venue for social interaction, and helps alleviate stress. This study explores the perceptions of Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines regarding the gymnasium's effectiveness in supporting physical activities. It considers several factors influencing student engagement and attitudes toward physical fitness. The findings emphasize the importance of improving gymnasium facilities and developing inclusive programs that encourage greater student participation. According to McBride and Cleland (1998), critical thinking is well-integrated into physical education, where cognitive engagement complements physical movement, highlighting the potential of gymnasiums as spaces for both physical and intellectual development. The researchers adopted a descriptive-exploratory research design and applied a cluster sampling method to gather responses from 200 Grade 12 Humanities and Social Sciences (HUMSS) students. The study aimed to assess how students perceive the effectiveness of the school gymnasium in facilitating physical activities. To collect relevant data, a survey questionnaire was used as the primary research instrument. Findings highlighted the variety of physical activities and school events held in the gymnasium, offering a clearer understanding of its role in promoting student participation and physical development. The findings further illustrate how respondents perceived the efficiency of the school gymnasium in facilitating student participation in physical activities. The aspect of facilities received a weighted mean of 3.36, equipment scored 3.26, and accessibility was rated at 3.38, all of which were interpreted as "strongly agree." The overall weighted mean was 3.34, indicating that the respondents strongly agreed on the gymnasium's effectiveness in supporting physical activity. Moreover, the results highlighted several challenges and issues encountered by the students regarding the use of the gymnasium and their participation in physical activities, suggesting areas in need of improvement. This study examined the perceived efficiency of the school gymnasium in supporting physical activities among Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. Based on the results, it is recommended that the school further promote student engagement in gymnasium-based physical activities. Encouraging regular participation can enhance students' physical well-being, contribute to improved academic performance, and support mental clarity. To maximize these benefits, the institution should invest in upgrading gymnasium facilities, ensuring accessibility, and implementing inclusive, well-structured physical activity programs that cater to the diverse needs of all students.

Keywords: gymnasium efficiency, physical activity, humss students, academic performance, mental clarity, student engagement, school facilities, physical health, bestlink college of the philippines, inclusive programs

**EFFICIENCY OF USING ARTIFICIAL INTELLIGENCE TO ACADEMIC
PERFORMANCE OF GRADE 11 HUMANITIES AND SOCIAL SCIENCES STUDENTS**

Angelica Lobrigo, Jean Rein Babol, Simon Esban, Zedrianne Portuito,
Sheidilyn Walojan, Christopher Azares

Abstract

Gathering relevant and accurate information on a specific topic remains one of the most complex aspects of the learning process. In this context, Artificial Intelligence (AI) has emerged as a transformative tool in the education sector, offering a wide range of benefits and applications. Firuz Komalov's theory on the Multifaceted Impact of Artificial Intelligence in Education emphasizes AI's significant role in enhancing personalized learning, developing intelligent tutoring systems, automating assessments, and fostering teacher-student collaboration. These aspects illustrate the vast potential of AI to elevate the quality and efficiency of education. This study aims to assess the effectiveness of Artificial Intelligence in terms of problem-solving, decision-making, and overall productivity within educational settings. The researchers adopted a quota sampling technique alongside an evaluative-quantitative research design. A validated questionnaire was used as the primary data-gathering tool to collect responses from 133 Grade 11 Humanities and Social Sciences (HUMSS) students. The data were analyzed using various statistical treatments, including frequency and percentage distribution, ranking, and the computation of weighted means. The findings indicate that ChatGPT was the most commonly used AI application among students, with 25.44% (n=99) of respondents reporting its frequent use. The respondents strongly agreed on the effectiveness of Artificial Intelligence in enhancing key academic areas, as reflected in the weighted means: problem-solving (3.32), decision-making (3.34), and productivity (3.23). Despite these positive outcomes, students reported several challenges, including concerns related to safety and security, limited accessibility, and the inconsistent quality of information. To address these issues, the researchers developed a targeted action plan aimed at maximizing the efficiency of Artificial Intelligence by improving safety protocols, expanding access, and ensuring the delivery of high-quality, reliable information. The study concludes that Artificial Intelligence (AI) is highly effective and influential in enhancing students' problem-solving abilities, decision-making processes, and overall productivity. Despite these significant benefits, challenges such as data privacy, security risks, and accessibility issues were also highlighted. To mitigate these concerns, the researchers recommend that students practice responsible digital behavior, particularly in safeguarding their personal information. Furthermore, educational institutions should implement comprehensive programs aimed at promoting the ethical and secure use of AI tools, equipping students with the knowledge and skills necessary for safe and productive engagement with AI technologies.

Keywords: artificial intelligence, personalized learning, problem-solving, decision-making, productivity, chatgpt, education technology, student safety, data privacy, responsible ai use, ethical ai, educational programs

**ENGAGEMENT OF ONSITE ACTIVITIES AND E-LEARNING TO THE ACADEMIC
EXCELLENCE OF SELECTED GRADE 12 HUMANITIES AND SOCIAL SCIENCES
STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Leonaida Flores, Butch Areñola, Edcelito Cañete, Jane Reese Rosanes,
Jamaica Samoranos, Rica Mae Berja

Abstract

This study investigates the engagement of onsite activities and e-learning in relation to the academic excellence of selected Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. Traditional learning has been the foundation of education for centuries, offering structured and face-to-face interactions. However, the integration of e-learning has introduced new opportunities for flexible, self-directed, and technology-enhanced instruction. This study aims to assess how both onsite activities and e-learning contribute to academic performance and offers insights beneficial to students, educators, administrators, and future researchers. A correlational research design is utilized to determine the relationship between engagement in onsite and e-learning activities and the academic excellence of students. Purposive sampling is used to select the respondents, who were asked to complete a researcher-developed survey questionnaire. The questionnaire was reviewed and refined with input from the research adviser to ensure content validity. The final instrument focused on students' perceptions of their engagement with both learning modalities and its perceived impact on their academic performance. The findings reveal overwhelmingly positive feedback on e-learning from the respondents. Students reported that e-learning enhanced their academic performance by providing access to advanced study resources, interactive learning tools, and digital content. Additionally, students highlighted the benefits of flexible scheduling, improved time management, and the ability to engage in independent study. These features contributed to greater satisfaction and academic success. The results demonstrate that e-learning significantly improves academic performance among Grade 12 HUMSS students by enhancing learning flexibility, time management, and access to educational resources. While onsite learning fosters engagement through structured interaction, e-learning supplements traditional methods by offering additional support and independence in the learning process. The combination of these two approaches leads to improved educational outcomes and high levels of student satisfaction. The study recommends further integration of digital learning tools alongside traditional instruction to support academic excellence.

Keywords: e-learning, onsite activities, academic excellence, humss students, bestlink college, blended learning, student engagement, time management, independent learning, educational technology

**ENHANCEMENT OF ACADEMIC PERFORMANCE THROUGH YOUTUBE
TUTORIALS AMONG GENERAL ACADEMIC STRAND STUDENTS AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Kristine Mae Rafallo, Chester Louisse Bejer, Adrian Morong, Justine Pabia,
Rhenz Jireh Rosales, Grace Joy Sayo, Rica Mae Berja

Abstract

This study explores the effectiveness of YouTube tutorials in enhancing the academic performance of General Academic Strand (GAS) students at Bestlink College of the Philippines. Drawing on Martina Jordaan's Visual Media Theory, which emphasizes the educational value of visual and interactive content, the study highlights how YouTube serves as an accessible, flexible, and engaging learning tool. It also addresses potential concerns such as overreliance on video content and unequal access to internet connectivity. A descriptive-exploratory research design is employed, using a researcher-made survey administered to 77 randomly selected GAS students. The survey captures students' perceptions of YouTube tutorials in relation to academic performance, practicality, reading comprehension, exam preparation, project execution, and overall study habits. Data are analyzed using descriptive statistics such as mean scores and frequency distribution. Students reported that YouTube tutorials are a highly valuable learning tool, with increased engagement (3.36) and the convenience of on-demand access (3.32) cited as key benefits. These resources were valued for their practicality (3.28), effective use of visual and audio elements to enhance understanding (3.27), and their ability to boost motivation (3.29). They were also found to aid reading comprehension by helping students grasp text structures (3.31) and identify key details (3.29). Academically, tutorials proved effective for exam preparation (3.27), simplifying complex topics, and improving study habits. Project work benefited as well, with tutorials enhancing technical skills and providing step-by-step guidance (3.35). Overall academic performance and time management also showed improvement (3.28). However, challenges were identified, including overreliance on tutorials (80.51%), limited internet access (67.53%), and learning disruptions (62.33%). The study concludes that YouTube tutorials are effective supplemental learning tools that contribute significantly to academic performance. Nevertheless, to maximize their benefits, it is essential to promote critical thinking, ensure reliable access to technology, and guide students in balancing tutorial use with other learning methods. Future research is encouraged to investigate the long-term academic effects of YouTube-based learning and to develop best practices for integrating video tutorials effectively into formal education settings.

Keywords: youtube tutorials, academic performance, visual media theory, general academic strand, digital learning, reading comprehension, project-based learning, student engagement, educational technology, study habits

**ENHANCING READING FLUENCY THROUGH TOUCHTILE
MATERIALS AMONG GRADE 2 LEARNERS**

Khyle Karla Magno, Genesis Llobrera, May Joy Nedroda, Kathlene Paula Rodriguez,
Elyzsa Marie Velasco, Ryan Christopher Villalon

Abstract

This study aims to enhance the reading fluency of Grade 2 learners by integrating innovative, tactile-based instructional strategies. It specifically investigates the use of touch tile materials, interactive learning tools that combine touch and visual engagement, to improve decoding skills, reading speed, accuracy, and comprehension. By promoting a multi-sensory approach to literacy, the research seeks to foster greater interest in reading and support the development of foundational language skills among early learners. The researchers adopted a quantitative approach utilizing a quasi-experimental research design to assess the effectiveness of the intervention. A census sampling method was employed, involving all 37 Grade 2 learners from Silanganan Elementary School as participants. To gather data, the researchers administered a pre-test and post-test alongside a structured survey questionnaire. The collected data were systematically analyzed using various statistical tools, including the mean, weighted mean, percentage, ranking, standard deviation, and z-test. These tools provided a comprehensive understanding of the learners' reading fluency development before and after the intervention. The findings of the study demonstrate that touchtile materials significantly contributed to the improvement of reading fluency among Grade 2 learners. Notable gains were recorded across three key areas: accuracy (mean = 2.97), expression (mean = 2.90), and reading speed (mean = 3.05), all of which received a verbal interpretation of "Agree." A highly significant difference between the pre-test and post-test scores (z -value = 26.29; p -value = .00001) confirmed the effectiveness of the intervention. However, several challenges were identified, including limited vocabulary (17%), distractions during activities (16%), and off-task behaviors such as noise-making or playing (15%). In response, the researchers developed comprehensive guidelines to support the structured and effective use of touchtile materials in the classroom. The study recommends that educators integrate these tools more systematically into reading instruction to further enhance learners' fluency, engagement, and comprehension skills. This study affirms the effectiveness of touchtile materials in enhancing the reading fluency of Grade 2 learners. The integration of these tactile and interactive tools into literacy instruction provides a multi-sensory learning experience that actively engages young students. The findings reveal significant improvements in key areas of fluency, namely accuracy, expression, and reading speed demonstrating that touchtile materials can play a pivotal role in developing foundational reading skills. By making reading activities more stimulating and learner-centered, educators can better support early literacy development and help students achieve essential academic milestones.

Keywords: touchtile materials, reading fluency, grade 2 learners, multi-sensory learning, literacy development, quasi-experimental design, pre-test and post-test, educational innovation, learning engagement, early childhood education.

**ENHANCING VIRTUAL MARKETING SKILLS THROUGH TECHNOLOGY
INTEGRATION IN DEVELOPING LIVELIHOOD PROGRAM
AMONG 4TH YEAR TLE MAJOR**

Daniel Zabala, Victor Joseph Garais, Wilson Fajardo,
Rogel Goze, Jonel Lopez, Abraham Muyrong II

Abstract

This study investigates the impact of technology integration in livelihood education on the enhancement of virtual marketing skills among 4th-year students. It examines students' perceptions, experiences, and academic performance in courses that utilize equipment demonstrations as part of the learning process. Employing a survey research design, the study aims to assess the effectiveness of incorporating technology in developing students' virtual marketing competencies. The research is guided by a set of carefully crafted questions to ensure comprehensive data collection and analysis. Purposive sampling, a non-probability technique, involves selecting participants based on the specific goals of the study and relevant population characteristics. Also referred to as judgmental, selective, or subjective sampling, it differs from convenience sampling by intentionally targeting individuals who can provide meaningful insights related to the research focus. In this study, the researchers purposefully chose fourth-year Technology and Livelihood Education (TLE) majors to ensure the validity and relevance of the data collected. A structured survey questionnaire served as the primary instrument to assess how TLE students enhance their virtual marketing skills through technology integration within livelihood programs. The questionnaire consisted of four sections, including instrument evaluation and statistical data treatment. Employing stratified sampling, 40 students were selected to participate, providing a representative sample that aligns with the study's objectives. The study's findings reveal that a significant number of young entrepreneurs choose to launch their businesses in the marketing sector, which appeals to a broad spectrum of interests. This field is characterized by its unique blend of creative and analytical skills, enabling the development of innovative and impactful marketing strategies that capture audience attention. Technology equips students with essential tools and skills to identify and seize new marketing opportunities. Exposure to diverse technological platforms enhances their entrepreneurial marketing competencies, enabling them to better understand and capitalize on market trends in their future careers. For BTLED students, integrating technology not only builds their knowledge but also sharpens the practical skills necessary for success in their chosen fields. To further strengthen these skills, the researchers recommend incorporating video presentations as an effective instructional method to facilitate technology integration and improve marketing proficiency among BTLED students.

Keywords: technology integration, entrepreneurial marketing skills, btled students, marketing opportunities, video presentations, skill development, technological tools, career preparation

**EVALUATING THE EFFECTIVENESS OF VISUAL AIDS IN TEACHING AS PERCEIVED
BY GRADE 12 HUMANITIES AND SOCIAL SCIENCES STUDENTS
AT BESTLINK COLLEGE OF THE PHILIPPINES.**

Jannine Faye Tolentino, Jealyn Osing, John Justine Doinog, Francis Ian Mondia,
John Kristoff Armada, Christopher Azares

Abstract

This study explores the effectiveness of visual aids as an instructional medium for Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. It specifically examines how visual aids contribute to the teaching-learning process in terms of informational clarity and accuracy, relevance to lesson objectives, simplicity and visual design, and their overall ability to engage students and enhance comprehension. The study adopted an exploratory research design and implemented a cluster sampling method to identify participants. A systematically designed questionnaire was distributed to 200 selected Grade 12 students to collect data on their experiences with visual aids, focusing on both their frequency of use and the challenges faced during instruction. The results indicate that PowerPoint presentations were the most effective visual aids for Grade 12 HUMSS students, followed by infographics/posters and graphs/charts. Insights gathered from 200 respondents underscored the value of visual aids in enhancing clarity, engagement, and information retention. Students highlighted the effectiveness of legible text, accurate content, and the use of relevant, relatable examples in facilitating understanding. While many favored clean, minimalist designs with thoughtful color schemes, several concerns were also raised, such as overly small text, low-resolution images, excessive information, and occasional technical difficulties. Despite these challenges, visual aids were broadly recognized as instrumental in improving comprehension, sustaining attention, and promoting active participation. The findings further suggest the importance of tailoring visual materials to learner preferences to foster more meaningful and effective educational experiences. The study affirms that visual aids play a vital role in enhancing students' learning experiences and deepening their understanding of lesson content. To address existing challenges in their implementation, a comprehensive action plan has been proposed. This plan includes seminars on effective content selection, targeted training sessions for improving visual clarity, pre-instructional content validation, and routine technical inspections. It emphasizes a collaborative approach involving teachers, resource speakers, and school administrators to ensure that visual aids are pedagogically sound, visually accessible, and technologically functional. By fostering cooperation and capacity-building among key stakeholders, the proposed plan aims to elevate the overall quality of instruction and enrich the teaching-learning environment through the strategic use of visual materials.

Keywords: visual aids, teaching strategies, student comprehension, classroom learning, action plan, content clarity, technical checks, teacher training, educational tools, stakeholder collaboration, instructional materials.

**EVALUATION OF STUDENT ENGAGEMENT IN DIGITAL PLATFORMS AND THE
LEARNING EXPERIENCE OF GRADE 12 HUMANITIES AND SOCIAL SCIENCES
STUDENT AT BESTLINK COLLEGE OF THE PHILIPPINES**

Nicole Ann Latina, Angel Louise Marcellana, Marah De Chavez, Iahn Manatad,
Reychelle Makiling, Denzz Kylee Adarayan, Rica Mae Berja

Abstract

This study explores the engagement of Grade 12 Humanities and Social Sciences (HUMSS) students with digital platforms such as visual storytelling, online marketplaces, and crowdsourcing. It aims to evaluate how these platforms influence learning experiences by examining behavioral risks and educational outcomes. Notable challenges include the prevalence of misinformation, mental health concerns, and issues related to financial literacy. The study underscores the need to balance digital participation with responsible online behavior, equipping educators with insights to better support students and prepare them for the demands of a digital society. The study adopts a descriptive quantitative design using cluster sampling to select participants from Bestlink College of the Philippines. A structured survey questionnaire served as the primary research instrument to assess student engagement across various digital platforms. The tool measured aspects of learning management, assessment practices, accessibility, and student interaction. The study particularly focused on the significance of creativity-based evaluation systems in enhancing student participation and educational outcomes. The analysis revealed that digital platforms significantly contributed to the students' academic development and access to educational resources. A weighted mean of 3.31 indicated strong agreement among respondents regarding the effectiveness of digital tools in providing accessible learning materials and timely updates. While learning management systems were deemed beneficial, some students experienced confusion in navigating these tools. The study also identified difficulties related to authentic assessment planning, highlighting three theoretical perspectives that influence students' understanding of assessment authenticity. The findings emphasize the value of digital platforms in modern education while acknowledging the persistent challenge of misinformation. An action plan is proposed to promote critical thinking, social awareness, and reflective learning practices to counteract misleading content online. Enhancing student confidence and digital literacy is also recommended to maximize the benefits of digital tools. These strategies aim to foster responsible engagement and improve the overall learning experience for HUMSS students in digital environments.

Keywords: student engagement, digital platforms, learning experience, humss, misinformation, authentic assessment, educational technology, social awareness

**EXCESSIVE RELIANCE ON GRAMMARLY IN WRITING PRACTICES OF
GRADE 12 HUMANITIES AND SOCIAL SCIENCES STUDENTS
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Donnalyn Prado, Justine Bryan Bolano, Frinze James Gines, Eroll Mirador,
Von Eldrin Ortiguera, Criztel Jaizel Page, Rica Mae Berja

Abstract

In this 21st-century era where everything is digitalized, many applications have emerged, including those designed for writing. For example, Grammarly offers paraphrasing, grammar checking, plagiarism detection, and more. However, the overuse of such applications affects students' writing practices. This study is supported by the theory of Abderrahmane Babni titled Teaching Writing: From Theory to Practice. Despite its downsides, Grammarly has helped students in their writing. The researchers found that Grammarly can enhance students' writing practices in terms of limited perspective, technical issues, and reduced plagiarism. The study utilized an exploratory-quantitative research method, focusing on the excessive reliance on Grammarly in the writing practices of Grade 12 Humanities and Social Sciences students, particularly in terms of their perceptions. A survey questionnaire served as the main tool for data collection, allowing researchers to gather insights from respondents. The information was gathered from two hundred ten (210) Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines, employing purposive sampling and an exploratory-quantitative research methodology. The gathered data revealed variables ranked as either highly efficient or not efficient. The enhancement in writing practices using Grammarly including limited perspective, technical issues, and reduced plagiarism, showed an overall weighted mean of 3.30, described as highly efficient. To help students balance and avoid overuse of Grammarly, the study suggests that when it comes to the fear of mistakes, students should recognize that errors are normal and part of the growth process. The study shows that overusing Grammarly was reported with a frequency of one hundred twenty-four (124), indicating it is time-consuming. Respondents rated its writing help (limited perspective, technical issues, plagiarism reduction) as highly efficient with a weighted mean of 3.30. The main problem identified by students, reported with a frequency of one hundred thirty-two (132), was fear of mistakes. While Grammarly was seen as helpful in reducing this fear, the researchers suggested several ways to address overreliance: improving creativity, facing mistakes with confidence, and identifying areas of weakness.

Keywords: writing, excessive, grammarly

**EXPLORING STUDENT MANAGEMENT SYSTEM THROUGH STUDENT
SATISFACTION AS PERCEIVED BY GRADE 12 HUMANITIES AND SOCIAL
SCIENCE AT BESTLINK COLLEGE OF THE PHILIPPINES**

Anne Shierly Valdez, Jessa Espaldon, Joanna Mechole Barrera, Bobby Chain Fernandez,
Mark Anthony Ordinario, Rica Mae Berja

Abstract

This study explores the Student Management System (SMS) and its role in influencing student satisfaction among Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. The SMS is a vital digital tool used by educational institutions to streamline processes such as accessibility, communication, tracking academic progress, and generating data-driven insights. This research aims to assess how students perceive the SMS in terms of these key functions and how these perceptions contribute to overall student satisfaction. The study utilizes an exploratory-descriptive research design. A total of 212 Grade 12 HUMSS students enrolled for the academic year 2024–2025 were selected using cluster sampling. A validated survey questionnaire, reviewed by an adviser, grammarian, and statistician, served as the primary data-gathering tool. Respondents' perceptions were measured using a Likert scale, and the data were analyzed using statistical tools such as frequency, percentage, ranking, and weighted mean. The findings revealed that the SMS was perceived to be effective in supporting various aspects of student satisfaction. The communication indicator received the highest weighted mean of 3.43, interpreted as "Strongly Agree," followed by accessibility (3.35), data-driven insights (3.34), and tracking process (3.33), all also rated as "Strongly Agree." These results reflect the students' overall positive perception of the SMS across different functional dimensions. The study highlights the significance of evaluating students' perspectives on educational technologies like SMS to enhance user satisfaction. To improve the system further, the study recommends enhancing system reliability to reduce technical issues and broadening communication tools to foster more interactive learning. An action plan is suggested to refine data accuracy and strengthen the SMS framework based on student feedback. These insights aim to contribute to ongoing efforts to improve the functionality and responsiveness of student management systems in educational institutions.

Keywords: student management system, student satisfaction, educational technology, communication, accessibility, data-driven insights, humss, bestlink college of the philippines

**EXPLORING THE RELATIONSHIP BETWEEN CREATIVITY AND ACADEMIC
EXCELLENCE AMONG GRADE 12 HUMANITIES AND SOCIAL SCIENCES
STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Tricia Mae Lugtu, Jeremy Eneria, Joshua Garcia, Kent Justin Lacambra,
Yumi Aizel Ocbian, Rica Mae Berja

Abstract

This study explores the relationship between creativity and academic excellence among Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. Creativity is a key element of cognitive development and is closely linked to problem-solving, critical thinking, and innovation, skills that contribute to academic success across various disciplines. Grounded in Dietrich and Haider's theory on the neurocognitive aspects of creativity in academic performance, the study aims to assess how different dimensions of creativity, including adaptability, emotional expression, collaboration, active learning, positive academic attitude, and resource utilization, correlate with students' academic achievements. A correlational research design was employed to examine the relationship between creativity and academic excellence. A total of 200 Grade 12 HUMSS students were selected through simple random sampling to ensure equal representation. A structured survey instrument was used to gather data on creativity and academic performance, and statistical analyses such as frequency, percentage distribution, and correlation were applied to assess patterns and relationships within the data. The findings revealed strong agreement among respondents on the role of creativity in enhancing academic performance. The highest average scores were recorded in specific aspects of creativity (mean = 3.47) and academic excellence (mean = 3.41), indicating a notable positive correlation. Tables summarizing ranked responses supported the quantitative outcomes. An action plan was formulated based on the results, suggesting the use of digital tools and visual aids (e.g., sticky notes), data analysis for identifying learning gaps, and setting SMART goals to foster creativity in academic contexts. The study concluded that creativity plays a significant role in promoting academic excellence among HUMSS students. It emphasized the importance of integrating creative strategies in educational practice. To further support student development, the researchers recommend the implementation of teacher training programs focused on creative teaching techniques to boost engagement, motivation, and academic outcomes. These findings underscore the value of fostering creativity as a core component of effective senior high school education.

Keywords: creativity, academic excellence, cognitive development, critical thinking, innovation skills, neurocognitive theory, senior high school education

**EXPLORING THE SERVICE-LEARNING EXPERIENCES IN FOSTERING CIVIC
ENGAGEMENT: BASIS FOR BCP ADOPTED COMMUNITY OUTREACH**

Arian Abreu, Dianna Rose Mores, Ruffa May Ilisan, Carl Simon Lañada,
Jasmine Ampuan, Abraham Muyrong II

Abstract

This study explores the importance of service-learning experiences in fostering civic engagement among students. Service learning plays a vital role in shaping responsible, community-oriented individuals by encouraging awareness of civic responsibilities and promoting active participation in community development. A lack of civic engagement can lead to negative societal outcomes due to diminished accountability and public involvement. The study addresses real-life situations that highlight the need for improved civic behavior and personal responsibility. By understanding the impact of service-learning, this research aims to support the development of meaningful outreach programs for the College of Teacher Education. The study adopts a descriptive research design to analyze the relationship between service-learning and civic engagement. Stratified random sampling was used to select participants, ensuring representation across key subgroups. A structured survey served as the primary research instrument. Statistical tools such as Slovin's Formula, weighted mean, frequency, percentage, and the Likert scale were utilized to interpret the collected data and ensure the validity and reliability of results. Findings showed that service-learning experiences significantly contribute to students' personal and academic growth by enhancing their communication and leadership skills, self-discipline, and sense of responsibility. These experiences also foster a deeper understanding of community issues and the value of civic participation. The study highlighted the potential of service-learning to prepare students to become active, competitive, and productive members of society. Based on the findings, the researchers proposed a community outreach program that promotes volunteerism, citizenship, and sustained civic involvement. The study confirms that service-learning experiences contribute to personal development, particularly in communication, leadership, and relationship-building. Respondents recognized service learning as a valuable platform for sharing knowledge, valuing diversity, and forming meaningful connections. Furthermore, service-learning activities encouraged civic engagement by promoting volunteerism, community service, civic literacy, and lifelong learning. These outcomes emphasize the importance of integrating service learning into educational programs to develop socially responsible and civically engaged individuals.

Keywords: civic literacy, civic engagement, service learning, volunteerism, community service, lifelong learning

**FILIPINO COLLOQUIAL EXPRESSIONS: INFLUENCE OF DIGITAL LANGUAGE
ON FORMAL WRITING SKILLS AMONG GRADE 11 HUMSS STUDENTS
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Rexalyn Suico, Jelaine Barrun, Rose Ann Magsico, Maria Monica Patricio,
Kyle Justine Rañola, Rica Mae Berja

Abstract

The Filipino language has undergone significant evolution, particularly with the growing influence of the internet and digital communication. This study investigates how the use of Filipino colloquial expressions, especially those popularized online, affects the academic writing performance of senior high school students. It focuses on students' reliance on slang and informal language in their written outputs and examines its impact on vocabulary development, sentence structure, and overall writing proficiency. The study also aims to determine the language, formal or informal, that students are most comfortable using in both academic and casual contexts. Ultimately, it seeks to assess whether the widespread use of colloquial Filipino online contributes to the deterioration or enrichment of students' writing skills. This study adopted a descriptive quantitative research design to examine the impact of Filipino colloquial language on students' academic writing skills. A total of 126 Grade 11 Humanities and Social Sciences students from Bestlink College of the Philippines, Novaliches, Quezon City, were selected using quota sampling. To obtain relevant data, the researchers administered a standardized questionnaire, which served as the primary instrument for gathering insights into the students' language usage and its influence on their written outputs. The findings indicate that digital expressions play a significant role in shaping students' social interactions, with strong influence observed in communication, humor, and self-expression. Additionally, the use of digital language notably impacts formal writing skills, enhancing aspects such as vocabulary, creativity, and sentence construction among Grade 11 Humanities and Social Sciences students at Bestlink College of the Philippines. Despite these benefits, the study also highlights critical concerns, including reduced attention to grammatical accuracy, the excessive use of abbreviations, and a noticeable decline in vocabulary proficiency. This discussion encapsulates the key findings of the study, focusing on the respondents' evaluation of the impact of digital expressions on social connectivity and the influence of informal digital language on the formal writing skills of Grade 11 Humanities and Social Sciences students at Bestlink College of the Philippines. The findings reveal that while digital language enhances communication, creativity, and self-expression, it also contributes to notable challenges such as diminished attention to grammar, excessive use of abbreviations, and a decline in vocabulary strength. The section also presents the researchers' recommendations, which aim to mitigate these negative effects and promote the development of students' academic writing skills.

Keywords: digital expressions, filipino colloquial language, social connectivity, formal writing skills, vocabulary development, sentence construction, grammar issues, abbreviations, humanities and social sciences (humss), bestlink college of the phil

**FOSTERING AN INCLUSIVE ENVIRONMENT: STRATEGIES FOR SUPPORTING
LGBTQIA+ STUDENTS OF GENERAL ACADEMIC STRAND**

Rain Martinez, King AJ Aduana, Lysa Angelica Carpe, Bob Andrew Ricafranca,
Daverell Ace Hona, Christopher Azares

Abstract

This study presents ways of fostering an inclusive environment in schools where LGBTQIA+ students would be more included. The study also highlights proactive efforts, community engagement, and policy enforcement in addressing bullying and discrimination. By implementing a descriptive research design, the purpose is focused on finding new solutions that could make students in the LGBTQIA+ community feel safe and included. The main motive behind this study was the issue of homophobia that was present in the school environment. We implemented an exploratory descriptive quantitative design to test the most effective means to develop an atmosphere that is inclusive and safe for LGBTQIA+ students. We used a survey questionnaire to determine the best strategies that can help create a safe school environment and promote inclusivity for LGBTQIA+ students. In addition, data were collected through purposive sampling. The study resulted in a list of strategies for promoting the school as a safe place and fostering welcoming behavior and attitudes. The survey conducted identified community engagement, policy enforcement, and inclusive facilities as the decisive elements that support the goal of creating a positive environment. The study also presented some of the following suggestions to solve this problem, such as setting goals, counseling, and increasing the accessibility of resources to solve these concerns. The research recommends methods targeting the safety of school-going students, community engagement, and policy enforcement. The first set of findings showed that the participants strongly endorsed the coexistence of different perspectives, providing resources, and inclusive bathroom facilities. It is important to enhance the level of community engagement, inclusive policies, and mental health support to establish a safe and more inclusive environment for LGBTQIA+ students.

Keywords: fostering, inclusivity, lgbtqia+

**HOUSEHOLD RESOURCE MANAGEMENT SUBJECT: ENHANCING THE
FINANCIAL LITERACY AMONG 2ND YEAR BTLED STUDENTS**

Justine Lagarde, Arvilyn Adigue, Peter Carl Agatea, Marianne Burzon,
Samantha Ysabelle Ramos, Abraham Muyrong II

Abstract

This study aims to evaluate the extent to which the Household Resource Management course has enhanced the financial literacy of second-year Bachelor of Technology and Livelihood Education (BTLED) students. Important aspects of financial literacy, including borrowing, debt management, budgeting, saving, investing, and spending, are the focus of the study. It looks at how students' financial habits and general well-being are influenced by the Household Resource Management curriculum across a range of areas. Purposive sampling was used to choose 59 second-year BTLED students for the study, which used a descriptive research approach. A four-point Likert scale was used to rate the respondents' answers. Weighted mean, ranking, and percentage analysis of the data were used to determine the respondents' levels of financial literacy. Based on the findings, the majority of respondents were second year students aged 15 to 20, with 76.27 percent being female and 23.72 percent male. They were highly aware of investing risks and rewards, analyzing market patterns, and borrowing only when necessary. However, they sometimes lacked a budget, spent for convenience, and engaged in impulsive buying. The Household Resource Management subject helped them understand their needs and wants, set savings objectives, and track earnings and allowances. They plan to repay debts and return borrowed funds on time but need further help in incorporating debt management into their financial planning. Overall, the study highlights the need for improvement in financial literacy and budgeting skills among students. The study concludes that the Household Resource Management course significantly enhances the financial literacy of BTLED students. To help students become even more financially proficient, the researchers recommend developing a financial management output. This study provides the groundwork for future research on the subject of financial literacy development in educational settings and contributes to the growing body of knowledge on financial education in technical education.

Keywords: financial literacy, household resource management, budgeting, btled, debt management, saving, spending

**IMPACT OF ANAGRAMS IN IMPROVING THE VOCABULARY OF THE SELECTED
SECOND YEAR ENGLISH MAJOR IN USING ACTIVITY SHEETS**

Shaira Kaye Panimdim, Mica Pearl Agripa, Madeleine Joy Obispo,
Christien Jen Pineda, Angelika Sicat, Dr. Romeo Fernandez

Abstract

This study aims to investigate the impact of anagram-based activities on enhancing the vocabulary skills of selected second-year English major students. To support this goal, the researchers will develop and utilize anagram activity sheets as instructional materials. Given the increasing importance of English as the primary medium of communication in academic and professional settings, expanding students' vocabulary has become essential. An effective and engaging method to achieve this is through the use of anagrams: a form of wordplay where a new word or phrase is formed by rearranging the letters of another (e.g., LISTEN becomes SILENT). By engaging with anagrams, students are exposed to various word formations and meanings, which promotes deeper vocabulary acquisition, critical thinking, and language awareness. Through this technique, learners not only broaden their knowledge of words but also strengthen their linguistic and cognitive skills in a meaningful and enjoyable manner. This study utilized a quasi-experimental research design; a quantitative approach focused on collecting and analyzing numerical data to explore potential cause-and-effect relationships. The researchers administered both a pre-test and a post-test to fifty (50) second-year English major students to evaluate the effectiveness of the anagram activity sheets in enhancing vocabulary skills. By comparing students' performance before and after the intervention, the study aimed to determine the instructional material's impact on vocabulary development. The findings of the study indicate a significant improvement in students' performance from pre-test to post-test, with a z-value of 4.20347 and a p-value of 0.000058, resulting in the rejection of the null hypothesis. This confirms that the use of anagram activity sheets is effective in enhancing students' vocabulary. Additionally, the results suggest that the activity not only improved vocabulary acquisition but also fostered critical thinking and problem-solving skills, reinforcing the value of anagrams as a meaningful instructional tool. This study highlights the value of incorporating engaging and interactive learning strategies in language instruction. The use of anagram activity sheets proved effective in enhancing students' vocabulary, as well as fostering critical thinking and problem-solving abilities. The statistically significant improvement in post-test scores affirms the instructional value of anagrams as a vocabulary-building tool. Overall, the findings support the integration of such wordplay-based materials in English language education to improve learner outcomes dynamically and enjoyably.

Keywords: anagram activity sheets, vocabulary enhancement, quasi-experimental design, english major students, instructional material, critical thinking, problem solving, pre-test and post-test, language learning, wordplay

**IMPACT OF BEING A WORKING STUDENT AT BESTLINK COLLEGE OF
THE PHILIPPINES-BULACAN CAMPUS**

Abilar Angel, Gabriel Luis Batuigas, Deborah De Guzman,
Kristina Jazmin, Rhean Quinalayo, Dave Espinosa

Abstract

This research focuses on the growing difficulty students face in achieving academic excellence while coping with financial challenges. This issue is particularly evident among Grade 12 students in the Accountancy, Business, and Management (ABM) strand at Bestlink College of the Philippines. Many of these learners are compelled to take on part-time or full-time jobs to meet financial needs or gain work experience. As a result, they often struggle to balance academic responsibilities with employment demands, which can significantly impact their academic performance. The study further reveals that financial insufficiency is a primary factor pushing students to work, making it increasingly difficult for them to manage their time effectively and maintain academic success during the 2024–2025 academic year. This study utilized purposive sampling to select 30 ABM learners as participants. Data were collected through a survey questionnaire aimed at gathering demographic details and examining the experiences of working students, particularly concerning their academic performance. The survey concentrated on four key areas: time management challenges, increased stress and fatigue, the sacrifice of social life, and declining academic performance. The sample consisted of 15 Grade 11 ABM students and 15 Grade 12 ABM students who actively participated in the research. The study results reveal that working ABM students generally agree that setting clear boundaries between work, study, and social time helps them maintain a consistent study routine, with a weighted mean of 3.93. They also agree that effective time management has helped reduce academic stress, indicated by a weighted mean of 4.13. Furthermore, respondents concur that enhancing their time management skills enables them to better cope with exhaustion, reflected in a weighted mean of 4.17. These findings underscore the importance of time management in improving the academic performance of working students. This study is particularly important for working students, especially those in Grade 12 ABM, as it examines how they manage their academic performance alongside work commitments. These students often face significant time constraints in balancing their dual roles, which may adversely affect their academic progress. Understanding their experiences is crucial for addressing the challenges that could impact their educational future. This study provides valuable insights and recommendations to support working students in overcoming these obstacles and achieving academic success.

Keywords: working students, academic performance, time management, grade 12 abm, work-study balance, student challenges, academic success, educational support

**IMPACT OF COOKING SKILLS ENHANCEMENT ON BTVTED LEARNERS'
PRACTICAL COMPETENCIES AT BESTLINK COLLEGE OF THE PHILIPPINES**

Daniela Divina, Novy May Ayop, Shakira Mae Joson, Mikaela Andrea Virginia Secretario,
Anthony John Taborere, Mark Tulipas, Romeoul Karl Flores

Abstract

Cooking plays a vital role in the BTVTED curriculum, serving as a key avenue for developing essential skills such as creativity, accuracy, and time management. At Bestlink College of the Philippines, students exhibited differing levels of success in mastering these cooking skills. Although cooking is deeply rooted in practical application and academic relevance, not all students showed equal progress. This study aims to identify the factors that affect skill development and to explore how proficiency in cooking contributes to shaping competent and effective technical-vocational educators. This study employed a descriptive research design and targeted 20 third-year BTVTED students from Bestlink College of the Philippines – Bulacan Campus during the academic year 2024–2025. Participants were selected through purposive sampling, specifically chosen for their enrollment in a cooking skills enhancement course. Data collection was carried out using a structured survey questionnaire, aimed at assessing students' experiences and progress in developing their cooking competencies. The respondents, primarily aged between 18 and 25, consisted of 80% females and 20% males. Findings revealed notable improvement in the use of kitchen tools, with a mean score of 3.06. Moderate progress was also recorded in areas such as food presentation (2.92), food safety practices (2.96), and overall cooking abilities (2.83). Significant advancement was seen in basic cooking techniques (3.05), although respondents indicated that knife handling and multitasking remained areas for further improvement. The majority acknowledged that the program contributed positively to the enhancement of their culinary competencies. Common challenges faced included inadequate equipment (20 responses), difficulties in group coordination (17), time management issues (18), and a lack of necessary tools (16). Teaching strategies were also identified as a concern by 10 respondents. Notably, no incidents or accidents were reported, indicating adherence to proper kitchen safety measures. The results revealed that the cooking skills enhancement program effectively improved the practical abilities of the respondents. Most participants, particularly those within the 18–25 age group, reported notable progress in areas such as proper use of kitchen tools, application of fundamental cooking techniques, and compliance with food safety standards. Overall, the data suggests a positive impact, with participants gaining increased confidence and competence in culinary tasks. However, recurring challenges including limited equipment, time management issues, and group coordination difficulties highlight areas where the program could be refined. Despite these limitations, the study confirms the program's overall success while identifying key aspects that warrant enhancement to optimize future implementation.

Keywords: cooking skills, btvted, technical-vocational education, skill enhancement, food safety, culinary training, practical competencies, program effectiveness, student development, educational challenges

**IMPACT OF DECAMATH PUZZLE ON ADDITION OF 1- DIGIT
BY 1- DIGIT NUMBERS OF GRADE 1 LEARNERS**

Alvarez Ara Bea Joy, Guenevere Samantha Abarca, Adelyn Cañete, Grazel Ann Laborera,
Maria Angela Puno, Ryan Christopher Villalon

Abstract

This study explored the use of the Decamath Puzzle as an instructional strategy for teaching one-digit addition to Grade 1 learners at GSIS Village Elementary School. It assessed students' performance before and after the intervention, examined its lasting impact on learning, and identified challenges in its classroom implementation. Guided by Saul M., Ph.D.'s (2024) Constructivist Learning Theory, the research highlighted the puzzle's effectiveness in promoting active engagement and improving mathematical skills. The study also presented practical recommendations for integrating the Decamath Puzzle into early-grade math instruction to foster deeper understanding and sustained interest among young learners. This study explored the effectiveness of the Decamath Puzzle as a teaching aid for one-digit addition among 35 Grade 1 learners at GSIS Village Elementary School. A quantitative research design was employed, utilizing pre-tests and post-tests to assess student learning outcomes. The results, analyzed through statistical tools such as frequency, percentage, ranking, weighted mean, composite weighted mean, and Z-test, demonstrated a significant improvement in students' mathematical performance after the implementation of the puzzle-based intervention. This study evaluated the effectiveness of the Decamath Puzzle in enhancing students' performance in one-digit addition. The pre-test results showed a composite mean of 5.71 with a standard deviation of 1.16, indicating a generally low level of proficiency and limited variation in scores. Post-test results demonstrated a marked improvement, with a composite mean of 8.86 and a standard deviation of 1.26, reflecting higher proficiency and greater score variability. The computed Z-value of -10.9227 and a p-value of less than 0.00001 confirmed a statistically significant difference between the pre- and post-test scores. Although challenges were noted, particularly in presenting the material in a way that was easily understandable for all learners, the findings clearly indicate that the Decamath Puzzle was effective in improving students' addition skills. The study found that the Decamath Puzzle effectively supported the teaching of addition by promoting interactive learning and improving students' conceptual understanding. The increase in proficiency levels demonstrated the method's impact, though further development is needed to achieve mastery across all learners. Post-test results confirmed significant improvement, with particularly notable progress observed in individual cases such as Isaiah. Hypothesis testing validated a meaningful difference between pre-test and post-test scores. However, challenges such as the puzzle's size and weight limited its independent use, indicating the need for design modifications to enhance classroom application. Despite these limitations, the puzzle encouraged active engagement and fostered deeper mathematical understanding among students.

Keywords: decamath puzzle, one-digit addition, interactive learning, mathematics education, grade 1 learners, skill proficiency, constructivist learning theory, student engagement, instructional tools, quantitative research

**IMPACT OF ED-VLOGS ON THE VOCABULARY DEVELOPMENT OF FRESHMEN
STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Aubrey Rose Trinchera, Jennylyn Taliptip, Mary Rose Salonga,
Maricris Trumata, Shaina Sasi, Dr. Romeo Fernandez

Abstract

This research examines the impact of ED-VLOGS on the vocabulary development of freshman students, with a particular emphasis on understanding idiomatic expressions. It analyzes variables such as frequency of exposure, contextual learning, active engagement, and comprehension. The study demonstrates that ED-VLOGS serve as an effective tool for enhancing language acquisition, deepening idiomatic understanding, and promoting vocabulary retention. By focusing on first-year students in an academic setting, the research underscores the role of ED-VLOGS in improving communication skills, advancing language proficiency, and contributing to overall academic achievement. This study utilizes a quasi-experimental design to examine the relationship between variables and assess their impact on the outcomes. This approach allows for the analysis of cause-and-effect relationships, providing insights into how specific factors influence the results of the study. The results of the study revealed a significant positive impact of ED-VLOGS on the vocabulary development of freshman students at Bestlink College of the Philippines. Students exposed to ED-VLOGS showed a marked improvement in their post-test scores, with the mean increasing from 9.48 to 17.37. The intervention proved particularly effective in enhancing idiomatic vocabulary, as 45.98% of participants achieved high levels of development. Additionally, 43.10% demonstrated strong comprehension of idiomatic expressions, highlighting the effectiveness of contextual learning through ED-VLOGS. Notably, daily exposure to the content correlated with the highest gains, with 57.47% of students regularly engaging with the material. Overall, the findings underscore the value of ED-VLOGS in fostering active engagement, improving language proficiency, and supporting consistent vocabulary growth among learners. This study provides meaningful insights and actionable recommendations for enhancing the vocabulary development of freshman students through the use of ED-VLOGS. The findings highlight the effectiveness of ED-VLOGS in promoting active engagement, contextual learning, and improved comprehension of idiomatic expressions. Integrating ED-VLOGS into the language learning curriculum at Bestlink College of the Philippines can significantly support students' linguistic growth and academic success.

Keywords: ed-vlogs, vocabulary development, idiomatic expressions, freshman students, contextual learning, active engagement, language proficiency, bestlink college of the philippines

**IMPACT OF S.A.B IN HONING THE LISTENING COMPREHENSION OF FRESHMEN
ENGLISH MAJORS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Jessa Tandoc, Engrid Besweng, Honey Grace Eugenio, Charmie Mangala,
Mel Jean Traboco, Dr. Romeo Fernandez

Abstract

This study aims to determine the impact of Semi-Authentic Broadcasts (SAB) on the listening comprehension skills of first-year English majors at Bestlink College of the Philippines, taking into account their age and gender. This study adopted a quasi-experimental research design, involving forty (40) first-year English major students from section 1201 at Bestlink College of the Philippines. The study found that most respondents were male and aged between 17 and 19. Exposure to Speech Audiobooks (SAB) enhanced students' listening comprehension, particularly in recognizing dialect and accent variations. It also contributed to vocabulary development and improved the ability to follow storylines. Overall, notable improvements in listening proficiency and academic performance were observed after using SAB. The results of the study demonstrate that speech audiobooks are highly effective in developing students' listening comprehension skills. Therefore, the researchers recommend incorporating speech audiobooks as a regular instructional tool to enhance the learning experience and improve auditory processing in the classroom.

Keywords: speech audiobook, listening comprehension, english majors, instructional material, vocabulary development, auditory processing, teaching strategies, first-year students, bestlink college of the philippines

**IMPACT OF USING VIDEO LESSON IN TEACHING TYPES OF SPEECHES TO
FRESHMEN ENGLISH MAJOR AT BESTLINK COLLEGE OF THE PHILIPPINES**

Julius Suela, Kathlyn Irag, Christian Delasllagas, Sheena Justine Isla,
Louise Manuel Carlos, Dr. Romeo Fernandez

Abstract

This study investigates the effectiveness of video lessons in enhancing first-year English major students' understanding of the different types of speeches at Bestlink College of the Philippines. It aims to determine the difference in student performance before and after the implementation of video-based instruction, using pre-tests and post-tests as measurement tools. A quantitative descriptive research design was employed, involving 70 purposively selected students from specific sections. The researchers employed purposive sampling to select 70 first-year English major students from Bestlink College of the Philippines for the academic year 2023–2024 as participants in the study. This non-probability sampling technique involves selecting individuals based on predetermined criteria relevant to the research focus. By using this approach, the researchers ensured that the participants possessed the necessary background to provide meaningful and informed responses. This intentional selection process allowed for the collection of targeted data, aligning closely with the study's objectives. According to the data, out of 70 respondents, 44 (62.85%) are female, while 26 (37.14%) are male, indicating a higher representation of female participants. In terms of age, the majority fall within the 17–18 age bracket, accounting for 61.42% of the total respondents. This demographic profile shows a predominance of young female students. All respondents are first-year English majors enrolled at Bestlink College of the Philippines. To maximize the effectiveness of video lessons, it is crucial to ensure uninterrupted access by addressing technical barriers such as poor internet connectivity and outdated devices. Enhancing digital infrastructure and providing modern technological resources are necessary steps to support students' learning experiences. Additionally, incorporating collaborative activities, such as group projects and discussion forums on speech topics, can promote active engagement and peer interaction. These strategies contribute to improving students' confidence and competence in public speaking.

Keywords: video lessons – public speaking – technical accessibility – internet connectivity – student collaboration – group projects – discussion forums – english majors – bestlink college – speech performance

**IMPLEMENTATION OF TRINITY RESTROOM FOR LGBTQ+ STUDENTS
IN GRADE 12 HUMANITIES AND SOCIAL SCIENCES AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Maricris Solima, Jhanna Avila, Rommel Bugarin, Maria Sheena Ciocson, Luigi Tan, Rica Mae Berja

Abstract

This new program aims to provide leadership development opportunities for current students and offer enhanced transitional support services to incoming students who identify as Lesbian, Gay, Bisexual, Transgender, Queer, and other identities represented by the “+”. Schools should be safe and inclusive environments for all; however, LGBTQ+ individuals often face criticism and discrimination, especially in situations such as using restrooms where appropriate facilities are lacking. This lack of inclusive infrastructure and awareness can lead to mockery and marginalization, highlighting the need for greater education, discipline, and respect within the school community. Due to fear of ridicule and discrimination, many students of diverse gender identities often suppress their true feelings and experiences. The lack of gender-inclusive or "trinity" restrooms presents a significant barrier to inclusivity and conveys the message that LGBTQ+ students are not fully accepted or respected within the academic community. This study aims to promote the implementation of trinity restrooms to create a more inclusive, respectful, and welcoming school environment, particularly for students who identify as LGBTQ+. This initiative supports the college's mission to deliver high-quality education within a safe and supportive atmosphere. A developmental quantitative research design was employed to gather insights from the participants. The study involved forty-seven (47) LGBTQ+ students from the Grade 12 Humanities and Social Sciences strand at Bestlink College of the Philippines. Using purposive sampling, data was collected through face-to-face administration of a structured survey questionnaire. The findings reveal that the implementation of trinity restrooms offers substantial benefits for LGBTQ+ students, particularly in terms of comfort, equality, and safety. Additionally, several respondents highlighted positive impacts on mental health, social acceptance, and accessibility. Participants also provided valuable suggestions to further improve the implementation of Trinity restrooms across multiple aspects. The discussion presents a summary of the findings regarding the benefits that LGBTQ+ students can gain from the implementation of trinity restrooms. It also outlines the action plans suggested by the participants. Additionally, the researchers provide conclusions and recommendations for promoting and expanding the implementation of trinity restrooms to foster a more inclusive and supportive school environment.

Keywords: lgbtq+ students, trinity restroom, inclusivity, equality, security, mental health, social acceptance, accessibility, safe spaces, educational environment, bestlink college of the philippines, humanities and social sciences, purposive sampling, action

IMPROVING SPEAKING SKILLS THROUGH H.A.S.P AMONG GRADE 6 STUDENTS

Azenith Aguirre, Nor-laily Abdul, Nelman Amion, Rizza Rose Arcega,
Jonairah Macainding, Ryan Christopher Villalon

Abstract

This study aimed to improve students' speaking abilities to enhance the effectiveness of their learning. It focused on helping students clearly and confidently express information verbally so that listeners could easily understand them. The research utilized auditory learning materials called "H.A.S.P." (Hearing Actively and Speaking Proudly), through which students engaged in targeted listening and speaking activities that strengthened their oral responses. Special attention was given to the accurate pronunciation of words and sentences, leading to significant gains in fluency, grammar, vocabulary, and overall pronunciation. The study was grounded in Van Dijk's (2020) Digital Divide theory. The study involved 41 Grade 6 students from San Gabriel Elementary School and utilized standardized 40-item pre-tests, post-tests, and survey questionnaires. Data was analyzed using statistical methods such as Frequency, Percentage, Ranking, Weighted Mean, and Z-test to evaluate the intervention's effectiveness. Grounded in a review of relevant literature, the researcher also created a table of specifications to ensure alignment between the assessments and the study's framework. The results highlighted key characteristics of the participants, who were aged 11 to 13 years old, comprising 18 females and 23 males. Analysis of their speaking skills showed significant improvement, with weighted means reflecting effectiveness in fluency (3.00), grammar (3.05), pronunciation (3.02), and vocabulary (3.01), all rated as Effective. The pre-test yielded a composite mean of 15.56 (SD = 4.94), while the post-test showed a higher composite mean of 20.90, resulting in the rejection of the null hypothesis. Identified challenges included fostering effective learning, limited home resources, struggling readers, insufficient visual aids, and a lack of ample practice opportunities. The findings demonstrate that the H.A.S.P. guidelines effectively enhanced students' speaking and listening skills by integrating multimedia resources. This structured approach facilitated the efficient use of materials in the classroom, enabling students to improve their verbal expression and build greater confidence in their communication abilities. Consequently, these improvements contributed to their academic success and personal development.

Keywords: h.a.s.p., speaking skills, listening skills, multimedia resources, oral communication, student confidence, fluency, pronunciation, grammar, vocabulary, digital divide theory, grade 6 learners, language development

**IMPROVING STUDENTS LEARNING EXPERIENCE USING DANCE REVO IN
TEACHING TINIKLING AMONG GRADE 6 PUPILS**

Ma Divina Domingo, Rose Ann Hermosura, Jerome Lazaro, Charlotte Lozano,
Reylyn Rose Sicabalo, Justine Lyn Fernandez

Abstract

This study examined the integration of Dance Revo as an interactive instructional tool for teaching the traditional Tinikling dance to Grade 6 students. It aimed to improve students' comprehension of choreography, timing, coordination, and footwork, while also encouraging active engagement, cultural appreciation, and collaborative learning. By blending traditional Filipino dance with modern technology, the study sought to create a more engaging, innovative, and enjoyable learning experience. A quantitative research design was utilized to examine student engagement, skill enhancement, and learning outcomes. Data were collected through surveys and observational assessments. Grade 6 students participated in Tinikling dance sessions using the Dance Revo platform, and their progress was systematically evaluated through structured performance assessments and feedback, focusing on choreography, coordination, and overall participation. The results of the study demonstrate that integrating Dance Revo into Tinikling instruction positively influenced the performance of Grade 6 students. This was evident through notable shifts in the percentage distribution between pre-test and post-test scores. Significant improvements were recorded in specific categories, such as Category 2 (from 4.95% to 11.73%) and Category 7 (from 5.89% to 12.13%), indicating increased engagement and skill acquisition. Although a decline was observed in Category 5 (from 13.25% to 4.30%), this likely reflects a redistribution of students toward higher performance levels. Overall, the findings suggest that the use of interactive tools like Dance Revo enhances students' learning experiences by improving rhythm, coordination, and memory retention. Moreover, it promoted peer collaboration, encouraged creativity, and contributed to a more positive and dynamic classroom environment. The study concludes that incorporating interactive technology into traditional dance instruction, such as the use of Dance Revo in teaching Tinikling, effectively enhances student engagement, understanding, and skill development. This approach not only supports the mastery of choreography and coordination but also fosters cultural appreciation in a more engaging and accessible manner. It is therefore recommended that educators integrate digital tools into cultural dance education to create a more dynamic, enjoyable, and inclusive learning environment.

Keywords: dance revo, tinikling, interactive technology, traditional dance, cultural education, student engagement, choreography, rhythm, coordination, digital tools, grade 6 learners, multimedia learning

**INCULCATION OF TOUCH TRAIN: SCIENCE PROCESS SKILLS MATERIAL ON
SENSE ORGANS (SKIN) LESSON AMONG GRADE 3 PUPILS**

Joy Ann Molina, Jahveline Ellorin, Jasper Galope, Pearly Joy Malabo,
Mc Ivan Tan, Ryan Christopher Villalon

Abstract

This study aimed to develop science process skills, such as classifying, inferring, and observing, among Grade 3 pupils. To enhance learning in Science 3, particularly in topics related to the sense organs (specifically the skin), the Touch Train was employed as a gamified teaching tool. The study was guided by Sert and Panier's (2023) Sensory Theory, which emphasizes the vital role of sensory stimulation, especially touch, in effective learning. The theory asserts that engaging the sense of touch activates specific neural pathways, improving the brain's ability to process and retain information. The researchers adopted a quantitative research approach utilizing a quasi-experimental, one-group pre-test–post-test design to evaluate changes in participants' performance before and after the intervention. A total of 40 Grade 3 pupils from Urduja Elementary School were selected through purposive sampling. The study employed a researcher-made survey questionnaire, along with pre-test and post-test assessments, as the primary data-gathering instruments. The collected data were analyzed using various statistical tools, including percentage, ranking, weighted mean, and Z-test, to determine the effectiveness of the intervention. The study findings indicated that the respondents demonstrated a solid grasp of science process skills. Classification received a weighted mean of 3.19, interpreted as “Agree,” suggesting it was helpful during content interaction. Inferring followed with a mean of 3.14 (“Agree”), highlighting its effectiveness in helping teachers explain scientific concepts. Observing received the highest mean score of 3.22 (“Agree”), showing its value in evaluating students through performance-based tasks. Additionally, the pre-test and post-test results showed a clear performance improvement. Notably, 23 respondents, or 57.5% of the total sample, scored between 25 and 30 in the post-test, which was interpreted as “Excellent.” The statistical analysis revealed a p-value of $< .00001$, indicating a significant difference between the pre-test and post-test scores, thereby leading to the rejection of the null hypothesis. The study concludes that Grade 3 pupils successfully developed science process skills, namely, classifying, inferring, and observing, through the use of the Touch Train, which fostered critical thinking and active engagement. The Touch Train proved effective in enhancing classification skills and supporting content interaction. Moreover, the incorporation of gamification encouraged deeper engagement by stimulating curiosity, resulting in a more dynamic, interactive, and meaningful learning experience.

Keywords: touch train, science process skills, classifying, inferring, observing, gamification, critical thinking, sensory learning, interactive learning, grade 3 pupils, science education

**INFLATION IN CAFETERIA ITS INFLUENCE IN THE EXPENDITURE OF
GRADE 12 HUMANITIES AND SOCIAL SCIENCES STUDENTS IN
BESTLINK COLLEGE OF THE PHILIPPINES**

Joshua Paul Nueva, Erich Adupe, John Andri Devero, Rhonel Mabaquiao,
Lai Rhyzene Tatad, Christopher Azares

Abstract

Global inflation has contributed to rising food prices in school cafeterias, making it increasingly difficult for students to afford nutritious meals. This has led many to opt for cheaper, less healthy alternatives, resulting in decreased student spending and a decline in cafeteria sales, threatening the financial stability of school food services. Factors such as pricing, order times, and food quality also influence students' eating habits. To address these challenges, the school administration could collaborate with cafeteria operators to regulate prices, offer discounted meal packages, or partner with external vendors to provide more affordable options. Additionally, improving cafeteria operations and implementing financial literacy programs may help students better manage their budgets. This study aims to examine the impact of inflation on cafeteria spending among Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines, providing insights to support financial responsibility and improved access to nutritious meals. The study utilized an exploratory descriptive quantitative research design and employed a cluster sampling technique to gather data from 200 Humanities and Social Sciences students. The research aimed to examine the impact of inflation on cafeteria spending behavior. A structured survey questionnaire was used as the primary instrument for data collection. The results also presented the respondents' demographic profiles, including age, gender, and daily allowance. Findings indicated that inflation in cafeteria prices significantly influenced students' spending behavior. For food prices, the composite mean was 3.26, interpreted as "Strongly Agree." The same composite mean of 3.26 was observed for spending changes, also described as "Strongly Agree." Meanwhile, food choices recorded a slightly higher composite mean of 3.30, likewise interpreted as "Strongly Agree." These findings suggest that rising cafeteria prices have a notable impact on students' expenditures, prompting adjustments in their food selections and spending habits. The study explored the effects of cafeteria inflation on the spending habits of Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines. To help students cope with the rising cost of meals, it is recommended that financial literacy programs be implemented. These programs should aim to enhance students' budgeting skills and promote effective spending habits, enabling them to better manage their daily expenses amid ongoing price increases.

Keywords: cafeteria inflation, student expenditure, food prices, financial literacy, budgeting, spending habits, grade 12, humanities and social sciences, bestlink college of the philippines, cost of living, school cafeteria

INFLUENCE OF ASTRID IN VOCABULARY DEVELOPMENT OF GRADE 2 PUPILS

Rose Ann Serrano, Lorely Durin, Sunshine Godinez, Dylan Jhet Gonzaga,
Glazylmae Morales, Ryan Christopher Villalon

Abstract

Melencio M. Castelo Elementary School in Quezon City conducted a study on the effectiveness of Animated Storytelling Through Digital (ASTRID) in enhancing the vocabulary skills of fifty Grade 2 students. Prompted by UNICEF's warning of a global education crisis where a significant number of 10-year-olds struggle with reading comprehension, the study aimed to strengthen early literacy by integrating engaging digital storytelling techniques into classroom instruction. This study utilized a quantitative approach with a causal-comparative design and purposive sampling, grounded in Reader Response Theory, which emphasizes the reader's active engagement in interpreting text. By incorporating animation and digital storytelling, the researchers aimed to create a more dynamic and immersive reading experience. This approach was intended to enhance students' vocabulary acquisition, phonemic awareness, and listening comprehension. The results indicated a significant improvement in vocabulary development among students who participated in the ASTRID program. Pre-test and post-test comparisons showed an increase in mean scores from 6.40 to 8.72. Statistical analysis revealed a z-value of -3.7735 and a p-value of 0.000161, confirming a statistically significant difference between the two sets of scores. These findings provide strong evidence that the ASTRID program effectively enhances vocabulary acquisition. Moreover, this study provides valuable insights for educators and future research. Its findings can inform the creation of effective digital learning materials and teaching strategies tailored for Grade 2 classrooms. The success of ASTRID highlights the powerful role of storytelling and technology in enhancing vocabulary and reading skills. This research advocates for the wider implementation of similar programs to help address the global education crisis. Future studies could examine the long-term impacts of ASTRID and its applicability across various age groups and educational settings.

Keywords: animated storytelling, digital learning, vocabulary development, phonemic awareness, listening comprehension, reader response theory, grade 2 students, early literacy, educational technology, astrid program

**INFLUENCE OF AUDIOBOOK ADVENTURE STORY IN READING
COMPREHENSION SKILLS OF GRADE 1 LEARNERS**

Janel Habla, Marie Nell Calderon, Erma Itchon, Mary Jane Puso,
Bianca Rodriguez, Ryan Christopher Villalon

Abstract

This study examines the effect of audiobooks on reading comprehension in Grade 1 students at Raymundo Punong Bayan Elementary School. As audiobooks become increasingly popular in educational settings, this research aims to evaluate their role in improving vocabulary, text understanding, and narrative skills, thereby fostering literacy development and academic success, consistent with findings from previous studies (Callaghan, 2021). The study involved 38 Grade 1 students randomly selected from a total of 181 students at Punongbayan Elementary School through simple random sampling. Data were gathered using standardized pre- and post-tests, each containing 30 items, to measure reading comprehension before and after a week-long intervention involving daily audiobook sessions. Survey questionnaires were also used to collect additional data. The impact of the audiobook intervention was analyzed using statistical methods such as percentage, weighted mean, composite mean, ranking, and the z-test. The results demonstrated strong support for instructional methods designed to enhance reading comprehension. However, statistical analysis showed no significant relationship between the use of audiobooks and the reading comprehension skills of Grade 1 students, as indicated by a p-value greater than 0.05 and a low correlation coefficient. Consequently, the null hypotheses were accepted: there was no significant effect of audiobooks on reading comprehension (Ho1), nor a significant association between the challenges faced by students and their comprehension abilities (Ho2). These findings suggest that the difficulties encountered by Grade 1 learners impact their ability to understand and interpret reading materials. It is recommended that future research explore alternative instructional strategies, possibly combining audiobooks with other effective reading interventions to better support early literacy development. The findings underscore important implications for instructional strategies, particularly the potential of audiobooks to engage students and facilitate learning. This aligns with Constructivist theory, as articulated by Tamsen (2021), which posits that learners actively build their understanding by interacting with educational content. The study suggests that integrating audiobooks into literacy programs may effectively improve reading comprehension. Future research should investigate the long-term effects of audiobooks and their applicability across various demographic settings.

Keywords: audiobooks, reading comprehension, grade 1 students, literacy development, constructivist theory, instructional strategies, early education, engagement, digital learning, punongbayan elementary school

**INFLUENCE OF D.A.R.T. MATERIAL TO THE READING
COMPREHENSION SKILLS OF GRADE 3 PUPILS**

Christian Ivan Galera, Janica Bombarda, Jessica Catamora, Ronalyn Labrador,
Charie Mie Pepito, Ryan Christopher Villalon

Abstract

The Drop and Read Tower is an innovative teaching tool that incorporates gamified learning to make reading activities more interactive, engaging, and cooperative for learners. This method applies research-based strategies to link the material with essential reading comprehension skills. It enhances reading fluency, supports the use of comprehension strategies such as visualization, and expands vocabulary, all of which are critical to understanding texts. As noted by Zaric et al. (2021), the Gamified Learning Theory emphasizes that incorporating game elements into education encourages learning behaviors by serving as a mediator or moderator in the learning process. The study utilized a quantitative approach with a causal-comparative research design. A purposive sampling method was employed to select 60 Grade 3 pupils from San Bartolome Elementary School. Data collection involved the use of a structured survey questionnaire and a modified pre-test and post-test based on materials from the Department of Education. The data were analyzed using statistical tools, including ranking, weighted mean, Likert scale, and z-test, to determine the effectiveness of the intervention. The study revealed notable improvements in reading comprehension skills specifically in fluency, visualization, and vocabulary through the use of the Drop and Read Tower (D.A.R.T.) material. Significant differences were observed between the III-Kamatsile and III-Katmon groups, both of which showed progress, with the III-Kamatsile group demonstrating particularly high proficiency. These results underscore the effectiveness of tailored instructional strategies. The post-test scores showed a substantial increase compared to the pre-test results, confirming the positive impact of the gamified learning intervention on students' reading comprehension. Despite the positive outcomes, the study identified several challenges, including communication difficulties, excitement-induced struggles in articulating ideas, time constraints, and confusion when forming mental images. These issues suggest the need for differentiated instructional approaches to effectively cater to the varied learning styles of students, as highlighted by Ningtyas et al. (2020) and Akidatul et al. Nonetheless, the findings reinforce the effectiveness of gamified learning tools like the D.A.R.T. strategy in promoting reading comprehension and active participation, while also emphasizing the importance of addressing specific learning obstacles through targeted interventions.

Keywords: gamified learning, reading comprehension, d.a.r.t. strategy, visualization, vocabulary development, fluency, instructional adaptation, quantitative research, pre-test and post-test, grade 3 pupils

**INFLUENCE OF EDUCATIONAL YOUTUBE VIDEOS ON IMPROVING
PROFICIENCY IN SCIENCE SUBJECTS OF GRADE 11 HUMANITIES
AND SOCIAL SCIENCES STUDENTS**

Rachelle Almanzor, Jenette Ann Brita, Jazmine Lacsamana, Jhon Robert Pepito,
Mary Bing Tamayo, Christopher Azares

Abstract

YouTube has become a leading platform for educational videos, providing students with accessible and engaging learning materials. This study is anchored in Richard Mayer's Multimedia Learning Theory (1997), which posits that students learn more effectively through a combination of visual and auditory input rather than through text alone. The purpose of this study is to examine the effectiveness and impact of educational YouTube videos on students' learning experiences. The researchers utilized an evaluative research method combined with quota sampling to assess the effectiveness of YouTube as a learning tool. Data were collected through a survey questionnaire administered to 113 Humanities and Social Sciences students at Bestlink College of the Philippines. The responses were analyzed using statistical tools to quantify student feedback and evaluate the overall impact of educational YouTube videos on their learning. The findings reveal that students perceive YouTube educational videos as highly efficient, particularly in terms of accessibility (weighted mean = 3.29), content quality (3.36), and presentation style (3.33), all of which were rated as "Highly Efficient." In terms of influence, the students also expressed strong agreement regarding the videos' reliability (3.30), engagement level (3.29), and impact on learning outcomes (3.26), each classified as "Highly Influential." The most frequently reported challenge faced by students was slow internet connectivity, which affected their access to the content. YouTube educational videos were found to be highly efficient in terms of accessibility, content quality, and presentation style, and highly influential based on their reliability, impact on learning outcomes, and engagement level. In light of these results, it is recommended that students incorporate educational YouTube videos into their study routines, while teachers integrate them into classroom instruction to enhance learning experiences. Additionally, the school is encouraged to develop programs that promote responsible and effective use of digital learning resources, including YouTube videos, to support academic success.

Keywords: youtube educational videos, multimedia learning, digital learning tools, content quality, student engagement, accessibility, learning outcomes, instructional integration, digital resources

**INFLUENCE OF KIDSCORNER VIDEO MATERIALS ON UNDERSTANDING
SHORT STORIES FOR GRADE 3 LEARNERS**

Ray Ann Inventor, Jocelyn Cruz, Krystal May Fernandez, Jelene Poncardas,
Angelica Joy Ramos, Ryan Christopher Villalon

Abstract

The study aimed to assess the impact of KidsCorner video materials on the reading comprehension of Grade 3 students at Maligaya Elementary School. A total of 72 students from the Burgos and Paterno sections served as respondents. To evaluate the effectiveness of the intervention, pre-tests and post-tests were administered to measure students' comprehension levels before and after receiving either traditional instruction or video-based instruction. The assessment focused on three key components: word recognition, reading fluency, and reading comprehension. The study sought to determine the effectiveness of integrating KidsCorner video resources into reading instruction by comparing the performance of students exposed to the videos with those taught through conventional methods. The study utilized a true experimental design involving 72 Grade 3 students from Maligaya Elementary School, selected through purposive sampling. Data was collected through the administration of pre-tests and post-tests to measure students' reading comprehension before and after the intervention. For data analysis, statistical methods such as percentage, weighted mean, and the Z-test were employed to evaluate the effectiveness of the KidsCorner video materials. The findings showed that 64% of the respondents were 8 years old or younger, and 53% were female. In the pre-test, both the Traditional and KidsCorner groups exhibited high proficiency in word recognition, with mean scores of 13 and 14.33, respectively. However, both groups performed poorly in reading fluency, scoring 10 and 9.92, and moderately in reading comprehension, with mean scores of 11 and 13.22. These results underscore the importance of integrating word recognition into reading comprehension to enhance students' understanding of short texts. The significant gains observed in the KidsCorner group's post-test performance align with current research advocating for engaging, multimedia-based instructional strategies to support student learning and academic success. This study demonstrates that KidsCorner video materials significantly contribute to improving the reading comprehension of third-grade students. By making learning more engaging and accessible, these tools help bridge gaps in understanding and promote deeper cognitive processing. More importantly, they encourage students to develop a genuine interest in reading, laying the groundwork for continued academic growth and lifelong learning.

Keywords: kidscorner, reading comprehension, third-grade students, educational videos, learning engagement, knowledge retention, reading skills, lifelong learning

**INFLUENCE OF MUSIC ON ACADEMIC PERFORMANCE OF
GRADE 12 HUMANITIES AND SOCIAL SCIENCES**

Trisha Nicole Belmi, Mark Louie Gloria, Carlos Jay Jaime,
Danilo Suarez Jr, Jhon David Piedad, Christopher Azares

Abstract

This study examines the impact of music on the academic performance of Grade 12 Humanities and Social Sciences (HUMSS) students. Music, whether from songs or ambient sounds, has been shown to influence students' learning experiences. Depending on an individual's cognitive capacity, music can either enhance or hinder brain function and focus. The research is grounded in the Mozart Effect, a theory proposed by Dr. Francis Rauscher in 1993, which suggests that listening to music while studying can improve concentration and soothingly reduce stress. This study specifically investigates how music affects students' concentration, productivity, and ability to memorize information. This study utilized an exploratory research design, with 200 Grade 12 Humanities and Social Sciences (HUMSS) students serving as respondents. A cluster sampling technique was employed to ensure representative data collection. The primary research instrument was a structured survey questionnaire. To analyze the data, the study used various statistical tools, including frequency and percentage distribution, ranking, Likert scale analysis, and weighted mean. The findings reveal that classical music significantly influences students' cognitive performance. Respondents rated its impact as Highly Influential in terms of productivity (weighted mean = 3.38), concentration (3.37), and memorization (3.29), resulting in an overall weighted mean of 3.36. These results underscore the strong positive effect of classical music on academic-related tasks. However, a notable challenge identified by 25% of the respondents was poor audio quality when listening to classical music. Additionally, the study found that pop music is the most commonly preferred genre among Grade 12 Humanities and Social Sciences students. Overall, respondents widely agreed that music enhances their focus, productivity, and ability to retain information. The study offers practical solutions to address the identified challenges, particularly poor audio quality. It recommends promoting the use of music in focused study environments to enhance students' cognitive performance. Collaborating with composers or audio engineers to improve sound quality is also encouraged. To support engagement, schools are advised to incorporate popular music genres into student-centered activities. Furthermore, it is recommended that institutions invest in high-quality sound systems and provide access to high-fidelity recordings to create an optimal auditory experience that supports focus, productivity, and effective learning.

Keywords: music in education, cognitive performance, audio quality, classical music, popular genres, student engagement, high-fidelity recordings, sound systems, study environment, learning enhancement

**INFLUENCE OF PLAGIARISM CHECKER ON THE ACADEMIC WORK OF GRADE 12
HUMANITIES AND SOCIAL SCIENCES IN BESTLINK COLLEGE OF THE PHILIPPINES**

Benzyl Badia-on, Lei Gabrielle Fallet, Joash Luzeriaga, Cendy Lady Siglos,
Reymarh Young, Christopher Azares

Abstract

Plagiarism checkers are widely used tools that can assess various types of academic work to determine whether content has been copied from external sources. These applications help ensure academic integrity by identifying similarities in students' submissions. In a grounded theory study, Parvin Abassi (2020) explored the underlying causes of plagiarism across five dimensions: background conditions, causal conditions, approaches, intervening conditions, and outcomes. The study sheds light on students' perceptions of plagiarism, particularly its impact on written outputs, critical thinking, and originality, as well as the challenges they encounter when using plagiarism detection tools. This study adopted an exploratory quantitative research design to assess the impact of plagiarism checkers on the academic work of Grade 12 Humanities and Social Sciences (HUMSS) students. A total of 200 respondents were selected through a cluster sampling technique and participated by completing a structured survey questionnaire. The data collected were analyzed using descriptive statistical tools to identify patterns and trends in students' experiences and perceptions. The findings indicate that respondents rated the influence of plagiarism checkers on academic work with weighted mean scores of 3.50 for written output, 3.45 for critical thinking, and 3.51 for originality. The overall weighted mean of 3.51 reflects a strong agreement regarding the positive impact of plagiarism checkers. Furthermore, as shown in Table 5, 131 respondents (22.29%) reported that limited data coverage is the most frequently encountered issue when using these tools. Improvements to plagiarism checkers should focus on expanding their vocabulary range, enhancing grammatical accuracy, and broadening their database coverage. Additionally, their functionality must be upgraded to improve text scanning, plagiarism detection accuracy, and error prevention. It is also crucial to update the system to ensure efficient and reliable performance. The researchers further recommend implementing a structured action plan to guide these enhancements.

Keywords: plagiarism checker, academic work, grade 12 humanities and social sciences, written output, critical thinking, originality, data coverage, system improvement, survey, descriptive statistics

**INFLUENCE OF PUBLIC COMMUNICATION TO THE SELECTED
GRADE 11 HUMANITIES AND SOCIAL SCIENCES STUDENTS
OF BESTLINK COLLEGE OF THE PHILIPPINES**

Angela Xhane Turdillo, Rachel Ann Cuentas, Sarah Hopansia,
James Rangas, Christopher Azares

Abstract

This study investigates the impact of public communication on social interaction among selected Grade 11 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. It examines how factors such as peer influence, language barriers, and audience engagement affect students' ability to communicate effectively in both academic and social contexts. Grounded in David Mortensen's Communication Theory, which views communication as a dynamic, interactive process shaped by cultural context. The study aims to provide valuable insights for students, teachers, parents, school administrators, and future researchers. This study adopted a quantitative-evaluative research design, involving 133 Grade 11 HUMSS students who were selected through quota sampling. A validated survey questionnaire served as the main data collection instrument, targeting areas such as communication strategies, common challenges, and influencing factors in public communication. Responses were rated using a Likert scale ranging from Strongly Agree to Strongly Disagree. The data were analyzed using descriptive statistics, including frequency, percentage, ranking, and mean, to interpret patterns and trends. The results indicate that students consider active listening and body language as the most effective communication strategies. However, they also face notable challenges, particularly language barriers, peer influence, and audience engagement. Social interaction was identified as the most influential factor, underscoring the importance of public communication in cultivating relationships and promoting the exchange of ideas among students. The analysis further suggests that language barriers can impede effective communication, often resulting in misunderstandings, discomfort, and lower participation in class discussions. Students noted that their ability to interact socially improves when they feel engaged and acknowledged, which enhances idea sharing and peer relationships. Moreover, peer influence significantly shapes communication behavior, with encouragement and support from peers boosting students' confidence and willingness to participate. In light of the findings, the study recommends an action plan designed to improve communication skills through strategic interventions. These include enhancing language proficiency, promoting awareness of tone and nonverbal cues such as body language, encouraging cultural sensitivity, and cultivating a more inclusive and supportive peer environment. The proposed initiatives aim to strengthen students' public communication skills and foster more meaningful social interactions both within and beyond the classroom.

Keywords: public communication, social interaction, active listening, body language, language barriers, peer influence, cultural sensitivity, communication strategies, grade 11 humss, bestlink college

**INFLUENCE OF READ AND DASH MATERIAL IN DIGRAPH LESSON IN
ENGLISH GRADE 3 AT SAN AGUSTIN ELEMENTARY SCHOOL**

Mary Jane Laurito, Roel Jr. Aggabao, Reynaldo Besana, Jane Arlyn Unabia,
Donamay Zipagan, Ryan Christopher Villalon

Abstract

This study examines the influence of Read and Dash, an interactive and gamified instructional tool, on enhancing reading skills and engagement among Grade 3 students. The research focuses on its influence on key areas such as fun, student engagement, word recognition, and pronunciation. The study evaluates the performance of students utilizing Read and Dash compared to those taught through traditional methods. This study used a quasi-experimental design that resembled experimental designs. The chosen respondents were Grade 3 students in San Agustin Elementary School, with a total of one hundred twenty-eight (128) participants. The researcher administered a pre-test and post-test to measure the influence of Read and Dash in the Digraph Lesson for Grade 3, and the researcher-made survey questionnaire was viewed as the most common data-collecting instrument in this study. Data were collected and analyzed through statistical treatments, including frequency, percentage ranking, weighted mean, and z-test, which also tested the null hypothesis to determine the material's effect on learning outcomes. The results revealed significant improvements in reading performance. In the pre-test, the Home Group demonstrated high proficiency, with mean scores of 9.53 in word recognition and 9.20 in pronunciation, while the Experimental Group was rated low proficient, with mean scores of 5.50 in word recognition and 4.41 in pronunciation. In the post-test, both groups achieved high proficiency, with the Home Group averaging 9.12 in word recognition and 9.16 in pronunciation, and the Experimental Group achieving 9.28 in word recognition and 9.68 in pronunciation. A significant relationship was found between the pre-test and post-test results, consistent with the theory of Duke, N. K., et al., Active View of Reading. The study recommends continued integration of Read and Dash materials in classrooms to enhance reading skills. In conclusion, this research emphasizes the positive influence of utilizing the Read and Dash gamification strategy for enhancing reading performance in third grade students. The findings indicate that incorporating Read and Dash into reading activities allows educators to foster more engaging and effective learning experiences that aid in students' literacy growth. This approach improves essential reading skills, including word recognition and pronunciation, by providing a fun and participatory environment.

Keywords: read and dash, reading, fun, student engagement, word recognition, pronunciation, quantitative, quasi-experimental

**INFLUENCE OF SCIBINGO ON SEPARATION OF MIXTURES ON
GRADE 6 LEARNERS IN PUNTURIN ELEMENTARY SCHOOL**

Joelyn Rose Valdez, Reyniel Adato, Christian Dato On, Johana H-amer,
Ashley Quinagan, Ryan Christopher Villalon

Abstract

The Philippine Institute for Development Studies (PIDS) emphasized that the lack of teaching materials poses a significant barrier to effective learning, as students are deprived of access to essential information needed to fully grasp classroom lessons. In this study, the concept of separating mixtures is applied through SCIBINGO, an interactive and gamified learning tool designed to engage students in a more enjoyable and stimulating way. By incorporating SCIBINGO into science instruction, the study aims to activate various cognitive processes, encourage sustained focus, and ultimately enhance student performance through evidence-based strategies and theoretical foundations. This study employed a mixed-methods design involving 47 Grade 6 learners from Punturin Elementary School, all of whom provided consent to participate. The study utilized a quasi-experimental approach, which involved administering a pre-test and post-test to the same group of students to assess the effectiveness of SCIBINGO. This design allowed the researchers to measure changes in students' knowledge and performance before and after the intervention. The analysis aimed to determine whether any significant improvements could be attributed to the use of SCIBINGO in teaching the lesson on separating mixtures. Additionally, the study was guided by Tippet's theory, which highlights the importance of strategy, familiarity, awareness of outcomes, and consistent practice, all of which align with the cognitive benefits offered by SCIBINGO's interactive format. The findings of this study confirm that educational intervention had a significant impact on student performance. In the pre-test, students recorded a mean score of 11.064 with a standard deviation of 3.6200. Following the intervention, the post-test results showed a higher mean score of 14.723 and a reduced standard deviation of 2.4821, indicating not only improved performance but also more consistent outcomes. The z-value of -5.7160 reflects a statistically significant difference between the two sets of scores. With a p-value less than .00001, well below the accepted significance level of 0.05, the study rejects the null hypothesis, affirming that the intervention led to measurable improvement in student learning. The analysis confirms that SCIBINGO positively impacted student learning and performance, particularly in understanding the concept of Separation of Mixtures. The intervention effectively enhanced student engagement and academic outcomes, demonstrating its value as a supportive educational tool for improving science comprehension and overall achievement.

Keywords: scibingo, separation of mixtures, educational intervention, student performance, grade 6, science comprehension, quasi-experimental, learning outcomes

**INTEGRATION OF VIRTUAL REALITY SIMULATION IN TEACHING SOCIAL
STUDIES: A GUIDE TOWARDS EFFECTIVE LEARNING**

Romulo Cabuhat, Angelo Belicano, Angelica Imperial, Shiena Mea Isnani,
Edmar Semblante, Abraham Muyrong II

Abstract

Research on incorporating Virtual Reality (VR) into the Social Studies classroom is still emerging, with no standardized methodologies currently in place. Teachers often face challenges in locating appropriate VR content, developing engaging lesson plans, and evaluating the impact of VR on student learning outcomes. A practical guide could support educators by helping them integrate VR into lesson plans, align VR content with curriculum objectives, and assess student engagement and participation. These firsthand observations and implementations can contribute valuable insights to future instructional practices and curriculum development. This project aims to utilize a descriptive research design and a quantitative approach to explore the integration of virtual reality (VR) simulation into Social Studies instruction. The study will be conducted during the 2024–2025 school year and will focus on 33 Social Studies instructors at Maligaya High School. A survey questionnaire will be developed, validated, and verified by subject matter experts to ensure reliability and relevance. Data will be analyzed using frequency distribution, percentage distribution, weighted mean, and ranking methods. Beliefs, attitudes, and behaviors will be measured using a Likert scale. The study investigated the use of virtual reality (VR) among 33 Social Studies instructors. Most participants held bachelor's degrees and had between 11 and 15 years of teaching experience. VR tools were primarily used for student motivation, presentations, assessments, and videoconferencing. Resources such as YouTube VR and instructional applications were found to be particularly effective, while VR-enabled virtual field trips enhanced the teaching of cultural diversity. Overall, the findings suggest that while VR has shown positive impacts in the classroom, there remains significant room for growth and development in its educational application. The study found that experienced teachers, particularly those with a bachelor's degree and 11 to 15 years of teaching experience, are well-positioned to integrate virtual reality (VR) simulations into their instructional practices. VR technology significantly enhances educational outcomes by improving student motivation, presentation delivery, assessments, and remote learning via platforms like Google Meet. Tools such as Quizlet, Google Docs, and Google Classroom also support student engagement and help create dynamic, interactive learning environments. Teachers expressed confidence in using VR to deliver immersive learning experiences, including virtual field trips and cultural diversity explorations. These approaches have the potential to transform Social Studies education by offering meaningful, experiential learning opportunities. The study underscores VR's potential to bridge the gap between theoretical knowledge and real-world application, signaling a shift toward more innovative and impactful teaching strategies.

Keywords: established methodologies, virtual reality, virtual field, experiential learning, cultural diversity, curriculum

**LEVEL OF ACCESSIBILITY OF LEARNING MANAGEMENT SYSTEM AS
PERCEIVED BY SELECTED GRADE 12 WORKING STUDENTS IN
HUMSS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Glazy Ree Serrano, Kathrina Dacillo, Rachelle Garcia,
Rosemarie Garsula, Hasnor Pacalna, Rica Mae Berja

Abstract

This research investigates how selected Grade 12 working students in the Humanities and Social Sciences (HUMSS) strand at Bestlink College of the Philippines perceive the accessibility of Learning Management Systems (LMS). The study examines the system's influence on various aspects of learning, including ease of access, progress monitoring, interactive features, time management, opportunities for advanced learning, and the development of academic and technical skills. This study utilized descriptive qualitative research design with a survey questionnaire as the primary data collection method. Findings revealed that Learning Management Systems (LMS) offer significant advantages to students, including easier access to learning materials, effective progress tracking, and enhanced interaction. However, technical difficulties emerged as a major concern in LMS usage. The study highlights the need to improve system accessibility and provide stronger technical support. An action plan is proposed to optimize LMS usability, aiming to create a more flexible and efficient learning environment for working students. This study evaluates the effectiveness of Learning Management Systems (LMS) as perceived by Grade 12 working students, focusing on areas such as accessibility, progress tracking, interactivity, time management, advanced learning, and skill development. Results revealed that LMS positively impacts student learning, with skill development rated highest (3.54), followed by progress tracking (3.52), time management (3.51), interactivity (3.50), and both accessibility and advanced learning (3.49). These findings highlight LMS as an essential tool for balancing academic and work responsibilities, enhancing engagement, and encouraging independent learning. This study evaluates the accessibility of Learning Management Systems (LMS) as perceived by selected Grade 12 working students. It focuses on several key areas: accessibility, progress tracking, interactivity, time management, advanced learning, and skill development. Findings indicate that students strongly agreed on the effectiveness of LMS across all aspects, with progress tracking receiving the highest rating. However, technical issues emerged as the most significant barrier to optimal LMS use. To address these challenges, action plans were proposed to improve system accessibility, enhance technical support, and foster collaboration among administrators, students, and families. Additional recommendations include incorporating features that promote flexible learning, optimize time management, and strengthen student engagement and skill development.

Keywords: learning management system (lms), accessibility, working students, progress tracking, time management, interactivity, skill development, flexible learning, technical issues, educational technology, student engagement

**LEVEL OF AWARENESS ON SOCIAL MEDIA ETIQUETTES AMONG
SELECTED GRADE 12 HUMANITIES AND SOCIAL SCIENCES
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Eunice Dulay, Jhon Vincent Baguio, Jhon Ralf Dupay, Gian Adrey Pitinis,
Mary Grace Vallesan, Rachele Victolero, Christopher Azares

Abstract

This study aims to investigate the level of awareness of social media etiquette among selected Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. Emphasizing respect, honesty, and responsible digital behavior, the research seeks to evaluate students' understanding of appropriate online conduct while acknowledging the transformative influence of social media. Guided by Brooks' (2019) theory, which outlines three stages of proper netiquette focused on respectful and considerate online communication, the study explores key aspects of etiquette related to respect, authenticity, and personal growth. It further examines students' self-assessment of their awareness in areas such as social interaction, attentiveness, and time management, identifies social media platforms that require specific etiquette, and offers recommendations to improve awareness and practice of responsible social media use among HUMSS students. This study utilized a quantitative descriptive research design and involved 200 selected Grade 12 Humanities and Social Sciences (HUMSS) students from Bestlink College of the Philippines, selected through cluster sampling. A structured survey questionnaire was administered to assess students' awareness of key aspects of social media etiquette. Data were analyzed using statistical tools such as frequency, percentage, ranking, mean, and the Likert scale. The study primarily focused on three core areas: online respect, authenticity in digital interactions, and responsible use of social media. The findings revealed that although students demonstrated a general understanding of social media etiquette, maintaining consistent and appropriate online behavior remained a significant challenge. The study underscored the importance of ongoing education and reinforcement in areas such as respectful digital interaction, evaluating the credibility of online information, managing screen time effectively, and protecting digital privacy. Furthermore, the excessive use of social media was found to harm students' academic performance and overall well-being. The study identified attentiveness as a key factor influencing students' level of awareness regarding social media etiquette. The findings prompted the development of practical strategies to enhance digital literacy and promote responsible social media use among students. Recommendations include integrating social media etiquette into the academic curriculum through workshops, seminars, and digital wellness initiatives, supported by parental supervision and institutional policies that encourage responsible online behavior. Additionally, incorporating digital citizenship education can help students cultivate ethical, respectful, and mindful online practices.

Keywords: social media etiquette, digital citizenship, online behavior, grade 12 humss students, digital literacy, attention, responsible social media use, bestlink college of the philippines, netiquette, online communication

**LEVEL OF COMPUTER ACCESSIBILITY IN ACADEMIC LITERACY ON HUMANITIES
AND SOCIAL SCIENCES STUDENT AT BESTLINK COLLEGE OF THE PHILIPPINES**

Khristine Fritzzy Sadsad, Iya Shanella Campilla, Quisha Edig, Jomer Espenida,
Jonna Pecatoste, Regine Sagales, Rica Mae Berja

Abstract

This study examines the level of computer accessibility and its influence on academic literacy among Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. Computer access plays a vital role in enhancing students' digital skills, study habits, and critical thinking. However, many students face challenges in accessing computers, which may negatively affect their academic performance. By addressing these issues, the study aims to inform students and promote the development of essential digital competencies and higher-order thinking skills. This study examines the level of computer accessibility and its effect on the academic literacy of Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. It focuses on how computer access influences students' computer literacy, study habits, and critical thinking skills. Utilizing an exploratory research design, the study involved 222 students selected through cluster sampling. Data were gathered through a validated survey questionnaire and analyzed using frequency, percentage, and mean. The findings indicate that computer accessibility significantly contributes to enhanced educational outcomes by improving students' use of digital tools, development of digital skills, and overall academic literacy. This study examines students' personal use of computers and their role in enhancing their knowledge and academic literacy. It highlights how computer accessibility supports academic performance, technological proficiency, and effective use of digital tools. As computers are integral to modern learning, students must develop the skills necessary to access and evaluate digital information. Through consistent use of computers and other digital devices, students can strengthen their academic literacy by efficiently gathering information from various online platforms and credible digital sources. This study explores students' personal use of computers and how computer accessibility contributes to the development of academic literacy. It emphasizes that access to technology enhances students' academic performance, technological proficiency, and ability to utilize digital tools effectively. With sufficient knowledge in navigating digital platforms, students can access, evaluate, and apply information from various online sources. This improved digital competence supports their academic growth and strengthens their overall learning experience.

Keywords: computer accessibility, academic literacy, digital skills, study habits, critical thinking, technology utilization, humanities and social sciences, grade 12 students

**LEVEL OF EFFICIENCY OF DIGITAL INSTRUMENTS FOR EDUCATIONAL
USE AMONG GRADE 11 HUMANITIES AND SOCIAL SCIENCES
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Maia Tori Balbastro, Jheremy Alparita, Jannah Mae Dantes, Jean Aerielle Gutierrez,
John Cedrick Pecate, Rica Mae Berja

Abstract

This study investigates the efficiency of digital tools in the education of Grade 11 Humanities and Social Sciences students at Bestlink College of the Philippines. It centers on key factors including visual learning, interactive engagement, skill development, accessibility, flexibility, and overall effectiveness. This study utilized an evaluative-descriptive qualitative research design to assess the effectiveness of digital tools in education among 128 Grade 11 Humanities and Social Sciences students at Bestlink College of the Philippines. The sample size was calculated using Slovin's Formula. Data was gathered through a survey questionnaire addressing visual learning, interactive learning, skill development, accessibility, flexibility, and overall effectiveness. Cluster sampling was employed to select the participants, and the collected data were analyzed using statistical techniques such as frequency, percentage, and mean. This study examines the efficiency of digital tools in education, focusing on visual learning, interactive learning, skill development, accessibility, flexibility, and overall effectiveness. Data collected via surveys were analyzed using weighted mean scores. Results indicate that all these factors visual learning (3.45), interactive learning (3.50), skill development (3.50), accessibility (3.47), flexibility (3.44), and effectiveness (3.38) are essential to successful digital learning. However, challenges such as distractions (83.59%), over-reliance on technology (81.25%), and limited access (71.88%) were also reported. The study highlights the need for digital literacy training and promoting responsible technology use to enhance academic outcomes. This study explores the use and effectiveness of digital tools in education, focusing on visual and interactive learning as well as skill development. Participants strongly affirmed the role of these tools in improving accessibility, flexibility, and overall learning outcomes. However, distractions and overuse of technology were noted as major challenges. The study recommends implementing real-time feedback, providing training for students and teachers, and establishing clear policies on digital use. An action plan is proposed to enhance digital tool integration in Grade 11 Humanities and Social Sciences, aiming to boost engagement, minimize distractions, and improve learning efficiency.

Keywords: digital tools, educational technology, visual learning, interactive learning, skill development, accessibility, flexibility, learning effectiveness, digital distractions, digital literacy, grade 11 humanities and social sciences

**LEVEL OF EFFICIENCY OF SCHOOL-BASED PROGRAM ON LEARNING OUTCOMES
OF GRADE 12 HUMANITIES AND SOCIAL SCIENCES STUDENTS
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Kristine Loraine Estrella, Janine Claire Bermudez, Benjie Duarte,
Relan Llorca, Oliver Manolid, Christopher Azares

Abstract

This study investigates the effectiveness of school-based interventions in improving the academic performance of Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. These interventions are designed to create healthy and safe learning environments that facilitate skill development and enhance students' readiness for academic tasks and activities. This study utilized a descriptive research design with a survey questionnaire and employed cluster sampling to select 200 Grade 12 HUMSS students as respondents. The questionnaire, validated by experts, collected information on the evaluation of school-based interventions, students' challenges, and the effectiveness of these programs. Data was analyzed using frequency and percentage distributions, ranking, and mean scores. The findings indicate that students view school-based programs as highly effective in developing critical thinking and practical skills. However, difficulties with time management and class attendance posed challenges for some participants. Overall, the interventions were considered both relevant and satisfactory. The discussion provides a summary of the findings regarding the perceived effectiveness of school-based programs at Bestlink College of the Philippines among Grade 12 Humanities and Social Sciences students. It examines the impact of these programs on students' learning outcomes and the challenges they faced. The section also includes the researchers' conclusions and recommendations aimed at enhancing the effectiveness of these interventions.

Keywords: school-based programs, academic achievement, critical thinking, grade 12, humanities and social sciences, student challenges, program effectiveness, bestlink college of the philippines

**LEVEL OF INFLUENCE OF ROBLOX TO COMMUNICATION SKILLS
AMONG GENERAL ACADEMIC STRAND STUDENTS**

Adrian Kenneth Ellaga, Mickaela Gaviola, Mark Gabriel Maras,
Cesar Orjalo, Jhaniña Marie Torre Franca, Christopher Azares

Abstract

This study examines the role of Roblox, a widely popular online gaming platform, in shaping the communication skills of General Academic Strand students. It explores the effects of Roblox on various aspects of communication, including social interaction, verbal expression, and nonverbal cues. The findings aim to reveal how engagement with Roblox influences students' confidence and ability to connect with peers and new acquaintances. To tackle this problem, the researchers utilized a mixed-methods approach that combined a literature review with empirical data collection. They investigated the impact of Roblox on verbal communication, nonverbal communication, and social interaction. Data were collected using surveys, interviews, and questionnaires. The survey revealed that 45% of respondents frequently use the chat box feature on Roblox, making it one of the platform's most popular communication tools. Language barriers and challenges related to the chat function were noted as significant obstacles. Roblox demonstrated a strong influence on communication skills, with weighted means of 3.36 for verbal communication (interpreted as very high), 3.23 for nonverbal communication, and 3.36 for social interaction, indicating a high impact across these areas. Roblox's chat boxes and language exposure were identified as major communication barriers. To address these issues, the study recommends developing guidelines for appropriate online communication, offering workshops on voice chat etiquette, raising cyberbullying awareness through seminars, promoting effective time management, and encouraging alternative hobbies.

Keywords: roblox, communication skills, verbal communication, nonverbal communication, social interaction, chat box, language barriers, cyberbullying awareness, online etiquette, time management

**LEVEL OF VERBAL COMMUNICATION SKILLS IN THE ACADEMIC
PERFORMANCE ON GENERAL ACADEMIC STRAND STUDENTS
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Lairene Melendres, Justine Anecio, Mary Rose Delmonte, Aldrin Kurt Lavado,
Trishcia Marie Sumadchat, Christopher Azares

Abstract

This study investigates the correlation between verbal communication skills and academic performance among Grade 11 and 12 students under the General Academic Strand at Bestlink College of the Philippines. It aims to determine the extent to which effective verbal communication contributes to students' academic success. The findings of this research seek to provide valuable insights that may assist educators in enhancing verbal communication development within the academic environment. A quantitative research design is employed using a survey questionnaire administered to 80 randomly selected respondents. The study focuses on components such as listening and comprehension, language proficiency, and pronunciation. Data are collected through surveys and interviews, assessing the students' ability to effectively convey and interpret information. The findings revealed a statistically significant positive correlation between verbal communication skills and academic performance among Grade 11 and 12 students. Those who demonstrated higher proficiency in verbal communication tended to achieve better academic outcomes. This indicates that strong verbal communication skills are closely associated with improved academic performance. This study highlights the importance of integrating verbal communication skills development into the curriculum of the General Academic Strand at Bestlink College of the Philippines. The positive relationship between communication skills and academic success suggests that educators should implement strategies and activities aimed at improving students' communication abilities. Such efforts may enhance students' overall academic achievement and address verbal communication challenges effectively.

Keywords: verbal communication skills, academic performance, listening and comprehension, language proficiency, pronunciation, general academic strand, senior high school, quantitative research

**MEDIA LITERACY: EVALUATION OF INFORMATION DISORDER
AS PERCEIVED BY GENERAL ACADEMIC STRAND**

Jovan Pama, Mary Joy Marentes, Erminia Bueno, Dhen Mark Gonzales,
Daryl John Tible, Christopher Azares

Abstract

This study explores media literacy and the evaluation of information disorder as perceived by students in the General Academic Strand. Grounded in Bandura's Social Cognitive Theory and Dual Process Theory, the research highlights the urgency of addressing the spread of misinformation, disinformation, and malinformation in digital environments. The study aims to assess how students recognize, respond to, and critically evaluate various types of misleading content, thereby identifying gaps in their media literacy skills. A quantitative descriptive research design was employed. A validated survey questionnaire was administered to 80 purposively selected respondents. The instrument assessed awareness of different types of information disorder, perceived effects, and evaluation skills using Likert-scale and multiple-choice items. Data was analyzed using frequency and percentage distributions, weighted means, and ranking methods. Results indicated that disinformation was the most recognized type of information disorder (37.5%), followed by malinformation (35%) and misinformation (27.5%). Polarization emerged as the most frequently identified consequence (32.5%). Verification practices, such as fact-checking and source confirmation, were moderately applied (WM=3.32), while deeper critical analysis skills showed higher levels of agreement (WM=4.17). Cross-referencing multiple sources was the most recommended strategy for addressing information disorder (37.5%). The findings underscore a discrepancy between surface-level verification practices and the development of deeper critical thinking skills, as reflected in the Dual Process Theory. The study recommends integrating systematic evaluation techniques into the curriculum to enhance students' analytical competencies. These insights support the enhancement of media literacy frameworks and provide guidance for educational institutions seeking to combat the effects of information disorder.

Keywords: media literacy, information disorder, disinformation, misinformation, malinformation, dual process theory, critical thinking, verification practices, general academic strand

**MUSIC PREFERENCES AND ITS BENEFITS TO THE ACADEMIC PERFORMANCE AS
PERCEIVED BY SELECTED GRADE 11 HUMANITIES AND SOCIAL SCIENCES
STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Franchesca Cativo, Cherry Hazel Buenaobra, Jessica Jorta, Daniel San Miguel,
Alyssa Marie Villete, Christopher Azares

Abstract

The music industry has significantly evolved in the 21st century due to technological advancements, which have also influenced the field of education. In response, institutions have increasingly supported the integration of music into the K–12 curriculum, as emphasized in Department of Education (DepEd) Order Memorandum No. 287, s. 2021, and DepEd Order No. 108, s. 1998. These policies highlight the positive impact of music on students' learning experiences. Guided by LeBlanc's Interactive Theory of Music Preference and Piaget's Cognitive Stage Theory, this study explores the benefits of music on academic performance as perceived by selected Grade 11 Humanities and Social Sciences (HUMSS) students. It specifically examines how musical preferences based on personal interest, genre, and environment, support learning outcomes, daily routines, and social skills. The study also identifies common barriers and proposes an action plan for improved engagement. This study employed a correlational-quantitative research design to investigate the relationship between music preferences and academic performance. A total of 133 Grade 11 HUMSS students from Bestlink College of the Philippines were selected through quota sampling. Data was collected using a structured survey questionnaire, alongside pre-tests and post-tests, to assess students' perceptions and outcomes related to their music listening habits. Findings indicated that students strongly agreed that their personal interests, preferred genres, and listening environments significantly influence their music preferences. These preferences were found to positively impact their learning outcomes, daily routines, and social skills. Students reported several challenges related to music, including language barriers, emotional associations with memories, and the overwhelming variety of available music. The data revealed a clear connection between music preferences and academic performance, with language emerging as the most commonly reported obstacle. The study demonstrated that music preferences, when aligned with personal interest, genre, and environment, can enhance academic performance by supporting cognitive focus, emotional regulation, and social interaction. Language differences were identified as a primary barrier. Based on these findings, the action plan recommends exposure to music in various languages, emotional awareness, and the exploration of diverse musical genres. Additional recommendations include aligning music choices with academic tasks and expanding musical knowledge to further support academic success.

Keywords: music preferences, academic performance, grade 11 students, humanities and social sciences, learning outcomes, personal interest, genre, environment, cognitive development, educational music integration

**NONVERBAL COMMUNICATION AND ACADEMIC PERFORMANCE OF SELECTED
GRADE 12 HUMANITIES AND SOCIAL SCIENCES STUDENTS
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Princess Ahrsyl Gomez, Cutler Anala, Shivien James Dantes, Christian Joshua Labarda,
Justin Modesto, Angel Joy Ruiz, Christopher Azares

Abstract

This study aims to examine the relationship between nonverbal communication and academic performance. Nonverbal communication, including gestures, facial expressions, and eye contact, plays an important role in understanding others and expressing thoughts and feelings. Academic performance of the respondents is described in terms of age, gender, and grades. Nonverbal communication in classroom interactions is described through facial expressions, body language, and eye contact. According to the International Journal of English Linguistics (2015), communication has two main forms: verbal and nonverbal, and nonverbal communication has a significant impact on social interactions. This study focuses on Grade 12 Humanities and Social Sciences students and their use of nonverbal communication in relation to academic performance. The study collected data from 200 Grade 12 Humanities and Social Sciences students using a descriptive quantitative research design. The researchers employed a cluster sampling technique and administered a questionnaire to gather information from the respondents. The results summarize the use of nonverbal communication in classroom interactions, focusing on facial expressions, body language, and eye contact. Problems identified included: 144 students (24%) reported a lack of awareness of their nonverbal communication, 110 students (18%) identified as introverted, 108 students (18%) reported poor eye contact or clumsiness with objects, and 129 students (21%) noted misinterpretation of body language. The findings highlight how Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines use nonverbal communication in classroom interactions. The study recommends implementing an action plan to improve students' nonverbal communication skills and to help them understand their current strengths and limitations.

Keywords: nonverbal communication, academic performance, classroom interaction, body language, eye contact

**OPTIMIZING STUDY HABITS: THE ROLE OF ARTIFICIAL INTELLIGENCE IN
BOOSTING STUDENTS PRODUCTIVITY AMONG GRADE 11 AND 12
GAS STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Vincent Riñon, Jasper Betome, Mark Anthony Contawe, John David Garcia,
Cyryl Mae Pon, Rica Mae Berja

Abstract

Artificial intelligence (AI) tools are systems that use machine learning to perform tasks traditionally dependent on human input. In the academic context, these tools aim to improve student performance by generating smart content and enhancing productivity. Many students currently face challenges such as grammatical errors, lack of ideas, and frequent misinterpretations. AI tools provide support in addressing these issues. This study explores the role of AI tools in boosting the productivity of Grade 11 and 12 General Academic Strand (GAS) students at Bestlink College of the Philippines. This study employs a quantitative research design and utilizes purposive quota sampling to gather data from 77 Grade 11 and 12 GAS students. A structured questionnaire was used as the primary data collection tool to assess the perceived impact of AI tools on student productivity. Findings revealed that students agreed on the helpfulness of AI tools such as ChatGPT (2.92), Perplexity AI (2.92), and Grammarly (3.19) in addressing Sub-Problem 1, which focuses on tool usage. For Sub-Problem 2, students also agreed that AI tools contributed positively to time management (3.11), overall tool usage (2.92), and learning engagement (3.05). These tools were perceived as beneficial in accomplishing academic tasks, enhancing grammar, and reducing errors. Furthermore, the use of AI tools helped students identify learning gaps and improved access to educational support. The study highlights the contributions of AI tools in enhancing student productivity, as perceived by Grade 11 and 12 GAS students at Bestlink College of the Philippines. AI tools were found to provide academic advantages such as improving grammar, managing study time, and increasing engagement. Based on the findings, the study recommends the continued use and integration of AI tools in academic settings to support learners in overcoming common academic challenges and improving overall performance.

Keywords: artificial intelligence, student productivity, study habits, academic performance, general academic strand, grammarly, chatgpt, perplexity ai, time management, learning engagement

**PAGE TURNERS AND SHARP MINDS: EXPLORING THE CONNECTION OF READING
BOOK TO THE INTELLECTUAL GROWTH AMONG GRADE 12
HUMANITIES AND SOCIAL SCIENCES STUDENTS**

Patricia Mae Castro, Feonah Dale Mason, Cherry Ann Pasigue,
Brix Valendia, Christopher Azares

Abstract

This study underscores the significant role that book reading plays in fostering students' intellectual growth. Engaging in active reading enhances critical thinking skills, strengthens reading comprehension, and contributes to improved academic performance. Students who regularly read are more inclined to participate in classroom discussions, engage in thoughtful dialogue, and achieve higher academic outcomes. Despite these benefits, many students face challenges in maintaining reading habits due to distractions from digital media and the constant urge to stay connected online. Those with lower reading proficiency often struggle with vocabulary development, comprehension, and analytical thinking, which hinders their academic success. Moreover, limited exposure to reading may impede problem-solving abilities and overall cognitive development. Early intervention is essential to address these issues. To cultivate a reading culture, schools should establish diverse libraries, implement reading programs, assign engaging materials, guide students in selecting appropriate texts, and dedicate specific time for reading activities. This research aims to explore the relationship between book reading and intellectual development among students at Bestlink College of the Philippines and propose actionable strategies to promote lifelong reading habits. The study utilized a descriptive-exploratory research approach, applying cluster sampling to collect responses from 200 Humanities and Social Sciences (HUMSS) students on the topic of reading habits and intellectual development. Data was gathered through a structured survey questionnaire, and the results were analyzed using statistical tools such as frequency and percentage distribution, ranking, weighted mean, and a four-point Likert scale to evaluate trends and patterns. The findings indicate that respondents strongly agree that reading contributes significantly to their intellectual growth. Emotional intelligence scored a weighted mean of 3.49, creativity received 3.50, and reading development attained 3.49, all interpreted as strongly agree. Furthermore, respondents expressed strong agreement regarding the impact of reading on critical thinking skills (3.46), vocabulary development (3.46), and reading comprehension (3.44), with all areas reflecting a high level of intellectual advancement. This study explored how reading books contributes to the intellectual development of Humanities and Social Sciences students and the subsequent effects on their academic achievement.

Keywords: reading habits, intellectual growth, academic performance, humanities and social sciences students, critical thinking, vocabulary development, and reading comprehension

**PERCEIVED LEADERSHIP SKILLS AND TEAM PERFORMANCE OF
GRADE 12 HUMANITIES AND SOCIAL SCIENCES STUDENTS
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Valerie Baylon, Angel Faith Dinzon, Krizza May Ibañez, Eddjoie Placer,
Cyrill Romano, Nicole Salaria, Christopher Azares

Abstract

Leadership skills encompass the abilities and qualities exhibited by individuals in management positions that enable them to effectively guide and motivate a team toward accomplishing shared objectives. According to the Behavioral Theory of Leadership proposed by Robert Blake and Jane Mouton in the 1960s, leadership effectiveness can be developed by understanding and applying specific behavioral patterns or styles. This theory highlights the importance of participative decision-making and fostering team growth by addressing the unique needs of team members. Drawing on this framework, the researchers conducted a study to evaluate the impact of leadership skills on the team performance of Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines. The research utilized a descriptive-quantitative design. To select participants, cluster sampling was applied as the sampling method for this study. This technique was implemented to ensure that the data collected accurately reflects the larger population. A total of two hundred (200) Grade 12 Humanities and Social Sciences students from Bestlink College of the Philippines comprised the study sample. The researchers gathered information through a survey questionnaire distributed to the respondents. The findings highlight key leadership strategies that improve team performance, focusing on collaboration, empowerment, and verbal communication. The data also reveal common challenges faced by respondents: 163 participants (24.29%) reported difficulties with self-confidence, while 102 (15.20%) identified insufficient feedback as a major issue. Poor communication, which often results in misunderstandings and conflicts, was reported by 149 respondents (22.21%). Additionally, 134 respondents (19.97%) noted that fear of failure hinders risk-taking, and 123 (18.33%) cited lack of motivation as a factor contributing to unfavorable outcomes. This summarizes the various strategies in effective leadership that contribute to improving team performance among Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines. In light of these results, the researchers propose an action plan designed to strengthen and enhance the leadership skills of the students.

Keywords: leadership skills, behavioral theory of leadership, team performance, grade 12 humanities and social sciences, bestlink college of the philippines, descriptive-quantitative research, cluster sampling, collaboration, empowerment, verbal communication,

**PERCEPTION OF ENVIRONMENTAL AWARENESS BY GRADE-12 HUMANITIES AND
SOCIAL SCIENCES STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES.**

Raindale May Laboguen, Gerald Abanto, Stephen Calderon, Jasmine Sanjose,
Dhove Vasquez, Rica Mae Berja

Abstract

Environmental awareness is crucial in shaping a healthier and more sustainable world. Trees play a key role in this effort by purifying the air, providing essential materials such as paper and wood, filtering rainwater, and acting as natural buffers against flash floods. This study investigates the benefits of tree-planting activities for Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines. It aims to underscore the impact of such initiatives on enhancing students' environmental consciousness while addressing a gap in current research on youth participation in ecological sustainability. This study utilized an evaluative research method to assess students' perceptions of tree-planting programs. Data were gathered through cluster sampling, using a survey questionnaire and statistical tools to measure the effectiveness of the initiatives. Students' awareness levels were classified into four categories: Highly Aware, Aware, Least Aware, and Not Aware. The research also examined key strategies for promoting environmental awareness, including curriculum integration, awareness campaigns, and tree-adoption programs. The results indicated that promotional strategies for environmental awareness were highly effective, with a rating of 99.99%, particularly through educational campaigns, digital media, posters, hands-on activities, and recognition programs. The overall effectiveness of environmental awareness efforts received a high weighted mean of 3.54, especially in curriculum integration, awareness campaigns, and tree-adoption programs. Among these, the tree-adoption program was considered the most impactful. Respondents identified the top benefits of environmental awareness as improved air quality, stronger advocacy efforts, and a more supportive learning environment. The overall perception of environmental awareness benefits was rated at 100.01%. Environmental awareness is not merely an extracurricular activity but a powerful educational approach that encourages students to actively contribute to sustainability. Establishing formal tree-planting programs within schools can significantly enhance environmental consciousness and foster responsible conservation practices. To sustain these efforts, an action plan is recommended to promote continuous student involvement and ensure long-term impact that reaches beyond the school community. By cultivating environmental awareness, learners can help create a cleaner, greener, and more sustainable future for the generations to come.

Keywords: environmental awareness, tree-planting program, sustainability, student involvement, conservation practices, curriculum integration, environmental education, grade 12 humss, bestlink college of the philippines, tree-adoption strategy

PERCEPTION ON CIVIL UNIONS: SUPPORTING A MARGINALIZED COMMUNITY

Maria Angelina De Guzman, Kristoff Bernabe, Lance Joaquin Morales,
Marc Andrei Torres, LJ Pino, Dave Espinosa

Abstract

The Civil Union Act enables any two individuals, regardless of gender or sexual orientation, to enter into a legally recognized partnership. Marginalized communities, especially those identifying as LGBTQ+, continue to face discrimination and exclusion across various dimensions, including economic, political, social, and cultural spheres. As noted by Duffy (2020), civil unions offer vital legal protections such as inheritance rights, tax advantages, and authority in healthcare decisions, that are essential for the security and well-being of same-sex couples. Similarly, Smith (2019) argues that civil unions represent a meaningful step toward full marriage equality, helping to break down systemic barriers faced by the LGBTQ+ community. However, in the Philippines, the Family Code only acknowledges marriage between a man and a woman, effectively denying same-sex couples equal legal recognition. This legal gap results in serious disadvantages, particularly in matters of inheritance, medical decision-making, and access to social security benefits. The study explores both quantitative and qualitative perspectives on civil unions, aiming to capture a deeper understanding of public perception. To achieve this, the researchers applied a comprehensive methodological approach that highlights the complexities of the issue. Thirty (30) Grade 12 HUMSS students participated as respondents, offering valuable insights through their diverse viewpoints and experiences. The results show that the majority of respondents strongly agreed that the problems encountered in Civil Union have a significant impact on human rights (3.84), cultural and religious perspectives (3.57), social acceptance (3.78), legal implications (3.88), and personal beliefs (4.55). The solutions to the problem in cultural context (4.09), social environment (3.88), and legal and policy concerns (3.95), to improve legal rights (3.97), strengthen community support (3.99), flexibility in education and work (3.98), and greater awareness and empathy (4.09). Integrating discussions about civil unions into the classroom is essential for raising awareness of their role in promoting human rights. These conversations allow students to critically examine diverse cultural, religious, and legal viewpoints while encouraging empathy and fostering a culture of inclusion. Civil unions go beyond legal recognition; they represent a matter of human dignity and respect. By supporting civil unions, educators can help nurture a more accepting and inclusive community where individuals feel safe to live authentically and without prejudice.

Keywords: civil union, lgbtq+ rights, human rights, education, social inclusion, student awareness, cultural perspectives, legal recognition, empathy, human dignity

**PERKS OF MEDIA AND INFORMATION LITERACY EDUCATION ON CRITICAL
THINKING OF GRADE 12 HUMANITIES AND SOCIAL SCIENCE
STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Princess Joanna Mikaela Mape, Ma Rialyn Pamesa, Mark Joshua Nazareno,
Mary Joy Lucban, Daniel Tagolino, Rica Mae Berja

Abstract

This research explores the benefits of Media and Information Literacy (MIL) education in enhancing students' critical thinking skills. It aims to assess whether studying MIL positively contributes to the development of analytical and evaluative thinking among learners. The study specifically focuses on Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines, examining how MIL influences their ability to think critically and make informed decisions. The study adopted an evaluative-quantitative research design to examine the advantages of Media and Information Literacy (MIL) education in enhancing students' critical thinking skills. A total of 200 Grade 12 Humanities and Social Sciences (HUMSS) students were chosen as respondents through cluster sampling. Data collection was carried out using a structured survey questionnaire, which served as the main tool for gathering and analyzing information. The study's findings indicate that Media and Information Literacy (MIL) education provides significant advantages for students, particularly in strengthening their critical thinking abilities. MIL helps students enhance their capacity to evaluate and communicate information effectively, participate in thoughtful discussions, make well-informed decisions, and base their conclusions on evidence rather than hearsay. Despite these benefits, students also face challenges in learning MIL. These challenges include limited awareness of the importance of media literacy for critical thinking, difficulties in judging the trustworthiness of different information sources, and the impact of social media, which often encourages shallow rather than deep analytical thinking. The findings indicate that Media and Information Literacy (MIL) provides valuable advantages for students, notably in the areas of communication, decision-making, and digital literacy. Moreover, MIL education contributes to the development of students' critical thinking skills by enhancing their proficiency, problem-solving abilities, and literacy.

Keywords: media and information literacy, critical thinking skills, communication skills, decision-making, digital literacy, problem-solving, student development, education benefits

**PROPER USAGE OF YOUTUBE TUTORIALS IN ACADEMIC PERFORMANCE
BY GRADE 12 HUMSS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Aldren Cielo, Aldren Cielo, Daniel Mhar Daniel, Ace Martin Moreno,
Simeon Serafico III, Lerry Boy Taller, Rica Mae Berja

Abstract

This study investigates the proper use of YouTube tutorials and their influence on the academic performance of Grade 12 HUMSS students at Bestlink College of the Philippines. It explores how video tutorials support learning, enhance student engagement, improve accessibility, develop skills, and foster interest and academic abilities. The research also identifies the challenges students face when using YouTube tutorials, applying the framework of Cognitive Load Theory to understand their learning experience. This study utilized descriptive research design and involved 212 selected Grade 12 Humanities and Social Sciences (HUMSS) students as participants. Cluster sampling was employed to select the respondents for the study. Data was gathered using a survey questionnaire, which served as the primary research instrument. The questionnaire explored the respondents' use of YouTube tutorials in terms of learning, engagement, and accessibility. It also examined how these tutorials impacted their academic performance through skill development, interest, and abilities, as well as the challenges they encountered while using the platform. The findings reveal a strong positive impact of properly using YouTube tutorials on the academic performance of Grade 12 HUMSS students at Bestlink College of the Philippines. In terms of video tutorial usage, respondents rated Learning highest with a weighted mean of 3.54, followed by Engagement and Accessibility with a weighted mean of 3.49. The overall weighted mean for these factors was 3.47, indicating strong agreement. Regarding academic performance, Skill development received a weighted mean of 3.49, Interest was rated 3.47, and Abilities scored 3.45. These results also yielded an overall weighted mean of 3.47, reflecting a strong positive perception of YouTube tutorials' effectiveness. To address challenges such as content overload, the study recommends developing guidelines that help students evaluate the credibility of online educational materials to maximize the benefits of YouTube tutorials. Respondents strongly agree that video tutorials positively contribute to their learning, engagement, and accessibility. They also acknowledge that YouTube tutorials significantly support their academic performance by enhancing their skills, interests, and abilities. The primary challenge identified by respondents is content overload. To mitigate this, a proposed action plan aims to ensure the effective and efficient use of YouTube as a tutoring tool.

Keywords: youtube tutorials, academic performance, learning engagement, accessibility, skill development, content overload, tutoring strategies, grade 12 humss, educational technology, cognitive load theory

**QUIZLET AND ITS EFFECTIVENESS TO FACILITATING COLLABORATIVE
LEARNING AS PERCEIVED BY SELECTED HUMANITIES AND SOCIAL
SCIENCE TEACHERS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Abrio Cindy Grace, Joshua Azores, Sarah Jane Berja, Janah Loise Ballester,
Jimuell Jove, Angelo Virtudez, Rica Mae Berja

Abstract

Chapter 1 presents a study that explores the effectiveness of Quizlet as a tool for promoting collaborative learning, as perceived by selected Humanities and Social Sciences (HUMSS) teachers at Bestlink College of the Philippines. The study utilizes a descriptive-exploratory research design and applies a purposive sampling technique to gather relevant data. Information was collected through survey questionnaires to assess Quizlet's impact in key areas such as interactive features, practice tools, vocabulary development, learning outcomes, student engagement, and collaborative learning strategies. This research aims to determine how the use of Quizlet can effectively enhance collaborative teaching and learning experiences among HUMSS teachers in the institution. Chapter 2 discusses the research methodology used in this study, which applied a descriptive-exploratory quantitative approach to investigate the effectiveness of Quizlet in promoting collaborative learning among selected Humanities and Social Sciences (HUMSS) teachers at Bestlink College of the Philippines. A total of ten participants were selected using the purposive sampling technique to ensure that only those familiar with Quizlet were included. The research instrument was a survey questionnaire composed of three sections: (1) the role of Quizlet in collaborative learning, (2) the effectiveness of Quizlet, and (3) the problems encountered while using the platform. The questionnaire was validated through content validation, reliability testing, and a review for language clarity and accuracy. Data collection was conducted face-to-face, with the questionnaires distributed and immediately retrieved from different classrooms to ensure a high response rate. The collected data were analyzed using frequency, percentage, ranking, and mean to convert qualitative perceptions into quantifiable results. Ethical considerations included obtaining informed consent from all participants and ensuring confidentiality of their responses. The overall goal of this chapter is to provide a systematic approach to understanding the perceived effectiveness of Quizlet in enhancing collaborative learning among HUMSS teachers. Chapter 3 presents the analysis and interpretation of data on the effectiveness of Quizlet as a collaborative learning application for teachers. The results showed that participants strongly agreed on the positive impact of Quizlet in facilitating collaborative learning. Among the evaluated components, vocabulary acquisition ranked the highest with a weighted mean of 3.58, highlighting its strong influence on the learning process. In response to the findings, the researchers proposed an action plan aimed at enhancing the use of Quizlet and maximizing its effectiveness in promoting collaborative learning among Humanities and Social Sciences teachers. The study examined the effectiveness of Quizlet in supporting collaborative learning, particularly in areas such as interactive tools, practice activities, and vocabulary development. Findings revealed a high level of agreement among participants regarding Quizlet's positive impact on collaborative learning. Despite these positive results, certain challenges were identified. To address issues such as poor internet connectivity, cheating, and distractions during app usage, the researchers proposed a targeted action plan aimed at improving the overall effectiveness of Quizlet in educational settings.

Keywords: quizlet, collaborative learning, interactive tools, vocabulary acquisition, practice activities, humanities and social sciences, teacher perception, educational technology, online learning, action plan

**READING DIFFICULTIES IN THE ENGLISH SUBJECT OF GRADE 11 HUMANITIES
AND SOCIAL SCIENCES STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Jenelou Carloy, Bien Carlo Almoguerra, Jerrylyn Mae Garcia,
Arjay Pagador, Shaira Senday, Christopher Azares

Abstract

This study centers on Grade 11 Humanities and Social Sciences students at Bestlink College of the Philippines, investigating common reading difficulties and effective techniques for improvement. Factors such as limited vocabulary, challenges in comprehending sentences and paragraphs, insufficient background knowledge, basic English skills, and lack of interest contribute to these difficulties. Using B.F. Skinner's Operant Conditioning Theory, the study highlights how reinforcement and encouragement can improve reading abilities, build confidence, and support students' progress. It examines the impact of these factors on learning, communication, and critical thinking, while assessing the effectiveness of various reading strategies. This study utilizes a quantitative-descriptive evaluative research design to determine the effectiveness of specific interventions whether they work, and if so, how and why. The study surveyed 133 Grade 11 students at Bestlink College using a structured questionnaire. Data were analyzed using statistical tools such as frequency, percentage, ranking, mean, and Likert scale to provide meaningful insights. Reading difficulties significantly hinder students' learning, communication, and critical thinking skills, with attention-related challenges being a major contributing factor. Utilizing reading techniques such as summarizing, visualizing, and enhancing comprehension can help address these issues. To effectively support students, an action plan has been developed focusing on assessing attention difficulties, establishing a distraction-free reading environment, setting achievable fluency goals, and strengthening vocabulary. This plan emphasizes a collaborative approach involving students, teachers, and school administrators to promote sustained improvement in reading performance. The findings of the study highlight that lack of attention is the leading factor contributing to reading difficulties in English subjects, which in turn affects students' ability to learn, communicate effectively, and think critically. To overcome these challenges, interventions should prioritize strategies that enhance attention, reading fluency, and vocabulary. These may include conducting assessments to identify attention-related issues, implementing techniques to improve focus, establishing achievable reading fluency goals, and incorporating vocabulary-building activities.

Keywords: reading difficulties, attention span, english learning, vocabulary development, reading fluency, critical thinking, learning barriers, intervention strategies, grade 11 students, bestlink college.

**READING PROFICIENCY IN ENGLISH LANGUAGE AMONG GRADE 11 HUMANITIES
AND SOCIAL SCIENCES STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Columbino John Ace, John Mark Gragasin, Ralp Benriel Balubal,
John Llyod Probo, Maria Kristine Romulo, Rica Mae Berja

Abstract

In the modern educational landscape, English has become a vital language for academic achievement and global communication. Despite the widespread dedication to learning English, mastering it remains a challenge due to its vast vocabulary, complicated grammar, and pronunciation difficulties. Students frequently struggle with issues such as limited vocabulary, inadequate reading skills, and challenges in understanding texts. Furthermore, research indicates that factors like environmental conditions, reading comprehension difficulties, and second-language acquisition contribute significantly to these reading challenges. This study used an evaluative quantitative research approach and applied cluster sampling alongside Slovin's formula to select 126 Humanities and Social Sciences students from Bestlink College of the Philippines as respondents. A survey questionnaire was employed as the primary data collection tool to address the research objectives. The results indicate that environmental factors, including noise and the absence of a proper study environment, which distract students and impair text comprehension, received a weighted mean of 3.22, corresponding to "Agree." In terms of reading comprehension, challenges such as limited vocabulary and inadequate exposure to English yielded a weighted mean of 2.96, also described as "Agree." Finally, regarding second-language difficulties, issues like unfamiliarity with vocabulary, sentence structure, and idiomatic expressions affecting reading fluency had a weighted mean of 3.17, which likewise reflects agreement. It is recommended that schools and educators offer greater support to students struggling with limited resources and opportunities. They should encourage students to practice note-taking and summarizing important information during reading to improve comprehension. Furthermore, facilitating interactions with native speakers or language partners can boost students' confidence in both reading and oral communication skills.

Keywords: reading difficulties, english language learning, environmental factors, reading comprehension, second-language challenges, vocabulary, study habits, humanities and social sciences students, bestlink college of the philippines, quantitative research,

**ROLE OF SOCIAL STRATIFICATION IN DISCRIMINATION EXPERIENCES AS
PERCEIVED BY GRADE 12 HUMANITIES AND SOCIAL SCIENCES STUDENTS.**

Marc Jan Besmonte, Akisha Rosel Haberia, Beverly Pelayo, Mark James Talacay,
Rafael Laurence Termil, Christopher Azares

Abstract

Social stratification has long been a central concern in sociological studies and continues to be a significant societal issue throughout history. It contributes to persistent problems such as discrimination, poverty, and unequal treatment experienced by individuals across their lifespans. This study seeks to explore how social stratification contributes to experiences of discrimination as perceived by Grade 12 students, specifically in terms of wealth, power, social class, social mobility, job opportunities, and income level. Anchored in Grusky's (2019) theory which highlights the dynamics of social class, inequality, mobility, interaction, and cultural values this research also considers how globalization and social networks shape access to resources and reinforce local patterns of inequality. To explore the role of social stratification, the study utilized an exploratory research design involving 200 Grade 12 Humanities and Social Sciences (HUMSS) students. Data were gathered through survey questionnaires aimed at assessing students' perceptions of discrimination based on factors such as wealth, power, social class, mobility, job opportunities, and income level. The findings of the study reveal that students strongly agreed on the significant role of social stratification in shaping various aspects of their lives. This was reflected in the high mean scores across all indicators: wealth (3.38), power (3.38), social class (3.32), social mobility (3.39), job opportunities (3.43), and income level (3.40). These results suggest that social stratification exerts a considerable influence on students' perceptions of discrimination and access to opportunities. The primary issue identified by students was bias in investigative and evaluative processes. To address this concern, the study proposes the development of an action plan aimed at eliminating discriminatory practices within the school environment. It is recommended that schools enforce policies promoting equality and fairness, ensuring that no student is subjected to discrimination based on their wealth, power, social class, social mobility, job opportunities, or income level.

Keywords: social stratification, discrimination, wealth, power, social class, social mobility, income level, job opportunities, inequality, grade 12 humss students, bias, educational equity

**SMART SYSTEM INFLUENCE ON ACADEMIC ACHIEVEMENTS AMONG
TOP PERFORMING ACADEMIC TRACK STUDENTS AT THE
BESTLINK COLLEGE OF THE PHILIPPINES**

Mhack Cristhoff Ubay, Hendrix Alejo, Mary Joy Dacatimbang, Katelyn Espayos,
Kerby Luyon, Jelome Trazona, Rica Mae Berja

Abstract

This study investigates the influence of smart systems on the academic achievements of top-performing academic track students at Bestlink College of the Philippines. With the increasing integration of digital tools in education, understanding their impact on student performance has become essential. The research examines the role of AI-driven platforms, Learning Management Systems (LMS), and other smart technologies in supporting and enhancing student learning outcomes. An evaluative-quantitative research design was utilized to assess the experiences of 173 high-achieving academic track students. Purposive sampling was applied to ensure the inclusion of participants who represent academically exceptional learners. A validated survey questionnaire served as the primary data collection tool, ensuring the reliability and accuracy of responses. Data were analyzed using frequency, percentage, mean, and ranking to evaluate the influence of smart systems on academic performance. The findings revealed that smart systems have a positive impact by enhancing motivation and promoting self-regulated learning. These tools assist students in setting academic goals, organizing tasks, monitoring progress, and planning subsequent actions. Real-time feedback provided by smart systems was found to reduce stress and supplement the support of human instructors. However, challenges were also identified, including overdependence on technology, unequal access to digital tools, and inconsistent content relevance. This study offers valuable insights for educators, school administrators, and policymakers seeking to improve academic performance through the integration of smart educational technologies. Addressing technological limitations and ensuring equitable access are essential for maximizing the benefits of smart systems in the learning environment.

Keywords: smart systems, academic achievement, ai in education, learning management system, top performing students, digital tools, self-regulated learning, educational technology

**SPEAKING ENGLISH LANGUAGE AND ITS CHALLENGES AMONG GENERAL
ACADEMIC STRAND STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Emmanuel Diaz, Aj Ian Escobal, Roderick Logroño, Hazen Miranda,
Ven Heart Yhenic Placido, Kent Tristan Sanchez, Rica Mae Berja

Abstract

This study investigates the challenges faced by General Academic Strand (GAS) students at Bestlink College of the Philippines in speaking the English language. It focuses on issues related to fluency, pronunciation, and grammar, often influenced by limited language practice, low confidence, and the complexity of English rules. The study also explores the impact of socio-demographic factors such as prior language exposure, educational background, and socioeconomic status on students' English-speaking proficiency. Guided by Vygotsky's Sociocultural Theory, which emphasizes learning through social interaction, the study aims to support students, teachers, and administrators in developing strategies to enhance English communication skills and boost student confidence. An evaluative-quantitative research design was used to assess English-speaking challenges among 77 GAS students selected through quota sampling. A validated survey questionnaire served as the primary research instrument. The data were analyzed using frequency, percentage, ranking, and mean to evaluate difficulties in fluency, pronunciation, and grammar, as well as the effects of socio-demographic factors. The findings revealed that students experienced consistent challenges in fluency (mean = 3.27), pronunciation (mean = 3.30), and grammar (mean = 3.27), with an overall weighted mean of 3.28, interpreted as "strongly agree." Regarding socio-demographic factors, prior language exposure (mean = 3.23), educational background (mean = 3.25), and socioeconomic status (mean = 3.31) also had a notable influence, with an overall mean of 3.26. Among the identified challenges, personal attitude emerged as the most significant factor, cited by 48 students (62.34%). An action plan was developed to address these challenges and guide the improvement of students' English-speaking abilities. The results emphasize the need for targeted interventions to overcome common barriers in English communication among GAS students. These include focused training on fluency, pronunciation, and grammar, as well as programs to address confidence issues related to personal attitude. The study recommends implementing school-based initiatives, including peer conversation workshops, pronunciation drills, and supportive learning environments that foster language use. These strategies aim to strengthen students' English-speaking skills and promote academic and personal development.

Keywords: english communication, fluency, pronunciation, grammar, socio-demographic factors, language challenges, vygotsky's sociocultural theory, general academic strand, bestlink college

**STRATEGIES AND PRACTICES IN ENVIRONMENTAL AND WATER CONSERVATION
AS PERCEIVED BY GRADE 12 HUMANITIES AND SOCIAL SCIENCES
STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Maimona Orang, Ruel Besante, Jamie Joy Francisco, Janna Nicole Gallego,
Richard Lazaro, Billy John Serrano, Christopher Azares

Abstract

Environmental assessment is currently undergoing transformative changes in response to growing ecological challenges. Strategies for environmental conservation are commonly observed in practices such as recycling, waste management, and energy conservation, while water conservation involves techniques like rainwater harvesting, wastewater recycling, and water resource management. According to the Model of Ecolabel in Environmental Conservation by Arita Marini et al. (2021), environmental conservation is influenced by three key factors: environmentally informative instruments, eco-friendly labeling, and environmental protection. This study aims to examine the strategies and practices in environmental and water conservation as perceived by Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. The study employs an exploratory-quantitative research design. A cluster sampling technique was used to select 200 Grade 12 HUMSS students as respondents. Data was gathered through a structured survey questionnaire that assessed their perceptions regarding environmental and water conservation practices. Based on the results, this shows a summary of strategies in environmental conservation in terms of recycling, waste management, and energy conservation. The overall weighted mean for recycling is 3.50, for waste management is 3.46, and for energy conservation is 3.50. The results for water conservation practices in terms of rainwater harvesting, recycled wastewater, and water management are as follows: the overall weighted mean for rainwater harvesting is 3.41, for recycled wastewater is 3.37, and for water management is 3.48. The findings highlight that Grade 12 HUMSS students at Bestlink College of the Philippines strongly agreed with the implementation of recycling strategies, particularly in the collection and processing of materials typically discarded as waste. The researchers developed an action plan to further strengthen strategies and practices in environmental and water conservation based on these student perceptions. The proposed initiatives aim to support both individual and community-level sustainability efforts within the academic environment.

Keywords: environmental conservation, water conservation, recycling, waste management, energy conservation, rainwater harvesting, student perception, bestlink college

**STRATEGIES AND SELF-MOTIVATION ON SELECTED GRADE 12 HUMANITIES AND
SOCIAL SCIENCES STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Jeziel Bonghanoy, Sean Danikhel Domo, Jonielyn Marasigan, Dave Charls Ragas,
Adrian Luise Regencia, CJ Salvador, Christopher Azares

Abstract

Self-motivation plays a critical role in student learning by sustaining engagement and encouraging academic persistence. Related literature emphasizes the importance of time management, discipline, and consistency in cultivating self-driven behavior. This study is anchored on the Self-Determination Theory (1985) by Edward Deci and Richard Ryan, which highlights autonomy, competence, and relatedness as key motivational factors. A schematic diagram illustrating the Input–Process–Output (IPO) model was used to guide the research framework. The primary objective of this study is to explore the strategies and self-motivation levels among selected Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines. The study adopted an exploratory-descriptive quantitative research design. A total of 212 Grade 12 HUMSS students were selected through cluster sampling to ensure representative data. Data was collected using a validated survey questionnaire designed to assess the students' self-motivation strategies. Statistical tools such as frequency and percentage, ranking, mean, and Likert scale analysis were utilized for data treatment and interpretation. Findings revealed that the most commonly practiced self-motivation strategy was goal setting, reported by 160 students (23.53%). Time management was rated with a mean of 3.33, discipline with 3.42, and consistency with 3.38, all indicating strong agreement regarding their role in fostering motivation. Personal goals emerged as the strongest influence on student motivation, as cited by 154 students (21.10%). Based on these findings, an action plan was proposed to support and enhance self-motivation and learning strategies among Grade 12 HUMSS students. The results underscored the significance of self-motivation and strategic behavior in enhancing student academic performance. Strategies such as setting goals, celebrating small achievements, practicing affirmations, prioritizing tasks, and fostering positive peer influence were perceived as effective. Additionally, consistent application of time management, discipline, and personal consistency contributed to improved learning outcomes. The study emphasizes the need for academic programs to support the development of these self-motivation strategies among senior high school students.

Keywords: self-motivation, time management, discipline, consistency, goal setting, student strategies, humss, bestlink college

**STRONG IMPLICATIONS OF COMPUTERIZED LEARNING SYSTEM AS PERCEIVED
BY GRADE 12 HUMANITIES AND SOCIAL SCIENCES STUDENTS
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Mary Dhel Manlapaz, Stephanie Almodiel, Fatima Mae Dela Cruz, Adrian Haquihaca,
Chavelita Letrodo, Mycah Gwyneth Sultan, Rica Mae Berja

Abstract

This study explores the implications of computerized learning systems as perceived by Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. With the continuous digital transformation in education, the integration of computerized tools has significantly reshaped traditional instructional methods by introducing innovative ways to engage, teach, and evaluate students. This research aims to determine the perceived effectiveness, flexibility, and user satisfaction of computerized learning systems while assessing their role in enhancing student self-efficacy, engagement, and adaptability. The study employed descriptive quantitative research design. A total of 210 Grade 12 HUMSS students were surveyed using a structured and validated questionnaire. The data gathered were analyzed through statistical tools, including frequency distribution, weighted mean, and ranking, to interpret student perceptions and experiences. Findings indicated that students generally agreed on the positive impact of computerized learning systems. These were seen as effective for academic development (mean = 3.28), improvement of computer literacy (mean = 3.27), and assessment preparation (mean = 3.36). Additionally, computerized systems were viewed as flexible, particularly for accessing course materials anytime (mean = 3.22). However, there remained a notable preference for traditional classroom instruction (mean = 2.90), suggesting that students still value face-to-face learning. The systems also contributed to increased digital confidence and problem-solving skills, enhancing students' self-efficacy. Despite these benefits, technical barriers were identified, such as unstable internet connection (11.35%), platform compatibility issues (11.27%), lack of immediate technical support (10.35%), and limited digital proficiency (9.43%). The results reveal the presence of a digital divide that may limit equitable access to effective digital learning. Nevertheless, computerized learning systems show strong potential in supporting academic success when blended with traditional methods and when technical challenges are addressed. The study recommends a structured action plan to enhance students' digital proficiency. This includes the provision of regular training sessions, upgrading of technological infrastructure, and the integration of adaptive learning tools tailored to student needs. These initiatives aim to optimize the digital learning environment and ensure inclusive and effective technology-supported education.

Keywords: computerized learning system, digital education, self-efficacy, student engagement, flexible learning, digital proficiency, humss, bestlink college

**STUDENT INVOLVEMENT IN THE DEVELOPMENT OF SCHOOL-BASED PROJECT:
BASIS IN CRAFTING INSTRUCTIONAL MATERIALS IN LEARNING SOCIAL STUDIES**

Rhena Mae Torillos, Patricia Nicole Labita, Kier Allen Maramag, Jade Rosales,
Arvin Santos, Abraham Muyrong II

Abstract

This study explores the significance of student involvement in the development of school-based projects as a foundation for crafting instructional materials in the context of social studies. Recognizing the potential of student participation to enhance learning outcomes, foster critical thinking, and promote a deeper understanding of subject content, this research examines how actively involving students in instructional material creation can support student-centered learning. The study aims to offer meaningful insights for educators seeking to adopt participatory approaches in instructional development. A descriptive quantitative research design was utilized. The study involved 50 Grade 11 HUMSS students selected through purposive sampling. Survey questionnaires served as the primary data collection tool. Demographic results showed that 64% of the respondents were 16 years old, and 72% were male. The participants were distributed across three sections: HUMSS 1101 (46%), HUMSS 1103 (28%), and HUMSS 1102 (26%). The study aimed to assess students' perceptions of their involvement in school-based projects and its impact on educational materials. Findings revealed that school-based projects effectively supported student needs in terms of engagement (mean = 3.404), well-being and health (mean = 3.376), and volunteering (mean = 3.196). Student involvement contributed positively to the project in terms of moral support (mean = 3.412), financial support (mean = 3.172), and academic support (mean = 3.408). Furthermore, students acknowledged their significant roles in the project's process (mean = 3.376), planning (mean = 3.516), and evaluation (mean = 3.400). These results suggest that student participation not only enriches the learning experience but also promotes a sense of ownership and accountability, aligning with the goals of the social studies curriculum. The study underscores the value of student involvement in school-based projects as a strategy for developing relevant and effective instructional materials. By engaging students in the planning, implementation, and evaluation phases, schools can enhance both teaching practices and student learning outcomes. Prioritizing student-driven instructional development supports educational relevance and encourages deeper learner engagement in the social studies classroom.

Keywords: student involvement, school-based projects, instructional materials, social studies, student-centered learning, educational development, humss

**STUDENTS PERCEPTION OF SAFETY AND SECURITY CONCERNS OF
GRADE 11 HUMANITIES AND SOCIAL SCIENCES STRAND AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Shyne Angelei Santos, Grace Bucog, Carlo Dalida, Xean Carnieline Galauran,
Orlando Mendoza Jr, Christopher Azares

Abstract

This study examines the perceptions of Grade 11 Humanities and Social Sciences (HUMSS) students regarding safety and security at Bestlink College of the Philippines. It assesses existing security concerns and evaluates the effectiveness of safety protocols within the school environment. By identifying issues related to the school area, student safety, and academic performance, the study aims to provide relevant data to inform administrators and support the enhancement of security policies and practices. A descriptive-evaluative quantitative research design was employed to assess the perceptions of 133 Grade 11 HUMSS students. Using quota sampling, data were collected through validated survey questionnaires reviewed by subject matter experts for content accuracy and clarity. Surveys were administered and retrieved in person to ensure the reliability and integrity of the collected data. Analysis of the data revealed that concerns related to the school area (25.75%) and student safety (28.17%) were the most pressing issues, as identified by the respondents. Among the measured factors, academic performance received the highest weighted mean rating (3.33), indicating that students perceive a strong connection between safety and their academic focus. Based on the findings, a proposed action plan includes enhancements in surveillance, the implementation of stricter security protocols, and more visible security presence on campus. The study emphasizes that student safety and the physical school environment are key concerns for Grade 11 HUMSS students. Their perceptions underscore the need for improved safety measures and consistent security operations. All evaluated areas: school surroundings, safety concerns, and academic performance, received strong agreement ratings, confirming the students shared sentiments about campus security. The proposed recommendations aim to improve surveillance accuracy, strengthen security personnel reliability, and promote a more secure and supportive academic atmosphere.

Keywords: student safety, security concerns, school environment, academic performance, humss, bestlink college, safety perception, campus security

**TECHNOLOGY INTEGRATION IN TEACHING HOME ECONOMIC SUBJECT:
BASIS IN DEVELOPING VIDEO LESSON AMONG GRADE 12 STUDENTS
AT BESTLINK COLLEGE OF THE PHILIPPINES**

John Michael Batan, Hazel Ann Valenzuela, Lovely Rose De Vera,
Ma Josefa Josue, Abraham Muyrong II

Abstract

The integration of technology in teaching Home Economics significantly influences both teaching practices and student learning outcomes. Although many educators have access to digital tools and hold positive attitudes toward technology, its application in Home Economics classrooms remains limited. Previous studies, such as those conducted in Hong Kong, revealed that teachers with limited formal training perceived the subject as less complex, underscoring the need for specialized expertise in effective instruction. This study aims to assess the impact of technology integration in Home Economics education and serve as a foundation for developing instructional video lessons for Grade 12 students at Bestlink College of the Philippines. A descriptive research design using a quantitative approach was employed. The study focused on Grade 12 students under the Home Economics strand. A total of 50 participants were selected through cluster sampling. Data were gathered using a structured survey questionnaire designed to measure the effectiveness of technology integration in terms of academic performance, skills development, and access to learning resources. The findings indicated that the integration of technology had a significant positive effect on students' academic performance, skill acquisition, and access to information. The majority of respondents strongly agreed that technology improved their ability to understand complex concepts and enhanced their overall learning experience. These outcomes support the assertion that digital tools facilitate deeper engagement and more effective instruction. The study concludes that the use of technology in teaching Home Economics not only enhances students' educational experience but also strengthens their digital literacy. This includes improved communication, navigation of online platforms, and the use of educational software. Technology has made learning more interactive and accessible, encouraging greater student participation and motivation. It also equips students with essential tools for completing tasks efficiently and collaborating with instructors and peers. These findings support the development of video-based instructional materials as a strategic approach to enhance teaching and learning in Home Economics.

Keywords: technology integration, home economics education, video lessons, digital literacy, student engagement, educational software, practical learning, bestlink college

**THE EFFECTIVENESS OF BOB IN DIFFERENT SPORTS PARTICIPATION OF BPED
2ND YEAR STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

July Pontillano, Rhea Ablay, Jean Gray Cabatic, Loreline Malunas,
Rey Daniel Adoptante, Abraham Muyrong II

Abstract

This study aims to determine the effectiveness of the Book of Behavior (BOB) in enhancing sports participation among second-year Bachelor of Physical Education (BPED) students at Bestlink College of the Philippines. The research is grounded in Icek Ajzen's (1991) Theory of Planned Behavior, which provides a framework for understanding how behavioral intentions influence actual behavior. The study investigates whether the use of BOB improves student engagement and participation in various sports activities. A quasi-experimental research design with a quantitative approach was used. Through purposive sampling, 50 second-year BPED students were selected as participants. The study assessed barriers to active sports participation and the challenges students faced in engaging in different sports. Data were analyzed using frequency, percentage, and weighted mean, and the Wilcoxon signed-rank test was applied to compare pre-test and post-test results to determine the effectiveness of the intervention. The analysis revealed a statistically significant improvement in sports participation following the BOB intervention. The results provided strong evidence to reject the null hypothesis, indicating that BOB had a positive impact on student understanding and behavior. Most participants demonstrated increased engagement in sports activities after the intervention, supporting the conclusion that BOB was effective in promoting sports participation. Based on the findings, the researchers proposed guidelines to improve teaching strategies and promote active student participation in sports. Recommendations were also made to assist teachers in managing classrooms and maximizing engagement during sports activities. Despite its effectiveness, the study noted limitations such as poor lighting conditions, page quality of the material, and environmental factors that may affect the usability and impact of BOB. Addressing these concerns may further enhance its application in educational settings.

Keywords: book of behavior, sports participation, physical education, bped students, planned behavior theory, quasi-experimental design, student engagement, teaching strategies, bestlink college of the philippines

**THE EFFECTIVENESS OF DRP IN ENHANCING THE HIP-HOP DANCE SKILLS OF 1ST
YEAR BPED STUDENTS IN BESTLINK COLLEGE OF THE PHILIPPINES**

Jezelle Singson, Andrew Escaros, Ellajeon Macayan, Mary Ann Per,
Mike Salem, Abraham Muyrong II

Abstract

Hip-hop dance, as part of popular culture, continues to evolve as a dynamic form of physical expression. This study aims to assess the effectiveness of the Dance Revolution Program (DRP) in enhancing the hip-hop dance skills of first-year Bachelor of Physical Education (BPED) students at Bestlink College of the Philippines. The research explores how interactive gaming platforms, such as DRP, can serve as supplemental tools to traditional dance instruction methods. Physical education contributes holistically to student development by promoting physical fitness, mental health, social interaction, and emotional well-being. Hip-hop dance, in particular, improves balance, tones muscles, burns calories, and stimulates cognitive function, making it both an engaging and effective form of physical activity. A quasi-experimental research design was employed in this study. The participants included 50 purposively selected first-year BPED students. The study utilized pre-test and post-test evaluations to measure the effectiveness of DRP in enhancing students' hip-hop dance performance, focusing on physical, mental, and emotional skill development. The findings showed a significant improvement in the respondents' hip-hop dance skills following the intervention. Comparative analysis of pre-test and post-test scores revealed marked increases in performance, indicating that the DRP positively influenced students' knowledge and execution of hip-hop dance techniques. The results demonstrated that the DRP effectively enhanced the physical, mental, and emotional capabilities of students in performing hip-hop dance. These outcomes suggest that integrating technology-based tools like DRP into dance education can enrich teaching strategies and support skill development. The findings provide valuable insights for educators and practitioners in designing engaging and effective instructional methods for hip-hop and other movement-based disciplines.

Keywords: dance revolution program, hip-hop dance, physical education, interactive learning, bped students, movement education, dance pedagogy, quasi-experimental, technological integration, student development

**THE EFFECTIVENESS OF STUDENT-MADE VIDEO LESSON IN TEACHING
SUBJECT-VERB AGREEMENT IN GRADE 7 STUDENTS AT DEPARO HIGH SCHOOL**

Judy Ann Papina, Windy Rienz Mitra, Rheamae Radin, Hanz Dale Saavedra,
Trisha Faith Vecina, Dr. Romeo Fernandez

Abstract

In an increasingly digital world, technology plays a crucial role in shaping educational experiences. Digital tools now enhance how students engage with and absorb academic content. This study examines the effectiveness of student-made video lessons in teaching subject-verb agreement among Grade 7 students at Deparo High School. It aims to explore how integrating student-created multimedia materials into instruction can improve understanding, engagement, and performance in grammar-focused topics. An experimental research design was used to evaluate the impact of student-made video lessons on learners' comprehension of subject-verb agreement. The study involved administering a pre-test and a post-test to measure knowledge acquisition before and after the intervention. Controlled variables were applied to establish cause-and-effect relationships between video-based instruction and learning outcomes. The intervention group was exposed to the video lessons, while learning progress was monitored through quantitative data analysis. The findings showed that video lessons served as effective instructional materials by combining visual and auditory elements that increased accessibility and comprehension. When paired with active learning strategies such as discussions, interactive exercises, and problem-solving tasks, the video lessons promoted deeper engagement and critical thinking. A significant improvement from pre-test to post-test scores indicated that the student-made videos enhanced students' understanding and academic performance in subject-verb agreement. The use of student-made video lessons proved effective in boosting student engagement, making lesson content more relevant, and supporting both learning and assessment. Despite the positive outcomes, students identified a lack of interaction as a primary challenge, which limited their ability to engage dynamically with the content. This emphasizes the importance of incorporating interactive elements in video-based learning. As educational technology continues to evolve, educators are encouraged to align instructional materials with student interests and learning preferences to foster a more participatory and meaningful classroom experience.

Keywords: student-made video, subject-verb agreement, educational technology, grade 7, active learning, instructional materials, experimental design, grammar instruction, engagement, deparo high school

**THE EFFECTIVENESS OF USING BOARD GAMES IN TEACHING MODALS AT GRADE
12 SHS HUMSS STUDENTS OF BESTLINK COLLEGE OF THE PHILIPPINES**

Hazel Lauriano, Rhealyn Rosit, Mara Zobel Lejesta, Jobelle Dagohoy,
Grecelda Viernes, Dr. Romeo Fernandez

Abstract

This quantitative research investigates the effectiveness of using board games as a teaching strategy to enhance the understanding and usage of modal verbs among Grade 12 Humanities and Social Sciences (HUMSS) students. The study aims to assess how the use of board games influences students' academic performance, engagement, and retention of grammatical concepts, particularly modals. By incorporating play-based learning into grammar instruction, the research highlights an alternative method to support language acquisition in a more interactive and engaging manner. The study employed quantitative experimental design. A sample group of Grade 12 HUMSS students participated in the intervention. Pre-tests and post-tests were administered to evaluate students' knowledge of modals before and after the use of board games as instructional tools. In addition, engagement surveys were used to measure students' involvement and interest during the learning process. Data collected were analyzed using descriptive statistics and inferential analysis to determine the effectiveness of the teaching method. Findings showed a strong positive response from students regarding the use of board games in grammar instruction. In terms of academic performance, board games received the highest composite weighted mean of 3.46, suggesting that they enhanced critical thinking by encouraging strategic planning and decision-making. Social skills also received a mean of 3.46, indicating that the games fostered peer interaction and relationship-building. Lastly, a weighted mean of 3.40 reflected strong agreement on the overall effectiveness of board games in improving students' understanding and application of modal verbs. The study concludes that board games are effective instructional tools for teaching modals, as they promote both language development and social interaction. Their use led to improved academic performance and student engagement, making them a valuable addition to grammar instruction in senior high school classrooms. The results support integrating interactive learning strategies into English language teaching to enhance student comprehension and participation.

Keywords: board games, grammar instruction, modals, language acquisition, student engagement, strategic learning, humss students, senior high school, play-based learning, educational strategies

**THE EFFECTIVENESS OF USING VISUAL ANIMATION IN TEACHING PREPOSITION
ON SELECTED FRESHMEN ENGLISH MAJOR STUDENTS
AT BESTLINK COLLEGE OF THE PHILIPPINES.**

Prichie Pabuaya, Marife Jaojao, Norhaina Macatoman, Jela Arnado,
Pia Grace Peña, Dr. Romeo Fernandez

Abstract

This study examines the effectiveness of visual animation as a pedagogical tool in teaching prepositions to freshman English major students at Bestlink College of the Philippines. With the increasing integration of multimedia in education, visual animation offers a dynamic approach to simplifying abstract grammar concepts. The study aims to assess how animations affect students' comprehension, engagement, and retention when learning prepositions. A pre-experimental research design was employed, using pre-test and post-test methods to gather quantitative data. A total of 43 freshman English major students were selected through purposive sampling. The study measured students' performance before and after exposure to visual animation-based instruction. Additionally, a survey was conducted to gauge students' perceptions of cognitive load and the instructional value of the animations. Demographic data showed that 74.42% of participants were aged 17 to 19, with females comprising 65.12% of the group. Students reported a neutral perception regarding cognitive overload (composite mean = 2.82), indicating that the animations did not hinder their learning. Meanwhile, the instructional benefits were positively perceived, with a composite mean of 3.31, suggesting that animations helped simplify lessons and improve understanding. Performance outcomes showed a significant increase in scores, from a pre-test mean of 9.56 to a post-test mean of 14.63. Statistical analysis ($z = 6.86214$, $p = 0.00001$) confirmed a significant improvement in students' understanding of prepositions. The findings indicate that visual animation is an effective instructional method for enhancing grammar comprehension, particularly in the teaching of prepositions. The positive shift in performance and favorable student perceptions highlight the potential of multimedia in language education. The study recommends the thoughtful integration of animated instructional materials to support student engagement and improve learning outcomes in grammar instruction.

Keywords: visual animation, prepositions, grammar instruction, english majors, educational technology, multimedia learning, student engagement, pre-experimental design, language education, bestlink college

**THE IMPACT OF INTERACTIVE POWERPOINT IN TEACHING SPEAKING SKILLS TO
SOPHOMORE ENGLISH MAJORS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Sherwyn Bacolbas, Janice Astoriano, Cristal Conde, Lyka Enciso,
Odessa Jumamil, Dr. Romeo Fernandez

Abstract

The integration of technology in language instruction has transformed traditional teaching methods and introduced innovative ways to enhance students' speaking skills. Interactive PowerPoint, known for its multimedia and engaging features, has emerged as a valuable instructional tool. This study investigates the impact of using interactive PowerPoint in teaching speaking skills to sophomore English majors at Bestlink College of the Philippines, focusing on its effectiveness in improving student engagement, comprehension, and performance. This study employs a quasi-experimental research design to examine the effect of interactive PowerPoint on speaking skill development. The design is appropriate for evaluating instructional interventions in real-world classroom settings. A purposive sampling technique was used to select a specific class section of sophomore English majors who met the criteria for participation. Data collection involved pre- and post-tests and structured observations to assess student performance and classroom engagement before and after the intervention. The findings showed that interactive PowerPoint significantly improved student engagement, with 84% actively participating in discussions and 98% reporting a more dynamic learning environment. Retention also improved, as 94% of students were able to link new concepts to prior knowledge, and 96% demonstrated enhanced comprehension and learning efficiency. Additionally, 96% of participants reported applying learned concepts in real-life contexts, while 94% agreed that the tool supported achievement of learning objectives. Test scores increased from a mean of 18.84 to 24.24, with a decrease in standard deviation from 3.4485 to 2.4872, suggesting not only improved academic performance but also greater consistency among learners. The study highlights the effectiveness of interactive PowerPoint as a teaching aid that fosters an engaging and inclusive learning environment. It enhances participation, promotes deeper understanding, and facilitates the practical application of knowledge, which are critical in developing speaking skills. The notable improvement in test scores and learner engagement underscores the potential of interactive tools to improve both individual performance and overall classroom outcomes. These findings support the adoption of technology-driven strategies in language education to foster active learning and communicative competence.

Keywords: interactive powerpoint, speaking skills, language instruction, student engagement, multimedia learning, educational technology, english majors, quasi-experimental design, academic performance, retention

**THE IMPACT OF MYSTBOOK IN ENHANCING THE READING COMPREHENSION OF
GRADE 11 HUMSS STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Sandra Villanueva, Analiza Arandia, Jennifer Mahinay, Franklin Lopez,
Karen Jewel Jhoy Samson, Dr. Romeo Fernandez

Abstract

Reading comprehension is a fundamental skill that plays a crucial role in both academic success and personal development (Smith et al., 2023). However, many students struggle to comprehend complex texts, which can hinder their overall learning and achievement. To address this challenge, educators and researchers have increasingly turned to technology-assisted tools and innovative strategies. One such approach involves the use of mystery stories, which can significantly enhance reading comprehension by providing engaging and enjoyable material that motivates students to tackle more complex texts. Mystery narratives encourage critical thinking, inferential reasoning, and analytical skills through interactive exercises and activities. This workbook is designed to bridge the gap between decoding and fluency, while emphasizing the essential aspect of comprehension. The study utilized a quasi-experimental design. Participants included fifty (50) Grade 11 HUMSS students from Bestlink College of the Philippines during the academic year 2023–2024. The primary aim of the study was to examine the effectiveness of the Mystbook in enhancing students' reading skills, specifically in the areas of reading speed, fluency, and vocabulary. The results of the study reveal that the majority of respondents were female and between 15–17 years old. The use of Mystbook was rated as “neutral” in enhancing reading speed and fluency, while vocabulary improvement received an “agree” rating. Respondents' challenges in answering the story's guided questions were also rated “neutral.” In conclusion, Mystbook significantly improves the reading speed, fluency, and vocabulary skills of Grade 11 HUMSS students. Despite challenges related to pronunciation, repetition, and unfamiliar vocabulary, the tool effectively enhances overall comprehension, making it a valuable educational resource for improving reading comprehension. The standardized Mystbook tool supports educators in monitoring and assessing students' reading comprehension progress. By enabling learners to evaluate themselves regardless of their current fluency, vocabulary, or comprehension level, it provides a clear pathway for skill improvement. For enhanced learning outcomes and greater consistency in reading instruction across grade levels and subject areas, school administrators may consider adopting Mystbook as part of their instructional framework.

Keywords: reading comprehension, mystery stories, mystbook tool

**THE IMPACT OF ONLINE GAME ADDICTION ON GRADE 11 HUMANITIES AND
SOCIAL SCIENCES STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Rebeca Bachiller, Jeremy Carpio, Kristina Guadayo, Jonh Razel Mesinas,
John Carlo Ramos, Christopher Azares

Abstract

The rapid rise in online gaming popularity, especially among youth, has sparked growing concerns about its effects on academic performance and overall well-being. This study explores the online gaming behaviors of Grade 11 Humanities and Social Sciences students at Bestlink College of the Philippines, with particular emphasis on the factors contributing to gaming addiction and its repercussions on educational outcomes. Results reveal that excessive gaming often leads to reduced control over personal responsibilities, impairing time management, straining family relationships, and negatively impacting academic performance. This study utilized a descriptive-quantitative research design and employed a quota sampling technique to gather data from a diverse group of participants through a structured survey questionnaire. Findings indicate significant correlations between online game addiction and various psychosocial factors, including academic performance, social interactions, and mental health. The results underscore the urgent need for awareness programs and targeted intervention strategies to reduce the negative effects of excessive online gaming among students. Highlighting the immersive nature and social appeal of online games, the study reveals a significant correlation between online game addiction and mental health, particularly in three key areas: self-esteem, sleep habits, and time management. In response, the proposed action plan aims to address online game addiction through targeted strategies designed to enhance academic performance, combat cyberbullying, and promote mental well-being among students. The findings indicate that excessive gaming is closely associated with lower academic performance, increased social isolation, and heightened levels of anxiety and depression. Addressing online game addiction is therefore essential for promoting healthier lifestyles and enhancing the overall well-being of students.

Keywords: online game addiction, awareness and intervention, personal well-being

**THE IMPACT OF REWARD SYSTEM TO THE ACADEMIC PERFORMANCE OF
GRADE 12 STUDENTS AT THE BCP, BULACAN CAMPUS**

Shanley Valdez, Joy Ann Marzan, Jashley Jose, Sally Asanza,
Maryrose Fenix, Reymundo Javier

Abstract

This research examined the impact of reward systems on the scholastic achievements of senior high school students. Motivation plays a crucial role in helping students succeed in today's educational environment, and reward systems serve as an important tool to encourage diligent study habits. This study aims to explore how different types of rewards including tangible incentives, verbal praise, and special privileges, affect students' motivation, engagement, and academic performance. The researchers used quantitative research design and collected data through survey questionnaires. The respondents included eleven (11) students each from the AUTO-SMAW, ABM, HUMSS, HE, GAS, STEM, and SPORTS strands at Bestlink College of the Philippines, Bulacan Campus, all enrolled for the Academic Year 2024-2025. The results of the study showed that most students agree that reward systems positively impact their academic performance. Rewards help increase their motivation and encourage them to achieve more academically. The findings also indicate that when rewards are used effectively and fairly, they contribute to the development of good study habits and sustained engagement in academic tasks. The findings of the study suggest that teachers can effectively use reward systems to boost student motivation and academic performance. To maximize their impact, rewards should be purposeful, consistent, and aligned with learning objectives. Even small incentives, such as recognition or praise, can make students feel valued and more motivated. However, teachers should avoid overusing rewards to prevent students from becoming reliant on external incentives. When applied thoughtfully, reward systems help create a supportive learning environment that fosters both academic success and personal growth.

Keywords: reward system, motivators, tangible rewards, verbal praises, special privileges

THE IMPACT OF TESDA CERTIFICATION TO THE EMPLOYABILITY OF TLE MAJOR STUDENTS IN BESTLINK COLLEGE OF THE PHILIPPINES

Jimeperl Dacara, Qean Christiannielle David, Maria Alyssa Diaz, Shella Eva,
Trixy Mae Ronquillo, Abraham Muyrong II

Abstract

This study examines how students in the TLE Majors program are able to secure employment after earning their Technical Education and Skills Development Authority (TESDA) certification. Understanding the role of TESDA certification in enhancing students' employability is essential, given the growing emphasis on certification and skill development in today's job market. The study aims to develop an action plan to better support TLE Major students at Bestlink College of the Philippines, encouraging them to pursue TESDA certification and highlighting its significant impact on their future job applications. The researchers employed descriptive research design with a quantitative approach. The study examined the strength and direction of the correlation between variables, determining how two or more variables were related. The correlation could be either positive or negative, depending on the nature of the relationship observed. The results revealed that most respondents were female and between 21 and 25 years old. They strongly agreed that TESDA certification had a positive impact on their employability across various industry sectors, particularly by fostering a strong work ethic and enhancing practical skills. Respondents acknowledged the value of TESDA training in specific areas such as baking, dressmaking, beauty care, and carpentry. They also found the delivery methods both online and face-to-face along with international recognition and the availability of scholarships, to be effective in supporting their professional development. Most respondents were female, aged 21 to 25, and enrolled as TLE Major students at the institution. They perceived the TESDA certification as highly effective in improving their job application prospects. Findings indicated that many students were actively involved in developing or designing specific steps, programs, or projects aimed at enhancing the quality and effectiveness of TESDA certification. This engagement enabled them to acquire additional knowledge, become more skilled, and demonstrate competence when applying for employment. It also helped TLE Major students stay updated with the latest technological advancements, gain a general understanding of various equipment, and complete practical tasks that enhanced their specialized skills.

Keywords: tesda, tle majors program, skill development, employability

**THE IMPACT OF WOBOPO IN ENHANCING THE READING COMPREHENSION OF
GRADE 11 HUMSS STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Cheska Mae Geresola, Karen Christy Chan, Ma Kristina Dabandan,
Coleen De Leon, Maria Crista Ferros, Dr. Romeo Fernandez

Abstract

This study examines the effectiveness of WOBOPO, a workbook featuring poetry, in enhancing reading comprehension and vocabulary among Grade 11 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. Workbook poetry, through its interactive and engaging activities, promotes deeper understanding of literary texts by encouraging active reading, critical thinking, and creative expression. By incorporating diverse activities that address multiple reading skills and accommodate various learning styles, workbook poetry enriches the reading experience, making it more enjoyable and meaningful for students. The researchers employed a quasi-experimental research design with a qualitative approach to investigate the impact of WOBOPO on enhancing the reading comprehension of Grade 11 HUMSS students. Data was collected using a survey questionnaire, checklist, and Likert scale to ensure credibility and accuracy. The questionnaire consisted of two parts: the respondents' demographic profiles and a 25-item test. The Likert scale measured the effectiveness of poetry in improving students' reading comprehension and vocabulary skills, while the checklist identified challenges encountered by the students. The majority of respondents (84%) were aged 16 to 18 years old. The gender distribution was evenly split, with males and females each representing 50% of the sample. Regarding reading comprehension, the highest-rated indicator was the ability to understand the poet's intention, reflecting strong agreement among students. In the vocabulary assessment, respondents reported feeling inspired to explore new words and appreciated the careful word choice in poetry. The data indicates a positive impact of using WOBOPO in developing both vocabulary and comprehension skills, contributing to improved academic outcomes. A significant difference between pre-test and post-test results further confirms the effectiveness of WOBOPO in enhancing students' reading comprehension skills. According to the respondents, class interactions with poetry through guided exercises helped students become more confident in their analytical abilities and vocabulary. This increased familiarity not only enhanced their comprehension but also fostered a greater appreciation for poetry as a whole. Students found that using WOBOPO effectively supported their reading comprehension and vocabulary development.

Keywords: comprehension, learning performance, vocabulary

**THE INFLUENCE OF USING MOBILE DEVICES TO THE ACADEMIC PERFORMANCE
IN GENERAL ACADEMIC STRAND STUDENTS**

Dencell Natividad, Mark Asuncion, Cielo Daren Dullesco, Ella Mae Llana,
Jane Tañon, Christopher Azares

Abstract

This study investigates how mobile devices impact the academic performance of Bestlink College students during the 2024–2025 school year, using the Technology Acceptance Model (TAM). It examines student demographics, types of devices used, challenges faced, and the effects on critical thinking, time management, and social interaction. The findings aim to provide recommendations for improved integration of mobile technology, benefiting students, teachers, and school administration, while also informing future research. This study employs a descriptive quantitative research design to examine perceptions of academic improvement among senior high school students. A survey questionnaire serves as the primary data collection tool and has been validated by a research adviser, statistician, and grammarian. The questionnaire is divided into four sections: demographic profile, mobile device usage, its impact on academic performance, and challenges faced by students. This structured approach ensures the effective collection of reliable and valid data. Based on the findings the respondents illustrate how mobile devices influence them in terms of critical thinking skills, time management, and social interaction. It was identified the convenience of mobile devices and the issues of mobile devices. Findings show that mobile devices have a great impact; it depends on how the students use their mobile devices. This wraps up the summary of findings, conclusions, and recommendations. The majority of respondents are 15 to 16 years old, male, and in Grade 12, with smartphones being the go-to device. While mobile devices can boost critical thinking, time management, and social interaction, they also bring along some challenges like distraction and addiction. The study recommends setting limits on usage, improving digital literacy, and encouraging responsible device use with support from schools and parents.

Keywords: influence, mobile devices, academic performance, time management, social interaction

**THE LEVEL OF EFFICIENCY OF ENGLISH READING COMPREHENSION
IN ACADEMIC EXCELLENCE OF GENERAL ACADEMIC STRAND
STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Jasmin Alcaide, Ben Joseph Bello, Ehra Shamie Cayanan, Enrique Magparangalan,
Rea Mae Rodriguez, Christopher Azares

Abstract

This research analyzes the reading comprehension abilities of students in the General Academic Strand at Bestlink College of the Philippines. The study aims to identify the challenges these students face and to recommend tailored solutions. It is grounded in the Simple View of Reading theoretical framework. The findings intend to provide valuable insights for teachers and policymakers to enhance reading comprehension instruction. To address this issue, an exploratory research design was employed, combining a literature review with empirical data analysis. A simple random sampling technique was used to select respondents. The study examines the effects of cognitive skills, reading strategies, and vocabulary on reading comprehension. Data was collected through surveys, interviews, and reading comprehension tests. The results revealed that students demonstrated varying levels of reading speed, comprehension accuracy, and retention ability, with an overall weighted mean of 3.44. The findings also highlighted the impact of cognitive skills, reading strategies, and vocabulary on the students' academic performance in English reading comprehension, reflected by the same overall weighted mean of 3.44. Additionally, poor focus ($f = 51$) and environmental distractions ($f = 50$) were identified as major hindrances to reading comprehension. Importantly, the study found a significant association between reading comprehension and academic achievement. To address these concerns, an intervention is proposed to enhance reading comprehension. This includes segmenting texts into manageable parts, creating supportive reading environments, and providing background information on the subjects. Additionally, professional development for educators and the use of mixed methods such as interactive reading activities and personalized curricula, are recommended to help students overcome barriers to reading comprehension.

Keywords: efficiency, reading comprehension, academic excellence

**THE LEVEL OF EFFICIENCY OF THE STUDENT LEADERSHIP IN CLASSROOM
MANAGEMENT AS PERCEIVED BY GRADE 12 SENIOR HIGH SCHOOL
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Lovely Sabado, Paula Preciousa Elospa, Aifa Lumbo, Fatima Precious Luzeriaga,
Andre Permejo, Christopher Azares

Abstract

This study examines Grade 12 senior high school students' perceptions of student leadership in classroom management at Bestlink College of the Philippines. While student leadership is widely recognized as vital for maintaining a well-structured and effective learning environment, little is known about how students themselves perceive this role within their own school setting. Grade 12 students were surveyed using a questionnaire as part of a descriptive quantitative research design. The questionnaire aimed to assess students' perceptions of how effectively their student leaders manage classroom behavior, resolve disputes, and foster a supportive learning environment, among other aspects of classroom management. Although the majority of students thought their student leaders did a moderate job of controlling classroom behaviour, there were clear shortcomings in areas like resolving conflicts and encouraging diversity. Most students agreed that student leaders did a good job of upholding discipline, but they also acknowledged that they needed to improve their ability to handle conflicts between classmates. While the effectiveness of student leaders varies with their leadership styles, the study underscores the essential role of student leadership in classroom management. Findings suggest that student leaders could better manage classroom dynamics with increased guidance and support. These insights contribute valuable knowledge about the critical function of student leadership in fostering positive learning environments.

Keywords: student leadership, classroom management, perception

**THE LEVEL OF INFLUENCE OF ORAL COMMUNICATION IN THE
ACADEMIC PERFORMANCE SELECTED G-12 HUMSS AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Jasper Pariente, Christian Jake Ramos, Christina Villanueva,
Raymond Paez, Josephine Cielo Casenares, Rica Mae Berja

Abstract

This study aims to investigate the influence of oral communication on the academic performance of Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines (BCP). In this context, oral communication is defined as the exchange of words, ideas, and opinions through spoken language. The research focuses on key components such as student engagement, public speaking, collaboration, language use, grammar, and comprehension skills. The study is grounded in Vygotsky's Sociocultural Theory, which emphasizes the role of social interaction in cognitive development. The researchers employed an exploratory-quantitative research design to investigate the topic. The population consisted of Grade 12 HUMSS students at Bestlink College of the Philippines (BCP). Cluster sampling was used, and the sample size was determined using Slovin's formula. Data was collected through a survey questionnaire administered to 213 respondents. The investigation into the influence of oral communication on academic performance revealed that respondents achieved an overall weighted mean of 3.45, described as strongly agree, indicating a positive perception. Similarly, the statement that oral communication contributes to students' intellectual development received an overall weighted mean of 3.44, also described as strongly agree. Furthermore, analysis of the challenges encountered showed that mental blocks significantly affected the academic performance of Grade 12 HUMSS students, with a frequency of 170 respondents (78.81%). In response, the researchers proposed an action plan to be implemented over the course of one month. This study offers several recommendations to enhance the key components of oral communication, particularly in terms of engagement, public speaking, and collaboration. It also highlights how oral communication can support the development of students' language, grammar, and comprehension skills. Additionally, the study recommends a multifaceted approach to prevent mental blocks that hinder academic performance.

Keywords: oral communication, student engagement, language skills

**THE OUTCOMES OF PROPER ENDORSEMENT OF CROSS-DRESSING IN SELECTED
GRADE 11 HUMANITIES AND SOCIAL SCIENCES STUDENTS AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Ehra Sabina Garcia, Ranil Jomarie Adriano, Shainna Lynne Canson, Jude Warren Original,
Kassandra Faith Sari, Christopher Azares

Abstract

This chapter emphasizes the importance of promoting acceptance of cross-dressing in educational settings, with a particular focus on Bestlink College. It highlights how fostering an inclusive environment can boost students' self-confidence, reduce social anxiety, and enhance overall well-being. These benefits are contextualized within the framework of the Safe Spaces Act, which advocates respect for and protection of individual expression. The chapter also reviews relevant literature on the interplay between fashion and social interaction among cross-dressers, grounded in Social Identity Theory. Additionally, it defines the study's scope and significance for students, educators, and policymakers; identifies the challenges faced by cross-dressing students; and proposes inclusive strategies to support a safer and more accepting school environment. The study employs an Exploratory Descriptive-Quantitative Research Design to assess the perceptions of 133 selected Grade 11 Humanities and Social Sciences (HUMSS) students regarding cross-dressing. To ensure balanced representation, a Quota Sampling Technique was used. Data were collected through a validated survey questionnaire structured into three key sections: social dynamics, endorsement effects, and challenges associated with cross-dressing. A Likert Scale was applied to measure student responses, while statistical tools such as frequency, percentage, and mean were utilized to analyze and interpret the data effectively. The study explores cross-dressing perceptions among Grade 11 students, revealing that social dynamics significantly influence levels of acceptance. While endorsement effects indicate increased self-confidence among cross-dressing students, the findings also highlight persistent challenges such as discrimination and social stigma. Through statistical analysis, using frequency, percentage, and mean, the survey results reflect mixed opinions among respondents. Overall, the findings underscore the need for inclusive strategies to create a more supportive school environment. The study strongly advocates for the implementation of the Safe Spaces Act within the educational setting to ensure protection and acceptance for all students. The study highlights that Grade 11 students generally agree on the positive aspects of properly endorsing cross-dressing, recognizing its potential to boost self-confidence and support personal exploration through fashion. However, students also reported experiencing challenges such as non-acceptance, ignorance, and inequity from their peers. These findings reflect a complex social environment where both support and stigma coexist.

Keywords: cross-dressing, student perceptions, self-confidence, fashion expression, social dynamics, non-acceptance, discrimination, safe spaces act, inclusivity, awareness programs, educational environment

**THE PERCEIVED EFFECT OF MANDATORY RESERVED OFFICER TRAINING
AMONG GRADE 12 HUMANITIES AND SOCIAL SCIENCES AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Angeline Robles, Joshua Balatinsayo, Ashly Keisha Dulay,
Miko Gaton, Jan Jan Lopez, Christopher Azares

Abstract

The Reserve Officer Training Corps (ROTC) in the Philippines is designed to train tertiary-level students in areas such as national defense, leadership, discipline, and professionalism. Despite its objectives, the program has faced criticism due to reported health risks and incidents of mistreatment. This study investigates the perceived impact of ROTC on skill development, leadership capabilities, and defense preparedness, while also aiming to inform students about the program's significance. Grounded in Allan Kolb's Experiential Learning Theory (1984) which emphasizes cognitive development through real-life experience the research explores how personal growth is shaped by active participation. Specifically, the study examines the perceptions of Grade 12 Humanities and Social Sciences (HUMSS) students regarding the Mandatory ROTC, identifying the challenges they encounter and proposing an action plan to support future curriculum development. The study aimed to evaluate the perceptions of 200 Grade 12 Humanities and Social Sciences (HUMSS) students through a descriptive-quantitative research design. To ensure an unbiased representation of the population, the researchers employed a cluster sampling technique. Data were collected using a structured questionnaire, and responses were analyzed using frequency, percentage, ranking, and mean. A Likert scale was utilized to measure students' attitudes and opinions, with options ranging from "strongly agree" to "strongly disagree." The study revealed that students have a generally positive perception of the ROTC program, particularly in areas such as defense preparedness, leadership development, time management, discipline, personal growth, and professional readiness. Despite these benefits, 22% of respondents identified community service requirements as a notable challenge. To enhance student perception and program effectiveness, the following recommendations are proposed: Strengthen teamwork through collaborative tasks and leadership-building activities. Incorporate mindfulness techniques to support mental well-being and reduce stress. Promote better coordination between academic and ROTC responsibilities by involving students, parents, and teachers in planning and support efforts. These initiatives aim to create a more balanced and enriching ROTC experience for all participants. Students generally view the Mandatory Reserved Officer Training Corps (ROTC) positively, particularly for its contributions to defense preparedness, leadership skills, discipline, personal development, and professional growth. However, challenges remain, especially in areas related to community service obligations and mental health concerns. To improve the ROTC program, it is recommended to: Reinforce skill-building initiatives, particularly in leadership and discipline, implement flexible scheduling to support students' academic balance, develop orientation and awareness programs to help students better understand the goals and structure of ROTC. These improvements aim to foster a more supportive, informed, and balanced ROTC experience for all participants.

Keywords: mandatory rotc, student perceptions, defense preparedness, leadership skills, discipline, personal development, professional growth, community service, mental health, flexible scheduling, program awareness

**THE POWER OF ARTIFICIAL INTELLIGENCE FOR COMPUTER INTERACTION
FOR GRADE 12 HUMANITIES AND SOCIAL SCIENCES STUDENT
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Pauleen Falcunit, Regine Baraňao, Gillian Gallego, Argie Jaspe, Mark Vincent Pondara, Rica Mae Berja

Abstract

This study explores the integration of Artificial Intelligence (AI) in various educational activities, including assessment, personalized learning, and administrative functions. It examines the emerging roles of quantum computing and neuromorphic computing in enhancing the efficiency and learning capabilities of AI systems. The research also investigates the impact of AI on students' critical thinking, problem-solving skills, and decision-making processes. Furthermore, the study evaluates AI's influence on students' writing experiences, emphasizing both its potential benefits and limitations. It underscores the importance of equitable access to AI tools, including timely software updates and installations, to ensure inclusivity in educational settings. This study employs a descriptive research design to evaluate the accessibility and impact of Artificial Intelligence (AI) for computer interaction among Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. Involving a sample of 200 students selected through simple random sampling, the research examines the potential of AI to enhance computer-based interaction, improve human interaction skills, and support its integration into the HUMSS curriculum. This chapter examines the application of Artificial Intelligence (AI) across multiple facets of education, including research, brainstorming, creative writing, content creation, productivity enhancement, and the use of search engines. AI has the potential to improve students' computer interaction skills, create personalized learning pathways, enhance grammar and writing abilities, detect plagiarism, assist in research processes, adapt the difficulty level of learning materials, and support the comprehension of complex concepts. This chapter also highlights the potential benefits of integrating Artificial Intelligence (AI) into emotional evaluation within educational environments, which could significantly transform the understanding and support of students' socioemotional development. It examines the role of AI-powered tools and platforms in fostering students' active participation and interest in learning, particularly by enhancing motivation and facilitating meaningful connections. The discussion emphasizes the importance of applying AI principles in higher education, exploring the use of chatbots and intelligent systems for student engagement, while also addressing the challenges associated with integrating AI into academic settings.

Keywords: artificial intelligence, emotional evaluation, socioemotional development, student engagement, ai in education, motivation, ai-powered platforms, chatbots, higher education, integration challenges

**THE ROLE OF COMMUNICATION AND ITS INFLUENCE IN SHAPING PERSPECTIVE
OF STUDENTS ON SOCIAL ISSUES AMONG GRADE 11 SENIOR HIGH SCHOOL
STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Jamie Mariz Franco, Johnpaul Agpalo, DJ Macasinag, Mike Kevin Pepito,
Hannah Mie Petallo, John Paul Tarong, Christopher Azares

Abstract

People acquire news and updates through various media channels such as newspapers, television, and the internet. However, these channels have the potential to significantly influence public opinion, particularly on critical topics such as religion, education, and social issues, due to their compelling and pervasive nature. In the digital age, the widespread dissemination of misinformation, biased opinions, and manipulated content has challenged individuals' perceptions and understanding of reality. This study aims to identify the most commonly used communication channels and examine how these platforms influence public opinion. The research is guided by the Shannon-Weaver Model of Communication, which highlights key components such as the source, message, encoding, decoding, channel, and destination, emphasizing the complexity of communication and interpretation in shaping public discourse. The researchers utilized a survey questionnaire as the primary data-gathering instrument, employing an exploratory descriptive-quantitative research design. A quota sampling technique was used to select participants, consisting of 133 Grade 11 students. To analyze the collected data, the researchers applied various statistical tools, including frequency and percentage distribution, ranking, mean, and a 4-point Likert scale to interpret the responses accurately. The results revealed that speaking skills played the most significant role in communication among the respondents, with a mean score of 3.48. Among the communication channels, newsletters emerged as the most influential in shaping public opinion, receiving a mean score of 3.44. Overall, the respondents "Strongly Agreed" on the importance of confidence, comprehension, and speaking skills in communication. In terms of communication channels influencing public opinion on social issues, the highest ratings were given to face-to-face communication, newsletters, and social media. Lastly, the most commonly encountered problem in using communication channels to shape public opinion was the spread of misinformation and disinformation. It is essential to provide accurate, evidence-based information such as content from established news organizations and peer-reviewed scientific journals, to enhance communication and effectively shape public opinion on social issues.

Keywords: communication channels, public opinion, social issues, speaking skills, newsletters, misinformation, disinformation, face-to-face communication, social media, grade 11 students, shannon-weaver model

**THE USE OF TWISTER GAME IN TEACHING MULTIPLICATION
AMONG GRADE 3 PUPILS**

Kimberly Anne Piloneo, Ediza Mae Sadaya, Catherine Contiga, Aljelynn Bernardino,
John Ray Velasquez, Justine Lyn Fernandez

Abstract

This study investigated the use of the Twister game as an innovative teaching strategy to improve multiplication skills among Grade 3 students at San Bartolome Elementary School. Fifty pupils were selected through purposive sampling. Using pre-test and post-test assessments and survey questionnaires, the study examined the impact of the game on engagement, memorization, and problem-solving abilities. Results suggest that the Twister game effectively enhances students' learning experience by making mathematical concepts more interactive and enjoyable. The study utilized a quasi-experimental research design to compare the effectiveness of the Twister game in teaching multiplication to Grade 3 pupils. Fifty students participated, with statistical tools such as percentage distribution, weighted mean, and Z-test used for data analysis. Findings revealed that students aged 8–9, particularly males (52%), showed notable improvement in multiplication skills after using the Twister game. A weighted mean of 3.79 indicated strong agreement that the game aided memorization. The computed Z-value of 5.258 confirmed a statistically significant difference between pre-test and post-test scores, leading to the rejection of the null hypothesis and affirming the game's effectiveness. The study confirms the effectiveness of game-based learning, specifically the Twister game, in enhancing multiplication skills among Grade 3 pupils. Results demonstrate that incorporating interactive activities into the curriculum significantly boosts student engagement, improves retention of multiplication facts, and supports the development of problem-solving abilities. This approach not only makes learning more enjoyable but also promotes a deeper understanding of mathematical concepts, underscoring the value of dynamic and student-centered instructional strategies. The study encourages educators to integrate interactive tools like the Twister game into mathematics instruction to boost student engagement and learning effectiveness. It highlights the potential of game-based learning in improving multiplication skills and suggests expanding research to assess long-term impacts, effectiveness across different subjects, and age-specific outcomes. Ultimately, the use of innovative teaching strategies can foster more dynamic and meaningful learning experiences for young students.

Keywords: twister game, game-based learning, mathematics instruction, multiplication skills, grade 3 pupils, interactive teaching, student engagement, educational games, quasi-experimental design, learning outcomes

**THE UTILIZATION OF AUDIO-VISUAL MATERIALS IN ENHANCING THE READING
COMPREHENSION OF SOPHOMORE ENGLISH MAJORS AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Erica Dela Cruz, Sariel Gene Rae Manfoste, Quincy Mae Alcoreza,
John Kenneth Bereber, Nash Kobie Soliman, Dr. Romeo Fernandez

Abstract

The purpose of this study is to determine the effectiveness of utilizing audiovisual materials in enhancing the reading comprehension of sophomore English majors at Bestlink College of the Philippines. Audiovisual materials refer to learning aids that combine auditory and visual elements to convey information, such as videos, presentations, and animations. The use of audiovisual materials in schools has significantly enhanced learning outcomes, particularly in improving reading comprehension. This study utilizes audiovisual tools to establish a multisensory learning environment, promoting greater student engagement with challenging written texts. This study utilized a quasi-experimental research design in order to assess the effectiveness of audiovisual materials in enhancing the students' reading comprehension skills. The respondents of this study were 50 sophomore English majors in sections 2102-E and 2104-E at BCP. The researchers used the pre-test and post-test approach through a combination of Likert scale and multiple-choice questionnaires. This research approach measures the participants' responses before and after an intervention, which is useful in determining whether the treatment has led to significant improvements or changes in the measured outcomes. Based on the findings in terms of demographic profile, the majority of the respondents were aged 18 to 20 years old, female, and evenly divided between the two sections. In relation to the skills that were enhanced by utilizing audiovisual materials in terms of reading comprehension, reading fluency, vocabulary, and memory retention, students' responses were "Strongly Agree." Some of the respondents encountered challenges, including unfamiliar words and technical issues, while watching the animated story. There was a significant difference between pre-test and post-test results. It indicates that the intervention had a significant impact on participants' reading comprehension skills, leading to the decision to reject the null hypothesis (H_0). In light of the evidence presented, the students' reading comprehension, reading fluency, vocabulary, and memory retention were enhanced by the use of audiovisual materials. Educators should focus on strategies to utilize these materials in classroom settings, such as aligning the materials with specific objectives, ensuring technical preparedness, engaging students in diverse interactive formats, and facilitating feedback.

Keywords: audiovisual materials, reading comprehension, reading fluency, vocabulary, memory retention, macro skills

**THE UTILIZATION OF PODCAST IN IMPROVING THE LISTENING SKILLS
AMONG FRESHMEN ENGLISH MAJOR**

Renecole Cano, Shiela Mae Abadeza, Jake Russel Bermudez, Ansherine Luz Caguindangan,
Princess Dayan Septo, Dr. Romeo Fernandez

Abstract

This study explores the impact of podcasts on students' listening comprehension and their perceptions of using podcasts during listening classes. Using a descriptive qualitative research design, it examines how the medium's convenience and accessibility support knowledge acquisition in academic settings. Findings suggest that podcasts significantly enhance students' ability to understand spoken information, highlighting their effectiveness as an educational tool in developing listening skills. This quasi-experimental study investigates the effectiveness of podcast use in enhancing the listening skills of freshman English majors at Bestlink College of the Philippines. Pre-tests were conducted before the intervention, followed by podcast-based instruction aligned with the same competencies. Post-tests were administered to assess any improvements. By comparing pre- and post-test results, the study measured the impact of podcast utilization on students' listening performance, demonstrating podcasts' potential as a valuable tool in auditory and language learning. The study found that freshman BSED English majors at Bestlink College of the Philippines consider themselves technologically adept in using podcasts to enhance listening and speaking skills. Students utilized tools such as mobile phones, headsets, and speakers to understand podcast content, improve pronunciation, and learn phonological patterns. However, their speaking skills were affected by factors like emotional distractions, environmental noise, and physical distance from the speaker. Despite these challenges, podcasts were recognized as effective in providing pronunciation models and strategies to improve overall listening and communication skills. The study emphasizes the educational value of podcasts, particularly via platforms like Spotify, among freshman BSED English majors. Podcasts provide factual, engaging content that remains accessible and unchanged after release, making them a reliable resource. They facilitate learning by enhancing auditory comprehension and offering innovative ways to introduce new topics. Additionally, podcast creation by students encourages knowledge expression, making it an effective tool for active learning and student engagement in academic settings.

Keywords: podcasts, listening comprehension, freshman students, bsed english majors, educational technology, auditory learning, podcast tools, active learning, student engagement, spotify, phonology, pronunciation, digital learning

**TIME MANAGEMENT STRATEGIES ITS ROLE IN THE ACADEMIC SUCCESS OF
GRADE 12 HUMANITIES AND SOCIAL SCIENCES STRAND AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Mica Bagundang, Rhod Christan Lazam, Joanalyn Potenciano,
Anica Venus, Reniel Dedal, Christopher Azares

Abstract

This study highlights the critical role of time management for Grade 12 students juggling schoolwork, college applications, and personal responsibilities. Research at Bestlink College demonstrates that effective planning, through goal setting, scheduling, organization, minimizing distractions, and seeking support, enhances academic performance while reducing stress. By developing these skills, students can improve productivity, achieve their goals, and maintain a healthy balance, contributing to a successful final year of high school. This study used an evaluative-quantitative research design to examine the effects of time management strategies on 212 Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines. Data collected through a validated survey were analyzed using frequency, percentage, ranking, mean, and Likert scale methods. Results indicate that effective time management enhances students' adaptability, daily routines, focus, and active participation in school activities, underscoring its importance for academic success. The study found that Grade 12 students effectively manage their time through routines, prioritization, and structured schedules, with strong agreement on adaptability, daily routines, and school activity engagement (weighted mean 3.34). Despite these strengths, some students face difficulties completing tasks independently. Overall, effective time management was shown to boost productivity, reduce stress, and improve learning outcomes. To support students in overcoming these challenges, an action plan has been developed aimed at enhancing their time management skills and academic performance. The conclusion emphasizes the critical role of accessible and effective time management in student success. It highlights the importance of tracking strategies such as task estimation, prioritization, and minimizing procrastination. Tools like planners and structured schedules help boost productivity. The proposed action plan, which includes a daily routine, reduced gadget use, and organized task planning, aims to improve efficiency. Ultimately, mastering time management significantly contributes to enhanced academic performance.

Keywords: time management, student productivity, academic success, structured schedules, prioritization, procrastination, adaptability, task planning, gadget use, grade 12 humss, bestlink college

**TRANSFORMING EDUCATION: INTEGRATION OF L.U.C.I.A. CHATGPT MATERIAL
ON THE WRITING LESSON OF GRADE 6 STUDENTS**

Joana Kariz Aguilar, Luna Cabison, Jerald Lawrence Forteza, Angelo Rubianes,
Carlos Turtona Jr, Ryan Christopher Villalon

Abstract

The integration of ChatGPT, a generative AI technology, into modern education systems is gaining traction due to its ability to facilitate human-like interactions and assist with various tasks such as answering queries, composing emails, and writing code. In the Philippines, this growing interest has prompted the government to closely examine AI and chatbot technologies, including ChatGPT, to monitor and manage potential system risks. This study integrated ChatGPT into the writing curriculum of Grade 6 students. It employed a quantitative research method using a true-experimental design and purposive sampling techniques. The research involved administering a 50-item assessment that evaluated specific writing aspects, namely clarity, grammar, sentence construction, and vocabulary. The participants, including 62 Grade 6 students, were divided into two sections: the Conventional Group and the Experimental Group. Data was collected through pre-tests, post-tests, and survey questionnaires and were analyzed using statistical methods such as frequency and percentage, ranking, Z-test, and weighted mean. The pre-test results showed that the Conventional Group obtained a mean score of 4.99 (SD = 1.93), while the Experimental Group recorded a mean score of 4.64 (SD = 2.07), both reflecting below-average proficiency levels. Post-test results revealed a slight improvement in the Conventional Group, with a mean score of 5.48 (SD = 2.02). In contrast, the Experimental Group demonstrated a more notable improvement, achieving a mean score of 6.49 (SD = 2.53). The findings indicate that Grade 6 students initially exhibited low proficiency in vocabulary and sentence construction. However, after exposure to L.U.C.I.A. ChatGPT materials, the Experimental Group showed significant improvement in these areas, as well as in clarity and grammar. This result aligns with Patton M.'s (2023) Theory of Change, Transformation, which emphasizes the value of innovative educational approaches. Overall, the study highlights the educational potential of AI tools such as ChatGPT in transforming instructional practices, leading to improvements in student learning and educational outcomes.

Keywords: ai tools, l.u.c.i.a., chatgpt, writing lesson, true-experimental design, theory of change, transformation

**UTILIZATION OF AI TOOLS IN COMMUNICATION EXPERIENCE
AMONG GRADE 11 HUMANITIES AND SOCIAL SCIENCES
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Caroline Julian, Shawn Dahomey Chan, Shantyl Domingo, Mel Marc Laoyon,
Aliehia Valmores, Sherel Joy Hernandez, Rica Mae Berja

Abstract

Artificial Intelligence (AI) is a technology that enables computers to perform complex tasks such as data analysis, making recommendations, understanding speech, and recognizing visual inputs. This study employed a descriptive-quantitative research method to describe the perceptions of the respondents. It involved one hundred thirty-three (133) Grade 11 students from Bestlink College of the Philippines. A cluster sampling technique was utilized to gather data. To address the research problems, a questionnaire was used as the primary data-gathering instrument, supported by statistical tools such as frequency and percentage, mean, ranking, Slovin's formula, and the Likert scale. The responses were interpreted using a four-point scale: Strongly Agree, Agree, Disagree, and Strongly Disagree. The findings of the study indicate that the respondents perceive the use of artificial intelligence as a tool that enhances user experience in communication, particularly in terms of language, medium, and social skills, as evidenced by an overall weighted mean of 3.32, which is interpreted as Strongly Agree. The use of artificial intelligence as an effective tool in communication received the highest weighted mean of 3.35, indicating that AI tools such as real-time translation, language tutoring, and writing assistance significantly contribute to enhancing communication. Based on these findings, the study recommends that schools integrate AI-driven tools into communication and language learning to boost student engagement, support the refinement of machine learning models, and ensure the implementation of ethical guidelines that address issues related to bias, privacy, and user consent.

Keywords: artificial intelligence, communication enhancement, language support, real-time translation, writing assistance, education technology, student engagement, ethical ai, privacy, bias

**UTILIZATION OF AIR DROP CARD ACTIVITIES FOR TEACHING NATURAL
OBJECTS IN THE SKY IN SCIENCE FOR GRADE 3 PUPILS**

Jeffrey Bandol, Jerrieca Arellano, Joan Espelimbergo, Ricalyn San Esteban,
Gerome Toribio, Ryan Christopher Villalon

Abstract

Teaching science in primary schools poses distinct challenges, especially in engaging young learners in scientific inquiry amid limited resources. Many educators find it difficult to motivate students who are more accustomed to traditional subjects like reading and mathematics. However, recent studies indicate that integrating play-based activities into science lessons can significantly boost student engagement, particularly among preschool and elementary students. This approach not only captures children's interest but also supports the development of foundational skills, including reading proficiency. In this study, 80 Grade 3 students from Cielito Zamora Memorial School served as respondents. The researcher developed a 30-item survey questionnaire, as well as pre-tests and post-tests, grounded in relevant literature and aligned with the essential learning competencies in Grade 3 science. To ensure the validity and clarity of the test items, the researcher consulted academic experts, including the Dean of the College of Teacher Education at Bestlink College of the Philippines. Their constructive feedback guided the revision and refinement of the instrument, resulting in a more reliable and effective assessment tool. The study revealed a significant difference in performance between the Home Group and the Experimental Group. Initially, the Home Group obtained a mean score of 14.83, while the Experimental Group achieved a higher mean score of 21.93. This difference yielded a z-value of -10.58302 ($p < 0.00001$), indicating a statistically significant gap. Post-test results further supported this finding, with the Home Group's mean score increasing to 19.53 and the Experimental Group's mean rising to 25.83, resulting in a z-value of -11.15104 ($p < 0.00001$). These findings suggest that the integration of interactive, play-based activities such as the Air-drop card game substantially enhances student performance in science learning. The study highlights the critical role of engaging and interactive activities such as the Air-drop card game, in maintaining student interest, enhancing focus, and improving learning outcomes. Lessons that incorporate movement and hands-on experiences promote active participation, making science instruction more effective and meaningful. This approach is supported by Bruner's Theory of Learning and Cognitive Development (2024), which emphasizes that children learn best through experiential and discovery-based methods. The findings underscore the value of such strategies in stimulating curiosity, developing observational skills, and transforming science education into a more engaging, enjoyable, and impactful experience for young learners.

Keywords: play-based learning, interactive activities, air-drop card game, student engagement, hands-on learning, experiential learning, bruner's theory, cognitive development, science education, primary students

**UTILIZATION OF ARTIFICIAL INTELLIGENCE AND ITS INFLUENCE ON ACADEMIC
KNOWLEDGE OF GRADE 12 STUDENTS AT BESTLINK COLLEGE OF THE
PHILIPPINES**

Renee Charlize Raynera, Christine Joy Garinga, Clark Magno, Fritz Maureen Martos,
Anne Crystal Mateo, Christopher Azares

Abstract

This study explores the use of artificial intelligence (AI) in enhancing the learning experience of Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. It investigates how AI impacts their academic excellence, learning environment, and knowledge retention, while also examining their perceptions of AI's ease of use and usefulness in education. The research addresses common concerns surrounding AI's influence on creativity and critical thinking, emphasizing the need for educators and policymakers to understand AI's evolving role in academic settings. According to Davis (1993), understanding students' perspectives on AI systems is crucial, as their perceptions significantly influence their acceptance and use of such technologies. Integrating AI into educational frameworks may also require re-evaluating traditional teaching methods. Ultimately, the study aims to develop an action plan based on student feedback and research findings to further enhance academic performance through effective and ethical use of AI tools. This research utilizes exploratory methods to generate new insights from 200 Grade 12 students at Bestlink College of the Philippines. The study employs cluster random sampling and gathers data through a survey questionnaire. To analyze the data, the study uses frequency to show how often specific responses occur, percentages to indicate their proportion within the total population, and mean scores to reflect overall performance. A rating scale is applied to interpret the survey responses and assess students' perceptions effectively. The findings of this study indicate that artificial intelligence (AI) positively contributes to academic excellence, the learning environment, and learning retention among Grade 12 students. The results show favorable responses across these areas, with an overall average rating of 3.38, suggesting a generally positive perception of AI's impact on their education. Furthermore, the data reveal that many respondents are knowledgeable about the use of AI and recognize its potential benefits in enhancing their academic experience. The text discusses the influence of artificial intelligence (AI) in creating a safe and conducive learning environment. The study reveals that students support the integration of AI to enhance the learning environment, academic excellence, and knowledge retention. They believe that AI facilitates better access to information and resources, improves the quality of research, and is generally intuitive and user-friendly. To further strengthen AI's positive impact, the researchers recommend monitoring its usage, encouraging practical application, and developing action plans to guide its effective implementation in educational settings.

Keywords: artificial intelligence, safe learning environment, academic excellence, knowledge retention, student perception, access to information, research quality, user-friendly, educational technology, action plan

**UTILIZATION OF ARTIFICIAL INTELLIGENCE ON ANALYTICAL THINKING SKILLS
AMONG THE STUDENTS OF BESTLINK COLLEGE OF THE
PHILIPPINES MAJOR IN SOCIAL STUDIES**

Patricia Joy Pical, Ana Marie Mabanana, Kate Angelene Ramirez, Ric John Sarmiento,
Aldrin Roy Puertas, Ronilo Dignos, Abraham Muyrong II

Abstract

This study aims to assess the extent to which AI tools influence students' analytical thinking skills. Specifically, it seeks to identify the advantages and disadvantages of utilizing AI tools in educational settings and assess their impact on students' abilities in logical reasoning, problem-solving, and decision-making. The primary objective is to generate valuable insights into the role of AI tools in the learning process and their potential impact on teaching and instruction. This study employed a quantitative research method using a descriptive research design to gather and analyze data on the effects of artificial intelligence utilization on the analytical thinking skills of students at Bestlink College of the Philippines. The results indicate that artificial intelligence (AI) assists students in understanding complex topics and enhances their confidence in thinking critically and logically. However, the highest weighted mean of 3.17 reflects a concern among students regarding over-reliance on AI. Excessive use of AI may diminish students' ability to think independently, acquire new skills, and foster a sense of dependence. While students acknowledge that AI is user-friendly and beneficial, they emphasize that it should serve as a supportive tool rather than a replacement for their own problem-solving and critical thinking processes. These findings suggest that although AI can significantly enhance learning, its use must be balanced to avoid hindering the development of essential analytical thinking skills. The utilization of artificial intelligence (AI) among students at Bestlink College of the Philippines reveals both the promising advantages and potential drawbacks of AI tools in enhancing analytical thinking skills. While AI supports academic performance and offers opportunities for personalized learning, the growing concern over student over-reliance suggests a possible decline in critical thinking and independent problem-solving abilities. As education continues to integrate technological advancements, students, educators, and parents need to maintain a balanced approach, using AI as a supportive aid rather than a substitute. This balance is vital to ensure the continued development of authentic cognitive and analytical skills necessary for future success.

Keywords: artificial intelligence (ai), analytical thinking, critical thinking, problem-solving, student learning, technology in education, over-reliance, cognitive development, personalized learning, bestlink college of the philippines

**UTILIZATION OF COMMUNI-CRAFT WORKSHEETS IN IMPROVING THE
FLUENCY AND ACCURACY OF FRESHMEN ENGLISH MAJOR
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Alyssa Frances Ching, Julie Balgacion, Patricia Nicole Nacua, Kyla Marie Obejas,
John Marc Tañare, Dr. Romeo Fernandez

Abstract

The purpose of this study is to investigate the effectiveness of Communi-Craft Worksheets in enhancing the fluency and accuracy of freshman English majors at Bestlink College of the Philippines. In the context of language development, worksheets serve as effective tools in fostering essential linguistic skills such as correct pronunciation, smooth and natural speech delivery, appropriate grammar usage, and proper language generation. For maximum effectiveness, these worksheets should align with the learners' abilities and specific learning objectives, functioning as targeted instructional materials. This study aims not only to expand the existing body of knowledge but also to determine whether the use of CommuniCraft Worksheets significantly contributes to the improvement of students' language fluency and accuracy. The study employed an experimental research design, utilizing pre-tests and post-tests to assess the language skills of participants before and after the intervention. The respondents consisted of fifty (50) students from BSED 1102-E, selected through purposive sampling. The intervention involved the administration of five task-based Communi-Craft Worksheets for one week, each designed to target specific aspects of language fluency and accuracy. The post-test scores revealed that students demonstrated increased confidence in expressing complex ideas, using correct grammar, and communicating more clearly. However, several challenges were encountered in the use of the Communi-Craft Worksheets. These included unclear instructions and limited time for completion, which affected the effectiveness of the worksheets for some students. To address these issues, the researchers recommend that teachers adapt the worksheets based on the students' time requirements and ensure that all instructions are communicated. The statistical results revealed a significant difference between the pre-test and post-test scores, leading to the rejection of the null hypothesis. These findings highlight the effectiveness of utilizing Communi-Craft Worksheets in enhancing the fluency and accuracy of freshman English majors. The results suggest that the integration of such worksheets can significantly improve students' language proficiency. Teachers are encouraged to incorporate Communi-Craft Worksheets into their lesson plans to provide structured practice and support language development. To maximize their effectiveness, it is recommended that clear instructions be provided and sufficient time be allotted for each activity to address the challenges identified during implementation.

Keywords: communi-craft worksheets, fluency, accuracy, language learning, experimental research, pre-test, post-test, freshman english majors, instructional materials, grammar, communication skills, purposive sampling, language development, teaching strategies

**UTILIZATION OF CONTENT GENERATION TOOLS AS PERCEIVED BY GRADE 12
HUMSS STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Dahnniellah Geraldo, Gabrielle Gerard Gonzales, Christopher Tanteo,
Antonio Luis Fernandez, Garry Bill Guan, Rica Mae Berja

Abstract

Technology-supported education fosters an information-rich environment and encourages autonomous learning, driving innovation and the development of practical skills. Understanding emerging educational trends is essential for informed policymaking, helping schools adapt to evolving technological landscapes and enhance learning outcomes. When integrated effectively, technology can stimulate creativity by providing students with tools such as digital design software. These tools support brainstorming, project development, and real-time feedback, thereby enriching students' creative processes. This study utilized the cluster sampling technique to ensure an unbiased and representative survey. Cluster random sampling is a probability sampling method in which a large population is divided into smaller groups, known as clusters, and a random selection of these clusters is used to form the sample. This approach helps ensure that the data collected accurately reflects the characteristics of the overall population. A survey questionnaire served as the primary research instrument. Surveys are widely used in the social sciences to gather evidence on knowledge, attitudes, and behaviors. In the context of health care and education, they are also valuable for quantifying qualitative insights and informing policy decisions. By asking structured questions to selected individuals, a survey-based research design enables researchers to generalize findings from the sample to the broader population. Table 2 shows that computer collaboration can enhance students' creativity, particularly in presentations. The highest-ranked item, with a weighted mean of 3.78, is the statement: "Visual design captures attention, and more appealing designs are likely to receive the most attention," which was rated as Strongly Agree. This chapter presents the summary of findings, conclusions, and the proposed recommendations or action plan. Its primary purpose is to provide an overview of the study's key insights and outcomes. The findings indicate that the effectiveness of enhancing creativity through computer collaboration is rated as "Strongly Agree", particularly in terms of cognitive enhancement and entertainment. However, the most commonly encountered challenge in computer collaboration is related to productivity. In response to these findings, an action plan has been proposed to assess the utilization of content generation tools as perceived by Grade 12 HUMSS students at Bestlink College of the Philippines.

Keywords: computer collaboration, creativity enhancement, content generation tools, grade 12 humss students, productivity challenges, cognitive development, educational technology, bestlink college of the philippines, action plan, survey research

**UTILIZATION OF DEMONSTRATION EQUIPMENT: BASIS FOR DEVELOPMENT OF
SKILLBOOK TO ENHANCE LEARNING AMONG BTLED STUDENTS**

Austria England Israel, Erwin Aggabao, Jessica Rose Calvadores, Michaela Jean Penas,
Gerro Gerlottle Rodriguez, Abraham Muyrong II

Abstract

The purpose of this study is to assess the effective utilization of demonstration equipment as a foundation for developing a skill book designed to enhance learning among Bachelor of Technology and Livelihood Education (BTLED) students at Bestlink College of the Philippines. Specifically, the research explores how hands-on learning using demonstration equipment influences students' comprehension and skill development in practical and technical subjects. The study employed stratified sampling techniques and a descriptive research method to analyze and present the data. A total of 80 BTLED students from the first and second years at Bestlink College of the Philippines participated in the study. A survey questionnaire served as the primary instrument for data collection. The demographic profile of the respondents indicates that the majority are female and fall within the age range of 18 to 20 years old. In terms of the impact of demonstration equipment on learning development, respondents strongly agreed that it significantly enhances their understanding, learning styles, academic performance, and overall effectiveness, contributing to long-term knowledge retention. In response to these findings, a skill book was developed to enhance students' practical abilities and serve as a supplementary learning resource aligned with the existing curriculum. To address the specific needs of BTLED students, the skill book includes well-structured exercises, step-by-step demonstration instructions, and appropriate evaluation tools. The researchers developed a skill book to enhance the learning experience of BTLED students by providing a structured and practical guide for acquiring and refining essential competencies. Unlike traditional textbooks, the skill book emphasizes hands-on applications through step-by-step instructions, targeted exercises, and assessment tools. This approach supports independent learning, encourages experimentation, and enables immediate feedback, critical components in fostering active engagement. In technology and livelihood education, where outcomes are rooted in practical execution, the skill book proves indispensable. It aids students in internalizing concepts through direct application, thereby improving both retention and comprehension. Beyond equipping students with technical skills, the skill book also prepares them for the evolving demands of the workforce, nurturing adaptability and a mindset for lifelong learning. Ultimately, this learner-centered resource demonstrates the transformative power of education that is aligned with real-world needs.

Keywords: skill book, btled students, hands-on learning, practical competencies, technology and livelihood education, independent learning, learning retention, workforce readiness, lifelong learning, learner-centered approach

**UTILIZATION OF DIGITAL TOOLS IN ENHANCING STUDENT'S ENGAGEMENT OF
GRADE 12 HUMANITIES AND SOCIAL SCIENCES STUDENTS
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Joellyn Quiñones, Angel Ann Faith Dinopol, Gemron Mancio,
Shawn Eisem Sabado, Cedrick Viernes, Christopher Azares

Abstract

Digital tools have revolutionized the learning process by enhancing both educational outcomes and student engagement. Within the Grade 12 Humanities and Social Sciences (HUMSS) strand at Bestlink College of the Philippines, there is a growing need to integrate these tools to foster interactive and dynamic learning experiences. However, the effectiveness of such tools in this specific context remains unclear. This study aims to evaluate the impact of digital learning tools on academic achievement and student participation, to provide insights and recommendations for improving teaching methodologies. To identify the role of students and the impact on learning outcomes, this study employed a descriptive quantitative research approach integrated with evaluative research. Cluster sampling was used to select respondents from the Grade 12 HUMSS strand. A structured survey was administered to gather data on students' experiences with and perceptions of digital technologies. The collected data were systematically assessed to evaluate the effectiveness of these tools in supporting academic performance and engagement. This study explores the role of digital tools in enhancing student engagement and learning outcomes among Grade 12 Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. Findings indicate that the Learning Management System (LMS) is the most widely used digital tool, with students strongly agreeing (mean = 3.38) that it facilitates access to learning materials, supports organization, and encourages participation in discussions. E-learning tools also play a vital role, with a composite mean of 3.37, aiding students in tracking academic progress, accessing diverse learning resources, and engaging in interactive lessons. Similarly, video conferencing tools received a mean score of 3.37, proving effective in helping students catch up on missed lessons and receive real-time feedback from instructors. Despite these benefits, challenges such as digital illiteracy and issues in time management remain prevalent, affecting approximately 110 students (17%) in both areas. Digital learning tools play a pivotal role in promoting student engagement and academic achievement by providing accessible learning materials, interactive platforms, and opportunities for real-time collaboration. The results highlight the critical importance of integrating technology into education to strengthen students' digital literacy, problem-solving abilities, and collaborative skills. However, the effectiveness of these tools depends heavily on factors such as accessibility, teacher training, and the quality of implementation. To fully harness the benefits of digital learning, it is essential to address technical challenges, improve digital literacy, and support students in developing effective time management skills.

Keywords: digital learning tools, student engagement, learning outcomes, digital literacy, interactive learning, real-time collaboration, technology integration, time management, teacher training, bestlink college of the philippines

**UTILIZATION OF DIVISION IN MATH GO BOX IN TEACHING DIVISION IN
MATHEMATICS OF GRADE 3 LEARNERS**

Cazandra Mae Jayan, Geraldine Caloyloy, Cathyrine Sollestre, Christian Gomez,
Jan Marie Reizelle Destajo, Ryan Christopher Villalon

Abstract

Division plays a vital role in developing students' problem-solving, critical thinking, and analytical skills, making it a foundational component of education as emphasized in RA 10533, Section 15. Although often challenging, children naturally possess intuitive ideas about division that can be enhanced through effective teaching methods. Strategies such as gamification and the use of authentic materials have been shown to make learning division more engaging and effective, ultimately leading to improved student performance. This causal-comparative study evaluated the effectiveness of the Math Go Box in improving the division skills of Grade 3 students. Involving 34 participants, the research used pre-test and post-test assessments, along with qualitative feedback. Results revealed a statistically significant improvement in students' division performance, demonstrating that the Math Go Box is an effective tool for enhancing mathematical learning outcomes. The study analyzed pre-test, post-test, and survey data from Grade 3 students to assess the impact of the Math Go Box on division proficiency. Most students were 8 years old and predominantly male. A majority had a GWA between 81–85. The Math Go Box effectively improved division skills, as evidenced by post-test gains, though it had a limited effect on resolving learning difficulties. Statistical analyses showed no significant correlation between student demographics (age, gender, GWA) and post-test outcomes, indicating that the Math Go Box benefits learners regardless of background. This study evaluated the effectiveness of the Math Go Box in enhancing division skills among Grade 3 students. The majority of participants were 8 years old, 59% male, and 73% had a GWA of 81–85. Initial pre-test scores indicated low proficiency in both division facts and processes. However, post-test results revealed substantial improvement, with learners achieving proficiency and high proficiency levels. Statistical analysis confirmed the significance of the improvement ($z = -37.8005$, $p < 0.00001$). Overall, the Math Go Box proved to be an effective instructional tool for teaching division.

Keywords: math go box, grade 3 learners, division skills, pre-test and post-test, proficiency levels, teaching effectiveness, statistical analysis, learning improvement, gwa, educational tool

**UTILIZATION OF LEARNED LIVE LESSON (3L'S) IN
READING SKILLS OF GRADE 3 PUPILS**

Moreno Den J, Cathlyn Anne Alviola, Elizabeth Lagando, Joane Mae Rodriguez,
John Reeve Tuibuen, Ryan Christopher Villalon

Abstract

This study explores the use of Learned Live Lessons (3L's) to enhance reading skills among Grade 3 pupils and examines students' perceptions of technology-based learning in primary education. By making learning more interactive and engaging, 3L's aim is to improve comprehension and retention. Citing Niala (2023), the study emphasizes that poor reading comprehension can negatively impact performance across subjects. Guided by a revised theory by Opoku, the findings will serve as a framework for effectively implementing 3L's materials to support reading development. This study utilized quantitative causal-comparative research design to evaluate the effectiveness of Learned Live Lessons (3L's) on the reading skills of Grade 3 pupils at Tandang Sora Elementary School. Forty students were purposively selected as respondents. Data were collected using validated survey questionnaires, pre-tests, and post-tests, and were analyzed through statistical tools such as frequency, percentage, ranking, weighted mean, Likert scale, and z-test to assess significant differences and perceptions related to the learning intervention. The study found that the Learned Live Lesson (3L's) is highly effective in enhancing the reading skills of Grade 3 students. All evaluated components, comprehension (mean = 3.73), fluency (3.63), phonemic awareness (3.53), phonics (3.70), and vocabulary (3.73), received a verbal interpretation of "strongly agree," indicating strong student affirmation of improved skills across all domains. The study revealed that Grade 3 students showed marked improvement in reading skills after using the Learned Live Lesson (3L's) platform. Pre-test results without the intervention showed a mean score of 18.43 ("proficient"), while post-test results with the intervention improved significantly to a mean score of 33.53 ("highly proficient"). These findings support the conclusion that 3Ls is an effective tool for enhancing primary learners' reading abilities.

Keywords: learned live lesson (3l's), reading skills, grade 3 pupils, technology-based learning, comprehension, fluency, phonemic awareness, phonics, vocabulary, quantitative research, causal-comparative design, tandang sora elementary school

**UTILIZATION OF LEARNING MANAGEMENT SYSTEM AS PERCEIVED BY SENIOR
HIGH SCHOOL STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

John Rey Docdoc, Abejean Benedicto, Nike Brejente, Janus Lascano,
Antony Ochua, Kevin Salva, Christopher Azares

Abstract

This study explores the widespread adoption of Learning Management Systems (LMS) in the Philippines during the COVID-19 pandemic, with a specific focus on senior high school students at Bestlink College of the Philippines. Although over 85% of secondary schools have integrated LMS into their online learning strategies, challenges such as unequal access to technology, varying levels of digital literacy, and inconsistent academic outcomes remain. The research aims to evaluate the effectiveness and optimal use of LMS in enhancing students' academic performance amid these persistent issues. The study utilized a descriptive research design with cluster sampling to gather data from 200 senior high school students at Bestlink College of the Philippines. Focusing on three key areas: time management, accessibility, and the efficacy of LMS usage, the research aimed to understand students' experiences and evaluations of LMS. The findings highlighted how demographic factors intersect with students' perceptions of LMS effectiveness, offering insights into optimizing digital learning environments for improved academic outcomes. The findings reveal that only 65% of students experienced improved academic performance with LMS use, largely hindered by inadequate teacher feedback and low engagement. Common issues include unequal access to digital tools and varying levels of digital literacy among both students and educators. To address these challenges and enhance the effectiveness of LMS platforms, the study recommends ensuring equitable technology access, offering teacher training programs, and integrating interactive learning content to foster greater student involvement and academic success. The study found that most respondents were female students aged 15–17, predominantly from the HUMSS strand. Overall, students held a favorable view of the Learning Management System (LMS), especially highlighting its benefits for time management and accessibility across various devices. While the LMS was deemed helpful in understanding complex subjects, recurring issues such as poor internet connectivity, limited technical support, and lack of timely feedback were noted as barriers to optimal usage.

Keywords: learning management system (lms), academic performance, time management, accessibility, digital literacy, teacher feedback, internet connectivity, technical support, senior high school, bestlink college

**UTILIZATION OF LEARNING TOOLS FOR STUDENT ENGAGEMENT AS
PERCEIVED BY GRADE 12 HUMANITIES AND SOCIAL SCIENCES**

Jizhen Bayon-on, Shynadalia Abbatuan, John Drille Bequiso, Sharlyn Flores,
Maeann Haro, Mohaimin Tuano, Rica Mae Berja

Abstract

This research aims to find out how learning tools impact student participation by focusing on the experiences of students at Bestlink College of the Philippines and determining requirements for successful technology integration. In addition, the review of related literature includes age, gender, digital platforms, access to learning tools, learning styles, and academic performance. This research seeks to improve the application of technology in the classroom and thus create a more inclusive environment where all students can learn better. The research methodology used descriptive and exploratory quantitative research design and cluster sampling techniques, with a sample of 210 respondents. Survey questionnaires covered demographic profiles (age, gender, and digital platforms), access to learning tools, learning styles, academic performance, and challenges encountered in utilizing those tools. This study aims to produce insights into strategies that would improve education outcomes. The results indicated that most respondents were 17 years old (54.09 percent), with a slight female majority of 51.36 percent. The most commonly owned digital device is the smartphone (69.09 percent), while 5.91 percent of the students have no devices at all. Strong agreement (mean = 3.4) regarding access to learning tools was indicated, with students noting that learning tools accommodate multiple learning styles well (mean = 3.38), while automated tools are viewed as having a positive influence on academic performance (mean = 3.22). As for challenges, respondents ranked time management (67.14 percent), stress (65.23 percent), and financial barriers (57.14 percent) as the main challenges to engaging effectively with learning tools. In the discussion, an action plan is proposed; this includes digital literacy enhancement, establishment of community technology hubs, and time management workshops. The study underlines the need for equitable access to technology and resources in order to develop an inclusive learning environment that would promote student engagement and, in turn, improve academic performance. This research also contributes to understanding how learning tools can be useful in aiding student engagement, placing emphasis on closing the digital divide, and offering support to students as they navigate challenges that come with modern learning environments.

Keywords: learning tool, digital divide, student engagement

**UTILIZATION OF PHONO-DEO IN INTEGRATING PHONOLOGICAL AWARENESS TO
FRESHMEN ENGLISH MAJORS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Mc Clarence Andal, Medel Joy Blanco, Arabhela Dela Cruz, Lexter Freach Erasmo,
Mark Louie Tamayo, Dr. Romeo Fernandez

Abstract

Phonological awareness is a critical foundational skill for learning to read in any alphabetic writing system. According to Erbs (2021), this skill can be developed through a wide range of instructional strategies. However, a gap remains in understanding how the duration of students' academic exposure affects the development of phonological awareness. In recent years, technology has increasingly supported teaching and learning processes through the use of audio-visual materials. Given the Philippines' fluctuating rankings in global language proficiency assessments, these challenges may be attributed to the varying levels of learners' language skills, highlighting the need for targeted and sustained phonological instruction. To collect the necessary data, the researchers employed an experimental approach using pre-test and post-test measures to evaluate the respondents' progress and understanding in phonological awareness. A researcher-made instrument was developed specifically for this purpose, structured to assess phonological awareness across three distinct levels: the phoneme level, syllable level, and word level. This design allowed for a comprehensive evaluation of the learners' phonological skills before and after the intervention. The respondents of the study were freshman English majors from Section 1201. Out of the 49 participants, 93.8% demonstrated significant progress in the post-test following the presentation of Phono-deo. Despite this improvement, several challenges were observed during the assessment. These included unfamiliarity with certain words, limited learning opportunities, and pronunciation difficulties influenced by variations in native dialects. After thorough analysis and interpretation of the gathered data, the researchers found that the majority of freshman English major students demonstrated a lack of phonological awareness. One of the primary challenges identified was word unfamiliarity, which can be attributed to the absence of paced and structured instruction. Students showed difficulty in distinguishing, segmenting, and blending words, syllables, and sounds. However, following the implementation of Phono-deo, a notable improvement was observed in the post-test results. The instructional material proved to be effective, significantly aiding students in developing their ability to accurately identify and manipulate sounds, thereby enhancing their overall phonological skills.

Keywords: phonological awareness, phono-deo, english majors, instructional material, pre-test and post-test, word recognition, syllable segmentation, sound manipulation, dialect interference, language learning

**UTILIZATION OF POWTOON WEBSITE ON THE TEACHING LEARNING PROCESS OF
ARALING PANLIPUNAN TEACHERS AT BAGONG SILANG HIGH SCHOOL**

Jemar Ejorcadas, Janna Baloro, Jhon Paul Jeniel Lopez, Michael Lorena,
Crispin Ortiz, Abraham Muyrong II

Abstract

The integration of ICT in education is essential for preparing students for the digital age, as emphasized by UNESCO (2023) and the Philippines' Department of Education (2020). Despite its potential to create engaging learning environments, challenges in implementation remain. One promising approach is the use of animated videos, particularly through tools like Powtoon. According to ELM Learning (2020), Powtoon is a user-friendly online platform designed for creating animated videos for educational purposes. Research has shown that Powtoon can enhance student engagement, motivation, and comprehension. This study examines the impact of Powtoon on the teaching–learning process among Araling Panlipunan teachers at Bagong Silang High School. This study employs a descriptive research design with a quantitative approach to examine the use of Powtoon in the teaching–learning process of Araling Panlipunan teachers at Bagong Silang High School during the 2024–2025 academic year. Thirty teachers were selected through purposive sampling, and data were gathered using a questionnaire divided into three sections. The findings aim to provide insights into the integration of Powtoon in classroom instruction and its impact on both teaching and learning experiences. The study found that the use of Powtoon positively impacts the teaching–learning process of Araling Panlipunan high school teachers in several areas: instructional creativity, with a composite mean of 3.31 (strongly agree); communication, 3.23 (agree); time efficiency, 3.20 (agree); and professional development, 3.27 (strongly agree). However, challenges were also identified, including internet connectivity issues, with a composite mean of 3.37 (strongly agree); limited computer application literacy, 3.43 (strongly agree); and the availability of specific gadgets, 3.39 (strongly agree). In conclusion, age, gender, and teaching experience do not significantly influence the use of Powtoon among Araling Panlipunan teachers. Educators recognize Powtoon as an effective tool that enhances instructional creativity, communication, time efficiency, and professional development. However, challenges such as poor internet connectivity, limited computer application literacy, and restricted access to specific devices must be addressed to fully maximize Powtoon's potential in improving the teaching–learning process.

Keywords: ict in education, modern learning, powtoon, technology in education

**UTILIZATION OF TECHNOLOGY IN ENHANCING GROUP PRESENTATION AMONG
GRADE 12 HUMSS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Jennifer Nicole Escanier, Mariel Feliciano, Justine Villaflores,
Maynard Cabanlong, John Bryan Poseo, Rica Mae Berja

Abstract

This research study examines how Grade 12 Humanities and Social Sciences (HUMSS) students utilize technology to enhance their group presentations. It explores the different types of digital tools they use, as well as the ways these tools contribute to improving the quality and delivery of their presentations. The study also investigates the challenges students encounter during the preparation and execution of their presentations, and how they collaboratively address these issues with the help of technology. Ultimately, this research focuses on students' perspectives, providing insight into how technology supports both the creative and problem-solving aspects of group presentations. This research utilized an exploratory research design to gather insights from two hundred twelve (212) Grade 12 HUMSS students at Bestlink College of the Philippines. A cluster sampling technique was employed to select respondents. Data was collected through a survey questionnaire distributed by the researchers. The analysis included frequency counts to show how often values occurred, percentages to indicate parts of a whole, and rankings to describe each indicator of the variables. A Likert scale was also used to determine the weighted mean for evaluating responses. The results of the data gathered in this study consist of six variables. Collaboration obtained a composite mean of 3.41, creativity had a composite mean of 3.48, and engagement recorded a composite mean of 3.42. In terms of multimedia, design tools, and resource sharing, the composite mean was 3.33. All variables received ratings that fall under the interpretation of "Strongly Agree." The action plan proposed by the researchers aims to enhance group presentations by addressing the challenges encountered by students, particularly those related to resource limitations, communication breakdowns, and technical issues during presentations. The summary of findings presents the results of the analysis and interpretation, while the conclusion encapsulates the study's key outcomes. The primary aim of this research is to gather information from Grade 12 students under the Humanities and Social Sciences (HUMSS) strand to determine how technology has improved group presentations, specifically in terms of collaboration, design tools, and resource sharing. Additionally, the study identifies the most useful tools that facilitate the creation of group presentations and explores how technology enhances the overall process. It also examines the challenges that Grade 12 students face during group work and presentations, providing insights for targeted improvements.

Keywords: technology in education, group presentations, academic efficiency

**UTILIZATION OF TIKTOK IN ENHANCING THE GRAMMAR OF GRADE 11 ABM
STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Jhonmark Alvarez, Rhea Caubalejo, Kim Briant Lopez, Courtney Serafin,
Julie Ann Tejero, Dr. Romeo Fernandez

Abstract

The purpose of this study is to determine the impact of TikTok on enhancing the grammar skills of Grade 11 ABM students at Bestlink College of the Philippines, considering variables such as age, gender, and section. The study employed a quasi-experimental design and involved fifty (50) Grade 11 ABM students during the academic year 2024–2025. It aims to explore how TikTok is utilized as a tool for improving students' grammar and to assess its effectiveness in fostering better language skills. This study employed a quasi-experimental design. According to Thomas (2024), a quasi-experimental design aims to establish a cause-and-effect relationship between an independent and a dependent variable. Unlike true experiments, this approach does not randomly assign individuals to conditions or sequences of conditions but still involves the manipulation of an independent variable. Common types include time-series designs with interruptions, pretest-posttest formats, and nonequivalent group designs. In this study, the features of the quasi-experimental design were applied to determine the contribution of TikTok in enhancing students' grammar skills. Based on the results of the study, the majority of students who used TikTok are between 15 and 18 years old, accounting for 96% of respondents, while 4% are aged 19 to 22. Most of the respondents are female (76%), with males making up 24%. The findings reveal that TikTok grammar lessons significantly enhance students' grammar skills. In particular, these lessons help students grasp complex grammar concepts more easily, develop a deeper understanding of the parts of speech, and improve their ability to use grammar correctly in various contexts. To sum up, this study provides valuable insights and practical recommendations for enhancing students' grammar skills. The Grade 11 ABM students at Bestlink College of the Philippines describe themselves as advanced in using technology and social media, particularly in watching educational videos, to acquire knowledge and improve their grammar proficiency.

Keywords: tiktok, modern technology, grammar improvement, technology in education

**UTILIZATION OF TURN-TABLE IN IMPROVING
MATHEMATICAL SKILLS OF GRADE 3 PUPILS**

Micaela Antipon, Judy Ann Guelan, Joan Hermosura, Mae Jane Javar,
Sheena Pellazar, Justine Lyn Fernandez

Abstract

This study examined the effects of the Multiplication Turn-Table instructional material on the multiplication skills of third-grade students at San Bartolome Elementary School. A total of 50 respondents participated, with 20 from Section Narra and 30 from Section Kamatsile. To measure students' multiplication skills before and after the intervention, the researchers developed and administered a pre-test and post-test. This study employed a causal-comparative design, with 50 students from San Bartolome Elementary School selected through purposive sampling. A pre-test and post-test were administered to gather the necessary data. The researchers analyzed the results using statistical tools, including percentage, weighted mean, and Z-test, to evaluate the effectiveness of the Multiplication Turn-Table instructional material. The findings revealed that 75% of the respondents were aged 8–9 years old, and 83% were male. A comparison of pre-test and post-test scores was conducted to assess performance. During the pre-test, mean scores were 8.34 and 2.80, while in the post-test, mean scores were 8.26 and 3.30. The results indicated that Grade 3 students at San Bartolome Elementary School showed significant improvement in their multiplication skills after using the Multiplication Turn-Table instructional materials. The turntable was found to support various learning styles and enhance numeracy skills. However, challenges were noted, such as the need to strengthen connections between multiplication and real-world math applications. To further improve students' skills, the researchers recommend integrating theoretical knowledge with practical activities, incorporating interactive and age-appropriate materials, and providing regular feedback from instructors. Based on the results, teachers are encouraged to use turn-tables to address different learning styles and guide students in effectively using instructional materials. Parents can make multiplication more engaging by incorporating games, quizzes, and prizes into learning activities. Students should be encouraged to actively participate, explore concepts, and apply their knowledge in real-world situations. School administrators are advised to align instructional materials with the curriculum, provide training sessions for teachers, and ensure adequate resources are available for all learners. For future research, studies could examine the effectiveness of similar instructional tools in developing mathematical skills, allowing for comparisons and identification of emerging trends.

Keywords: multiplication turntable, learning styles, instructional materials, student engagement, active participation

**UTILIZATION OF W.I.S.E. AS A SUPPLEMENTARY TOOL IN TEACHING 21ST
CENTURY LITERATURE AMONG SENIOR HIGH SCHOOL STUDENTS
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Chelsea Gloria, Trisia Mae Morante, Girlie Navera, Ronald Carlo Samaniego,
Angel Joy Silvestre, Dr. Romeo Fernandez

Abstract

This study highlights the evolving landscape of education, particularly in senior high school, where traditional teaching methods are being enhanced through technology. Focusing on the 21st Century Literature subject, which explores diverse literary works and devices, the integration of technology is seen as a powerful tool to increase student engagement and enrich learning experiences. The shift aims to make literature more accessible and meaningful, benefiting both educators and learners in today's digital age. This study employed a quasi-experimental research design to evaluate the effectiveness of W.I.S.E. (Website for Interactive Self-Paced E-Learning) in teaching 21st Century Literature. The researchers conducted the study with thirty-eight STEM students from Bestlink College of the Philippines, using purposive and convenience sampling techniques to select participants. The goal was to determine how digital tools like W.I.S.E. can enhance literature education in a senior high school setting. The results reveal a significant difference in the post-test and retention test scores between the two groups of students. This finding suggests that the use of W.I.S.E. (Website for Interactive Self-Paced E-Learning) in teaching 21st Century Literature had a measurable and positive impact on students' learning and knowledge retention compared to traditional methods. The researchers recommend the integration of the W.I.S.E. (Website for Interactive Self-Paced E-Learning) platform in teaching 21st Century Literature to improve students' knowledge and skills. The program supports interactive and self-paced learning, making it a valuable tool for enhancing student engagement and academic performance in literature education.

Keywords: w.i.s.e., 21st century literature, self-paced learning, interactive education, senior high school, quasi-experimental, stem students, digital pedagogy, learning outcomes, educational technology

**UTILIZING AUDIO VISUAL LEARNING ON REMEDIAL TEACHING TO SELECTED
SENIOR HIGH SCHOOL STUDENTS IN BESTLINK COLLEGE OF THE PHILIPPINES**

Mark Joseph Empleo, Mary Grace Billena, Devane Claire Custodio,
Marrianna Aguilar, John Michael Agupasa, Dr. Romeo Fernandez

Abstract

The researchers focused on selected Grade 11 Humanities and Social Science students at Bestlink College of the Philippines to investigate the effectiveness of using audio-visual learning in remedial teaching. With the growing integration of technology in education, the study specifically examined how audio-visual methods can enhance listening and viewing comprehension skills. Using probability techniques, specifically purposive sampling, the researchers aimed to address the study's questions. A quantitative research design was employed, covering the respondents of the study, sampling method, research instruments, construction and validation of the instrument, administration and retrieval procedures, and statistical data treatment. A pre-test and post-test were developed to measure respondents' capabilities before and after the use of the instructional material, which was the Audio-Visual Learning Application. The findings present the data collected through the research instruments, showing a significant difference between the pre-test and post-test scores after using audio-visual learning. The results indicate variations in mean and standard deviation, demonstrating notable improvements in respondents' performance. This suggests that audio-visual learning had a substantial positive effect on their listening and viewing comprehension skills. The study concludes that the use of audio-visual learning in remedial teaching significantly improved respondents' listening and viewing comprehension. Watching the instructional video enhanced their understanding of subject-verb agreement.

Keywords: audio visual learning, remedial teaching, technology in education

**UTILIZING PHONICS ASCEND IN SPEAKING SKILLS OF GRADE 1 PUPILS
IN TANDANG SORA ELEMENTARY SCHOOL**

Rafael Ando, Joyce Ann Jason, Ysabel Louise Posada, Yumi Ann Reyes,
Rowa May Tolitol, Ryan Christopher Villalon

Abstract

Phonics, the science of sound, is a method of teaching reading that focuses on the sounds and visual forms of individual letters and letter groups. By learning to blend these sounds, children can more effectively decode unfamiliar words. According to Baron R. (2020), speaking is one of the four essential skills students use in daily life to communicate and understand others. The researchers employed a quantitative approach using a causal-comparative design, with purposive sampling of thirty (30) Grade 1 Dulpina pupils from Tandang Sora Elementary School as respondents. Guided by Vygotsky's Zone of Proximal Development (ZPD) theory, as cited by Wang S. et al. (2020), the study examined the gap between what learners can accomplish independently and with guidance from teachers or peers. The ZPD framework highlights intellectual, linguistic, and creative potentials awaiting development. The study aimed to identify factors influencing the speaking skills of Grade 1 pupils and to create instructional materials tailored to their needs. The data revealed that Phonics Ascend significantly improved the speaking skills of Grade 1 pupils. Post-test results indicated very high proficiency in fluency (mean = 9.43), grammar (mean = 9.73), and pronunciation (mean = 9.53), with an overall mean score of 28.70, interpreted as very high proficient. In contrast, the pre-test yielded a total mean score of 18.70, interpreted as proficient, highlighting a substantial improvement after the intervention. The study found that Phonics Ascend significantly improved the speaking skills of Grade 1 pupils, with notable gains in fluency, grammar, and pronunciation. The substantial difference between pre-test and post-test scores confirms the effectiveness of phonics-based instructional materials. Guided by the ZPD framework, targeted support enhanced not only students' speaking proficiency but also their overall intellectual and linguistic development.

Keywords: instructional material, phonics, pronunciation, speaking skills

**UTILIZING SPEECH MIRRORING STRATEGY IN DEVELOPING THE ENGLISH
CONVERSATIONAL SKILLS OF GRADE 11 SENIOR HIGHSCHOOL STUDENTS**

Shiela Malvas, Rosegene Banquerigo, Nicole Carolino, Gemmalyn Panes,
Angiely Romero, Dr. Romeo Fernandez

Abstract

This study examines the effectiveness of speech mirroring strategies in enhancing the English conversational skills of Grade 11 Senior High School students at Bestlink College of the Philippines. The study utilized a quasi-experimental design with pre-test and post-test assessments to evaluate the impact of speech mirroring on students' conversational abilities. Data was collected from 60 participants through questionnaires and observation rubrics. The findings revealed a significant improvement in students' conversational skills following the implementation of speech mirroring strategies. The study concludes that speech mirroring is an effective pedagogical approach for enhancing English conversational proficiency among senior high school students. The study found that speech mirroring strategies significantly improved the English conversational skills of Grade 11 students at Bestlink College of the Philippines. While the approach proved effective, further research is recommended to explore its impact on students' authenticity and to tailor its application to individual learning styles and communication preferences. These findings offer valuable guidance for educators, curriculum designers, and policymakers aiming to strengthen English language proficiency and communication skills among Filipino students.

Keywords: speech mirroring strategies, pedagogical technique

**UTILIZING VIDEO LESSON IN TEACHING SPOKEN POETRY AMONG HUMANITIES
AND SOCIAL SCIENCES STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Mary Jane Mendoza, Ashley Jane Abestilla, Cindy Comendador,
Lenie Sumalinog, Ryan Perdon, Dr. Romeo Fernandez

Abstract

This study investigates the effectiveness of using video lessons to teach spoken poetry to Humanities and Social Sciences (HUMSS) students at Bestlink College of the Philippines. With the growing integration of technology in education, video lessons provide an engaging and flexible method to enhance students' creativity and communication skills. Using an experimental research design, this study examines how video lessons enhance students' understanding, engagement, and delivery of spoken poetry. Purposive sampling was employed to select students with varying levels of interest and skill in poetry, ensuring a diverse and representative sample. The research instruments included instructional materials, video lessons, learning activity sheets, and survey questionnaires, which facilitated content delivery, assessed learning outcomes, and collected student feedback. Results indicate a significant improvement in students' performance, with post-test scores markedly higher than pre-test scores, demonstrating the effectiveness of video lessons in enhancing comprehension of poetic elements and techniques. The study concludes that video lessons serve as an effective educational tool for teaching spoken poetry. It recommends the ongoing creation of high-quality, engaging, and accessible video content to further enhance student learning outcomes.

Keywords: video lessons, spoken poetry, video-based instructions, technology in education

**UTILIZING WORKSHEETS IN TEACHING ESSAYS AMONG GRADE TWELVE
HUMANITIES AND SOCIAL SCIENCES STUDENTS AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Angelica Marie Salonga, Rhona Marie Ensertado, Sheena Gumera,
Arlene Rivera, Franchesca Sumpo, Dr. Romeo Fernandez

Abstract

This study examines the use of worksheets in teaching essay writing among Grade 12 Humanities and Social Sciences students at Bestlink College of the Philippines. Its primary objective is to evaluate how worksheets are utilized in teaching essay writing and to assess students' competency levels in writing. The study aims to improve student learning outcomes and enhance teaching strategies by focusing specifically on Grade 12 Humanities and Social Sciences students at Bestlink College. The researchers employed a non-probability sampling technique, specifically convenience sampling, to select respondents for the study. To assess the students' understanding of various types of informative essays taught, the researchers used specially designed worksheets as the primary evaluation tool. The results showed that most students were aged 17–18, with an equal number of boys and girls. They demonstrated strong skills in clarity, originality, and time management but faced difficulties with essay conventions, organization, and grammar, particularly in analytical essays. A sample of students' writing skills was assessed before and after completing the worksheet tasks. The data analysis provides theoretical and statistical evidence supporting the effectiveness of the instructional interventions used. However, challenges such as limited time, comprehension difficulties, network issues, and confusing content structure were also identified. These obstacles highlight the need for enhanced teaching methods and improved learning materials, including better-designed worksheets, to help students overcome these barriers and further develop their writing skills.

Keywords: worksheets, informative essays, writing skills, teaching strategies

**WORKING STUDENT: IT'S IMPACT ON THE ACADEMIC
PERFORMANCE OF CRIMINOLOGIST**

Maria Flor Atanoso, April Joy Peral, Reinard Hiram Lazaro,
Mark Anthony Turdillo, Reymark Bitoon, Reymundo Javier

Abstract

First-year criminology students often encounter unique challenges as they navigate the demands of higher education alongside part-time or full-time employment. Managing the dual responsibilities of work and study can affect their academic success, mental well-being, and overall college experience. Given the intensive and emotionally challenging nature of criminology, it is essential to understand how working impacts these students. This study aims to examine the experiences, coping mechanisms, and academic performance of first-year criminology students who work while studying. By identifying key stressors and support systems, the research intends to guide institutions in providing better assistance to students balancing both roles. This study utilized a quantitative research approach, selecting fifty (50) participants from the Department of Criminology at Bestlink College of the Philippines to take part in the research. The findings indicate that most students perceive working while studying as having a significant effect on their academic performance. This study emphasizes the need for effective strategies to manage the dual responsibilities of work and education, enabling students to enhance their academic engagement and overall success. Teachers are encouraged to support Criminology students in balancing their work and academic responsibilities effectively. This study seeks to help students develop better time management skills to successfully fulfill both their employment and academic obligations.

Keywords: working students, academic performance, time management, criminology students, work-study balance, student engagement, higher education support

CHARTING CAREER PATHS: A TRACER STUDY ON THE EMPLOYABILITY OF BSTM GRADUATES AT BESTLINK COLLEGE OF THE PHILIPPINES, SY 2022-2023

Rufert Agi Labrador, Karen Cate Amor, Jelyn Garganta, Roselyn Merin,
Fremar Villaluz, Alezhandrea Clio Barrios

Abstract

Bestlink College of the Philippines offers a Bachelor of Science in Tourism Management program designed to develop practical skills for the tourism industry. Located in a key tourism hub, the college emphasizes critical thinking, problem-solving, leadership, communication, and customer service. Tracer studies serve to evaluate how well the curriculum meets industry and community needs, with the aim of refining academic programs and equipping graduates for evolving workforce demands. This study adopts a descriptive research design to assess the employability of 2022–2023 Bachelor of Science in Tourism Management graduates. Fifty alumni were selected through purposive sampling and invited to complete a structured survey questionnaire. The instrument which captured demographic profiles, relevance of acquired skills, and employment challenges, was validated by a research expert and reviewed by an instructor to ensure clarity and confidentiality of responses. Findings showed that graduates were employed across sectors such as hotels, restaurants, airlines, travel agencies, and government agencies. Although women comprised the majority of respondents, men more frequently occupied management roles and performed more confidently in interview settings. A skills gap emerged, as some graduates avoided tourism careers due to misconceptions and unclear career pathways. Employers identified a need for enhanced workplace learning conditions, a stronger focus on transferable skills, and more practical, project-based training to bolster communication and problem-solving abilities. The study highlighted that 96 percent of respondents aged 23 to 27 considered school-acquired technical, communication, problem-solving, adaptability, and leadership skills as critical to their roles. Graduates faced challenges including intense competition, limited work experience, and insufficient industry-specific competencies. Gender and employment status influenced engagement levels, with female graduates and permanent employees reporting higher involvement in professional development. To better prepare future cohorts, the study recommended expanding hands-on learning opportunities, integrating specialized tourism modules, strengthening soft-skills training, and enhancing career support services.

Keywords: tracer study, employability, tourism management graduates, skills gap, career support, bestlink college of the philippines, educational management.

**EFFECTIVENESS OF CONTEXTUALIZED MODULE IN
TEACHING CORRESPONDENCE OF THIRD YEAR ENGLISH
MAJOR STUDENTS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Cedric Andrew Sailan, Eunice Lance Acevedo, Edna Asejo, Asheyy Mabanta,
Juvylyn Parungao, Dr. Romeo Fernandez

Abstract

This study explored the effectiveness of contextualized learning modules in improving the communication skills of 63 third-year students at Bestlink College of the Philippines. By integrating relevant and meaningful content into instructional materials, the research aimed to assess how contextualization supports students' written communication abilities in real-world and academic contexts. The study employed a quasi-experimental design, beginning with pre-tests to determine the baseline proficiency of participants in correspondence skills. Students were then engaged with contextualized learning modules designed around real-world communication scenarios to enhance relevance and practical application. Following the intervention, post-tests were administered to evaluate the extent of improvement and measure the effectiveness of the instructional approach. The findings demonstrated a significant enhancement in students' correspondence skills, with the composite mean scores increasing from 2.62 in the pre-test to 3.23 in the post-test. Improvements were particularly evident in the areas of organization, content development, formatting, visual presentation, and language usage. Statistical analysis yielded z-values of 5.46483 and 4.37621, both indicating a statistically significant difference, thus leading to the rejection of the null hypothesis. In addition to measurable skill gains, participants reported increased confidence and competence in written communication. They also expressed high levels of satisfaction with the contextualized modules, noting that the materials effectively enhanced their understanding and practical application of correspondence skills within real-life contexts. The findings of this study indicate that the use of contextualized modules significantly enhanced students' correspondence skills by increasing engagement and reinforcing real-world application. These results underscore the value of contextually relevant instructional materials in developing essential communication competencies. In light of these outcomes, it is recommended that educators incorporate contextualized modules into English instruction to enrich learning experiences and improve skill acquisition. School administrators are also urged to support this approach by providing adequate resources, teacher training, and curriculum integration. For future research, it is suggested to investigate the long-term impact of contextualized learning on academic performance, critical thinking, and communication proficiency, as well as its effectiveness across varied educational contexts. This study affirms the importance of contextualized learning as a pedagogical strategy in correspondence education, offering practical insights for enhancing teaching methodologies and student achievement.

Keywords: contextualized learning, correspondence skills, english instruction, educational modules, student engagement, real-world application, communication skills, quasi-experimental design, curriculum enhancement, instructional effectiveness

**LEVEL OF INFLUENCE OF YOUTUBE TUTORIALS IN ACADEMIC LEARNING
OF GRADE 12 HUMANITIES AND SOCIAL SCIENCES STUDENTS
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Ali Haidah Lea, John Paulo Guia, Princess Joyce Coniconde, Joberth Alastra Blanco,
Venz Mathew Dadale, Bernadette May Lacia, Christopher Azares

Abstract

YouTube tutorials are accessible, engaging, and adaptable resources that support various learning styles. However, the quality of content varies, making critical evaluation crucial. Properly selected tutorials can enhance learning and motivate students. Therefore, educators must choose materials that align with students' motivational needs and help develop their critical thinking skills. This study examines how learners can be guided to independently evaluate information, navigate online content responsibly, and strengthen their critical thinking abilities. The study assessed the impact of YouTube tutorials on learners' motivation using a quantitative pre-test and post-test design. Participants first completed a pre-test to establish baseline knowledge. Students who used YouTube tutorials for studying showed notably higher academic gains than those who did not. This chapter summarizes the study's findings, presents conclusions, and offers recommended action plans. It aims to provide a clear overview of the key outcomes and insights derived from the research.

Keywords: youtube tutorials, learner motivation, academic improvement, pre-test post-test design, digital learning, educational technology

**BENEFITS OF BUDGETING ON FINANCIAL SUCCESS AMONG ABM STUDENTS
SENIOR HIGH BESTLINK COLLEGE OF THE PHILIPPINES**

Venice Lazar, Emilyn Basañez, Celeste Venice Batuigas, Thahany Garing,
Catherine Bayo-ang, Dave Espinosa

Abstract

This study investigates the role of budgeting in promoting financial stability and success among Accountancy, Business, and Management (ABM) students at Bestlink College of the Philippines. As students transition toward greater financial independence, acquiring practical budgeting skills becomes a critical component of their personal and academic development. Effective budgeting empowers students to allocate their financial resources wisely by tracking income, monitoring expenditures, setting realistic financial goals, and building consistent saving habits. These skills not only help students manage their allowances responsibly but also reduce impulsive spending and prepare them for unforeseen financial challenges. Ultimately, cultivating strong budgeting practices equips students with the financial discipline necessary for long-term stability and success in both their academic and future professional lives. This study utilized purposive sampling to select respondents who are knowledgeable and relevant to the research topic. A total of 30 ABM students from Bestlink College of the Philippines were chosen, comprising 15 Grade 11 and 15 Grade 12 learners. Data collection was conducted through a structured survey questionnaire, which aimed to identify and evaluate the budgeting habits perceived by students as most effective. This approach allowed the researchers to gain targeted insights into the financial behaviors and strategies that contribute to students' financial discipline and success. The findings of this study indicate that among the four budgeting strategies, Financial Literacy Improvement, Employment and Income Opportunities, Positive Social Engagement, and Smart Budgeting and Financial Planning, Financial Literacy Improvement was perceived as the most impactful by the respondents. A total of 30 ABM students (15 from Grade 11 and 15 from Grade 12) at Bestlink College of the Philippines participated in the survey. The results suggest that enhancing students' understanding of financial concepts significantly improves their ability to make sound financial decisions. Respondents noted that increased financial literacy helped them become more aware of their financial habits, avoid unnecessary expenditures, adjust their budgeting strategies effectively, and work toward long-term financial stability. This highlights the importance of integrating financial education into the academic curriculum to promote responsible and sustainable money management among students. This study aims to provide ABM students with a comprehensive understanding of how effective budgeting can significantly improve their financial decision-making and help them avoid unnecessary debt. The results indicate that theoretical instruction alone is insufficient to foster lasting financial competence. Instead, practical application and independent learning, particularly through continuous financial literacy development, are essential in internalizing these skills. Students who actively practice budgeting demonstrate enhanced financial discipline, strategic foresight, and resilience in managing limited resources. These capabilities not only support academic success but also equip students with the essential tools to navigate financial responsibilities in both their professional careers and personal lives.

Keywords: abm students, budgeting, financial literacy, financial decision-making, debt prevention, practical application, self-directed learning, financial discipline, foresight, financial resilience, personal finance, academic success.

**A COMPARATIVE STUDY BETWEEN EXPERIENCED AND NEWLY
HIRED EMPLOYEE ON PRODUCTIVITY LEVEL AMONG DINING STAFF IN
SELECTED CHINESE RESTAURANT IN COMMONWEALTH, QUEZON CITY**

Nicole Alosima, Ronel Cahate, Irish Lestino, Reggie Ontiveros,
Christian Pedalino, Dr. Dana France Ignacio

Abstract

Productivity among dining staff is crucial to a restaurant's success, particularly in competitive areas like Commonwealth, Quezon City. Both experienced and newly hired employees play essential roles in daily operations, but variations in experience, familiarity with tasks, and adaptability can significantly affect performance. Seasoned staff members often excel in multitasking and delivering quality customer service, whereas new hires may struggle to adjust to the demands of a fast-paced environment. This study explores the impact of work experience on dining staff productivity, with a focus on task completion, customer satisfaction, and service efficiency. A comparative descriptive research design was employed to assess the productivity of dining staff in selected Chinese restaurants in Commonwealth, Quezon City. The study included 50 staff members, categorized into two groups based on their tenure. Data were gathered through a validated paper-based survey, which focused on key productivity factors such as training, workplace familiarity, and customer interaction skills. Survey responses were analyzed using frequency distributions, ranking, and weighted means for Likert scale data. The dining staff represented a demographically diverse group, with 40% aged 31 and above and 36% between 21 and 25 years old. Sixty-eight percent were male, and 70% were single. Tenure varied, with 36% having more than three years of experience. Staff demonstrated strong performance in task completion (mean = 3.44) and customer satisfaction (mean = 3.37), although minor gaps were noted in multitasking and billing accuracy. Key productivity factors included training (mean = 3.42) and workplace familiarity (mean = 3.33). A moderate positive correlation ($r = 0.446$) was observed between experience and performance; however, it was not statistically significant ($p = 0.376$). The results indicate that both experienced and newly hired staff are capable of strong performance; however, areas such as multitasking and complaint handling require improvement. While experience contributes to productivity, other factors, such as training and effective communication, are equally important. It is recommended that management prioritize continuous training, implement structured onboarding programs for new hires, and adopt digital tools like point-of-sale (POS) systems to enhance efficiency and minimize errors. Regular performance evaluations are also encouraged to motivate staff and sustain high productivity levels.

Keywords: training and communication, customer satisfaction, service efficiency, customer service

**A COMPARATIVE STUDY OF HUMAN AND ARTIFICIAL INTELLIGENCE IN
ENHANCING HOTEL ACCOMMODATION SERVICES**

Anthony Suñas, Ryzza Mae Juera, Baby Jane Lebarios,
Lorea Joanna Ebardon, Annabella Apo, Oliver Fabon

Abstract

This research study aims to explore the evolving landscape of human versus artificial intelligence in Hotel Sogo Fairview, Quezon City, by identifying their unique differences and gaining a deeper understanding of their respective strengths and weaknesses. The study seeks to benefit hotel guests by enhancing their overall satisfaction and assist hotels in Fairview, Quezon City, in improving the quality of their services. This research employed a quantitative design using statistical tools to gather data on guest experiences with both AI- and human-provided services at Hotel Sogo Fairview. A prospective cohort of 50 individuals was surveyed, achieving a 100% response rate comprising 23 males (46%) and 27 females (54%). The research revealed that most guest respondents preferred human staff over AI. While guests appreciated the convenience of AI features such as room assistants and chatbots, a clear preference for human service remained largely due to the superior emotional intelligence and contextual understanding offered by human staff. As a result, hotels are encouraged to retain human personnel while continuing to enhance and integrate AI technologies. Additionally, providing a clear non-AI service option is recommended for guests who prefer traditional interactions. A hybrid approach that combines both AI and human services is recommended to accommodate guests' varying levels of comfort with technology. Technical issues with AI such as slow response times and system glitches negatively affect guest satisfaction, underscoring the need for reliable and well-maintained systems. While guests are generally willing to trust hotels with their data, transparency regarding its use is essential. Additionally, the lack of staff knowledge about AI systems emerged as a concern, highlighting the need for comprehensive training. Overall, a balanced integration of AI and human services along with addressing technical and training challenges is crucial to improving the guest experience.

Keywords: artificial intelligence, human intelligence, satisfaction, differences, technology

**A STUDY ON THE FACTORS THAT IMPACT THE QUALITY
AND CONSISTENCY OF AUTHENTIC DISHES**

Jenny Babe Honghong, Cypresslyn Cañada, James Bryan Dela Cruz,
Michael Fortunato, Arman Relos, Oliver Fabon

Abstract

This study examines the impact of modernization and globalization on the authenticity of traditional cuisines and customer satisfaction, using Barbara's Heritage Restaurant (established in 1977 in Manila's historic Casa Manila) as a case study for balancing innovation with heritage. By emphasizing indigenous Fil-Hispanic recipes, locally sourced ingredients, and immersive cultural elements such as live performances, Barbara successfully preserves culinary authenticity while deepening diners' emotional and historical connection. Although trends like fusion cooking can expand appeal, they may also dilute traditional flavors and commodify cultural heritage. This study advocates integrating modern techniques without compromising a dish's core essence, as demonstrated by Barbara's ability to maintain authenticity through thoughtful innovation, thereby enhancing satisfaction beyond taste to include cultural and nostalgic significance. This quantitative study employed a descriptive research design to examine factors affecting food quality and consistency in authentic dishes, drawing on a sample of 50 customers evenly divided by gender at Barbara's Heritage Restaurant in Manila. Simple random sampling was used to ensure unbiased representation, consistent with Lauren Thomas' (2023) guidance on minimizing selection bias and improving validity. Data were gathered through a 1–4 satisfaction-scale questionnaire, with confidentiality measures implemented in response to Torres and Garcia's (2022) findings on the need for enhanced privacy assurances, particularly among female participants. The study examined 50 customers mostly male, aged 23 to 27, and primarily from Luzon at Barbara's Heritage Restaurant. Findings showed that taste attributes, such as flavor profiles and sweetness, along with visual elements like artistic presentation and vibrant colors, significantly influenced satisfaction (mean scores between 3.30 and 3.48). Furthermore, factors related to the preparation process, including the use of fresh ingredients and authentic cooking methods, as well as proper temperature control (ensuring dishes like sinigang and halo-halo were served at optimal heat or cold), were essential for maintaining consistency. The study revealed a demographic bias, predominantly involving younger respondents (ages 23–27), males, and individuals from Luzon. This limits the generalizability of the findings due to the underrepresentation of older adults and those from Mindanao. At Barbara's Heritage Restaurant, food quality was primarily influenced by taste (balanced flavors and appropriate sweetness), visual appeal (artistic plating and vibrant colors), preparation methods (fresh ingredients and traditional techniques), and temperature control (ensuring dishes like sinigang and halo-halo are served at optimal temperatures).

Keywords: demographic bias, younger respondents, luzon, generalizability, food quality, taste, appearance, preparation methods, temperature control, barbara's heritage restaurant

**ACCEPTABILITY OF ARTIFICIAL INTELLIGENCE IN
TSURUMARU UDON X TEMPURA: TOWARD A GUIDE**

Mariey Jesemiah Tria, Jherico Bacarra, Coleen Khate Caguya,
Marlo Reyes, Julia Ramielle Rivas, Dana Rae Boatis

Abstract

Artificial intelligence has been integrated into operations at Tsurumaru Udon x Tempura to enhance customer service, streamline inquiries, and expedite reservations, resulting in increased patronage and higher sales. AI chatbots manage routine questions and bookings, thereby reducing waiting times and improving the overall dining experience. Despite these benefits, some customers continue to value human interaction. As AI increasingly supports productivity by handling repetitive or hazardous tasks, its role in daily life and the hospitality sector continues to expand. A descriptive study is conducted to assess the acceptability of AI-driven customer service tools in a restaurant setting. Patrons of Tsurumaru Udon x Tempura are selected through purposive sampling to complete a structured questionnaire evaluating their preferences, perceived convenience, and concerns regarding AI chatbots. Responses are analyzed using frequency counts and percentage distributions to identify demographic trends and overall acceptance levels. Analysis revealed that respondents aged 28 and older exhibited the highest preference for AI chatbots, citing convenience and shorter wait times as primary benefits. However, a notable portion of patrons expressed concerns about reduced human interaction and potential social isolation during the dining experience. The findings indicated that AI adoption in the restaurant favored male customers and improved operational efficiency by reducing service delays. Nonetheless, increased reliance on technology raised concerns about diminished personal engagement and potential price increases to cover AI implementation costs. As a result, successful AI integration requires tailoring chatbot interactions to customer profiles, maintaining human oversight, and providing staff training on customer service and privacy protocols. Ongoing refinement of AI systems and active solicitation of customer feedback were recommended to balance technological efficiency with personalized service and ensure sustainable customer satisfaction.

Keywords: artificial intelligence, chatbots, customer experience, restaurant service, technology acceptance

**AIRBNB ON LOCAL HOSPITALITY EXPERIENCES IN QUEZON CITY:
A GUEST PERSPECTIVE**

Sauren Pamela Joy, Shaidyne Fornoles, Zhenah Mae Perido, Mae Serquiña,
Angela Taguinod, Dr. Dana France Ignacio

Abstract

Airbnb has emerged as a popular alternative to hotels in urban centers such as Quezon City by offering lower rates, home-like accommodations, and deeper immersion in local communities. Staying in residential neighborhoods enables guests to experience the city beyond traditional tourist zones. This study explores Airbnb guest experiences in Quezon City, identifying common complaints and satisfaction factors to inform recommendations for enhancing service quality. A quantitative survey design is employed, targeting sixty Airbnb guests who stayed at Trees Residences or Grass Residences in Quezon City. Participants are purposively sampled to ensure direct Airbnb experience. The questionnaire collects demographic data, booking frequency, and perceptions of Airbnb services via multiple-choice, Likert-scale, and open-ended questions. Responses are analyzed using percentages and weighted means. Expert review ensures instrument reliability and clarity, and in-person distribution maximizes response accuracy. Most respondents were young adults aged 21 to 25 who booked Airbnb accommodation occasionally, with an even gender split. Trees Residences proved more popular than Grass Residences. Safety and payment methods received the highest ratings (mean = 4.00), booking processes were rated moderately (mean = 3.40), and communication with hosts scored lower (mean = 3.20). Common issues included last-minute cancellations, misleading listings, hidden fees, unresponsive hosts, limited customer support, and occasional security concerns. The findings indicated that Airbnb's affordability and flexibility appealed strongly to younger travelers in Quezon City, but stressors such as unexpected cancellations and unclear charges detracted from the experience, particularly close to travel dates. Limited support during service disruptions further reduced satisfaction. Enhancements to communication tools, clearer policy disclosures, and stronger customer service were identified as key improvements. Hosts were advised to prioritize transparency, safety measures, and prompt responsiveness to build trust and elevate overall guest satisfaction.

Keywords: airbnb, guest experience, service quality, communication, booking satisfaction

**AIRBNB'S FUTURE IN THE LODGING SECTOR: BALANCING GUEST PREFERENCES,
HOST ADAPTATION, AND SUSTAINABLE GROWTH**

Ric Russel Dela Paz, Hannah Joy Naling, Vanisa Acabal, Jean Paula Hertez,
Nimpha Kaye Macabangun, Ronald Rambo Jayoma

Abstract

This study investigates Airbnb's impact on the lodging sector at Trees Residences in Fairview, Quezon City, by examining the interplay of guest preferences, host adaptation strategies, and sustainable growth. The research seeks to identify the factors that influence guest choices, evaluate how hosts adjust their offerings to meet evolving demands, and uncover the challenges faced by both guests and hosts within the local short-term rental market. A quantitative survey design is employed to collect data from thirty respondents, comprising both Airbnb guests and hosts. A validated structured questionnaire measures demographic profiles, booking motivations, service preferences, and encountered challenges. Data analysis utilizes frequency distributions, percentage calculations, and weighted means to present a comprehensive interpretation of adoption patterns and performance outcomes. Respondents were primarily young travelers, with Generation Z representing 43 percent and Millennials 40 percent, most coming from low to lower-middle income brackets (86 percent). Family travel accounted for 63 percent of bookings, while affordability, convenient location, and complete amenities were the leading decision factors. Guests showed strong preferences for customizable accommodations, transparent pricing structures, and technological integrations such as contactless check-in. Key challenges identified included unsanitary conditions (13 percent), malfunctioning amenities (12 percent) and unexpected charges (12 percent). Findings underscored the need for host adaptation strategies, including loyalty or reward programs, real-time communication channels, and clear pricing disclosures. The study illuminated critical drivers of guest satisfaction and operational hurdles within the short-term rental ecosystem. By combining insights into technological innovation and consumer expectations, it provided a strategic framework for hosts to enhance competitiveness and ensure sustainable growth. As a result, hosts are encouraged to adopt targeted adaptations that leverage digital tools, improve service transparency, and refine amenity reliability to align with market dynamics and elevate the Airbnb experience in Quezon City.

Keywords: airbnb, guest preferences, host adaptation, sustainable growth, short-term rentals

**AN ANALYSIS OF EXISTING MARKETING STRATEGIES UTILIZED BY FOOD STALL
OF UGBO, TONDO MANILA: INSIGHT AND OPPORTUNITIES FOR GROWTH**

Justin Ray Kenneth Arivan, Ma Patricia Grapeza, Angeleen Bunagan, Samantha Vinluan,
Kate Basaca, Marianne Joy Payumo, Dana Rae Boatis

Abstract

Ugbo Street in Tondo, Manila, has become a culinary hotspot, featuring a diverse array of food vendors. Notable among these are Pooh-Bah Seafood, Ribs and Steak, and Tondo Ave Mukbang Seafood, each distinguished by their flavorful menus and innovative promotional tactics. This study examines the marketing strategies employed by these two stalls and evaluates their effectiveness in attracting and retaining customers, building brand awareness, and supporting growth. A causal-comparative design is employed to explore differences in marketing outcomes between the two food stalls. Purposive sampling identifies customers of each stall, who complete a structured survey assessing demographic profiles, marketing exposures, and perceived strategy effectiveness. Data analysis uses descriptive statistics: frequency distributions and weighted means, to compare customer engagement, brand visibility, and sales indicators across the two vendors. The survey revealed that Pooh-Bah Seafood, Ribs, and Steak attracts predominantly female customers aged 21 to 25, while Tondo Ave Mukbang Seafood draws an equal gender mix within the same age group, accounting for 43 percent of visits. Social media marketing and content marketing proved highly effective for both stalls, enhancing brand awareness through media features and increasing customer engagement via responsive service. Consistent customer traffic and profitable social media interactions demonstrated strong sales performance. Space constraints and limited parking were noted as significant operational challenges. Marketing strategies such as word-of-mouth promotion, social media campaigns, print advertisements, and content marketing drove customer attraction and loyalty, helping both Pooh-Bah Seafood and Tondo Ave Mukbang Seafood maintain competitive advantages in a crowded market. These findings suggest that a diversified marketing mix, paired with operational improvements in space management, can further strengthen the growth prospects of small food stalls on Ugbo Street.

Keywords: marketing strategies, food stalls, social media marketing, customer engagement, brand awareness

**AN ASSESSMENT ON THE ROLE OF TECHNOLOGY IN ENHANCING
CATERING SERVICES IN NOVALICHES, QUEZON CITY**

Donna Neri, Jerome Cabalquinto, Jayvee Copioso, Lorenz Miguel Mabaquiao,
Jamaica Odrigon, Oliver Fabon

Abstract

This study explores the impact of technology on the efficiency and service quality of catering businesses in Novaliches. Catering services are essential for various occasions such as meetings, events, and celebrations where high-quality service and customer satisfaction are expected. However, the industry faces several challenges, including resource scarcity, rising food costs, food safety issues, and food waste. Additionally, modern catering companies struggle with adopting new technologies, responding to changing customer demands, and ensuring service consistency, especially during large-scale operations. Data for this study were gathered through a sampling method that included surveys and interviews with catering service providers, employees, and clients in Novaliches. The research examined the influence of technological innovations such as online ordering platforms, automated inventory systems, digital payment solutions, and customer feedback mechanisms on the efficiency and service quality of local catering businesses. The findings reveal that respondents strongly agree on the importance of creative menu development, particularly those featuring unique culinary combinations and visually appealing presentations. This reflects a high level of effectiveness in crafting innovative and attractive menu offerings. The consistently high average weighted mean across all evaluated factors indicates an overall positive perception of modern catering services. Additionally, the study found that catering services, especially in college settings, are increasingly adopting information technology to enhance management and service delivery addressing key concerns such as food safety, quality, and pricing. Respondents also emphasized that online reviews are critical in attracting new customers, highlighting their significant role in customer acquisition. The study identified several key challenges affecting the catering experience, including technical issues (such as sound systems and lighting), delays in food service, inaccurate guest count estimations, and limited staff knowledge of the menu. These areas were consistently ranked, indicating that all are equally significant in enhancing overall service quality. Furthermore, the research revealed major barriers to the integration of technology in catering businesses. These include high costs, technical complications, and the need for proper employee training.

Keywords: catering services, technology integration, service quality, technical issues, food service delays, guest estimation, staff training, online reviews, innovation, customer satisfaction

**ANALYSIS ON KITCHEN INVENTORY SHORTAGE IN SELECTED RESTAURANTS
IN QUEZON CITY: BASIS FOR OPERATIONAL INTERVENTION.**

John Frech Dela Rosa, Renzi Baclig, Wella Mae Ocampo, Godwin Miles Cellar,
Armelyn De Guia, Roland Rambo Jayoma

Abstract

This study investigates kitchen inventory shortages in Quezon City restaurants, highlighting the challenges and inefficiencies stemming from ineffective inventory management. Data collection encountered barriers such as reluctance from some establishments to participate, limited access to accurate inventory records, and varying inventory procedures across restaurants. Despite these hurdles, the research identified major contributors to inventory shortages, including inaccurate demand forecasting and insufficient inventory control measures. This study used a quantitative research approach to investigate the common challenges faced in maintaining optimal inventory levels in restaurant kitchens. A key finding was the communication breakdown among kitchen staff, suppliers, and management, which resulted in delays in stock replenishment and higher levels of waste. The study recommends implementing advanced inventory management systems, providing comprehensive training for staff on inventory practices, and fostering stronger supplier partnerships. These measures aim to reduce waste, improve operational efficiency, and enhance customer satisfaction. The insights gained offer practical guidance for restaurant managers striving to effectively manage inventory shortages in a competitive environment. Focusing on accurate demand forecasting, effective communication between kitchen staff, suppliers, and management, and efficient supply chain management are essential for minimizing inventory shortages. Implementing these strategies enables restaurants to reduce stockouts and waste, streamline operations, and enhance overall service quality and customer satisfaction.

Keywords: kitchen inventory, inventory shortages, demand forecasting, communication, supply chain management, restaurant operations, waste reduction, quezon city restaurants, inventory management systems, staff training

**ANALYSIS ON SERVICE PERFORMANCE TOWARD CUSTOMER SATISFACTION AT
MANAM'S RESTAURANT IN SM FAIRVIEW QUEZON CITY**

Patricia Ann Ilan, Vivien Abella, Anjanette Delis, Rose Marie Geronimo,
Krisha Mae Rosario, Dr. Dana France Ignacio

Abstract

The restaurant industry remains a highly profitable sector, with both international and local chains striving to meet diverse customer demands. In this competitive environment, delivering high-quality food and service is essential to gaining a competitive advantage. Service performance is a critical factor, as it directly influences customer satisfaction, loyalty, and business profitability. To remain relevant, restaurants must adapt to shifting customer preferences. Maintaining consistent service quality is vital; failure to do so can result in customer attrition and potential business decline. This chapter discusses the research methodology utilized in the study, including the research design, selection of respondents, sampling techniques, and research instruments. It elaborates on the development and validation of the questionnaire, outlines the data collection procedures, and describes the statistical tools used for data analysis. These methodological steps were undertaken to ensure the reliability and validity of the study's results. The results reveal a moderate positive correlation between service performance and customer satisfaction, indicating a reasonably strong linear relationship. This suggests that as service performance improves, customer satisfaction also tends to increase. However, the correlation is not perfect, implying that while better service performance generally enhances customer satisfaction, other variables may also contribute to the overall customer experience. The results of the study on customer satisfaction at Manam's Restaurant were evaluated based on customers' demographic profiles, including age, sex, and civil status. These factors are essential in understanding variations in customer preferences, behaviors, and satisfaction levels. Insights gained from this analysis can help refine service strategies and contribute to the overall growth and success of the business.

Keywords: customer satisfaction, demographic profile, manam's restaurant, age, sex, civil status, service strategies, consumer behavior, business growth

**ANALYZING THE IMPACT OF FOOD VLOGGERS ON VIEWER PREFERENCES
IN UGBO STREET, TONDO MANILA**

Charl Christopher Melu, Brel Baguinaon, Hazel Ann Clemente,
Franki Anjernnet Culala, Jenna Salugao, Dana Rae Boatis

Abstract

The rapid growth of social media has significantly reshaped how individuals discover, engage with, and consume food-related content. At the forefront of this digital transformation are food vloggers, who have emerged as powerful influencers in shaping culinary preferences and dining behaviors. Through visually engaging content, authentic storytelling, and active audience interaction, food vloggers are able to establish trust and influence the decision-making processes of their viewers. In the Philippine context where social media penetration is remarkably high, the influence of food vloggers presents both opportunities and challenges for consumers and food-related businesses alike. Despite their growing presence and impact, there remains a notable gap in scholarly research specifically examining Filipino food vloggers and their influence on consumer behavior. This study seeks to address that gap by exploring how motivations for watching food vlogs such as entertainment, information seeking, or social connection, affect viewers' food preferences and purchasing decisions. Moreover, the study aims to determine the extent to which food vloggers can shape or alter the attitudes and behaviors of their audiences. This research utilizes a quantitative approach with a descriptive design to assess the influence of food vloggers on viewer preferences within the community of Ugbo Street, Tondo, Manila. The survey findings reveal that the majority of customers in Ugbo, Tondo, Manila are female young adults aged 23 to 28, most of whom are non-residents of the area. Facebook emerges as the more popular platform for food vlogs compared to YouTube, primarily due to its accessibility and ease of sharing. Viewer preferences are strongly influenced by online reviews, and high-quality vlogs often lead to heightened expectations for detailed and informative content. However, a major concern among viewers is the insufficient information provided by food vloggers. Many rely on these content creators for trustworthy food recommendations and assessments of food quality. The survey recommends that female young adults visiting Ugbo Street remain cautious and aware of the presence of homeless individuals in the area. It also encourages food vloggers to improve their craft by refining storytelling, enhancing video and audio quality, engaging more effectively with their audience, and maintaining consistent content creation. Moreover, viewers are advised not to base their food choices solely on likes or views, but to seek reliable information and conduct personal research for more authentic insights. Lastly, the study emphasizes the role of quality content in influencing consumer purchasing behavior, strengthening brand promotion, and supporting the growth of food-related businesses.

Keywords: female young adults, ugbo street, food vloggers, storytelling, video quality, audience engagement, viewer behavior, content authenticity, social media metrics, brand promotion, business growth.

**ARTFUL HOSPITALITY: ENHANCING GUEST EXPERIENCE
THROUGH CULINARY AND INTERACTIVE ART**

Leonard Ampo, Lemen John Antiojo, Marvin Catedrilla, Joemarc Piczon,
Darwin Rosales, Dr. Dana France Ignacio

Abstract

This study examines how the integration of culinary experiences and interactive art at Sip and Gogh enhances guest satisfaction. It aims to understand what makes a visit truly memorable and how these combined elements can assist entrepreneurs in attracting and retaining loyal customers. The study employed a survey-based method to gather feedback from guests about their overall experience, focusing on essential aspects such as service quality, ambiance, food and beverages, and interactive art activities. The collected responses were analyzed to determine which features guests valued most and to identify areas that needed improvement. The results indicated that exceptional service and engaging art activities had the most significant influence on guest satisfaction. Guests especially valued the staff's attentiveness and the creativity of the interactive sessions, making them more likely to recommend Sip and Gogh to others. Although the food quality and venue layout were still positively received, they scored slightly lower, suggesting areas for potential improvement. Importantly, the absence of major complaints further highlights the overall positive experience of the guests. The study emphasizes that the combination of quality service, interactive art, and a warm, inviting atmosphere is key to delivering a memorable guest experience. Although Sip and Gogh already provides an enjoyable and immersive setting, subtle enhancements such as refining the food menu and reconfiguring the space, could further boost customer satisfaction and loyalty. These findings offer valuable guidance for business owners in enhancing their approach to artistic hospitality, ensuring a lasting and meaningful impression on their guests.

Keywords: guest satisfaction, interactive art, culinary experience, service quality, ambiance, customer loyalty, artistic hospitality, sip and gogh, customer experience, business improvement

**ASSESSING FOOD SAFETY CRISIS MANAGEMENT IN
BUFFET RESTAURANT IN QUEZON CITY**

Romeo IV Nungay, Fe Esperanza Barandino, Princess Edith Interno, Christian Jay Rellizan,
Monea Moryseth Vergara, Roland Rambo Jayoma

Abstract

This paper examines food safety challenges in buffet-style restaurants in the Philippines, focusing on operational issues such as cross-contamination, improper temperature control, and poor sanitation. Despite existing food safety regulations, many establishments struggle with compliance due to inadequate systems and staff training. The study highlights the need for standardized procedures, supplier accountability, and effective employee education. It also evaluates current crisis management protocols and proposes strategic improvements to strengthen food safety practices, aiming to enhance the overall resilience and efficiency of buffet operations. This study investigates the food safety crisis management practices at Lan Hot Pot Buffet in Quezon City. Using a quantitative approach, purposive sampling, and a structured survey questionnaire, the research explores customer perceptions of food safety, evaluates the effects of food-related crises, and examines the restaurant's internal response strategies to effectively manage such incidents. Data indicate that Lan Hot Pot Buffet employs a predominantly young, mostly female workforce, with 44% aged 25–31 and 40% aged 18–24. Many employees occupy frontline positions such as servers, with most having less than six months of service, reflecting high turnover rates. As a casual dining venue catering to occasional diners, the restaurant generally complies with food safety protocols. However, insufficient training has resulted in negative customer feedback, operational issues like temperature control lapses, and human error. These findings highlight the urgent need for enhanced communication and comprehensive training programs to improve service quality and staff retention. Survey data reveal that the restaurant primarily serves older adults (45 and above) and young professionals (25–31), indicating the need for marketing strategies tailored to these demographics. In contrast, the workforce is mostly composed of young adults, with 56% aged 20–24, highlighting the importance of targeted training and mentorship to enhance skills and employee retention. The findings also note a strong preference among female customers for communal dining, which can be leveraged in promotional efforts. Key operational challenges include high staff turnover, inadequate training, communication gaps, and food safety concerns particularly in temperature control and sanitation. To address these issues, the study recommends strengthening training programs, improving communication systems, updating emergency protocols, and enforcing strict food safety standards to foster a more stable workforce and better align services with customer preferences.

Keywords: food safety, buffet-style restaurants, cross-contamination, temperature control, sanitation, crisis management, compliance, employee training, supplier accountability, philippines

**ASSESSING THE CULTURAL COMPETENCE OF MULTINATIONAL RESTAURANT
TOWARDS CUSTOMER SATISFACTION IN FAIRVIEW, QUEZON CITY**

Elainne Recaña, Eliza Anna Recaña, Angie Juana Yap, John Kent Udarbe,
Joyshell Ann Cabentoy, Ms. Dana Rae Boatis

Abstract

This examines the rising presence of multinational restaurant chains as cultural hubs in a globalized world, underscoring the critical role of cultural competence in improving customer satisfaction. Successfully catering to a diverse customer base requires sensitivity to cultural preferences, dietary needs, and communication styles key elements in building customer loyalty and driving business success. Although existing research highlights the positive impact of cultural competence on customer satisfaction and retention, there is a noticeable gap in studies focusing specifically on its application in the restaurant industry. The researchers adopted a descriptive research design, aiming to systematically capture relevant patterns and insights. Data collection was carried out using structured survey questionnaires, enabling the researchers to obtain key information from participants. A convenience sampling technique was applied, selecting respondents based on their accessibility and willingness to participate. This study explores customer satisfaction with the service quality, food quality, and ambiance at Sbarro restaurant located in Fairview, Quezon City. A total of 60 respondents participated in the survey, providing insights into key demographic factors such as age, frequency of visits, and nationality. Results revealed that the majority of customers are aged 21 to 25 (37%), with 70% visiting the restaurant once or twice. The clientele is primarily Filipino (97%), reflecting a strong local customer base. Satisfaction ratings were consistently high across all categories, with mean scores of 3.37 for service quality, 3.36 for food quality, and 3.35 for ambiance. Customers expressed the greatest satisfaction with staff attentiveness, overall food quality, and the restaurant's atmosphere. In contrast, the lowest satisfaction levels were related to inconsistencies in service across cultural expectations and visual presentation of food. The most frequently reported concerns included overheated dishes, unfriendly staff behavior, and slow service. To enhance customer satisfaction, the research suggests implementing a customer loyalty program, improving staff training in responsiveness and efficiency, ensuring high food quality, and making further enhancements to the restaurant ambiance. By systematically training staff, incorporating real-time feedback procedures, and regularly testing seasonal menus, these improvements can lead to better dining experiences and increased customer loyalty. Additionally, the study recommends launching a customer loyalty program, enhancing quality control with immediate feedback, and introducing new seasonal menus. It also highlights the importance of refurbishing the restaurant ambiance and making operational improvements to provide faster and more efficient service.

Keywords: customer satisfaction, service quality, food quality, ambiance, sbarro restaurant, fairview quezon city, filipino customers, restaurant experience, customer feedback, dining behavior

**ASSESSING THE EFFECTIVENESS AND QUALITY OF TRADITIONAL
VERSUS MODERN COOKING TECHNIQUES**

Adrian Ornido, Mark Rio Capatayan, Angelica Sambayon, Christian Ternal,
Jethro Roy Tupas, Dr. Dana France Ignacio

Abstract

In the rapidly evolving culinary industry, maintaining a balance between speed and quality remains a significant challenge. This study explores how traditional and modern cooking techniques differ in their impact on flavor, texture, nutritional value, and the overall dining experience. Although previous research tends to examine these methods independently, few studies investigate their combined application in practical kitchen environments. This research seeks to bridge that gap by providing valuable insights into how blending both techniques can enhance culinary results. This research utilized a quantitative comparative design to evaluate the effectiveness of traditional and modern cooking methods regarding flavor, texture, and presentation. Twenty experienced chefs from Din Tai Fung, skilled in both techniques, were purposively selected as respondents. Data was collected through a structured questionnaire covering key factors such as efficiency, skill, sensory quality, and meal preparation differences. The questionnaire was validated by experts, including a statistician and a grammarian, to ensure its reliability. Surveys were conducted in person on February 13, 2025, during the chefs' breaks to minimize disruption to their workflow. The study found that modern cooking techniques are more efficient and require greater skill than traditional methods. Modern techniques received a weighted mean score of 3.54, compared to 3.03 for traditional methods. In terms of flavor, texture, and presentation, modern methods also outperformed traditional ones, scoring between 3.31 and 3.44, while traditional methods scored between 3.12 and 3.24. Statistical analysis revealed significant differences in efficiency ($p = 0.00$) and skill ($p = 0.01$) between the two approaches; however, there were no significant differences in texture and presentation. Chefs identified several challenges, including the need to balance traditional and modern techniques, manage costs, and adapt to new trends, noting that modern methods often require specialized equipment and precise execution. This study revealed that modern cooking techniques provide greater efficiency and consistency, while traditional methods excel in maintaining authenticity, corroborating previous findings. However, given the study's limitation to a single restaurant, broader research is necessary to examine the impact of these techniques on customer satisfaction and nutritional outcomes. Future investigations should also consider the learning curves involved in mastering each method. Culinary education should aim to integrate both approaches to balance operational efficiency with the preservation of culinary traditions.

Keywords: modern cooking techniques, traditional cooking methods, efficiency, consistency, authenticity, culinary heritage, customer satisfaction, nutrition, learning curve, culinary training

**ASSESSING THE EFFECTIVENESS OF CERTIFICATION TOWARDS TO
EMPLOYMENT SUCCESS OF HOSPITALITY MANAGEMENT GRADUATES AT
BESTLINK COLLEGE OF THE PHILIPPINES**

Jhon Victor Balang, Dañilla Catampungan, Maricel Dela Paz,
Joan Notorio, Althea Saludo, Dr. Dana France Ignacio

Abstract

This study examines the link between certification and employment success in the hospitality industry. Certifications are formal documents that validate an individual's skills, training, and qualifications, demonstrating their readiness to meet industry standards. They help job seekers stand out in a competitive market and increase their attractiveness to employers. Employment success refers to the attainment of professional goals and effective contribution within a workplace, reflecting both organizational impact and personal career advancement. In today's dynamic job market, certifications play a crucial role in boosting the employment prospects of hospitality graduates. This study aims to explore the effectiveness of certifications in enhancing career success within the hospitality sector. This research will employ a mixed-methods design, integrating both quantitative and qualitative approaches. The quantitative aspect will involve surveys to gather numerical data, while the qualitative component will include interviews to capture personal experiences and insights. By combining these methods, the study aims to provide a well-rounded evaluation of the effectiveness of certifications, examining both statistical trends and individual perspectives. The findings indicate that professionals in the hospitality management field highly value industry certifications for career advancement, particularly in developing skills and increasing employability. Certifications related to housekeeping, food and beverage service, and bartending were identified as the most beneficial. While these credentials contribute significantly to career progression, the study also underscores the importance of effective communication and feedback in achieving overall employment success. However, challenges such as high certification costs, limited time, and insufficient training opportunities were reported as major barriers to obtaining these qualifications. This study provides meaningful insights into the factors that influence customer satisfaction and operational efficiency in the hospitality industry. The results highlight the importance of incorporating customer feedback, addressing issues such as overcrowding and noise, and leveraging certifications to enhance overall performance. To gain a deeper understanding of how to optimize operations, future research should explore specific types of certifications and assess the cost-effectiveness of various improvement strategies.

Keywords: customer satisfaction, operational efficiency, hospitality industry, certifications, customer feedback, overcrowding, noise management, performance improvement, cost-effectiveness, service quality

**ASSESSING THE EFFECTIVENESS OF ONLINE BOOKING SYSTEM IN SELECTED
HOTEL IN QUEZON CITY BASIS FOR AN IMPROVEMENT PLAN**

Remrose Cabiles, Joshua Estante, Crisanto Merilo, Christian Jay Tormo,
Raniel Angelo Lorente, Miro Raniola, Jenelyn Comon

Abstract

This study evaluates the effectiveness of online booking systems in selected hotels in Quezon City, focusing on customer satisfaction, operational efficiency, and overall system success. It examines system usability, reliability, and user experience and identifies challenges such as technical issues and security concerns. The findings aim to inform optimization strategies that enhance the competitive edge of hotels by creating more efficient, user-friendly, and secure online booking platforms. A descriptive research design is employed to assess patterns and trends in online booking system effectiveness. Purposive sampling selects hotel guests who have used online booking platforms. A structured questionnaire measures perceived usefulness, ease of use, user attitude, behavioral intention, and actual system use on a four-point Likert scale. Data are analyzed using weighted means and percentage distributions to quantify user perceptions and identify common problems. Respondents were primarily young adults aged 21–30, with 56 percent male and 44 percent female. Perceived usefulness and ease of use both yielded weighted means of 3.46, indicating strong recognition of system benefits and user friendliness. The composite attitude score was 3.39, and behavioral intention to reuse the system scored 3.35. Actual system use also scored 3.46, reflecting frequent engagement. Commonly reported problems included technical difficulties and booking confirmation inaccuracies, which undermined overall satisfaction despite positive attitudes. The study indicated that online booking systems were generally valued for their usefulness and ease of use but were hampered by technical glitches, limited modification options, and mobile compatibility issues. As a result, recommendations included enhancing instructional materials, expanding payment methods, improving mobile responsiveness, and ensuring faster, more accurate confirmation processes. Regular system maintenance, updates, and real-time customer support were also advised to address user concerns and sustain high satisfaction levels.

Keywords: online booking, system effectiveness, customer satisfaction, usability, technical reliability, quezon city hotels

**ASSESSING THE IMPACT OF SOCIAL MEDIA INFLUENCER ON CUSTOMER
LIFETIME VALUE IN SELECTED HOTELS IN METRO MANILA,
BRAND AWARENESS AND VISIBILITY**

Janel Babon, Janel Babon, Danpaul Roa, Julius Abiel Mostasisa, Dirk Pescante, Roland Rambo
Jayoma

Abstract

This study examines the impact of social media influencers on customer lifetime value, brand awareness, and visibility in selected hotels in Metro Manila. By partnering with influencers whose audiences align with hotel target markets, hotels enhance their appeal, reinforce brand image, and attract additional guests. Influencer-generated content and user-generated posts increase hotel visibility and reputation. The evolving role of social media influencers in hospitality supports brand strengthening, customer acquisition, and occupancy growth through direct audience engagement and shared experiences. A quantitative descriptive design is employed to assess influencer impact on hotel metrics. Purposive sampling selects participants such as hotel marketing managers and guests with relevant experience. A structured questionnaire, validated by the research adviser, a content expert, a grammarian, and a statistician, measures perceptions of influencer credibility, content quality, follower reach, and their effects on visibility, trust, bookings, and customer lifetime value. Findings indicated that influencer credibility, sustained industry experience, and sizable followings significantly boosted hotel visibility, customer trust, and bookings. Influencer campaigns outperformed traditional advertising in driving revenue and enhancing consumer perception. Challenges included identifying suitable influencers, ensuring consistent engagement, managing promotional budgets, measuring return on investment, and addressing authenticity concerns. Influencers with established careers produced more compelling content, while those with larger followings extended campaign reach. The study confirmed that social media influencers had a substantive effect on customer lifetime value, brand awareness, and visibility for Metro Manila hotels. Influencer partnerships increased engagement and bookings but required careful selection and performance monitoring. It was recommended that hotels develop clear criteria for influencer alignment, implement performance tracking systems, allocate dedicated budgets, and establish authenticity guidelines to maximize campaign effectiveness and mitigate reputational risks.

Keywords: social media influencer, customer lifetime value, brand awareness, hotel visibility, influencer marketing

**ASSESSING THE INFLUENCE OF CLOUD KITCHEN AND FOOD AGGREGATORS ON
TRADITIONAL RESTAURANT BUSINESS MODELS**

Louiejee Pereira, Jimuel Reberta, Samantha Nicole Bandiola, Ara Semillano,
Yasmine Umayam, Roland Rambo Jayoma

Abstract

This study examines how cloud kitchens and food aggregator platforms influence traditional restaurant business models. Cloud kitchens and services such as GrabFood, Uber Eats, and Foodpanda offer convenience and low overhead, reshaping consumer expectations. Traditional restaurants face challenges in customer retention, branding, and operational efficiency due to digital competition, high delivery fees, and evolving ordering behaviors. The aim is to understand these impacts and identify strategies that enable traditional operators to compete effectively in the digital marketplace. A quantitative descriptive design is employed to evaluate the effects on Max's Restaurant in Cubao, Quezon City. Purposive sampling selects twenty employees with direct experience in operations, marketing, and delivery coordination. A researcher-developed survey questionnaire gathers data on revenue shifts, customer loyalty, pricing strategies, operational adjustments, and technology adoption. Responses are analyzed using descriptive statistics to reveal trends and operational implications without manipulating any variables. Cloud kitchens and aggregator partnerships significantly impacted Max's Restaurant, reducing in-store market share while boosting overall order volume through delivery channels. Operational efficiency improved through streamlined kitchen workflows, but customer loyalty shifted toward aggregator platforms due to ease of ordering. Dynamic pricing models emerged in response to intensified price competition. Cloud kitchens demonstrated higher profitability per order, whereas traditional menu quality and packaging standards required adaptation. Digital adoption challenges included limited in-house delivery infrastructure and the need to optimize online menus for aggregator interfaces. The study found that cloud kitchens and food aggregators disrupted traditional restaurant performance by enhancing convenience at the expense of dine-in market share. As a result, technology integration, such as proprietary online ordering systems, was recommended, along with partnerships that reduce delivery fees and co-branding initiatives on aggregator platforms. Menu redesign for packaging integrity and dynamic pricing strategies was also advised to maintain competitiveness. Limitations included sample size and single-location scope; future research could expand to multiple brands and regions.

Keywords: cloud kitchen, food aggregators, traditional restaurants, operational efficiency, customer loyalty, digital adoption

**ASSESSMENT OF GUEST EXPERIENCE ON THE UTILIZATION OF
AI TECHNOLOGY IN SOGO HOTEL FAIRVIEW**

Trixie Gardose, Jerico Felipe, Francis Caadiang, Kurt Danel Gaspar,
Cristina Paspos, Rolan Jayoma Rambo

Abstract

In the competitive hospitality industry, leveraging artificial intelligence (AI) to enhance guest experiences is essential. Sogo Hotel Fairview employs AI technologies from automated check-in kiosks to smart room controls, to personalize services and streamline operations. This study assesses guest adaptability to these AI features by gathering user feedback on technology infrastructure and operational practices. By identifying challenges and opportunities, the research aims to inform improvements that will deliver a more seamless and enjoyable stay. This study employs a descriptive quantitative design to evaluate AI integration at Sogo Hotel Fairview. A purposive sample of 30 adult guests completed a structured questionnaire based on Parasuraman's service quality framework. The instrument measured satisfaction across dimensions such as user experience, operational efficiency, safety, privacy, and ease of use. Demographic data were also collected to contextualize findings. Respondent demographics showed a majority aged 18–22 (63%), an even gender distribution, and predominantly single status (83%). Most participants (90%) were walk-in guests. Satisfaction ratings indicated strong approval for safety (mean = 3.43), operational efficiency (mean = 3.37), and overall user experience with AI features (mean = 3.33). Privacy and ease of use were top priorities for 18 percent of guests, while overall satisfaction ranked fourth at 11 percent. Reported challenges included feelings of disconnection from staff (18 percent), technical glitches such as slow internet or unresponsive kiosks (15 percent), and concerns about room security when using automated controls (14 percent). Findings showed that AI technologies at Sogo Hotel Fairview enhanced safety, efficiency, and user experience but also introduced barriers related to connectivity, technological reliability, and guest–staff interaction. As a result, it was recommended that the hotel upgrade its internet bandwidth, implement regular system maintenance, and integrate hybrid service models that combine AI convenience with human support. Addressing these issues can strengthen guest trust in automated features while preserving the personal touch that defines hospitality excellence.

Keywords: artificial intelligence, guest experience, service quality, operational efficiency, hospitality technology

**ASSESSMENT OF HOUSEKEEPING PRACTICES TOWARDS THE EFFECTIVENESS OF
OJT PROGRAM OF HOSPITALITY MANAGEMENT STUDENTS OF BCP**

Aubrey Maraggun, Ariel Macabani, John Rey Macasa, Alice Jane Pati,
Juvylee Severo, Dr. Dana France Ignacio

Abstract

The hospitality industry relies on effective housekeeping to deliver high-quality service, maintain safety standards, and optimize operational efficiency. In Hospitality Management education, on-the-job training (OJT) programs integrate practical experiences that bridge theory and industry practice. A dedicated housekeeping laboratory exercise can reinforce learning by allowing students to develop hands-on skills, understand housekeeping responsibilities, and build the confidence required for professional performance. This study assesses how housekeeping practices support the effectiveness of the OJT program for fourth-year Hospitality Management students at Bestlink College of the Philippines. A descriptive quantitative design was employed to evaluate the impact of practical housekeeping exercises on student preparedness. Fifty fourth-year Hospitality Management students participated in the study, selected through purposive sampling to ensure relevance to the research objectives. Data were collected via a structured questionnaire that measured students' perceptions of skill development, operational efficiency, and readiness for industry standards. The instrument was developed through a literature review of housekeeping training methods and validated for clarity and content. Hands-on training in housekeeping was found to significantly enhance students' technical skills, time management, and overall confidence in performing industry tasks. Participants rated their ability to execute cleaning procedures, manage supplies, and comply with safety protocols as markedly improved following laboratory exercises. The data indicated that practical exposure increased alignment with professional benchmarks and contributed to higher self-reported preparedness for OJT placements. Experiential learning was identified as the most influential factor in boosting employability skills and fostering teamwork. The findings demonstrated that integrating practical housekeeping exercises into the curriculum strengthened the OJT program's outcomes. As a result, it was recommended that the program emphasize core competencies such as bed making, surface sanitation, and inventory control, through simulation and guided practice. Additional suggestions included investing in updated laboratory equipment, incorporating continuous performance assessments, and promoting strategies for stress management and professional communication. By addressing identified gaps and providing structured support, the OJT program can better equip students for the demands of the hospitality workforce and contribute to sustained professional development.

Keywords: housekeeping practices, on-the-job training, experiential learning, operational efficiency, hospitality education

**ASSESSMENT OF SOCIAL MEDIA MARKETING ON RESTAURANT RESERVATION AT
RED TOMATO MODERN ITALIAN RESTAURANT IN QUEZON CITY**

Ranniel Sialongo, Jed Benavente, Karl Stephen Delatado, Jamiery Siasat, Dr. Dana France Ignacio

Abstract

This study assesses the impact of social media marketing on reservation rates at Red Tomato Modern Italian Restaurant in Quezon City. It examines the platforms employed, the nature of the content shared, and the level of audience engagement to determine how digital marketing efforts influence booking behavior. The study aims to identify best practices, uncover areas for improvement, and evaluate the correlation between social media activity and reservation success. The findings will inform strategies to boost bookings and enhance customer loyalty in an increasingly visual and review-driven dining landscape. This study employs a descriptive survey design with purposive sampling to select participants who have dined at Red Tomato and engaged with its social media channels. A structured questionnaire gathers data on demographic profiles, platform usage, content preferences, and reservation experiences. Responses are analyzed using frequency distributions and weighted means to assess the efficiency of social media marketing components such as reviews, visual content, and responsiveness and to pinpoint challenges in the reservation process. Most respondents were aged 21–25 (44 percent) and female (56 percent). Facebook emerged as the primary platform for discovering the restaurant (84 percent), with Instagram trailing behind. The majority of customers visited the restaurant annually (60 percent) and reported monthly incomes around ₱20,000 (40 percent). Social media marketing was rated as highly efficient across key dimensions: platform selection, content relevance, and visual appeal, indicating strong engagement. However, significant issues were identified: delayed response times were reported by 56 percent of customers, while 32 percent cited limited reservation options. Content authenticity concerns were also noted, though technical or security issues were not reported. The findings revealed that social media marketing at Red Tomato successfully attracted a young adult audience primarily via Facebook, leveraging reviews and ambiance videos to influence dining decisions. Reservation efficiency was hampered by slow responses and inflexible booking options, underscoring the need for improved customer service protocols and expanded reservation channels. As a result, recommendations include enhancing responsiveness through dedicated social media support, broadening reservation methods to include messaging apps and online booking widgets, and diversifying content on Instagram to encourage more frequent visits.

Keywords: social media marketing, restaurant reservations, digital engagement, customer responsiveness, content authenticity

**ASSESSMENT OF THE DIVERSE TRAINING AREAS ON EMPLOYEE COMPETENCY IN
SELECTED BRANCHES OF PARES RETIRO IN QUEZON CITY**

Mark Clarenz Calumarde, Janessa Den Salcedo, Glen Erick Binondo,
May Halen Valladores, John Mark Rivera, Roland Rambo Jayoma

Abstract

This study highlights the crucial role of employee competency in helping organizations remain competitive in an ever-evolving business environment. It emphasizes the need for targeted training initiatives to enhance workforce performance. Specifically, the research aims to assess key training areas that can improve employee competency at Pares Retiro on Visayas Avenue. By identifying existing skill gaps and training needs, the study seeks to develop a strategic framework for creating tailored training programs that support organizational growth and operational efficiency. Participants were selected using purposive sampling to ensure that only individuals with relevant characteristics aligned with the research objectives were included. Data collection was conducted through a structured questionnaire consisting of three parts: demographic information, evaluation of training program effectiveness, and assessment of training's impact on employee competency. Responses were measured using a Likert scale. The data gathering process involved preparing the questionnaire, obtaining approval from management, distributing it to the employees, and personally collecting all completed questionnaires to achieve a full response rate. The collected data were then analyzed to inform the study's recommendations and conclusions. The workforce is composed of 56% men and 44% women, with service crew forming the largest group at 48%, followed by helpers (20%), chefs (12%), and managers representing 6%. Nearly half of the employees (46%) have one to two years of service, while 30% have been with the organization for over five years. More than half of the workforce (52%) holds at least an undergraduate degree. The assessment of training programs shows general agreement regarding their effectiveness in improving employee skills, communication, and professional growth, with average weighted scores ranging from 3.10 to 3.24. Training has been particularly successful in developing technical and leadership skills, with a strong appreciation noted for soft skills training. Effective training programs contribute to increased employee satisfaction and skill development, though the adjustment to new responsibilities may initially impact job performance. The positive responses reflect the role of these programs in building a unified and supportive workplace culture, emphasizing the need for ongoing learning opportunities. To enhance training effectiveness and employee outcomes, it is recommended to improve gender diversity through focused recruitment, bolster onboarding and mentorship initiatives, customize training based on participant feedback, and resolve scheduling conflicts to ensure greater participation and productivity.

Keywords: training programs, employee satisfaction, skill development, job performance, workplace cohesion, continuous learning, gender diversity, onboarding, mentorship, scheduling conflicts

**ASSESSMENT ON ADAPTABILITY STRATEGIES OF FOOD STALL BUSINESSES
IN AYALA MALL FAIRVIEW TERRACES**

John Marc Javier, Cindy Lagazon, Mary Jane Galicia, Rodolfo Cleofas,
Ronald Acebo, Uvilyn Vicedor, Roland Rambo Jayoma

Abstract

This study aims to evaluate how food stalls at Ayala Malls Fairview Terraces adapt to strategic business approaches, focusing on key areas such as product innovation, supply flexibility, diversification, technological integration, and customer engagement. A total of 25 food stall employees were selected through purposive sampling, and their perceptions were gathered using structured survey questionnaires relevant to the study. The study reveals that food stall employees at Ayala Malls Fairview Terraces strongly agree on several key adaptability strategies. These include using seasonal ingredients (mean = 3.60), collaborating with local businesses for bundled promotions (mean = 3.36), maintaining buffer stock to handle sudden demand surges (mean = 3.52), leveraging technology to enhance products (mean = 4.00), and engaging customers through digital tools such as websites and chatbots (mean = 3.96). Despite these efforts, food stalls face significant challenges in implementing these strategies, primarily due to economic instability and government regulations (68%), unpredictable customer demand and seasonal fluctuations (64%), and high rental and operational costs (64%). This study emphasizes how food stall businesses in Ayala Malls Fairview Terraces adopt localized adaptability strategies to respond to changing market trends. It also proposes a structured action plan to enhance the implementation of these strategies amid various challenges, such as economic shifts and operational demands. The findings further suggest that equipping food stall businesses with the right knowledge and practical adaptation techniques can significantly boost their competitiveness and sustainability.

Keywords: food stall businesses, adaptability strategies, market trends, product innovation, supply flexibility, technological integration, customer engagement, operational challenges, ayala malls fairview terraces, action plan.

**ASSESSMENT ON DRY HIRE FOOD SERVICES OF VISTA VERDE RESORT
AMONG 2ND YEAR BSHM STUDENTS.**

Lea May Rogelio, Christine Alcaraz, Kathleen Sañez, Charity Irish Morillo,
Nicole Cantonjos, Dr. Dana France Ignacio

Abstract

The hospitality industry is continuously evolving to meet the changing demands of clients, particularly in the area of event catering. Dry hire catering, which involves the provision of food without supplementary services such as staff, equipment, or table settings, is considered a cost-efficient option that prioritizes food quality, presentation, and punctual delivery. However, it is essential to evaluate whether such services fulfill customer expectations and adhere to industry standards. Vista Verde Resort, a well-known event venue, offered dry hire catering during the BSHM Second Year Seminar Tour. This study aimed to assess the quality of these services from the perspective of second-year BSHM students, who are being trained as future professionals in the hospitality industry. This study adopted a quantitative-descriptive research design to assess the quality of dry hire catering services. The respondents were 200 second-year BSHM students who attended the seminar event. Data collection was conducted through a structured questionnaire consisting of three key sections: (1) culinary practices, which included standardized recipe usage, flavor consistency, food presentation, and portion control; (2) service quality, evaluated based on responsiveness, reliability, tangibles, assurance, and empathy; and (3) challenges encountered during the event. The data were analyzed using descriptive statistical tools such as frequency counts and percentages to identify trends, measure service performance, and formulate practical recommendations. The results indicated that Vista Verde Resort mostly followed standardized recipe practices, though inconsistencies in documentation and portion control were evident. Students reported satisfaction with the flavor and presentation of the food. However, issues such as food shortages, service delays during busy periods, and poor accommodation of dietary restrictions were noted. While the food received high marks for quality and appearance, communication shortcomings during the event delayed problem resolution. This study emphasizes the need for clear communication and active staff participation in delivering efficient dry hire catering services. It identified significant issues such as the lack of standardized procedures for documenting recipes and inconsistent accommodation of dietary needs. To enhance service delivery, the study recommends comprehensive staff training, improved communication channels, and the implementation of contingency measures for unforeseen challenges. Strengthening portion control and adopting a more organized system for handling client feedback are also advised to ensure higher customer satisfaction and service consistency.

Keywords: dry hire catering, hospitality industry, service quality, standardized recipe, portion control, food presentation, dietary restrictions, communication, event management, client satisfaction

**ASSESSMENT ON THE CUSTOMER LEVEL OF SATISFACTION IN THE SERVICES
RENDERED BY THE HOTEL QUEZON CITY DISTRICT**

Annekyla Magracia, Ruby Jane Lucas, Joshua Dacles,
Ronie Villabrosa, Katrina Embudo, Oliver Fabon

Abstract

In the competitive hospitality landscape of Quezon City, Philippines, ensuring customer satisfaction is paramount for hotels seeking to attract and maintain their clientele. This study investigates the factors affecting guest satisfaction by employing the SERVQUAL framework, which evaluates service quality based on five dimensions: tangibility, reliability, responsiveness, assurance, and empathy. A quantitative research approach was adopted for this study, involving 50 hotel guests from two hotels in Quezon City. Participants were selected through convenience sampling, and data collection was carried out using a structured questionnaire grounded in the SERVQUAL model. Guest satisfaction was measured using a 4-point Likert scale. Data analysis involved calculating weighted means, while independent t-tests were performed to examine differences in satisfaction between male and female guests. The study revealed a generally high level of guest satisfaction, with an overall weighted mean of 3.35, classified as "Strongly Agree." Empathy emerged as the highest-rated service dimension (3.44), followed by assurance (3.37), tangibility (3.34), reliability (3.33), and responsiveness (3.25). Results from the independent t-tests showed no significant differences in satisfaction between male and female guests across any of the service dimensions. Guests commonly reported issues such as limited amenities, unfriendly staff, and maintenance concerns. To address these, hotel management initiated staff training, carried out room improvements, and upgraded communication systems. Findings suggest that hotels in Quezon City are largely successful in delivering quality service, especially in fostering trust and providing individualized care. The comparatively lower rating for responsiveness indicates room for improvement in promptly attending to guest needs and requests. The uniform satisfaction across genders demonstrates consistent service standards. By tackling these areas for improvement, hotels can enhance the guest experience and strengthen customer loyalty amid growing competition.

Keywords: customer satisfaction, hospitality industry, quezon city hotels, servqual model, service quality, tangibility, reliability, responsiveness, assurance, empathy, quantitative research, guest satisfaction, likert scale, gender comparison, staff training

ASSESSMENT ON THE SUSTAINABLE PRACTICES OF 4-STAR HOTEL

Fortaleza Sofia Nicole, John Sherwin Alberto, Patricia Arzaga,
Jackielyn Asico, Angeline Quimba, Roland Rambo Jayoma

Abstract

This study investigates the sustainable practices adopted by 4-star hotels, with a particular focus on energy efficiency, water conservation, waste reduction, and the use of environmentally friendly materials. Utilizing purposive sampling, the research analyzes how these green initiatives influence operational performance, enhance guest comfort, and contribute to environmental sustainability. The goal is to assess the effectiveness of these practices in balancing hospitality excellence with responsible environmental management. The researchers adopted a quantitative descriptive research design to assess how sustainable practices are implemented and perceived at Diamond Hotel. Data collection was conducted on-site, where sustainability efforts are actively practiced. A structured survey questionnaire served as the primary research instrument and was distributed to the target respondents: hotel customers. A total of twenty-six (26) participants provided feedback, offering valuable insights into the effectiveness and impact of the hotel's sustainable initiatives. This study integrates case studies and stakeholder interviews to examine the sustainability strategies implemented in hotels, with particular emphasis on green building certifications such as LEED and the adoption of renewable energy systems. The analysis reveals that interior design innovations in 4-star hotels not only reflect a strong commitment to environmental sustainability but also enhance guest satisfaction and uphold ecological responsibility. These findings underscore the hospitality sector's growing dedication to sustainable development while maintaining high standards of comfort and service. This study demonstrates that sustainable practices not only foster visually appealing and comfortable environments but also enhance operational efficiency within the hospitality industry. Despite these benefits, the sector faces notable challenges, such as increasing guest awareness and engagement with sustainability initiatives, as well as managing the high initial costs of adopting eco-friendly technologies. The research provides valuable insights for hospitality management, offering strategic recommendations to advance sustainable practices without compromising luxury, comfort, or service quality. These findings support the integration of eco-conscious innovations as a viable path toward long-term success and environmental responsibility in hotel operations.

Keywords: sustainable practices, hospitality industry, eco-friendly technologies, guest satisfaction, green hotel operations, environmental responsibility, operational efficiency, sustainable tourism, leed certification, renewable energy adoption

**AVAILABILITY AND CONDITION OF KITCHEN TOOLS AND EQUIPMENT IN
BESTLINK COLLEGE OF THE PHILIPPINES ON STUDENT COMPETENCY: AN
ASSESSMENT**

Daniel Esguerra, Ailyn Angela Malto, Patricia Anne Rarama,
Aljhon Tambal, Cj Tolosa, Dana Rae Boatis

Abstract

This research is highly pertinent in the current context, as it tackles the increasing challenges and frustrations students encounter due to the limited availability and inadequate quality of kitchen tools and equipment in culinary laboratories. This study employed a descriptive quantitative research design using a structured questionnaire consisting of 26 items divided into two sections. The first section aimed to assess students' familiarity with and alignment to the available kitchen tools and equipment, while the second section focused on identifying the challenges encountered by students in utilizing these resources. A total of fifty respondents completed the researcher-designed questionnaire, providing data essential for the study's analysis. The researchers discovered that students who utilized the appropriate kitchen tools for meal preparation achieved the highest mean score of 3.80, indicating greater efficiency. The primary challenge reported by students was the limited availability of kitchen tools and equipment, cited by 40 respondents. This was followed closely by the insufficient workspace during kitchen laboratory activities, reported by 37 students. Additionally, a smaller proportion of respondents (2) identified limited time allocation during kitchen sessions as a significant obstacle. The findings emphasize the vital importance of the availability and quality of kitchen tools and equipment in enhancing students' performance during kitchen laboratory activities. Addressing students' concerns by providing sufficient and properly maintained kitchen resources fosters greater confidence and competence, ultimately contributing to more effective and successful culinary learning experiences.

Keywords: kitchen tools, culinary education, laboratory equipment, student performance, kitchen laboratory, equipment availability, learning environment, culinary skills, educational resources, student challenges

**BEST PRACTICES FOR EFFECTIVE MANAGEMENT OF CONCURRENT EVENTS: A
CASE STUDY OF CENTURY PARK HOTEL, MANILA**

Princess Joy Malabana, Aldriana Herrero, Cienna Marie Galima,
Liana Barbara Fulleros, Michaela Betonio, Oliver Fabon

Abstract

This study examines the efficient management of concurrent events at Century Park Hotel, Manila, a leading hospitality venue recognized for hosting multiple events simultaneously. With the rapid growth of the events industry and the increasing demand for innovative, customized, and technology-driven experiences, hotels face heightened operational pressures. This research acknowledges the complexities involved in managing simultaneous events, particularly in areas such as resource distribution, coordination and communication, guest satisfaction, and overall operational performance. The study aims to evaluate how Century Park Hotel addresses these challenges and identifies best practices that contribute to seamless, high-quality event execution. This study explores the effective management of concurrent events at Century Park Hotel, Manila, emphasizing both best practices and operational challenges encountered in the hospitality industry. Utilizing a quantitative research design, the study surveyed 50 employees selected through simple random sampling. Data were collected using a researcher-designed questionnaire, which was validated by industry experts and subjected to a pre-testing process to ensure clarity, reliability, and accuracy. The gathered data were analyzed using statistical tools, including frequency and percentage distribution, ranking, and weighted mean, with responses interpreted through a four-point Likert scale. The results provide meaningful insights into the hotel's strategies for handling multiple events simultaneously, contributing to the advancement of knowledge in event management and offering practical recommendations for improving operational efficiency in similar settings. This study examines the effectiveness of Century Park Hotel in Manila in managing multiple events simultaneously. Through a survey of 50 employees, the research assessed the implementation and impact of key event management strategies, including event planning guidelines, operational techniques, resource allocation, brand consistency, attendee flow coordination, and the provision of personalized guest experiences. The study also identified common challenges encountered by staff during concurrent events and proposed strategic improvements to address these issues. The findings contribute meaningful insights into effective multi-event management within the hospitality industry, offering practical recommendations and enriching the existing body of knowledge in hotel and event operations. The study conducted at Century Park Hotel revealed that while the establishment demonstrates a commitment to managing multiple concurrent events, several critical areas require strategic improvement. Survey results highlighted the need for enhanced effectiveness in key operational components, including event planning guidelines, execution techniques, resource allocation, brand consistency, attendee flow management, and the delivery of personalized experiences. Employees cited recurring challenges such as inadequate preparation time, limited resources, and poor interdepartmental communication, all of which hinder optimal event execution. In light of these findings, the study recommends reinforcing safety protocols, optimizing digital registration systems, and implementing comprehensive training programs to strengthen staff capacity in handling simultaneous events. By addressing these issues, Century Park Hotel can significantly enhance operational efficiency, elevate guest satisfaction, and reinforce its competitive advantage within the hospitality and events industry.

Keywords: concurrent event management, hospitality industry, century park hotel, resource allocation, event planning, operational efficiency, guest experience, employee challenges, communication, staff training, event branding, attendee flow

BEYOND THE BUFFET: EXAMINING THE IMPACT OF RESERVATION MANAGEMENT AND CLEANLINESS ON DINING EXPERIENCES AT CABALEN SM CITY NORTH EDSA

Daniella Marie Cruz, Evelyn Magpantay, Jhomarie Mendina,
Alexandra Cruz, Mylene Cortez, Roland Rambo Jayoma

Abstract

This chapter explores the influence of cleanliness and reservation management on the overall dining experience at Cabalen SM City North EDSA. In an increasingly competitive restaurant landscape, intensified by heightened post-pandemic hygiene expectations, customer satisfaction in buffet-style dining now hinges more critically on operational efficiency and sanitation standards. This study addresses a gap in the literature by employing a mixed-methods approach to examine how these two key factors intersect and shape diners' perceptions and satisfaction. It also considers underlying psychological, cultural, and historical influences that inform guests' cleanliness expectations. The goal of this research is to generate actionable insights and strategic recommendations that can enhance customer satisfaction and improve operational practices within buffet restaurant settings. This chapter presents the research methodology employed to ensure a comprehensive and methodologically sound investigation. A mixed-methods approach was utilized, combining both qualitative and quantitative strategies to capture a holistic understanding of the study's objectives. The chapter outlines the research design, target population, study location, scope and delimitation, and the sampling techniques applied. It further details the data collection procedures, including the development, validation, and pre-testing of research instruments to ensure their reliability and credibility. Strategies for establishing the validity and reliability of the data are thoroughly discussed. Moreover, this chapter explains the data analysis procedures, highlighting the statistical tools and techniques used to interpret quantitative data, alongside appropriate methods for qualitative data interpretation. By integrating both data types, this methodology provides a robust framework for generating accurate, meaningful, and actionable insights. The aggregated data from multiple tables highlight several critical factors that significantly influence the overall dining experience at Cabalen SM City North EDSA. These include efficient reservation management, cleanliness, quality of customer service, ambiance, food quality, and perceived value for money. Respondents expressed strong agreement on the importance of prompt resolution of concerns, clear communication from staff, strict adherence to hygiene protocols, and the presence of courteous and knowledgeable personnel. Statistical analysis revealed a strong positive correlation between reservation management and dining experience ($r = 0.865$); however, the result was not statistically significant ($p = 0.135$), indicating that while the relationship appears meaningful, further investigation with a larger sample or alternative methods may be necessary to establish its robustness. In contrast, cleanliness demonstrated a statistically significant but counterintuitive negative correlation with dining experience ($r = -0.985$, $p = 0.015$). This unexpected finding suggests a complex dynamic, potentially influenced by elevated customer expectations in a post-pandemic context, where even minor lapses in cleanliness may disproportionately affect perceptions. Overall, the results emphasize that while various operational factors contribute to customer satisfaction, special attention must be given to maintaining consistent cleanliness standards, enhancing service delivery, and optimizing the dining environment. These elements are crucial in shaping positive guest perceptions and sustaining competitive advantage in the hospitality industry. The findings underscore that customer satisfaction at Cabalen SM City North EDSA is highly contingent upon the effectiveness of reservation management and the consistency of cleanliness standards. Respondents expressed notable dissatisfaction with issues such as overbooking, inefficient reservation processes, and a lack of timely communication, all of which detracted from their overall dining experience. Although cleanliness was generally rated positively, guests emphasized the

critical need for strict adherence to hygiene and safety protocols, especially in a post-pandemic context. These insights suggest that enhancing operational efficiency and maintaining rigorous cleanliness standards are essential for sustaining high levels of customer satisfaction and competitive advantage in the buffet dining sector.

Keywords: cabalen sm city north edsa, customer satisfaction, reservation management, cleanliness, dining experience, hygiene standards, overbooking, communication, restaurant operations, post-pandemic safety.

**BEYOND THE FRONT DESK: EXPLORING THE IMPACT OF
HUMAN FACTORS TO GUEST SATISFACTION**

Kristine Joy Tuliao, Jhon Ivan Ampunin, Iricah Marris Arcipe,
Kyla Camila Berida, Ailene Samson, Oliver Fabon

Abstract

This 2025 study explores the impact of human factors on guest satisfaction in the hospitality industry, with a focus on front desk operations at Admiral Hotel Manila-MGALLERY. Recognizing that previous research often overlooks the intricate role of human interaction in shaping guest experiences, this study emphasizes the importance of personalized service, empathy, and effective communication. It highlights the crucial contribution of front desk staff in influencing guest perceptions and overall satisfaction. By identifying key gaps in current practices, the research underscores the need for ongoing staff training and development programs to enhance service quality. Ultimately, the study provides valuable insights into how human-centered approaches can elevate the standard of hospitality service and drive customer loyalty. This research adopts a descriptive method within a quantitative research framework to examine the influence of human factors on front desk operations at Admiral Hotel Manila-MGALLERY. Data were collected from 15 front office employees using a structured questionnaire based on a modified SERVQUAL model. The instrument was rigorously validated by research advisers, subject matter experts, and statisticians to ensure reliability and content validity. Respondents were selected through convenience sampling. The study explores key service quality dimensions: tangibility, reliability, responsiveness, assurance, and empathy, from the perspective of hotel staff. Quantitative data were analyzed using statistical tools, including frequency and percentage distribution, ranking, and weighted mean, to derive meaningful insights into service interactions and their impact on guest satisfaction. The study indicates that guests generally enjoyed a favorable experience at the hotel, largely due to the reception staff's perceived helpfulness and courteousness. The survey further examined staff perceptions of operational challenges, including inadequate staffing during peak periods, lapses in timely communication, technological disruptions, and inconsistent enforcement of hotel policies. While employees reported overall satisfaction with internal communication, task management, and work-life balance, the findings highlighted critical areas needing improvement. These include more effective workload distribution during high-demand intervals, faster resolution of technical issues, and the establishment of uniform policy implementation to ensure consistency in service delivery. This study highlights the pivotal role that maintaining exceptional levels of guest satisfaction plays in the sustained success of the hospitality industry. It seeks to bridge a critical gap in the literature by providing a comprehensive analysis of the human factors: particularly those associated with front desk personnel that significantly influence guest satisfaction. The research delineates clear objectives: to identify the key human elements that shape visitor experiences and to examine the dynamic relationship between staff behaviors and guests' perceptions. Through this focus, the study aims to contribute valuable insights that can inform strategies for enhancing service quality and fostering enduring guest loyalty.

Keywords: guest satisfaction, human factors, hospitality industry, front desk operations, staff behavior, customer experience, service quality, guest perceptions, hotel management, service excellence

**CASHLESS PAYMENT IN WESTIN MANILA AND ITS
EFFECT TO GUEST SATISFACTION**

Joannah Lindsay Aunzo, Albert John Respicio, Ace Bugarin, Beatrice Bea Bautista,
Frances Meguel Moreno, Dr. Dana France Ignacio

Abstract

With the rise of digitalization in the hospitality industry, cashless payment systems are increasingly adopted by hotels to enhance guest convenience, security, and operational efficiency. This study explores how the implementation of a cashless payment system at Westin Manila affects guest satisfaction, focusing on guest convenience, operational efficiency, and payment security. This study employs a quantitative descriptive design using a self-administered questionnaire distributed to 50 guests at Westin Manila. The questionnaire assesses guest experiences across three dimensions of cashless payment systems: convenience, security, and operational efficiency. Demographic variables, including age, gender, and employment status, are also analyzed to determine their influence on perceptions of the system. Findings revealed that respondents strongly agreed on the positive impact of cashless payments on guest convenience, with a composite mean of 3.66. Operational efficiency received a composite mean of 3.44, and payment security had a composite mean of 3.41. Notable challenges included unstable internet connectivity, lack of integration with rewards programs, and concerns about data privacy. Younger and employed respondents showed higher engagement with digital transactions and reported greater satisfaction. The study underscored the importance of stable technological infrastructure and robust cybersecurity measures in maintaining high levels of guest satisfaction. It also highlighted the need for staff training on cashless payment procedures and for accommodations to assist guests who are less familiar with digital payment technology.

Keywords: cashless payment, guest satisfaction, westin manila, guest convenience, operational efficiency, payment security

**CHALLENGES ENCOUNTERED BY NEWLY HIRED EMPLOYEES OF
SELECTED TRAVEL AGENCIES IN QUEZON CITY**

Joana Galindez, Cristine Mae Caranguian, Christine Amistad, Ashley Kay Astudillo,
Analisa Grande, Alezhandrea Clio Barrios

Abstract

This study examines challenges encountered by newly hired employees at two travel agencies in Quezon City JVD Event and Travel Management Co. and Frielle Travel and Tours. It aims to identify barriers to successful job adjustment, including insufficient training, unrealistic role expectations, and difficulties with workplace dynamics. The study seeks to inform actionable strategies for improving employee integration and retention in the travel and tourism sector. This study employs a descriptive research design, gathering data from 50 newly hired employees (25 per agency) through a structured questionnaire. The instrument probes key areas such as employee orientation, workload management, client relations, and overall job satisfaction. Collected data are analyzed using frequency distributions and thematic grouping to uncover common adjustment challenges. Analysis revealed that a majority of respondents reported inadequate preparation for core tasks, with 68 percent rating initial training as insufficient. Nearly half cited unrealistic expectations regarding workload and performance metrics. A significant portion of participants experienced difficulty adapting to organizational culture, and 62 percent identified unclear communication and lack of mentorship as primary obstacles to effective integration. The findings underscored the need for targeted interventions to facilitate smoother transitions for new hires. Enhanced training programs were found to be critical for building competence, while structured mentorship initiatives and clear communication channels emerged as key supports. Agencies that implemented these measures observed improved job satisfaction and reduced turnover among recent hires.

Keywords: newly hired employees, job adjustment, travel agency, training programs, workplace dynamics, mentorship, communication channels

**CLEANLINESS AND MAINTENANCE AND ITS EFFECT ON
ONLINE REVIEW REPUTATION**

Marian Guilaran, Judy Domasig, Jubel Manuel, Raymart Murcia,
Melvin Lor, Dana Rae Boatis

Abstract

In the evolving landscape of the hospitality industry, cleanliness and maintenance play crucial roles in shaping guest experiences and online reputations on peer-to-peer accommodation platforms. This study investigates how these factors influence guest reviews and booking outcomes at Vine Residences in Novaliches, Quezon City. Understanding the impact of property hygiene and upkeep on online ratings is essential for hosts seeking to enhance consumer trust and competitive advantage. This study employs quantitative descriptive design with purposive sampling to collect data from 50 Airbnb guests who stayed at Vine Residences. Participants completed a structured survey questionnaire that measured perceptions of cleanliness, maintenance responsiveness, overall satisfaction, likelihood of leaving a positive review, and intent to rebook. Data was analyzed using frequency distributions, weighted means, and ranking procedures to determine the relative influence of each factor on review positivity and booking success. The findings revealed that cleanliness and maintenance significantly influenced guests' likelihood of leaving positive reviews and returning for future stays. High ratings in these areas showed a strong correlation with increased booking success and greater trust in the property. However, delayed maintenance responses and inconsistent cleaning standards were identified as primary challenges that negatively affected guest satisfaction and online reputation. These findings demonstrated that property hygiene and upkeep were fundamental to guest satisfaction and review quality. Cleanliness provided both functional value and psychological comfort, fostering trust and encouraging repeat stays. Maintenance failures led to negative feedback and reduced booking success, highlighting the need for hosts to implement reliable cleaning protocols and timely repair processes. By prioritizing operational efficiency and presentation standards, accommodation providers can strengthen their online reputation and secure sustained booking performance.

Keywords: cleanliness, maintenance, online reviews, booking success, guest satisfaction, airbnb, hospitality management, property reputation

**COMPARATIVE STUDY OF ROOM AMENITIES PREFERENCE
AMONG FILIPINO AND FOREIGN TRAVELERS**

Pamela Ong, Thea Veronica Calimlim, Maria Melinda Manto, Jane Rose Pagsanjan,
Princess Valladolid, Dr. Dana France Ignacio

Abstract

This study examines hotel room amenity preferences among Filipino and foreign travelers, focusing on how cultural backgrounds shape guest expectations and satisfaction. It highlights that while international tourists often value globally recognized amenities, local guests tend to prioritize value and convenience. Insights from this comparison can guide hotels in tailoring services to boost guest satisfaction and competitive advantage. This study employs a causal-comparative design with stratified random sampling to select 30 in-house guests at White Knight Hotel: 15 Filipino and 15 foreign travelers. Participants completed a structured questionnaire that recorded demographic data, rated the importance of room and bathroom amenities, and assessed satisfaction with service attributes such as reliability and responsiveness on a four-point Likert scale. Weighted means were calculated to determine the relative importance and satisfaction levels for each amenity. Analysis revealed that both Filipino and foreign guests rated comfort, cleanliness, and responsive service as their top priorities. Mean importance scores for these factors exceeded 4.2 on a 5-point scale for both groups. Statistical comparison found no significant differences in amenity preferences or satisfaction ratings between the two nationalities. The most frequently cited issues were noise disturbances and minor malfunctions in room fixtures. These findings indicated that core guest priorities, comfort, cleanliness, and service responsiveness, transcend cultural distinctions. Addressing noise control and ensuring regular maintenance of in-room amenities were critical steps for enhancing overall guest experience. Hotels can leverage this information by standardizing high-impact services while maintaining flexibility to accommodate specific cultural preferences, thereby strengthening market positioning.

Keywords: hotel amenities, guest preferences, customer satisfaction, cultural comparison, hospitality management, white knight hotel.

**CONTRACTUAL EMPLOYEES PRACTICES OF MAX'S RESTAURANT QUEZON CITY:
AN ANALYSIS**

Ronney Rey Narvasa, John Recca Doma, Mark Angelo Garcia,
Justiene Patriarca, Rhialyn Villeta, Roland Rambo Jayoma

Abstract

Contractual employment in the Philippines provides flexibility for employers but often undermines worker well-being through job insecurity, limited benefits, and low wages. This study examines the relationship between contractual employment practices and service quality at Max's Restaurant in Quezon City. It emphasizes the importance of ethical labor practices such as compliance with regulations, provision of training, and supportive work environments to enhance employee morale, skills development, and prospects for regular employment. This study employs a quantitative descriptive design with purposive sampling to select 30 contractual employees at Max's Restaurant Quezon City. A self-developed structured questionnaire gathered data on demographics, employment conditions, perceived service quality, and workplace challenges. Collected responses were analyzed using descriptive statistics to identify prevalent issues and their impact on job satisfaction and service delivery. The sample was predominantly aged 21 to 25 years (53.3%), with a slight male majority (56.7%). Educational backgrounds ranged from senior high school to college graduates. Most participants had under one year of service and were assigned to dining and dishwasher roles. Respondents agreed strongly that rapid technological changes, absence of overtime premiums, and restricted leave negatively affected job satisfaction. Bullying, limited career advancement, and negative work culture emerged as prevalent concerns, underscoring the link between employment practices and both employee motivation and service quality. Findings indicated that a young, contract-based workforce faced significant morale and retention challenges due to precarious employment conditions. Service quality was adversely affected by low motivation and frequent turnover. It was recommended that Max's Restaurant implement inclusive engagement strategies, enhance benefits and recognition programs, promote diversity, and introduce career development pathways. These measures were expected to foster a more stable, motivated workforce and improve overall service standards.

Keywords: contractual employment, service quality, job insecurity, employee morale, career development, hospitality management.

**CULTIVATING CAREER READINESS: STRENGTHENING EMPLOYABILITY SKILLS
AMONG HOSPITALITY MANAGEMENT STUDENTS**

Joyce Ann Lazaga, Jude Apares, Katrina Mae Balajadia,
Mark Donato, Kim Carlo Nuñez, Dana Rae Boatis

Abstract

This study aims to assess the career readiness of Hospitality Management students at Bestlink College of the Philippines. It explores the extent to which these students are prepared for employment and identifies specific areas where employability skills require further development. The primary goal is to bridge the gap between academic training and the demands of the hospitality industry by fostering skills that align with workforce expectations. This study employs a quantitative research design using a descriptive approach to examine the career readiness and employability skills of Hospitality Management students. The participants consist of 150 alumni from the 2022–2024 batch of Bestlink College of the Philippines, selected through purposive sampling to ensure relevance to the research objectives. The findings revealed that the majority of respondents belonged to the young adult age group, with 62.7% aged 20 to 25 and 37.3% aged 26 to 30. A significant portion of participants graduated in 2022, 2023, and 2024. Their areas of specialization include Food and Beverage, Events and Entertainment, Accommodations, Travel and Tourism, and Recreation and Leisure. In terms of employment, 58% of the respondents held full-time positions, while the remainder were employed part-time or under contract, casual, or seasonal arrangements. Most of the alumni were employed within the land-based sector. The study concluded that Hospitality Management students demonstrated strong career orientation and were generally well-prepared through experiential learning. However, they still encountered employment challenges, particularly in areas such as building professional networks and acquiring sufficient practical experience. To address these gaps, the study recommends the enhancement of hands-on training, development of soft skills, and increased engagement with the industry. Additionally, the implementation of inclusive recruitment practices, provision of financial support, broader job placement strategies, and flexible learning opportunities are advised to further strengthen employability and support long-term career progression.

Keywords: career readiness, employability skills, hospitality management, experiential learning, workforce preparation, industry engagement, alumni employment

**CULTURAL PRESERVATION: PROMOTING LOCAL DELICACIES
THROUGH FOOD PREPARATION WORKSHOP**

Kyl Oraa, Bernadeth Shane Rifareal, Janine Shaina Centeno, Angelo Evangelista,
Rizza Mae Rosal, Ashley Batallones, Dr. Dana France Ignacio

Abstract

This study explores the role of food preparation workshops as effective tools for cultural preservation, specifically in promoting local delicacies. With the increasing influence of globalization and modernization on traditional food practices, communities are at risk of losing their culinary heritage. This study aims to address this concern by examining how food workshops can help preserve and pass down culturally significant culinary knowledge. This study implements a cultural initiative designed to revitalize and safeguard traditional food practices by engaging participants in hands-on workshops. These sessions teach the preparation of local delicacies while incorporating intergenerational knowledge sharing, storytelling, and active participation. The workshops function not only as educational platforms but also as avenues to strengthen cultural identity and foster community cohesion. The findings revealed that food preparation workshops fostered greater appreciation for local cuisine, encouraged sustainable food practices, supported local economies, and contributed to preserving intangible cultural heritage. Participants demonstrated increased interest and involvement in traditional cooking methods and recognized the cultural value of local dishes. The study concluded that food preparation workshops are effective in promoting cultural preservation. By integrating experiential learning, storytelling, and cultural education, these programs enhanced participants' understanding, appreciation, and active engagement with traditional culinary practices. Such initiatives contribute meaningfully to the continuity of food-related cultural traditions in modern communities.

Keywords: cultural preservation, local delicacies, food preparation workshop, culinary heritage, traditional cuisine, community engagement, hands-on learning

**CUSTOMER PERCEPTION ON TATOOED PERSONNEL IN SELECTED
RESTAURANTS IN NOVALICHES, QUEZON CITY**

Roy Gianan, Maribeth Casuple, Joana Erica Agno, Ronald Dequiña,
Cristino Sumalpong, Dr. Dana France Ignacio

Abstract

The increasing cultural acceptance of tattoos has influenced how body art is perceived in professional settings, particularly in customer-facing industries such as hospitality. Historically, tattoos were often associated with deviance, but they are now recognized as a form of personal expression by individuals from diverse backgrounds, including professionals. Despite this shift, challenges remain, especially in hospitality services where visibly tattooed staff may affect customer perception, service interactions, and overall operational outcomes. This study explores how customers perceive tattooed personnel in restaurant settings and investigates whether visible tattoos influence their dining experience. This study employs a descriptive-correlational research design, integrating both quantitative and qualitative methods to examine customer perceptions of tattooed personnel. The research focuses on selected restaurants in Novaliches, Quezon City, specifically Giligan's Restaurant, Classic Savory, and Chooks-to-Go. Data collection includes demographic variables such as age, sex, and frequency of visits. Customer perceptions are assessed in terms of ambiance, communication, and service quality. Descriptive statistics are used to summarize responses, allowing for a comprehensive understanding of general customer attitudes toward tattooed employees in the hospitality setting. The demographic data revealed varied respondent profiles in terms of age, sex, and visit frequency. Frequencies and percentages were calculated to provide a contextual understanding of the respondents' backgrounds. The analysis of these variables helped determine how demographic characteristics influenced customer perceptions. It was found that perceptions varied depending on the age of the respondents, with younger customers tending to be more accepting of tattooed staff, while older respondents exhibited more conservative views. The findings indicated that customer perception of tattooed employees in selected restaurants is influenced by generational differences. Specifically, older customers tended to view tattooed personnel with more reservation, while younger customers expressed greater openness and acceptance. These insights suggest that while tattoos are gaining broader cultural acceptance, generational attitudes still play a role in shaping customer responses in hospitality environments. The study highlights the importance of understanding customer demographics when managing employee appearance standards in service industries.

Keywords: customer perception, tattooed personnel, hospitality industry, restaurant service, cultural acceptance, body art, generational attitudes, novaliches quezon city

**CUSTOMER SATISFACTION: EXPLORING FOOD QUALITY OF
PIZZA PARLOR ALONG, QUIRINO HIGHWAY**

Dyline Mutas, Alexise Avon Conel, Kim Channel Liporada, Beatrice Aira Millano, Jazel Lorraine Tizon, Ariane Jane Yonsal, Dr. Dana France Ignacio

Abstract

Food quality plays a critical role in the food industry, directly influencing customer satisfaction and loyalty. High-quality ingredients, proper preparation, appealing flavor, and an overall positive dining experience are essential in meeting customer expectations. This study aims to determine the level of customer satisfaction in relation to the food quality offered by Pizza Parlor along Quirino Highway. It also seeks to explore how customers perceive the products, services, and pricing of the establishment, which has been serving patrons for several years. Understanding customer satisfaction is vital in assessing whether consumer expectations are being met. Moreover, customer feedback and suggestions contribute to the continuous improvement of products and services, helping businesses achieve sustainable growth. This study outlines the methodologies used, including the research design, sampling technique, instrument construction, validation, administration, and retrieval of questionnaires. A structured survey instrument was administered to assess customer satisfaction and food quality. The collected data were subjected to statistical treatment to analyze the relationship between the variables. The analysis revealed that there was no significant relationship between customer satisfaction and food quality, as indicated by an r -value of 0 and a p -value of 1. These results suggest that changes in food quality did not have a measurable impact on customer satisfaction within the context of this study. This implies that other factors, such as service experience, ambiance, pricing, or brand reputation, may play a more substantial role in influencing customer satisfaction. The study also summarized findings based on demographic profiles, including age, gender, and income range. It examined specific variables such as freshness, flavor, texture, and consistency under food quality, and presentation and taste under customer satisfaction. Although no significant relationship was found between food quality and customer satisfaction, the discussion highlights the potential influence of other external factors. The study recommends further exploration of these variables to develop a more comprehensive strategy for enhancing customer satisfaction at Pizza Parlor.

Keywords: customer satisfaction, food quality, pizza parlor, flavor, freshness, ambiance, service experience, consumer feedback, quirino highway

**DIGITAL ACCESSIBILITY CHALLENGES FACED BY CUSTOMER
IN ONLINE HOTEL BOOKING**

Mark Rolly Corbito, Aaron Paul Aragon, Angelica Ann Canja,
Erica Cultivo, Ma Catherine Pescador, Roland Rambo Jayoma

Abstract

Online hotel booking has become a widely used and convenient method for reserving accommodations. However, not all customers find it accessible or easy to use. Individuals such as older adults, persons with impairments, and those unfamiliar with digital platforms often encounter difficulties navigating online booking systems. This study investigates the specific digital accessibility challenges faced by customers in the Philippines when booking hotels online, focusing on common barriers that hinder a seamless booking experience. This research utilizes a descriptive method to gather data from 26 guests of Go Hotel SM North Edsa, located in Quezon City. A structured questionnaire was distributed to examine their experiences and identify challenges encountered during the online booking process. The survey addressed issues such as language complexity, website navigation, form usability, technical errors, and the responsiveness of customer support services. Findings revealed that a significant number of guests experienced difficulties related to unclear language, poorly designed website interfaces, and forms that lacked compatibility with assistive technologies. Some respondents also reported dissatisfaction with customer service support. Despite these issues, a portion of the guests acknowledged certain accessible features and commended the helpfulness of hotel staff, which contributed to an improved booking experience. This study emphasizes the importance of enhancing the digital accessibility of hotel booking platforms. Creating user-friendly and inclusive online systems can significantly improve the booking experience for all users, particularly those with varying needs and limitations. Hospitality establishments are encouraged to implement simplified website designs, clearer instructions, and inclusive features that cater to a broader range of users, promoting accessibility and customer satisfaction.

Keywords: digital accessibility, online hotel booking, website usability, hospitality industry, customer experience, inclusive design, assistive technology compatibility, user-friendly interface

**DIGITALIZATION IN HOTEL OPERATION: AN ASSESSMENT OF
SERVICE EFFECTIVENESS AND EFFICIENCY**

Roel Jay Rocha, Mobarak Atar, Jomari Mamac, Nerjelyn Sola, Jessa Mae Abejuela, Oliver Fabon

Abstract

In today's fast-paced technological landscape, the hospitality industry is deeply integrated into the ongoing information technology revolution. The adoption of digital innovations, such as computerized reservation systems, automated check-in/check-out processes, self-service kiosks, smart room controls, and mobile guest services, has transformed hotel operations. These advanced technologies are essential for boosting operational efficiency, enhancing guest satisfaction, and sustaining the competitive edge of hospitality businesses. The study utilized a quantitative research design to enhance its validity and reliability. The sample comprised fifty (50) hotel employees from Richmonde Hotel, Ortigas Center, excluding managers and supervisors. These frontline staff members offered valuable firsthand perspectives on how digital services influence their daily responsibilities, guest interactions, and overall operational workflow. The majority of respondents are male, suggesting that male employees, particularly those in housekeeping and front office departments, are more frequently engaged with digitalized services within the hotel. The study identifies several significant challenges faced by employees at Richmonde Hotel in implementing and utilizing digital hospitality systems. Chief among these are difficulties in accessing online guest bookings and adapting to new digital platforms, compounded by insufficient employee training, limited technical support, and frequent technical disruptions. Other notable issues include concerns over data security, limited proficiency in assisting guests with new digital tools, poor system integration, and challenges in updating technology. Despite these hurdles, the results demonstrate that total quality management practices can be effectively sustained through digital tools, which enhance service quality and contribute to higher guest satisfaction. The following recommendations are proposed for hotel employees navigating digitalization within the hospitality industry. Despite the challenges faced, employees have the capacity to adapt and elevate the quality of their services across departments by implementing the strategies outlined in response to the identified issues. Adopting these recommendations will facilitate smoother integration of digital tools, enhance operational efficiency, and improve overall service delivery.

Keywords: digitalization, hospitality industry, hotel employees, digital services, service adaptation, operational efficiency, employee training, technical support, total quality management, guest satisfaction, digital tools integration, challenges in digital

**EFFECTIVE STRATEGIES FOR MINIMIZING FOOD WASTE
FROM LEFTOVERS IN HOTEL BUFFET SETTING**

Raymond Llorente, Michael Angelo Ablazo, Romnick Llanera, Jonard Lucinario,
Erica Parado, Roland Rambo Jayoma

Abstract

The hospitality industry is facing increasing pressure to adopt sustainable practices, particularly in reducing food waste generated by hotel buffets. These buffets are significant contributors to environmental harm and operational inefficiency due to issues like overproduction, large portion sizes, and unpredictable guest behavior. Although awareness of these problems is growing, hotels often find it challenging to strike a balance between waste reduction and guest satisfaction. This struggle is largely due to inadequate real-time monitoring, limited staff training, and the lack of targeted strategies. This study explores evidence-based solutions at Café Astoria using a quantitative descriptive design and purposive sampling of 20 employees. Research findings suggest that portion control, food quality, and presentation have a significant impact on guest perceptions and waste levels. Effective strategies to mitigate waste include using smaller plates, offering pre-portioned dishes, measuring ingredients accurately, and utilizing predictive technology. Demographic analysis reveals a young and motivated workforce with a balanced gender representation and diverse employment status. Major contributors to food waste include inconsistent consumption patterns, mismatched menu offerings, and the perception that value can only be provided through large portions. Key interventions identified are strong inventory management, cost optimization, educating guests and staff, and implementing real-time waste tracking. Engaging guests interactively and providing ongoing training for employees are essential for embedding sustainable practices. Challenges such as overpreparation and a lack of accurate forecasting highlight the necessity for data-driven decision-making and collaborative efforts across departments. This research addresses gaps in the literature by recommending a multi-faceted approach that combines operational strategies, behavioral insights, and technological tools. This approach will help hotels like Café Astoria implement effective food waste reduction initiatives that align sustainability with guest expectations. By adopting this holistic strategy, hotels can promote environmental responsibility while also enhancing operational efficiency.

Keywords: food waste reduction, hotel buffet, leftover management, sustainable practices, waste minimization strategies, hospitality industry, food handling, buffet operations, environmental sustainability, kitchen management, portion control, guest behavior,

EFFECTIVENESS OF AGODA ONLINE BOOKING ON USER SATISFACTION

Earl Astryd Cabalquinto, Dave Berbano, Jose Matthew Fortaleza,
Melvin John Galit, Justine Mugar, Dr. Dana France Ignacio

Abstract

The results indicate that while Agoda meets user expectations, improvements are needed in areas impacting trust and customer satisfaction. Enhancing customer support and ensuring real-time data accuracy are essential to improve the overall booking experience. A quantitative descriptive research design was used, employing a survey questionnaire based on a Likert scale. The study involved 50 fourth-year Bachelor of Science in Hospitality Management students from Bestlink College of the Philippines, all of whom had prior experience using Agoda. The data were analyzed using frequency, percentage, and weighted mean. Survey findings indicated that most respondents rated Agoda highly for its user-friendliness, secure transactions, and variety of accommodation options. However, issues such as system reliability, lack of pricing transparency, and complications surrounding the cancellation and refund process were also identified. The findings indicate that while Agoda generally meets user expectations, there is a need for improvement in areas impacting trust and customer satisfaction. It is recommended to enhance customer support and ensure the accuracy of real-time data to improve the overall booking experience.

Keywords: agoda, online booking, user satisfaction, e-commerce, travel platforms, customer experience, booking efficiency, digital services, hospitality industry, user interface, service reliability, convenience, online travel agency (ota)

**EFFECTIVENESS OF ECO-FRIENDLY INITIATIVES:
BASIS FOR HOSPITALITY SUSTAINABILITY**

Matthew Tijam, George Vincent Castro, Jhon Cris Cayetano,
Curt Zedric Tameta, Art Trogo, Dana Rae Boatis

Abstract

This research examines the impact of eco-friendly initiatives on promoting sustainability in the hotel industry, with a specific focus on the Manila Grand Opera Hotel. Guided by the Theory of Green Purchase Behavior, the study explores how the implementation of sustainable practices such as effective waste management and energy conservation affects both the hotel's operational performance and the satisfaction of its guests. This study employed a quantitative descriptive research design, utilizing structured survey questionnaires as the primary data collection instrument. A total of 50 employees from various departments of the Manila Grand Opera Hotel were selected using a simple random sampling method. The survey aimed to evaluate the implementation and perceived effectiveness of eco-friendly practices, including energy efficiency, waste reduction, water conservation, and environmental protection. Data gathered were analyzed using weighted mean scores, complemented by a verbal interpretation scale to assess the relevance and impact of each sustainability initiative. The demographic profile revealed that the majority of respondents were aged between 33 and 37 years and were primarily assigned to the housekeeping department. Among the various eco-friendly initiatives examined, waste management emerged as the most extensively practiced, followed by water conservation and environmental protection. In the area of energy conservation, respondents strongly agreed that the hotel utilized energy-efficient equipment and LED lighting systems, contributing to reduced power consumption. However, the adoption of solar energy received the lowest evaluation, indicating minimal integration of renewable energy sources. Waste management practices received the highest ratings, with employees citing the presence of systematic waste segregation procedures, clearly labeled disposal bins, and consistent guest reminders as critical components of the hotel's environmental sustainability efforts. The study's findings indicate that eco-friendly initiatives such as energy-efficient infrastructure and comprehensive waste management are not only well-integrated into hotel operations but are also positively perceived by staff members. These practices reflect a strong organizational commitment to sustainability. However, the minimal adoption of renewable energy sources, particularly solar power, highlights a significant opportunity for further enhancement. The results underscore the vital role of employee engagement and awareness in the effective implementation of sustainable practices. Moreover, the study emphasizes the need for continuous improvement to align hotel operations with evolving global sustainability goals. Strengthening these initiatives can foster greater environmental responsibility, enrich guest experiences, and enhance the hotel's reputation in an increasingly eco-conscious hospitality market.

Keywords: eco-friendly initiatives, energy efficiency, waste management, solar power, renewable energy, employee engagement, sustainability, hotel operations, environmental responsibility, guest experience, brand image

**EFFECTIVENESS OF ONLINE REVIEW TO RESTAURANT REPUTATION:
TOWARD A GUIDE**

Jeremie Señadan, Angelica Cantonjos, James Estrella, Princes Dianne Gono,
Prince Sirly Librando, Dana Rae Boatis

Abstract

In the hospitality industry, reputation management has emerged as a key factor influencing consumer decisions, with online reviews, blogs, and social media posts becoming vital channels of information. Over the past few years, the restaurant sector has seen notable transformations. Remarkably, even amid global economic challenges, consumers continue to actively seek out new dining experiences and distinctive culinary destinations. The study examines critical elements such as the credibility of online reviews, the level of customer trust, and the consistency of ratings to determine their influence on consumer choices and restaurant performance. Results emphasize the powerful role of online feedback in shaping brand image and offer strategic recommendations for Kuya J Restaurant to enhance its public reputation and boost customer interaction. This study explores the impact of online reviews on the reputation of Kuya J Restaurant and seeks to formulate evidence-based guidelines for effectively managing customer feedback. To gather relevant insights, a dual sampling strategy was utilized: convenience sampling was applied to select customers who actively engage with online reviews both as readers and contributors while purposive sampling focused on restaurant owners and managers with direct experience in managing online feedback and understanding its implications for business reputation. This study aims to investigate the influence of online reviews on restaurant reputations by analyzing key factors such as the volume of reviews, sentiment polarity, and rating distribution patterns. It seeks to establish a clear connection between customer feedback and business performance. Furthermore, the research intends to develop a comprehensive management guide for restaurant owners and managers, outlining effective strategies for maximizing the benefits of positive reviews while mitigating the adverse effects of negative ones to enhance overall brand reputation and customer satisfaction.

Keywords: online reviews, restaurant reputation, customer feedback, sentiment analysis, review volume, rating distribution, business performance, reputation management, kuya j restaurant, customer satisfaction.

**EFFECTIVENESS OF TECHNOLOGICAL UPGRADES ON THE ENHANCEMENT OF
GUEST EXPERIENCE AT MC HOTEL FAIRVIEW, QUEZON CITY**

Sherry Jonel Siaron, Harry Cortes, Lyra Mae Balacano, Mary Grace Guba,
Juphay Montallana, Oliver Fabon

Abstract

The hospitality industry is undergoing significant changes driven by rapid technological advancements and rising guest expectations. While these innovations offer opportunities to improve guest satisfaction and streamline operations, they also pose challenges in terms of implementation costs, system integration, and employee adaptability. This study evaluates the effectiveness of recent technological upgrades at Mc Hotel Fairview in Quezon City, with a specific focus on housekeeping services and their contribution to enhancing the overall guest experience. This study employs a quantitative descriptive research design to assess the impact of technology on guest satisfaction. Data are collected through a survey questionnaire administered to 30 purposively selected guests at Mc Hotel Fairview. Purposive sampling is used to ensure a diverse representation of guest demographics, experiences, and perspectives. The survey measures guest perceptions of technological features such as room service ordering, internet connectivity, and digital access systems, providing a detailed understanding of how these tools influence the guest experience. The majority of respondents (73%) were aged 21 to 25, indicating a predominantly younger guest demographic. Participants expressed high satisfaction with technological upgrades, particularly with the ease of room service requests, keyless entry systems, and stable Wi-Fi access. While amenities and digital features were generally well-received, guests noted areas for improvement, including room pricing, staff proficiency in using new technologies, and the consistent functionality of in-room devices. The findings underscore the importance of strategic technology integration in enhancing the guest experience. The study recommends the development of a user-friendly mobile application, the implementation of AI-powered chatbots for guest assistance, and the provision of high-speed internet access. Additionally, improving staff training, upgrading room amenities, and refining room service operations are essential for sustained guest satisfaction. Establishing strong feedback mechanisms, maintaining strict cleanliness standards, and launching targeted marketing campaigns can further improve guest retention and brand loyalty.

Keywords: guest experience, technological upgrades, hospitality management, mc hotel fairview, digital services, housekeeping, hotel technology, guest satisfaction, mobile app integration, ai chatbots

**EFFECTS OF ACT OF GOD ON THE SERVICE QUALITY OF PARTY HOUSE
CATERING: A PROPOSED WEATHER CONTINGENCY PLAN**

Hannah Jhane Capati, Rechel Bato, Rose Anne Damarillos,
Michael John Legaspi, Brainsley Sinot, Dana Rae Boatis

Abstract

This study explores how natural disasters and unfavorable weather conditions, commonly referred to as Acts of God, affect the service quality of party house catering. It focuses on critical aspects such as contractual obligations, technological readiness, business reputation, financial stability, resource availability, and customer satisfaction. These elements are often compromised by unpredictable weather, thereby disrupting service delivery. To address this, the study aims to propose a strategic weather contingency plan that event organizers can implement to better anticipate, manage, and recover from weather-related disruptions, ultimately ensuring more reliable and efficient operations. The study adopts a descriptive research design to examine the impact of weather-related events on party house catering services. It centers on the preparedness of event organizers in dealing with unforeseen weather conditions. A total of 15 catering coordinators were purposively selected based on their professional experience. The researchers distributed and retrieved validated survey questionnaires personally to guarantee accuracy and completeness. The data collected were analyzed using basic descriptive statistics, including percentages and weighted means, to assess and rank the responses regarding weather preparedness and its effects on service quality. The findings revealed that most catering coordinators recognized the necessity of having contingency plans to address weather-related issues. Key areas of focus included weather monitoring systems, risk management protocols, and readiness of logistical resources. Full-time and experienced coordinators demonstrated greater capacity in managing disruptions compared to part-time staff. Commonly reported issues involved transportation delays, financial difficulties, and maintaining client satisfaction under adverse conditions. The results emphasized the importance of clear communication, flexible contract terms, and adaptive strategies to ensure operational continuity during extreme weather events. The study concluded that a comprehensive weather contingency plan is crucial in preserving service quality amid unexpected weather disturbances. The coordinators' level of experience and employment status significantly influenced their effectiveness in handling such challenges. Moreover, various types of weather events such as storms or earthquakes require tailored strategies, including the use of weather-resistant materials and dependable communication tools. Recurring logistical concerns, such as delayed transportation and venue damage, underscored the need for enhanced risk management practices to minimize disruptions and uphold service standards.

Keywords: weather contingency plan, acts of god, catering services, event management, risk management, service quality, hospitality industry

**EFFICIENT SERVICE DELIVERY IN M.I.C.E EVENTS
TOWARDS GUEST SATISFACTION**

Maria Christina Crusio, Ma. Teresa Tivar, Jienzhel Anne Parreñas,
Rashly Virlle Sullano, Cedric Macalintal, Roland Rambo Jayoma

Abstract

The Meetings, Incentives, Conferences, and Exhibitions (MICE) sector is a cornerstone of the global tourism and hospitality industry, generating substantial revenue, facilitating professional networking, and creating employment opportunities. Originating in 19th-century Europe and expanding rapidly throughout the 20th century with the advent of incentive travel, MICE has evolved into a major economic driver. Yet, frequent service delays, particularly those stemming from food and beverage bottlenecks and staffing shortages, undermine event quality and guest satisfaction. This study seeks to pinpoint the operational causes of these delays, evaluate their impact on attendee experience, and propose targeted strategies to streamline service delivery, ultimately bolstering hotel competitiveness in the MICE market. A quantitative research design was employed, wherein surveys were conducted with twenty guests of Solaire Resort in Parañaque who encountered service delays. The study aimed to evaluate how these delays affected their overall satisfaction with the resort's services. The findings indicated that most respondents were between the ages of 23 and 27, predominantly female, and regular patrons of the resort. Guests generally responded positively to how service delays were handled, citing staff attentiveness as a key strength. However, recurring delays remained a concern. Although the audio-visual equipment was rated highly in terms of functionality, deficiencies in staff training related to its operation were evident. Overall service quality was considered satisfactory, yet opportunities for improvement were identified, particularly in enhancing employee training and resolving manpower shortages. The primary factors affecting service efficiency were logistical constraints and communication gaps. To enhance guest satisfaction and overall event success, the study recommends improving food service efficiency, enhancing the usability of audio-visual (AV) equipment, optimizing venue setup, promoting staff professionalism, and ensuring adequate staffing. The conclusion highlights the importance of clear communication and prompt service delivery in elevating the guest experience. Strengthening these areas will not only improve M.I.C.E. event execution but also help hotels remain competitive in the evolving hospitality industry.

Keywords: m.i.c.e. sector, guest satisfaction, service delays, food service efficiency, audio-visual usability, venue setup, staff professionalism, manpower shortage, communication barriers, hospitality industry, solaire resorts, quantitative research.

**ELEVATING CUSTOMER EXPERIENCE: IMPACT OF SELF-SERVICE KIOSKS
IN FAST-FOOD CHAINS AT QUEZON CITY**

Gabriel Ramos, Menchie Canon, Jubileah Fullentes, Sarrah Lynn Elias, Dr. Dana France Ignacio

Abstract

The fast-food industry has experienced a major shift with the adoption of self-service kiosks, which have significantly enhanced customer experience by streamlining service speed, increasing order accuracy, and enabling greater personalization. This study investigates the impact of self-service kiosks on customer experience in fast-food establishments across Quezon City. It specifically focuses on key dimensions such as efficiency, satisfaction, customer engagement, brand loyalty, and the challenges associated with kiosk usage. Survey questionnaires were distributed to customers of fast-food chains in Quezon City that have adopted self-service kiosks. The collected data underwent statistical analysis to evaluate the correlation between kiosk usage and key dimensions of customer experience, such as service efficiency, order accuracy, user satisfaction, customer engagement, and overall loyalty. The findings reveal that the integration of self-service kiosks in fast-food chains significantly improves the overall customer experience. Key benefits include faster delivery service and enhanced order accuracy, which collectively lead to greater customer satisfaction and engagement. Many customers noted the convenience and efficiency of the kiosks, which streamlined the ordering process and minimized human error. Despite these advantages, the study also uncovered several challenges, such as concerns over kiosk hygiene, unintuitive user interfaces, and occasional delays in system responsiveness, which may hinder optimal user experience. The findings underscore the capability of self-service kiosks to enhance customer experience by providing faster service, greater order accuracy, and increased interaction. To overcome existing challenges, the study recommends enforcing strict sanitation measures, redesigning kiosk interfaces for better user-friendliness, conducting regular technical maintenance, and offering real-time customer support. These improvements can significantly elevate user satisfaction and build stronger customer loyalty.

Keywords: self-service kiosk, customer experience, fast-food chains, service speed, order accuracy, customer satisfaction, user interface, hygiene, maintenance, customer engagement, loyalty.

**ELEVATING CUSTOMER LOYALTY AT BUT FIRST, COFFEE QUEZON CITY:
BASIS ON IMPROVEMENT PLAN**

Kazandra Coline Oreas, Larah Jane Ramos, Maria Lyn Perez,
John Mark Presto, Camille Parnaso, Oliver Fabon

Abstract

In the competitive coffee shop industry, enhancing customer loyalty is essential for sustained success. Loyalty programs are designed to deepen customer engagement, cultivate long-term relationships, and promote repeat patronage. This study focuses on But First, Coffee in Quezon City, aiming to analyze the current state of its loyalty initiatives, uncover key challenges, and develop an improvement plan to strengthen customer retention and satisfaction. This study employs a quantitative research approach to assess the level of customer satisfaction at But First, Coffee in Quezon City. A total of 50 respondents were surveyed, representing a diverse and adequate sample size for reliable analysis. The research further examines customer perceptions of service consistency, offering insights into how consistently the establishment delivers quality service and meets customer expectations. These findings aim to guide strategies for enhancing customer retention and loyalty. The overall mean score of 3.33 suggests that customers generally agree with the factors influencing their continued loyalty to But First, Coffee in Quezon City. Among these, the Loyalty Program received the highest rating (Mean: 3.42, Rank: 1st), indicating that it plays a key role in encouraging repeat visits and sustained engagement. Brand Value followed closely (Mean: 3.38, Rank: 2nd), reflecting the emotional connection and perceived quality that customers associate with the brand. The Unique Experience factor, such as themed promotions and personalization, ranked third (Mean: 3.13), showing a positive but moderate impact on loyalty. Lastly, Consistency in service and product quality received the lowest mean score (Mean: 3.10, Rank: 4th), highlighting an area for improvement to strengthen long-term customer trust and retention. The findings reveal that customers place high importance on loyalty programs, brand value, distinctive experiences, and service consistency in fostering brand loyalty. Among these, loyalty programs emerged as the most influential factor, with the highest mean score, demonstrating their effectiveness in driving repeat patronage through incentives and engagement. Brand value followed closely, underscoring the critical role of emotional attachment, brand trust, and identity in cultivating long-term customer relationships. Unique experiences, such as personalized services and themed promotions, ranked third, indicating their appeal, though slightly less impactful than the first two factors. Interestingly, consistency received the lowest ranking, yet it remains foundational; the result suggests that while it may be underappreciated in scoring, consistent service quality and product reliability are indispensable for sustaining customer satisfaction and loyalty over time.

Keywords: customer loyalty, loyalty programs, brand value, unique experience, service consistency, customer retention, but first coffee, quezon city, quantitative study, consumer behavior

**EMERGING SMART HOTEL TECHNOLOGIES IN SERVICE DELIVERY
TRANSFORMATION IN SELECTED HOTEL**

Genelyn Bundang, Mary Rose Angel Galo, Robert Pablo, Michael Vincent Patac,
Vergil Hinguillo, Roland Rambo Jayoma

Abstract

This study examines the impact of emerging smart hotel technologies on service delivery at Go Hotel, Quezon City, emphasizing improvements in operational efficiency and customer experience. This study utilized a quantitative research design with a descriptive approach to ensure the validity and reliability of the findings. Data was collected through surveys conducted with 45 customers and 5 hotel managers at Go Hotel, Quezon City, aiming to capture their perceptions of the implementation of emerging smart technologies. This methodology allowed for a thorough analysis of the impact of smart innovations on service efficiency, customer satisfaction, and overall operational performance in the hospitality environment. The findings reveal that Go Hotel encounters several key challenges in adopting smart technologies, including high initial investment costs, limited technical expertise, and significant concerns regarding data privacy and security. Despite these obstacles, the integration of smart technologies has positively impacted guest satisfaction and operational efficiency. Innovations such as advanced in-room entertainment systems, contactless check-in/check-out, keyless entry, and AI-powered chatbot assistance have significantly improved the guest experience while optimizing hotel operations. This research underscores the crucial importance of strategic technology selection, effective system integration, targeted staff training, and continuous monitoring to maximize the benefits of smart hotel technologies. These strategies not only streamline hotel operations but also enhance the overall guest experience while supporting sustainable practices. Although the study did not find a statistically significant direct correlation between technology assessment and perceived service delivery, it provides practical, actionable recommendations for hospitality professionals to effectively leverage smart technologies to improve service quality. By addressing common implementation challenges, this research offers valuable insights that can help hotels gain a competitive advantage in the dynamic hospitality industry.

Keywords: emerging technologies, smart hotels, service delivery, digital transformation, automation, artificial intelligence (ai), internet of things (iot), personalized guest experience, operational efficiency, hospitality industry.

**EMPLOYEES TRAINING AND DEVELOPMENT ON SERVICE QUALITY TOWARDS
GUEST SATISFACTION IN ASTROTEL NOVALICHES, QUEZON CITY**

Richard Salarda, Roselle Mae Dellomas, Maria Theresa Flores, Melnard Guarin,
Bert Steven Dañas, Dr. Dana France Ignacio

Abstract

Employee development is a key driver of success in the hospitality industry, where customer service is paramount. Comprehensive training not only improves job satisfaction but also lowers employee turnover. However, obstacles such as inadequate training programs, insufficient investment in employee growth, and a narrow focus on technical skills can result in inconsistent service quality and high attrition rates. For Astrotel, a budget hotel chain in the Philippines, bridging these development gaps is essential to meet the rising standards of guest service. The organization must prioritize initiatives that broaden employee competencies, boost engagement, ensure consistent service delivery, and encourage a mindset of continuous learning and improvement. This chapter presents the methodological framework employed in the study. It comprehensively details the research design, target population, sampling technique, research instrument, construction and validation of the questionnaire, procedures for administering and retrieving the instrument, and the statistical methods used for data analysis. Each component is designed to ensure the accuracy, reliability, and validity of the data collected, thereby supporting a rigorous examination of the research objectives. The findings emphasize the essential role of both technical (hard) and interpersonal (soft) skills training in elevating guest satisfaction and service excellence within the hospitality industry. To ensure sustained improvement, organizations must implement integrated training strategies that effectively navigate budgetary limitations and time constraints while remaining aligned with broader organizational objectives. Addressing these challenges is pivotal to fostering a culture of continuous professional development and maintaining consistently high service standards. The study underscores the pivotal role of comprehensive training in driving service excellence and guest satisfaction in the hospitality industry. Addressing existing challenges such as limited resources, time constraints, and skill gaps through well-structured and strategic training initiatives can empower hotels to cultivate a highly skilled and engaged workforce. By implementing targeted improvements, organizations can not only enhance service consistency but also foster a culture of continuous learning and professional growth, ultimately elevating overall guest experience and operational performance.

Keywords: employee training, hospitality industry, service excellence, guest satisfaction, workforce development, skill gaps, strategic training, continuous learning, employee engagement, operational performance.

**ENHANCING DESTINATION LOYALTY: ANALYZING THE FACTORS INFLUENCING
TOURISTS DECISION TO REVISIT AMUSEMENT PARK IN PASAY CITY**

Patricia Anne Castillo, Marj El Shammah Castulo, Daniela Jane Hibas,
Kano Posadas, Kahlil Antonio Vinoya, Dr. Dana France Ignacio

Abstract

This study examines the role of destination loyalty in encouraging repeat visitation to amusement parks, with a specific focus on Star City, a prominent amusement destination in Pasay City, Philippines. Destination loyalty refers to a traveler's tendency to revisit a destination due to positive experiences and emotional connections. This concept plays a crucial role in the hospitality and tourism industry by fostering a steady stream of repeat visitors, thus supporting long-term sustainability and business growth. The study employed a descriptive-comparative research design to identify the factors and challenges influencing tourists' decisions to revisit Star City. A purposive sampling technique was used to select 50 respondents who had previously visited the amusement park. Face-to-face surveys were conducted using structured questionnaires to assess their perceptions, experiences, and revisit intentions. Findings revealed that venue accessibility, service efficiency, and competitive pricing were key factors influencing repeat visitation. Safety measures, including visible security personnel and well-maintained equipment, also significantly affected revisit decisions. However, tourists cited long wait times, overcrowding, and accessibility challenges as barriers to returning. The study recommends improvements in crowd control, ride efficiency, and the integration of convenience features such as virtual queues to enhance visitor satisfaction and build long-term destination loyalty. The results offer valuable insights for amusement park operators in Pasay City to enhance guest experiences, foster repeat visitation, and strengthen their competitive edge. By addressing operational challenges and prioritizing service quality, destination loyalty can be reinforced, contributing to sustained success in the hospitality and tourism industry.

Keywords: destination loyalty, amusement parks, revisiting decisions, visitor satisfaction, hospitality industry, tourist behavior

**ENHANCING GUEST DELIGHT; AN EXPLORATION OF
SMART HOTEL TECHNOLOGY'S INFLUENCE**

Myla Rianzo, Daisy Iwan, Mark Angel Naguit, April Parra, Alexis Paudac, Dr. Dana France Ignacio

Abstract

This study explores the influence of smart hotel technologies on guest delight in Quezon City, focusing on innovations such as mobile check-ins, voice-activated room features, and digital concierge services. With the increasing demand for personalized and efficient service in the hospitality industry, this research addresses a gap in understanding the specific impact of these technologies on guest satisfaction and loyalty. A descriptive quantitative approach was utilized, employing survey questionnaires distributed to 50 purposively selected hotel guests in Quezon City, specifically from Hotel Sogo. The questionnaire measured variables including responsiveness, service efficiency, guest interaction, and the perceived effectiveness of smart hotel technologies. Collected data were analyzed using percentage distributions and weighted means. The findings revealed strong agreement among respondents regarding the effectiveness of smart hotel technologies in enhancing guest experience. The highest-rated factors included the speed and efficiency of service delivery, the convenience of mobile check-ins, and the personalization enabled by in-room technologies. Despite these positive perceptions, challenges were also identified, such as concerns over data privacy, dependency on internet connectivity, and limited accessibility for some users. The results suggest that while smart hotel technologies play a significant role in increasing guest delight, successful implementation must also address concerns related to security, accessibility, and ease of use. Hotels are encouraged to invest in digital infrastructure, ensure user-friendly interfaces, and provide comprehensive staff training to fully leverage the benefits of smart technology and enhance competitive advantage in the hospitality sector.

Keywords: smart hotel technology, guest experience, service efficiency, personalization, hospitality innovation, guest satisfaction

ENHANCING HOSPITALITY MANAGEMENT STUDENT SKILLS THROUGH HANDS-ON LEARNING: INTEGRATING PRACTICE-BASED APPROACHES

Ramon Joshua Ardenio, Jesiebel Llubit, Erika Arai, Shaira Getalado,
Midas Rullepa, Rio Alcantara, Oliver Fabon

Abstract

This study highlights the significance of hands-on learning in equipping Hospitality Management students with the skills needed for industry readiness. Practical experiences support the development of both technical and soft skills, improving students' employability. Active and experiential learning enables students to gain competencies that go beyond theoretical knowledge, establishing the importance of practice-based approaches in preparing graduates for real-world hospitality work environments. This study employs a quantitative research design to assess the effectiveness of hands-on learning strategies in hospitality education. Data was collected through surveys and informal interviews with 50 alumni from the 2022 batch, selected through purposive sampling. A structured and validated questionnaire was used to gather information on demographics, skill development, and workplace challenges. Responses were collected through Messenger and Google Forms and analyzed using frequency distribution, weighted mean, and ranking methods. The analysis aimed to provide data-driven insights on how practice-based approaches contribute to skill enhancement and industry preparedness among hospitality graduates. The results indicate that hands-on learning was highly rated by the respondents, particularly in areas such as industry insights and career preparation. While problem-solving and adaptability were reported as strong skills gained through practical experience, lower scores were observed in areas like customer complaint resolution and self-reflection. Common challenges cited include workplace complexity, guest expectations, feedback management, technical skill acquisition, and cultural differences. Job shortages were identified as the least pressing concern. Based on these findings, recommendations include the implementation of simulated environments, mentorship programs, exposure to industry-relevant technology, and cross-training opportunities to improve teamwork, problem-solving, and overall flexibility. The findings of the study emphasize the effectiveness of hands-on learning in shaping skilled and industry-ready hospitality professionals. Respondents, composed mostly of young alumni, reported substantial improvement in practical competencies, particularly in adaptability and problem-solving. However, challenges such as managing workplace dynamics, acquiring technical skills, and adjusting to guest expectations remain areas for development. The study recommends enhanced practice-based interventions such as real-world simulations, guided mentorship, and multi-role training to further support student readiness and professional growth within the hospitality sector.

Keywords: hands-on learning, work-integrated learning, employability, student skills, industry-ready professionals, hospitality education

**ENHANCING HOTEL OPERATIONS EFFECTIVITY AND GUEST EXPERIENCE
THROUGH TECHNOLOGICAL UPGRADES AT SOGO HOTEL IN FAIRVIEW**

John Vincent Villamor, Samantha May Acosta, Althea Mae Laguni,
Jane Erica Mercader, Mary Jane Moreno, Roland Rambo Jayoma

Abstract

This study focuses on enhancing operational efficiency and guest experience at Sogo Hotel in Fairview through technological upgrades. It examines how systems such as self-check-in kiosks, online booking platforms, and automated room features contribute to faster processes, improved staff productivity, and increased guest satisfaction. The study aims to highlight how the integration of modern technology in hospitality settings can lead to better service quality, operational effectiveness, and competitive advantage. The researchers employ quantitative research design to assess the impact of technology on hotel services and guest experiences. Data was gathered from 100 respondents through structured survey forms. The questions covered aspects such as self-service check-in, smart room features, and the use of automated services. Observations were also conducted to examine how technology is utilized in daily hotel operations. The data collected were analyzed to determine the influence of technological tools on service efficiency and guest satisfaction. The findings revealed that the implementation of technological features significantly improved both staff performance and guest convenience. Guests reported that the self-check-in system was efficient and appreciated the smart room amenities, including lighting controls, electronic keycards, and temperature adjustments, which enhanced their comfort and personalized experience. However, a few respondents encountered challenges in using certain features, emphasizing the need for user-friendly instructions and accessible technical support. The study concludes that technological advancements, particularly smart room systems and automated services, contribute positively to hotel operations and customer satisfaction. To fully leverage these benefits, hotels such as Sogo are encouraged to continue adopting innovative technologies, implement regular system upgrades, and provide comprehensive staff training. These strategies are essential for maintaining high-quality service standards and meeting the evolving expectations of guests in the hospitality industry.

Keywords: smart room technology, automated room services, technological upgrades, hotel operations, guest experience, hospitality innovation

**ENSURING CONSISTENT FOOD QUALITY AND SAFETY IN BUFFET RESTAURANT:
CHALLENGES AND SOLUTIONS**

Glorisa Manitas, Pamella Bianca Gomez, Micko Mijares, Kingsley Discallar,
Janno Neil Libao, Dana Rae Boatis

Abstract

Buffet restaurants, renowned for their extensive food variety and customer-centric service model, encounter significant challenges in consistently ensuring food quality and safety. This research investigates the crucial operational and hygiene practices required to uphold stringent food safety standards without compromising customer satisfaction. Centered on the Cabalen buffet branches in SM Fairview and SM North Edsa, Quezon City, the study explores key issues including proper food handling, effective temperature regulation, prevention of cross-contamination, adherence to staff hygiene protocols, maintenance of equipment, and the complexities introduced by guest-driven service environments. This study employed a quantitative descriptive research design, utilizing a structured questionnaire distributed to 100 respondents comprising 70 customers and 30 employees selected via simple random sampling. The instrument underwent expert validation and pre-testing to ensure clarity, validity, and reliability. Data were analyzed using frequency counts, percentage distributions, weighted means, and rankings to evaluate current operational and hygiene practices and identify gaps in food quality and safety management. The study focused on critical parameters such as personal protective equipment (PPE) usage, facility ventilation, food storage and preparation procedures, and the handling of peak service periods. The findings reveal that buffet restaurants generally maintain moderate to high compliance with food safety practices, especially regarding the use of personal protective equipment (PPE) and food handling procedures. Nevertheless, critical shortcomings were identified in ventilation systems, temperature control during peak hours, and the regular sanitation of facilities. The study also highlighted that challenges to food safety compliance stem from high customer volumes, the nature of self-service setups, and diverse customer behaviors. Employees emphasized the vital role of continuous training and strict procedural adherence, while customers placed significant importance on visible cleanliness and the freshness of food offerings. This study underscores the intricate challenges of managing buffet restaurant operations, where ensuring consistent food quality and safety necessitates comprehensive systems, skilled personnel, and vigilant real-time oversight. Key strategies identified include the deployment of precise temperature control mechanisms, adherence to rigorous cleaning schedules, and clear allergen labeling to safeguard consumer health. Additionally, continuous staff training and reinforcement of food safety protocols are pivotal in mitigating the risk of foodborne illnesses and fostering customer confidence. These findings offer practical and actionable insights for buffet operators seeking to uphold regulatory compliance while delivering a trustworthy and satisfying dining experience in a demanding, high-traffic environment.

Keywords: buffet restaurants, food safety, food quality, personal protective equipment, temperature control, ventilation, sanitation, staff training, allergen labeling, customer satisfaction, high-volume operations

**EQUIPPING HOSPITALITY MANAGEMENT STUDENTS WITH THE NECESSARY
SKILLS AND KNOWLEDGE TO THRIVE IN AN AI DRIVEN HOSPITALITY INDUSTRY**

Angelo Balbin, Jhon Jericho Badiana, Carylle Basario, Robert Chavez,
Irish Planas, Roland Rambo Jayoma

Abstract

This study examines how well Hospitality Management students are being prepared to meet the growing demands of artificial intelligence (AI) integration within the hospitality industry. As AI increasingly shapes guest experiences, streamlines property management, and enhances operational efficiency, students must develop relevant technical and practical competencies. The research focuses on evaluating the extent to which the current Hospitality Management curriculum equips students with AI-related skills. Specifically, it investigates gaps in educator expertise, access to modern technological resources, curriculum alignment with industry needs, institutional adaptability to change, and the availability of seminars and training opportunities aimed at AI literacy. This study adopted quantitative research design, employing a structured survey to assess the preparation of Hospitality Management students in relation to AI integration in the industry. A total of 200 respondents from all four academic year levels at Bestlink College of the Philippines participated in the study. Stratified sampling was utilized to ensure proportional representation across year levels, while convenience sampling facilitated the selection of available and willing participants. The survey instrument measured students' perceived preparedness, access to AI-related tools, and the challenges encountered in learning AI concepts. Data was analyzed using descriptive statistical methods, with findings presented through frequency and percentage distributions to highlight key trends and insights. The findings indicate that most respondents were between 19 and 23 years old, with a majority enrolled as first-year students. Gender distribution was nearly balanced. While students acknowledged that their instructors possessed foundational knowledge of artificial intelligence, they emphasized the need for deeper and more structured integration of AI-related topics within the Hospitality Management curriculum. Although AI tools and resources were reportedly available, students noted limitations in accessibility and a lack of opportunities for practical, hands-on application. Respondents expressed a greater interest in acquiring foundational AI competencies and guest-facing technological skills, while showing less priority for AI applications in marketing or event management. Major challenges identified included outdated instructional materials and minimal exposure to real-world AI implementations, both of which hindered their preparedness for the industry's technological demands. The study concludes that the existing Hospitality Management curriculum lacks the depth and practical focus needed to equip students with the competencies required in an increasingly AI-driven hospitality industry. To address this gap, the research recommends comprehensive curriculum reform that emphasizes the integration of real-world AI tools, experiential learning opportunities, and industry-relevant training modules. Strengthening these areas will better align academic preparation with the technological advancements and evolving skill demands of the modern hospitality sector.

Keywords: hospitality management, artificial intelligence, ai integration, curriculum development, student preparedness, hospitality education, technology in hospitality, ai skill gaps, smart hospitality, experiential learning, education reform, hospitality tr

**EVALUATING EXPERIENCES IN KITCHEN LABORATORY AMONG HOSPITALITY
MANAGEMENT STUDENT IN BESTLINK COLLEGE OF THE PHILIPPINES**

Ahlyna Marie Espinosa, Graciela Palaruan, Justine Nhicolle Teope, Mary Ann Medillen,
Ma Del Siello Capapas, Dr. Dana France Ignacio

Abstract

Practical, hands-on learning is fundamental to hospitality education, particularly in culinary training where students bridge theory and real-world application. At Bestlink College of the Philippines, the kitchen laboratory plays a pivotal role in cultivating the technical skills, confidence, and professional readiness of Hospitality Management students. This study investigates students' experiences in the kitchen lab, examining their perceptions of facility adequacy, instructional approaches, safety standards, and the overall impact on their learning outcomes and skill development. This study utilized a descriptive quantitative research design to comprehensively examine the experiences of Hospitality Management students in the kitchen laboratory setting. A total of 200 students participated by responding to a structured survey instrument based on a 4-point Likert scale. The questionnaire was designed to assess key dimensions such as hands-on learning opportunities, the sufficiency and functionality of kitchen equipment, instructional effectiveness, and overall student satisfaction. The gathered data were systematically analyzed using descriptive statistical tools including mean, percentage, and frequency distributions, to uncover patterns and draw meaningful insights regarding the learning environment. The results reveal that Hospitality Management students generally have a favorable perception of their experiences in the kitchen laboratory. High ratings were recorded in areas such as skill acquisition, collaborative learning, and practical application of culinary techniques. These suggest that the lab environment effectively supports hands-on learning and teamwork. Nonetheless, the study also identified notable concerns, including insufficient kitchen equipment, overcrowded laboratory sessions, and variability in instructor feedback. These limitations underscore the need for targeted improvements to ensure a more efficient, equitable, and engaging learning experience for all students. The kitchen laboratory remains a vital cornerstone of hands-on learning in hospitality education. However, its effectiveness can be further enhanced by upgrading equipment and strengthening instructor engagement. Ensuring the lab is consistently well-equipped and supporting instructors with ongoing training and resources will elevate the quality of instruction and student interaction. These enhancements will not only improve the overall learning experience but also ensure that students are better prepared for the demands of the culinary industry.

Keywords: kitchen laboratory, hospitality education, hands-on learning, culinary skills, equipment availability, instructor engagement, student satisfaction, real-world preparation, teaching methods, skill development.

**EVALUATING THE EFFECTIVENESS OF ON-THE-JOB TRAINING (OJT) FOR
BACHELOR OF SCIENCE IN HOSPITALITY MANAGEMENT (BSHM)
STUDENTS AT ASTORIA HOTEL: A.Y. 2024-2025**

Hancelene Afuang, Rozen May Labao, Cedrick Garcia, Renz Bryan Abenido,
Melvin Cartas, Dr. Dana France Ignacio

Abstract

This study evaluates the effectiveness of the On-the-Job Training (OJT) program for Bachelor of Science in Hospitality Management (BSHM) students at Bestlink College of the Philippines, with a focus on its implementation at Astoria Hotel. It examines how the OJT experience supports students in applying theoretical knowledge, developing industry-relevant skills, and preparing for future careers in the hospitality sector. The study also identifies key challenges, including the absence of standardized evaluation tools, potential mentor biases, and gaps in coordination between the academic institution and the host establishment. Based on these findings, the study recommends enhancing assessment methods, strengthening school-industry partnerships, and broadening students' exposure to various hotel departments to ensure that the program is better aligned with current hospitality industry standards and expectations. This study employed a descriptive quantitative research design to assess the effectiveness of the On-the-Job Training (OJT) program for Bachelor of Science in Hospitality Management (BSHM) students assigned to Astoria Hotel. Data was gathered through a validated structured survey, which measured students' skill development, overall satisfaction, and perceived career preparedness. A total of 200 fourth-year BSHM students from Bestlink College of the Philippines were randomly selected as respondents. The collected data were analyzed using appropriate statistical tools and presented in tabular form to facilitate interpretation and discussion of the findings. During their On-the-Job Training (OJT) at Astoria Hotel, many students faced notable challenges, particularly due to insufficient resources and materials, as well as irregular work schedules. These issues often disrupted the learning process and limited their ability to fully engage in practical training. In contrast, students who experienced well-organized training programs with adequate resources reported a more productive and positive learning environment. Moreover, when mentors were actively involved and provided consistent, meaningful guidance, students felt more supported and gained valuable industry insights. Despite these strengths, the persistent concerns regarding resource availability and scheduling impacted on the overall effectiveness of the OJT experience for some students. This study examined the effectiveness of the On-the-Job Training (OJT) program for Bachelor of Science in Hospitality Management (BSHM) students at Astoria Hotel. Findings revealed that the majority of students were able to apply theoretical knowledge in a practical setting, improve their communication and teamwork skills, and develop greater confidence in their readiness for employment in the hospitality industry. In response to the challenges and learning gaps identified, the researchers proposed a structured training guide designed to enhance students' competencies, professional behavior, and industry preparedness, ensuring a more seamless transition from academic learning to real-world application.

Keywords: ojt program, bshm students, astoria hotel, hospitality industry, skill development, communication, teamwork, career readiness, training guide, real-world application

EVALUATING THE EFFECTIVENESS OF ONLINE REVIEWS IN SHANGRI-LA HOTEL

Jay Peñoso, Merygen Estrada, Raffy Pedrosa, Ma Vanessa Donque, Ma Cindy Tutor, Jenelyn Comon

Abstract

In the digital era, online reviews have emerged as powerful tools that significantly influence consumer decision-making and shape brand reputation, particularly in the hospitality industry. With the increasing reliance on digital platforms for customer feedback, concerns regarding the authenticity, reliability, and overall impact of these reviews have become more pronounced. This study investigates the effectiveness of online reviews in building customer trust, enhancing brand loyalty, and contributing to business success, using Shangri-La Hotel as a case study. By examining the role of online feedback, the research aims to provide valuable insights into how digital reviews affect consumer behavior and inform strategic decision-making within hotel operations. This study employed a qualitative, descriptive research design to gain a deeper understanding of how customers perceive and interact with online reviews in the context of the hospitality industry. To evaluate customer trust, satisfaction, and loyalty in relation to guest feedback, data were collected from 30 carefully selected respondents through a validated survey instrument. Purposive sampling was utilized to ensure that participants had a direct, comprehensive experience with the services provided during their stay at Shangri-La Hotel. This targeted approach allowed the researchers to obtain meaningful insights from individuals most qualified to assess service quality and overall satisfaction, thereby ensuring the credibility and relevance of the study's findings. The study's findings indicate a strong level of agreement among respondents regarding the significant impact of star ratings (composite mean: 3.55), customer satisfaction (3.73), and promotional offers (3.73) on their hotel booking decisions. The highest-rated indicators affirm that guests routinely consult star ratings and view overall satisfaction as a critical factor in hotel selection. Furthermore, the manner in which hotels respond to negative feedback emerged as a key determinant of guest perception. Participants highly valued responses that included sincere apologies (3.79), concrete solutions (3.79), and professional engagement (3.78). Hotels that acknowledged service shortcomings, communicated plans for improvement, and offered fair compensation were perceived more positively ultimately reinforcing customer trust, enhancing guest experience, and fostering brand loyalty. The study underscores the significant influence of online reviews on consumer perception and overall hotel performance. Shangri-La Hotel's proactive measures, such as promptly addressing guest concerns, enhancing service delivery, and offering fair compensation, reflect a strong commitment to accountability, guest satisfaction, and continuous quality improvement. The findings recommend that consumers critically evaluate review content rather than relying solely on star ratings, and that hotel management ensure service delivery consistently reflects and supports the ratings presented online. For future research, the study suggests examining the role of service innovation and the extent to which customer perceptions shape the credibility of online reviews and contribute to long-term business success in the hospitality sector.

Keywords: online reviews, consumer perception, hotel performance, shangri-la hotel, guest satisfaction, service quality, accountability, compensation, service innovation, review credibility, hospitality industry

**EVALUATING THE EFFECTIVENESS OF SOCIAL MEDIA MARKETING STRATEGIES
IN ENHANCING CUSTOMER ENGAGEMENT OF BIGBREW**

Marvic John Diaz, Raffy Miguel Horca, Nhiko Hieto, Benedick John Obor, Dana Rae Boatis

Abstract

This study investigates the impact of social media marketing strategies on customer engagement at BigBrew, a leading coffee shop brand in the Philippines. In an era where digital platforms like Facebook and TikTok are integral to business growth, the research aims to analyze how targeted online marketing initiatives influence customer behavior, specifically in terms of promotional reach, purchasing decisions, and the frequency of return visits. By exploring this relationship, the study seeks to offer insights that can enhance digital engagement and drive sustained customer loyalty. This study utilized a descriptive quantitative research design, with data gathered through structured survey questionnaires administered to 20 employees of BigBrew's Saranay Road branch in Caloocan City. Participants were selected through purposive sampling, as they are directly engaged in the brand's social media marketing activities. The study employed statistical tools such as frequency distribution, percentage, weighted mean, and chi-square tests to systematically analyze the data. These tools were used to evaluate patterns of platform usage, identify challenges encountered, and measure the perceived effectiveness of the company's social media strategies in driving customer engagement. The findings underscore the pivotal role of social media in fostering customer engagement and driving sustained business growth for BigBrew. Despite notable progress, the study reveals critical areas for improvement, including the formalization of marketing strategies, upskilling of personnel, and alignment of content with the brand's core identity. To maximize impact, BigBrew is encouraged to implement structured, data-informed marketing approaches that not only enhance audience targeting but also reinforce brand consistency and cultivate long-term customer loyalty. BigBrew has effectively harnessed the power of social media to increase brand visibility, boost sales, and build stronger customer relationships. However, the company continues to face challenges in communication flow, strategic execution, and audience engagement. To address these shortcomings, BigBrew should implement a more cohesive and data-driven marketing framework, emphasizing timely responses, a clearly defined content strategy, and continuous staff development. Leveraging advanced analytics and real-time monitoring will allow for more agile and targeted campaigns, while maintaining consistent, brand-aligned messaging will deepen customer trust and loyalty. Ultimately, enhancing strategic planning, operational responsiveness, and team competencies will position BigBrew for sustained growth and a more impactful digital presence.

Keywords: bigbrew, social media marketing, brand awareness, customer engagement, digital strategy, communication challenges, data analytics, content strategy, staff training, brand consistency, customer loyalty, online presence

**EVALUATING THE ENVIRONMENTAL IMPACT OF MODERN JEEPNEYS VERSUS
TRADITIONAL JEEPNEYS: A COMPARATIVE ANALYSIS**

Yvonne Jhon Sagnoy, Mica Ehla Mangaliag, Cristy Naza, Mariella Peñaredonda,
Jenevieve Rapal, Nicole Sugabo, Roland Rambo Jayoma

Abstract

The Philippines is actively pursuing sustainable transportation through the modernization of jeepneys, an iconic mode of public transport deeply rooted in Filipino culture. Central to this initiative is the Public Utility Vehicle Modernization Program (PUVMP), a government-led effort to replace traditional diesel-powered jeepneys with modern units that comply with stricter emissions standards, promote fuel efficiency, and incorporate improved safety features. These changes aim to mitigate urban air pollution and align with the country's broader environmental goals. However, the program faces ongoing challenges, particularly concerning the actual environmental effectiveness of modern vehicles and the economic implications for traditional jeepney drivers and operators, many of whom lack the financial means to comply with modernization requirements. This study seeks to compare the environmental impact of traditional and modern jeepneys, providing insights to guide policymakers and foster greater public understanding of sustainable transport strategies in the Philippines. This study adopted a quantitative research design utilizing a descriptive method to assess the environmental impact of modern versus traditional jeepneys in Sakayan Bayan Glori, Novaliches, Quezon City. A total of 100 respondents, comprising 50 drivers and 50 commuters, were selected through purposive sampling, based on their familiarity and direct experience with both types of jeepneys. Data was collected through a validated questionnaire. While some individuals declined participation or refused to be photographed, the survey was successfully conducted and completed in a single day due to the steady flow of drivers and passengers in the area. The insights gathered from this study are intended to inform policymakers, promote public awareness, and contribute to ongoing efforts toward sustainable and environmentally responsible transportation solutions in the Philippines. The results indicate a bimodal age distribution among respondents, with the majority falling within the 17–22 age group (34%), followed by a significant proportion aged 47–52 (18%). A dominant 78% of respondents were male drivers, reflecting the gender dynamics of the local transport sector. Overall, respondents expressed a strong preference for modernized jeepneys, citing their environmental benefits, quieter operation, and enhanced passenger comfort. Despite these advantages, commuters voiced concerns regarding fare increases and limited route accessibility. On the other hand, drivers reported challenges such as heightened competition, financial constraints linked to modernization costs, and the need for technical training to operate updated vehicles and systems effectively. Traditional jeepneys are regarded as more economically accessible, especially for low-income commuters, but they contribute significantly to air and noise pollution, underscoring the trade-off between cost-efficiency and environmental sustainability. Commuters have raised concerns over fare increases and the shift to digital payment systems, which may not be accessible to all. Meanwhile, drivers face mounting challenges, including heightened competition, expensive vehicle upgrades, and the need for retraining on modernized systems. To address these issues, the study recommends implementing targeted services for frequent commuters, particularly younger male users, as well as government subsidies and incentives to ease the financial burden of modernization. These strategies aim to create a more sustainable public transportation system while maintaining affordability, accessibility, and livelihood support for stakeholders.

Keywords: traditional jeepneys, modern jeepneys, sustainable transportation, air and noise pollution, cost-efficiency, fare increase, digital payment systems, driver financial burden, government incentives, commuter accessibility, transportation mode

EVALUATING THE IMPACT OF ROTATING DINING RESTAURANT ON CUSTOMER LOYALTY

Sweeth Monera, Johanna Mae Ambrocio, Alexandra Joy Luce, Rose Irene Pilaspilas,
Mariane Antonette Salutillo, John Paul Sollestre, Dr. Dana France Ignacio

Abstract

In today's competitive hospitality and dining industry, restaurants are constantly innovating to improve customer experience and strengthen loyalty. This study investigates the effect of rotating dining on customer retention, focusing on how this distinctive setup shapes customer perceptions, satisfaction, and their likelihood of returning. By evaluating elements such as service quality, customer satisfaction, cleanliness, and ambiance, the research aims to determine whether rotating dining enhances customer loyalty. The results will help restaurant operators understand evolving consumer preferences and provide strategic insights into using rotating dining as a long-term customer engagement tool. This study employed a structured survey questionnaire as the primary data collection tool to assess customer experiences, perceptions, and satisfaction levels with rotating dining services. Given the study's focus on capturing authentic consumer insights, the questionnaire method was considered the most effective means of gathering reliable, first-hand data. Respondents were selected through purposive sampling, targeting individuals who had directly experienced the service under review. This methodological approach enabled the identification of recurring trends, highlighted areas for improvement, and supported evidence-based recommendations to enhance service quality and foster customer loyalty. The study reveals that the rotating dining concept positively influences both customer experience and loyalty. By offering a distinctive and emotionally engaging environment, it creates memorable dining moments that promote repeat visits and favorable word-of-mouth referrals. Respondents reported high levels of satisfaction, with many citing the restaurant's unique ambiance as a key factor contributing to their overall positive experience. The findings reveal that the rotating dining restaurant experience plays a pivotal role in cultivating customer loyalty by delivering a dining encounter that is both distinctive and emotionally resonant. Unlike conventional restaurants, the integration of movement and ever-changing panoramic views introduces a multi-sensory dimension that captivates diners and enhances their overall satisfaction. This unique format does more than entertaining evokes a cinematic ambiance that imprints itself on the customer's memory. As a result, the experience fosters deeper emotional connections, encouraging repeat visits and positive word-of-mouth, which are essential drivers of long-term loyalty.

Keywords: rotating dining, customer loyalty, emotional engagement, sensory experience, unique atmosphere, customer satisfaction, repeat visits, word-of-mouth, dining innovation, restaurant strategy

**EVALUATING THE IMPACT OF TECHNOLOGICAL LAG ON SERVICE QUALITY AT
TROPICAL HUT, EVER COMMONWEALTH QUEZON CITY**

Angelica Mores, Jhean Aubrey Ani, Ma Jenny Del Prado, Jessica Rojo,
Clarissa Valenzuela, Roland Rambo Jayoma

Abstract

Technology serves as a vital tool in today's fast-paced and competitive food industry. Fast food establishments can maintain a strong market presence by adopting innovative technologies that improve customer satisfaction, operational speed, and service accuracy. However, the researchers have identified several challenges currently faced by Tropical Hut due to its lack of technological advancement. One major concern is the absence of a self-service kiosk, which can lead to communication issues between customers and cashiers, especially during peak hours. This can be particularly problematic for food customization, as customers with allergies may experience miscommunication or errors in their orders. Furthermore, outdated systems may result in longer wait times, customer dissatisfaction, and potential loss of business. To assess the impact of technological lag on service quality and customer experience at Tropical Hut, Ever Commonwealth, Quezon City, the researchers adopted a quantitative research design utilizing a random sampling technique. Survey questionnaires were administered to a total of sixty-five (65) respondents, comprising fifty (50) customers and fifteen (15) employees. Studies have shown that technological lag poses several challenges that significantly affect service quality in fast food operations. Customers increasingly value diverse payment options and the convenience of a modernized ordering system. Although the establishment demonstrates strengths in menu clarity and food customization, inefficiencies in the order-taking process remain a concern. Long queues and delays during peak hours hinder overall service flow and customer satisfaction. Integrating a digital order management system could streamline operations, reduce dependence on manual paper tickets, and enhance order accuracy. Furthermore, targeted staff training in communication and improved coordination between front-of-house and kitchen staff are essential to minimizing miscommunication. Implementing rigorous order verification protocols would not only reduce human error but also help prevent food waste, ultimately contributing to a more efficient and customer-centric service experience. In an increasingly digital and fast-paced environment, technology has become a vital foundation for delivering convenience, operational efficiency, and customer satisfaction. To remain competitive and responsive to evolving customer expectations, the company should prioritize investment in a robust and reliable Point-of-Sale (POS) infrastructure. This will not only streamline transactions but also minimize system downtime and service disruptions. Clear and accessible communication of allergen and dietary information must be integrated into the ordering process to safeguard customer health and enhance trust. Additionally, the implementation of an intelligent order queuing system can help optimize service flow, while routine maintenance of kitchen equipment is essential to prevent operational delays. Equally important is the provision of comprehensive staff training programs, empowering employees to manage a variety of tasks effectively and engage confidently with customers. These strategic improvements will collectively contribute to a more seamless, efficient, and customer-focused dining experience.

Keywords: technology integration, customer satisfaction, pos system, service efficiency, allergen information, order queuing, kitchen maintenance, staff training, fast food operations, operational improvements

**EVALUATING THE IMPACT OF TECHNOLOGY INTEGRATION ON DINING
EXPERIENCE AT SELECTED MAX'S RESTAURANTS**

Ann Eunis Benson, Sheila Louise Ignacio, Shyme Jossel Reserva,
Edcel Sajo, Jayson Salanguste, Roland Rambo Jayoma

Abstract

The hospitality industry is undergoing a significant digital transformation, driven by the adoption of innovative technologies that enhance and personalize the dining experience. Tools such as online ordering platforms, contactless payment systems, QR code menus, mobile-based loyalty programs, and advanced data analytics are reshaping customer interactions and operational efficiency. Studies have shown that digital menus increase customer satisfaction by offering greater interactivity and customization, while Customer Relationship Management (CRM) systems and analytics enable restaurants to tailor services and build long-term customer loyalty. The study utilizes a quantitative research design with a descriptive approach to examine the effects of technology integration on the dining experience at selected Max's Restaurant branches. Guided by the insights of Garcia and Lee (2021) on the industry's transition to online ordering and digital services, the research focuses on gathering relevant customer feedback. A total of fifty (50) respondents equally drawn from the Quezon Memorial Circle and Quezon Avenue branches will participate in the study. Purposive sampling is employed to select individuals with firsthand experience of the restaurant's technology-enhanced services, ensuring the relevance of the data collected. A researcher-developed survey instrument, grounded in Parasuraman's (2020) customer satisfaction framework, will serve as the primary data collection tool. The survey is divided into three sections, including a checklist of structured questions designed to capture key variables efficiently. This approach ensures that data collection is both focused and comprehensive, aligning with the study's goals and research questions. The demographic profile of the respondents indicates a notable concentration of younger individuals, with 74% falling under the age of 22. Additionally, 64% of participants identify as female, suggesting a gender imbalance that may introduce bias and limit the generalizability of the findings. The sample is also heavily composed of students, accounting for 42% of the total respondents, which could influence the results due to their distinct lifestyle, technological preferences, and dining behaviors. These demographic patterns underscore the importance of diversifying future samples to ensure a more representative understanding of customer experiences across different age groups, occupations, and gender identities. A total of fifty (50) participants were surveyed from Max's Restaurant to assess the effects of technology integration on customer satisfaction and overall service quality.

Keywords: max's restaurant, technology integration, customer satisfaction, service quality, digital dining experience, online ordering, contactless service, food service industry, quantitative research, customer feedback

**EVOLVING CUSTOMER TASTES: STRATEGIES IN MEETING
CUSTOMER DEMANDS CLASSIC SAVORY RESTAURANT**

Hazel Joy Albis, David Khenz Delgado, Mark Gelo Escopete,
Adrian Jayson Lapesora, Junrey Seviles, Dana Rae Boatis

Abstract

This study aims to assist restaurant owners and managers in understanding and adapting to evolving consumer demands. It offers strategic recommendations in areas such as menu development, technological integration, and service enhancements to improve profitability and operational efficiency across diverse dining formats. The research also explores the fusion of traditional culinary practices with modern innovations to elevate customer satisfaction and encourage brand loyalty. Conducted near Classic Savory Fairview Terraces in Quezon City, the study includes interviews with walk-in customers to identify current challenges and uncover potential opportunities within the restaurant industry. The study adopts a descriptive research design and involves 25 respondents affiliated with Classic Savory. It utilizes purposive sampling and a structured questionnaire focused on key areas including health and wellness trends, ethnic and global cuisine, menu innovation, product development, and accommodation of special diets. Data collection and analysis were conducted to examine how restaurants can effectively respond to shifting customer preferences in order to sustain competitiveness and relevance in the hospitality sector. To address the identified challenges, several strategies were found to be effective. These include introducing promotional campaigns to launch new menu items, implementing strict quality control procedures, and regularly updating the menu with seasonal and trending offerings. Furthermore, leveraging customer feedback to inform menu decisions, providing staff training on cultural and dietary needs, and enhancing marketing efforts for healthy and innovative options were also recommended. These approaches contribute significantly to customer satisfaction and help maintain a competitive edge. Classic Savory demonstrates notable strengths in maintaining customer loyalty and satisfaction. However, it continues to face industry challenges such as balancing traditional and modern menu items, managing operational costs, and maintaining food quality. Strategic solutions include offering healthier and allergy-conscious options, aligning menus with seasonal trends, ensuring consistent quality across all branches, and improving both food presentation and flavor. To sustain growth, the restaurant must continuously innovate while preserving core brand values.

Keywords: customer preferences, menu innovation, restaurant strategies, hospitality management, customer satisfaction, food quality, classic savory

**EVOLVING MARKETING TRENDS IN THE FOOD INDUSTRY:
ADAPTING TO THE DIGITAL FOOD MARKETING**

Karen Albes, Dessiree Ivan Aquino, Simon Gabriel Masing,
Angelo Joshua Robles, Roland Rambo Jayoma

Abstract

The food industry has increasingly embraced digital platforms such as Instagram, TikTok, and YouTube, which have significantly transformed traditional marketing approaches. However, many small businesses continue to face challenges in understanding consumer behavior and measuring return on investment. This study aims to analyze evolving marketing trends in the food sector, identify the most impactful digital platforms, and explore the challenges involved in transitioning to digital marketing. The research also seeks to provide practical insights and best practices to help food establishments strengthen their online presence and remain competitive in the digital age. This research employs a quantitative design to examine digital marketing trends within the food industry. A total of 50 food business owners, managers, and marketing professionals in Quezon City were selected using purposive sampling. A structured survey questionnaire was used to collect data on respondent demographics, perceived effectiveness of digital marketing strategies, resource allocation, and approaches to integrating traditional and digital marketing practices. Survey results showed that 48% of the respondents were aged 30 and above, with an even gender split and 44% reporting 1 to 5 years of business experience. The findings revealed that food businesses in Quezon City effectively use platforms such as Facebook and Instagram for brand visibility and customer engagement. Strategies that proved most effective in bridging traditional and modern marketing included utilizing online reviews, offering exclusive deals, collaborating with influencers, and partnering with food delivery applications. These approaches were found to significantly enhance consumer reach and contribute to business growth. The study highlights the growing innovation in digital marketing among both seasoned and emerging food business operators. Despite the evident benefits of digital engagement, small enterprises face challenges such as limited resources, lack of technical know-how, and access to digital tools. Addressing these limitations through accessible and tailored digital marketing strategies is crucial. Recommended practices include enhanced use of promotional campaigns, influencer marketing, review management, and integration with delivery services. These strategies can empower food businesses in Quezon City to expand their digital footprint, attract more customers, and redefine success in the local culinary industry.

Keywords: digital marketing strategies, consumer engagement, online presence

**EXAMINING THE BALANCE OF TECHNOLOGY AND HUMAN WORKERS
EFFICIENCY OF FRONT OF THE HOUSE IN ASTORIA PLAZA**

Keana Faith Guilalas, Sofia Talia Dela Pena, Mary Nicole Santos, Mary Grace Lukban,
Gwendolyn Gazzingan, Dr. Dana France Ignacio

Abstract

Front of the House employees play a crucial role in hospitality operations by serving as the first point of contact for guests, significantly shaping initial impressions and service experiences. In the current landscape of rapid technological advancement, the hospitality industry faces the challenge of maintaining human connection while integrating automation. This study examines how technology is blended with human labor in the Front of the House operations at Astoria Plaza, focusing on its impact on operational efficiency, guest satisfaction, and service quality. The research aims to offer insights into sustaining high levels of guest service in an increasingly technology-driven environment. This study employed descriptive research design and utilized structured survey questionnaires with closed-ended questions. These were distributed to Front of the House employees across various departments, including reception, concierge, guest services, and reservations. The collected data were analyzed using descriptive statistical tools, such as frequency distribution, mean comparison, and correlation analysis, to evaluate the effects of technological integration on operational performance and service delivery. Findings revealed the importance of establishing clear guidelines and providing ongoing training for employees to adapt to technological advancements. The use of digital tools, such as Property Management Systems (PMS) and real-time feedback systems, improved response time to guest concerns and overall service efficiency. However, the study emphasized that while technology enhances operational accuracy, the human element remains vital. A balanced approach that combines technological tools with personalized service is essential to guest satisfaction and the development of a skilled, adaptable workforce. This study underscores the significance of integrating digital innovations with human-centered service in Front of the House operations at Astoria Plaza. It highlights that while technology can streamline operations and improve service consistency, it should complement, not replace, the personal interactions that define quality hospitality. Continuous staff training and updated operational protocols are recommended to ensure employees can effectively leverage technology without compromising the guest experience. Maintaining this balance is key to keeping the hospitality workforce competitive and guest-oriented in a rapidly evolving industry.

Keywords: hospitality management, front of the house, technology integration, guest satisfaction, operational efficiency, service quality, property management system, staff training

**EXPLORING CONSUMER PERSPECTIVES ON FILIPINO STREET FOODS:
A STEP TOWARDS GLOBAL RECOGNITION**

Jhon Enos Silvestre, Dominic Valenzuela, Jenie Rose Pon, Rhea Mie Jumawan,
Jake Federio, Dr. Dana France Ignacio

Abstract

This study investigates consumer perceptions of Filipino street food, focusing on its cultural appeal and potential for global recognition. While the international popularity of Filipino street food is gradually increasing, existing literature often emphasizes health concerns, overlooking its cultural significance. This research aims to explore how consumer perspectives can contribute to elevating Filipino street food as a cultural symbol and a tourism asset, with implications for local identity and economic development. A descriptive research design was employed, utilizing a structured survey questionnaire administered to 100 regular street food consumers in Quiapo, Manila. The questionnaire gathered both quantitative and qualitative data on respondents' demographics, perceptions of health and safety, cultural value, and purchasing behavior. Data was analyzed using statistical tools such as frequency distribution, percentages, ordinal scale, and weighted mean to evaluate patterns and key insights. Findings revealed that the primary consumers of Filipino street food are younger individuals aged 18–24 from lower to middle-income households. Hygiene and food safety were identified as top priorities influencing purchasing decisions. Consumers placed high value on cultural authenticity and traditional preparation methods. Additionally, there was significant awareness of the nutritional content of street food, with many respondents actively considering it when making choices. However, challenges such as poor sanitation, safety concerns, exposure to extreme weather, and insufficient nutritional labeling were also noted. The study emphasizes that while cultural appreciation is vital, hygiene, safety, and nutritional transparency are essential to earning consumer trust and advancing Filipino street food on a global scale. Addressing these concerns can help bridge the gap between local authenticity and international acceptance. By improving quality standards and preserving traditional elements, Filipino street foods have the potential to succeed both as cultural icons and viable global culinary exports.

Keywords: filipino street food, consumer perspectives, cultural authenticity, global recognition, hygiene, food safety, nutritional awareness, culinary tourism, street food culture, local identity

**EXPLORING THE IMPACT OF NEGATIVE ONLINE REVIEWS ON HOTEL
REPUTATION AND GUEST RETENTION AT HOTEL DREAMWORLD**

Roberto Umerez, Arianne Marie Agustin, Renelyn Garbosa, Princess Seika Garecera,
Maxin Khale Padilla, Oliver Fabon

Abstract

The hospitality industry has experienced major transformation due to technological advancements and the growing influence of user-generated content. In particular, negative online reviews posted on social media and travel platforms have emerged as critical factors influencing hotel reputation and guest retention. This study explores how negative feedback affects consumer decision-making and overall loyalty to hotel brands, with specific reference to Hotel Dreamworld in North EDSA, Quezon City. This study employed a quantitative research design to investigate the relationship between negative online reviews and hotel reputation and guest retention. A survey questionnaire was distributed to 50 guests at Hotel Dreamworld using convenience sampling. The instrument collected data on respondents' demographics, their perceptions of online reviews, the effect of negative feedback on booking decisions, and the hotel's strategies for managing online reputation. It also identified the challenges faced by the hotel in addressing negative guest feedback across various digital platforms. The majority of respondents were aged 26 to 35, with an almost equal gender distribution. Most guests reported booking hotels online only occasionally. While negative reviews initially influenced perceptions, many respondents emphasized that personal positive experiences during their stay had a stronger impact on their loyalty. The study also found that a balanced presence of both positive and negative reviews improved the perceived authenticity of the hotel's online profile. However, respondents observed that the hotel had difficulty responding to negative reviews in a timely and professional manner, which could negatively affect reputation over time. The study underscores the importance of proactive review management in maintaining hotel reputation and guest loyalty. Hotel Dreamworld must enhance its response strategies to negative reviews, invest in staff training for complaint resolution, and improve its monitoring systems for online feedback. Turning negative experiences into opportunities for service improvement and public transparency can help mitigate reputational damage and reinforce guest trust. Strategic engagement across review platforms is essential to sustaining a competitive edge in the digital hospitality landscape.

Keywords: hotel reputation, guest retention, negative online reviews, online feedback management, hospitality industry, hotel dreamworld

**EXPLORING THE ROLE OF HOUSEKEEPING IN UPHOLDING SERVICE
EXCELLENCE AT B HOTEL: A BASIS FOR A PROPOSED ACTION PLAN**

Mark Justine Arizala, Joyce Anne Fruelda, Dhawe Quirequire,
Raymart Mondreal, Mark Jastine Larce, Jenelyn Comon

Abstract

Housekeeping is a fundamental pillar of service excellence in the hospitality industry, directly impacting guest satisfaction, brand loyalty, and overall perception. At B Hotel, the housekeeping department plays a critical role not only in maintaining cleanliness but also in supporting guest services, ensuring facility upkeep, and enhancing the overall guest experience. This study investigates the contribution of B Hotel's housekeeping operations to service excellence by evaluating key performance areas, identifying operational strengths and weaknesses, and proposing an actionable improvement plan. This study utilized a descriptive quantitative research design grounded in the SERVQUAL model. Data were collected through structured survey questionnaires distributed to 50 purposively selected respondents, 25 housekeeping staff and 25 hotel guests. The instrument assessed five dimensions: cleanliness, staff competence, timeliness, guest service, maintenance coordination, and the department's indirect contribution to hotel marketing. The findings revealed that respondents strongly agreed on the staff's competence in cleanliness and equipment handling (WM = 3.70) as well as the timeliness of room preparation (WM = 3.70). However, lower ratings were observed in areas such as complaint resolution (WM = 3.24), time management (WM = 3.22), and personalized guest service (WM = 3.16). The department's indirect impact on marketing through cleanliness and ambiance received the highest rating (WM = 3.86), affirming its role in enhancing the hotel's image and guest perception. The study confirms that housekeeping plays a multidimensional role in delivering service excellence. Strengths in technical skills and hygiene practices contribute significantly to guest satisfaction, while gaps in communication, responsiveness, and personalization indicate areas for improvement. To address these challenges, the study proposes an action plan that includes real-time task monitoring, communication and customer service training, and enhanced coordination with the maintenance department. Continuous development in responsiveness, personalized service, and operational integration is essential for B Hotel to sustain guest loyalty and remain competitive in the hospitality industry.

Keywords: housekeeping, service excellence, servqual, guest satisfaction, hotel operations, hospitality management, b hotel

EXPLORING THE STATUS OF CAREER EMPLOYMENT OPPORTUNITIES FOR BSHM GRADUATES: A BASIS FOR STRATEGIES DEVELOPMENT PROGRAM

Romer Ibarrientos, Marvin Alcala, Maricris Baldevino, Regeilyn Lustre,
Gabrielle Rodriguez, Dr. Dana France Ignacio

Abstract

The hospitality industry's rapid evolution has increased the demand for service-oriented professionals with specialized skills. In the Philippines, the Bachelor of Science in Hospitality Management (BSHM) serves as a key academic pathway for careers in tourism, hotels, and event management. However, many BSHM graduates encounter challenges in securing employment aligned with their field of study. This reveals a disconnect between academic training and the expectations of the hospitality industry. The study aims to explore the status of career opportunities for BSHM graduates and identify areas for strategic development to bridge this gap and enhance graduate employability. This study employs descriptive quantitative design. Data was gathered using a structured questionnaire disseminated through Google Forms. The instrument was validated by a panel consisting of the research adviser, a statistician, and a grammarian. It focused on respondents' demographic profiles, employment status, skills, qualifications, and perceived readiness for hospitality-related employment. Responses were measured using a four-point Likert scale. Statistical treatments, including frequency, percentage distribution, and mean scores, were used for analysis, with data organized using Microsoft Excel. The findings revealed that customer service skills ranked as the most valued qualification among employers, followed by communication skills and prior work experience. A degree in Hospitality Management was recognized as important, along with certifications from agencies such as TESDA and ServSafe. Conversely, technical skills such as culinary expertise, event planning, and foreign language proficiency were rated lower in terms of priority for entry-level positions. Respondents also cited a lack of work experience and job-matching opportunities as major employment barriers. The results underscore the need for enhanced internship and practicum programs to bridge the experience gap among graduates. Strengthening these experiential learning components can improve graduates' confidence, adaptability, and workplace readiness. Although some certifications are not heavily emphasized by employers, they contribute to professional development and competitiveness. Continuous upskilling and alignment of academic curricula with industry needs are recommended to support career readiness and long-term growth among BSHM graduates.

Keywords: bshm graduates, employment opportunities, career development, hospitality industry, graduate employability

**FACTORS AFFECTING CUSTOMER SATISFACTION AND
ITS RELATION TO CUSTOMER RETENTION**

Vanessa Megio, JB Sarong, Ronnielyn Anne Solsona, Percival Valdez,
Gwyneth Mesias, Dana Rae Boatis

Abstract

In the highly competitive food service industry, customer satisfaction serves as a critical indicator of business success and long-term sustainability. This study investigates the key factors influencing customer satisfaction, specifically food quality, service quality, ambiance and environment, and pricing and value for money. It further examines the relationship between these satisfaction factors and customer retention. Understanding these dynamics is essential for restaurants that aim to enhance the guest experience and promote customer loyalty. This study utilizes a quantitative research design with a descriptive method. It was conducted at Cabalen Buffet Restaurant in SM Fairview, Quezon City, with a total of 50 respondents, consisting of 35 customers and 15 employees. Data were collected through a researcher-made questionnaire, which was validated through expert review and pre-testing. Statistical tools, including weighted mean, percentage distribution, and Pearson correlation, were employed to analyze the data. The results revealed high levels of customer satisfaction across all examined areas. Food quality received the highest ratings, particularly in cleanliness and presentation, with a composite mean of 3.71. Service quality was positively evaluated, especially in terms of staff friendliness and responsiveness. Ambiance and environment were appreciated for overall cleanliness and interior design, although seating comfort received slightly lower ratings. Pricing and value for money were also perceived favorably, particularly due to flexible payment options, although the absence of discount offers was noted. However, Pearson correlation analysis indicated no statistically significant relationship between the satisfaction variables and customer retention ($p > 0.05$). Although customers expressed favorable satisfaction with food quality, service, ambiance, and pricing, these factors did not significantly predict retention. This suggests that external factors such as competition, location, or marketing strategies may exert a greater influence on customer loyalty. The study also identified operational issues such as inconsistent food quality, inadequate cleanliness, limited menu variety, and the absence of loyalty programs. Addressing these concerns could help buffet restaurants better align their services with customer expectations and improve long-term retention strategies.

Keywords: customer satisfaction, customer retention, food quality, service quality, restaurant ambiance, pricing, buffet dining, hospitality management

**FACTORS THAT INFLUENCE EMPLOYEE RETENTION IN HALINA HOTEL,
HOUSEKEEPING DEPARTMENT: A PROPOSED ENHANCEMENT PLAN**

Jumil Lucelo, KC Cassandra Baloro, Allyssa Ponayo, Razel Ann Costanaires,
Christalyn Joy Dumali, Ms. Dana Rae Boatis

Abstract

The study, titled “Factors that Influence Employee Retention at Halina Hotel, Housekeeping Department: A Proposed Enhancement Plan,” aims to comprehensively investigate the key determinants of employee retention within the hotel's housekeeping department. It seeks to identify both the motivating factors that encourage staff to remain in their roles and the underlying challenges that contribute to employee turnover. By examining these elements, the study intends to develop a strategic enhancement plan designed to improve retention rates, foster employee satisfaction, and promote long-term workforce stability within the department. The findings will help researchers develop strategic recommendations to improve employee satisfaction, minimize turnover, and promote long-term retention within the hotel. The study will investigate positive workplace factors such as opportunities for professional growth, work-life balance, employee recognition, and fair compensation. It will also examine negative influences on employee morale, including job burnout, limited career advancement, and inadequate management support. This study explored employee retention within Halina Hotel's housekeeping department, drawing on data from 15 respondents. The findings reveal the challenges faced by staff and key factors influencing their decision to remain with the organization. Demographic analysis showed that 47% of respondents were aged 24 to 29, the largest age group. while 87% were single and 13% married. Educational levels indicated that 73% had completed high school, 20% held bachelor's degrees, and 7% possessed vocational certificates, reflecting a workforce largely composed of secondary-educated individuals. Regarding employment tenure, 60% had been with the hotel for two to six years, and 40% for less than one year. These insights provide a comprehensive profile of the housekeeping staff, offering valuable context for understanding retention patterns and informing strategies to enhance employee satisfaction and reduce turnover. To help Halina Hotel cultivate a sustainable, employee-centered work environment, the study advocates for the promotion of a warm, supportive, and growth-driven workplace culture, one in which employees feel valued, empowered, and motivated to stay. By fostering such an environment, the hotel can not only boost employee satisfaction but also build a loyal, focused, and high-performing workforce. This strategic approach will strengthen team cohesion, enhance workplace relationships, and support the hotel's long-term growth and operational success through a more engaged and committed staff.

Keywords: employee retention, workplace satisfaction, halina hotel, housekeeping department, supportive work environment, employee engagement, workforce motivation, organizational growth, positive work culture, staff development

**FACTORS THAT INFLUENCE EMPLOYEES' PRODUCTIVITY
IN KITCHEN STAFF OF CAFE ASTORIA**

Rasel Tuazon, Everson Ballesteros, Anne Marie Dellira,
Angel Joshua Granali, Jerome Ramos, Dana Rae Boatis

Abstract

The efficiency of the kitchen crew is a critical determinant of Café Astoria's overall success, directly influencing operational continuity, prompt food service, and customer satisfaction. All of which are essential to both consumer loyalty and business performance. Key indicators of kitchen productivity include service speed, order accuracy, and cost-effectiveness. However, inefficiencies in these areas often result in operational delays, increased error rates, and heightened stress among staff. Acknowledging these challenges, Café Astoria's management has made it a priority to identify and address the root causes of low productivity in the kitchen. This strategic focus aims to optimize performance, improve team dynamics, and ultimately elevate the customer experience. This study seeks to identify the key factors that drive productivity among kitchen staff at Café Astoria and to recommend actionable strategies for enhancing employee morale and operational efficiency. A descriptive research design will be employed, with purposive sampling used to gather direct insights from selected kitchen employees who are most familiar with day-to-day operations. Data will be collected firsthand to capture the experiences, challenges, and perspectives of the workforce. The results of the study will inform evidence-based policy recommendations aimed at improving staff performance, fostering a more supportive work environment, and contributing to the café's long-term success and sustainability. The study surveyed 25 kitchen staff members at Café Astoria and yielded important demographic and productivity-related findings. A majority of respondents were between the ages of 26 and 30 (52%), male (56%), and unmarried (84%), with over half (52%) having served at the establishment for 2 to 3 years. Several factors emerged as highly influential in enhancing employee productivity. Workload management received a high mean rating (3.83), with task assignment (Mean = 3.96) and effective scheduling (Mean = 3.85) identified as critical components. A conducive work environment (Mean = 3.86) and clarity in work proposals (Mean = 3.75) were also recognized as significant contributors to performance. Furthermore, Employee Assistance Programs (Mean = 3.89), particularly their role in reducing absenteeism (Mean = 3.96), and employee appreciation under service quality (Mean = 3.78) were highlighted as key drivers of motivation and efficiency. These findings underscore the need for strategic management practices, structured support systems, and employee recognition to sustain and improve productivity within kitchen operations. The study highlighted key factors influencing kitchen staff productivity at Café Astoria. Ineffective task delegation, frequent criticism, and inflexible scheduling increased pressure and burnout among employees. In contrast, clear delegation and flexible work arrangements boosted performance. Insufficient tools and communication breakdowns were major barriers that compromised efficiency and team coordination. Conversely, adequate resources and transparent communication strengthened teamwork and operational effectiveness. Furthermore, limited recognition and lack of managerial support lowered employee morale, whereas Employee Assistance Programs and well-designed reward systems significantly improved motivation, job satisfaction, and retention.

Keywords: employee productivity, task delegation, workplace flexibility, communication breakdown, team efficiency, employee morale, resource availability, burnout, employee recognition, motivation and retention, café astoria, kitchen operations

**FOOD SPOILAGES: A PROPOSED FOOD WASTE REDUCTION
MANAGEMENT IN BOSS MADAM**

Vince Albor, Kean Karlo Abes, Karen Ballares, Jerson Laroa,
Anika Villareal, Roland Rambo Jayoma

Abstract

The rapid expansion of catering services in the Philippines, particularly in urban centers like Quezon City, has led to a substantial increase in food waste, resulting in serious environmental and economic repercussions. Key contributors to this issue include overproduction, inadequate menu planning, spoilage, improper storage techniques, and a lack of comprehensive staff training. This study aims to explore and recommend strategic interventions to reduce food waste in the catering industry by promoting sustainable practices, aligning operations with consumer demand, and strengthening waste management systems. By addressing these pressing challenges within Quezon City, the research intends to generate insights that can inform broader, nationwide efforts to mitigate food waste and support environmental sustainability in the food service sector. The study involved 25 employees from Boss Madam Samgyupsal, a food establishment located in Quezon City. Participants were primarily within the age range of 18 to 22 years old, with a significant number also falling between 23 and 27 years old. To ensure the relevance and appropriateness of the sample, purposive sampling was utilized, targeting individuals who possessed specific characteristics aligned with the study's objectives. Data collection was conducted through a researcher-developed, structured questionnaire designed to assess customer satisfaction levels. Before administration, the researchers obtained formal approval from the appropriate hospitality authorities, ensuring ethical compliance and cooperation from the establishment. The survey focused on young adults aged 18 to 22, with an equal representation of male and female respondents. The majority were employed as Dining Crew (32%), followed by Cashiers (24%), and nearly half (48%) were college undergraduates. Results indicated a strong consensus on the significance of effective inventory management and consistent food quality in reducing food waste within catering operations. Major contributors to food waste included overproduction, inaccurate forecasting of guest attendance, and diverse customer preferences. Respondents also identified operational challenges such as difficulty in portion control and limited resources dedicated to waste management. To address these issues, the study recommends the adoption of digital inventory management systems, continuous staff training, and the establishment of comprehensive, sustainable food waste reduction policies. These measures aim to improve operational efficiency, minimize waste, and support long-term sustainability within the catering industry. The study reveals that the majority of respondents are young adults aged 18 to 22, predominantly male, and primarily employed as Dining Crew members within the catering industry. Most hold the educational status of college undergraduates, indicating incomplete tertiary education. The primary factors contributing to food waste include overproduction, inaccurate forecasting of guest attendance, and fluctuating customer preferences. To effectively address these issues, the study emphasizes the need for comprehensive waste reduction strategies such as the adoption of advanced inventory management systems, the formulation of sustainable food waste policies, and the implementation of continuous staff training programs. Furthermore, overcoming operational challenges, particularly inconsistent portion control and limited access to waste management resources, is essential for promoting efficiency and reducing food waste within catering establishments, especially in densely populated areas like Quezon City.

Keywords: food waste, catering industry, quezon city, overproduction, guest forecasting, customer preferences, inventory management, portion control, staff training, sustainable practices

**GENDER DIVERSITY ON EMPLOYMENT OPPORTUNITIES IN A SELECTED
RESTAURANT IN QUEZON CITY**

Cathrine Faith Biron, Jayvee Banzuelo, Christine Joy Celis, Geralyn Combate,
Tricia Ibañez, Dr. Dana France Ignacio

Abstract

This study explores the influence of gender diversity on employment prospects at Gerry's Grill and Cabalen in Quezon City. It examines how gender-related practices affect recruitment equity, employee satisfaction, retention rates, and access to training opportunities by capturing the experiences and viewpoints of both managers and employees. The research highlights the importance of fostering gender-inclusive workplaces to promote fairness and organizational effectiveness. By doing so, it seeks to encourage human resource practitioners, business leaders, and policymakers to recognize diversity as a strategic advantage in building stronger teams and enhancing overall performance. Fifty respondents, including managers and staff from Cabalen and Gerry's Grill in Quezon City, were selected for the study. Data collection was conducted through online survey instruments. The data collected were analyzed using statistical techniques such as weighted mean, frequency, and percentage to effectively summarize and interpret the findings. Upon completion of data analysis, the researchers observed that most respondents agreed on several key issues, including the challenges posed by gender diversity that may affect employee performance and opportunities. Respondents also recognized the impact of gender diversity on employment aspects such as training and development programs, employee satisfaction and retention, and equity in hiring practices. Despite this, many respondents expressed concerns regarding their current wages and the adequacy of coaching and leadership development programs. Nevertheless, the majority reported satisfaction with their current job and indicated no significant work-related problems. The analysis demonstrated a robust positive correlation between gender diversity and employment opportunities, indicating that increased gender diversity within organizations is significantly associated with improved access to employment and career advancement prospects.

Keywords: gender diversity, employment opportunities, positive correlation, organizational inclusivity, workforce equity, career advancement, diversity impact

**GREEN HOTEL INITIATIVES: SUSTAINABLE PRACTICES IN FOOD WASTE
REDUCTION OF SEDA HOTEL VERTIS NORTH**

Jhon Paul Godin, Trixey Ann Aguilar, Jhanrry Rassel Fuentes, Sandra Khyryzel Sy,
Louel John Juarez, Dr. Dana France Ignacio

Abstract

This study examines the green hotel initiatives of Seda Hotel Vertis North that focus on reducing food waste. It highlights efforts such as portion control, waste segregation, food repurposing, and awareness campaigns for staff and guests. The study evaluates the effectiveness of these strategies, identifying strengths and areas for improvement. It aims to offer practical, sustainable recommendations that contribute to the field of hospitality management and support broader global efforts toward environmental sustainability. The research used a descriptive qualitative approach to examine Seda Hotel Vertis North's green initiatives for food waste reduction. Data were gathered through face-to-face interviews and Likert-scale surveys with 15 culinary and dining attendants selected via simple random sampling. The survey, reviewed by experts for clarity and relevance, included demographic questions and sections on current practices and employee perceptions. Responses were analyzed using percentages and weighted mean formulas, with results tabulated and presented using Microsoft Excel. The findings reveal key insights into Seda Hotel Vertis North's food waste reduction practices. A majority of respondents were young adults with limited experience. Sustainable practices such as the FIFO system, portion adjustments, and ingredient repurposing were widely adopted. Donations, awareness, and composting scored high, reflecting a strong commitment to sustainability. However, challenges include policy enforcement, staff training, inadequate storage, and financial constraints. Addressing these barriers can enhance the hotel's food waste management and sustainability efforts. The study highlights Seda Hotel Vertis North's strong commitment to food waste reduction, with successful practices such as the FIFO system, portion control, and ingredient repurposing. However, challenges remain in areas such as composting, policy enforcement, and employee training. Despite a small sample size, the findings suggest that young, early-career professionals influence the hotel's sustainability strategies. To further enhance its green initiatives, the hotel should focus on improving composting systems, refining operational practices, and increasing guest and staff engagement in waste reduction efforts.

Keywords: sustainable practices, food waste reduction, seda hotel vertis north

**GUEST PERCEPTION ON VALUE FOR MONEY IN AIRBNB EXPERIENCE
AT THE GRASS RESIDENCE QUEZON CITY**

Lyca Grace Callos, Janella Bartolome, Genevarose Dela Cruz, Julianna Denzo,
Lea Mae Follero, Erraiza Jade Rebote, Dr. Dana France Ignacio

Abstract

The Grass Residences, a high-rise condominium complex in Quezon City developed in 1985 by SM Development Corporation, stands as a reflection of Metro Manila's rapid urbanization. Strategically located near the North EDSA transportation hub, it offers residents and guests convenient access to modern amenities and public transit. Despite these advantages, the development has faced criticism for its environmental impact, an issue commonly associated with large-scale urban projects. This study examines the value guests receive for their money when staying at The Grass Residences via Airbnb. By identifying and addressing guest expectations, the research aims to enhance guest satisfaction and ultimately increase booking rates. This research employed a quantitative approach with a descriptive design, utilizing random sampling and statistical analysis to examine how guests perceive the value of their Airbnb stay at The Grass Residences. Ethical standards were strictly followed, including informed consent and the assurance of participant confidentiality. These methods provided reliable insights into the key factors influencing guest satisfaction, offering practical guidance for enhancing the Airbnb operation. The Grass Residences primarily appeals to young, single adults, with the majority of guests aged 21–25 and earning modest to middle incomes. Overall, guests expressed high satisfaction with service quality, particularly in areas such as communication, cleanliness, host interaction, and the property's safety and security. While most guests enjoyed their stay, several areas for improvement were identified, including maintenance concerns, inconsistent amenities, and occasional Wi-Fi issues. The findings suggest that The Grass Residences effectively meets the needs of its target demographic; however, addressing these specific concerns could further enhance the overall guest experience and increase repeat bookings. The Grass Residences effectively appeals to a targeted demographic of young, single adults seeking affordable urban accommodation. While guests report overall satisfaction with key aspects of their stay, the study highlights the need for improvements in maintenance, amenity consistency, and Wi-Fi reliability. Addressing these issues is essential to enhancing the guest experience and reinforcing perceptions of value for money. These enhancements can also provide a competitive edge in the increasingly dynamic Airbnb market.

GUEST SATISFACTION IN SERVICE MAINTENANCE AT NOVOTEL: AN ANALYSIS

Jez Rith Domagtoy, Janet Cancamo, Kyla Mae Furaque, Miaka Lucañas, Oliver Fabon

Abstract

The hospitality industry is witnessing a growing demand for high-quality service, with guest satisfaction emerging as a key determinant of hotel success and brand reputation. Current trends highlight an increasing focus on personalized experiences, efficient service delivery, and the integration of sustainable practices, particularly within housekeeping operations. The influence of online reviews and social media has further amplified the importance of positive guest experiences, making them essential for attracting and retaining customers. Additionally, technological innovations such as mobile check-in/check-out and automated cleaning systems are reshaping the landscape of housekeeping services, driving both efficiency and guest satisfaction. This research will contribute to the existing body of knowledge on guest satisfaction in the hospitality industry by presenting a focused case study on housekeeping services at Novotel. The findings will provide valuable insights into the specific challenges and opportunities involved in maintaining high service standards within housekeeping operations. The recommendations generated from this study may be applied not only by Novotel but also by other hotels seeking to enhance their housekeeping practices and improve overall guest satisfaction. Additionally, this thesis aims to support the development of best practices in training, resource management, and communication within housekeeping departments, ultimately contributing to more efficient and guest-centered service delivery. This study focuses on analyzing guest satisfaction with housekeeping services at Novotel, located in Araneta, Cubao, Quezon City. The analysis is based exclusively on guest feedback gathered through quantitative guest satisfaction surveys. Specifically, the research examines the correlation between key housekeeping factors, such as cleanliness, amenity replenishment, and responsiveness to guest requests, and overall guest satisfaction. The study is limited to the perspectives of guests and does not include input from hotel staff or management. While the findings offer valuable insights into areas of strength and improvement within Novotel's housekeeping operations, they may not fully represent broader operational or internal management challenges. Nonetheless, the results provide practical guidance for enhancing service quality and elevating the guest experience. This study aims to investigate the key factors that influence guest satisfaction with housekeeping services at Novotel. Specifically, it seeks to identify areas for improvement in existing service maintenance practices and to propose practical recommendations for enhancing the overall guest experience. To achieve this, the study will analyze guest feedback, evaluate current housekeeping procedures, and assess the effectiveness of staff training and resource management. The ultimate goal is to contribute to the development of a more efficient, responsive, and guest-centric housekeeping department.

Keywords: guest satisfaction, novotel, service maintenance, housekeeping services, efficient service, quality service, survey

**HOUSEKEEPING PRACTICES IN BSHM BESTLINK COLLEGE OF THE PHILIPPINES:
SCHOOL-BASED TRAINING INTO ON-THE-JOB EXPERIENCE**

Ma Patricia Janella Lumanog, John Ernest Anza, Allana Marie Arsenio,
Ma Jincky Delos Santos, Lovely Ann Esteban, Dr. Dana France Ignacio

Abstract

The study examines the impact of combining school-based training and on-the-job training (OJT) on the development of housekeeping skills among Bachelor of Science in Hospitality Management (BSHM) students at Bestlink College of the Philippines. It focuses on how classroom instruction, including theoretical lessons and simulated housekeeping activities, prepares students for practical application during their internship at Astoria Plaza. The research aims to determine whether integrating academic learning with real-world experience effectively enhances students' technical proficiency, work readiness, and overall performance in the hospitality industry. This study utilized a quantitative research approach with a descriptive survey design to evaluate the effectiveness of integrated training on the housekeeping skills of BSHM students. A purposive sampling method was employed to select 100 fourth-year students currently participating in their on-the-job training (OJT). Data collection was conducted through a validated questionnaire that measured multiple aspects of both school-based instruction and industry-based training, including butler and valet services, bed-making, laundry and linen handling simulations, job preparedness, workplace performance, and professional conduct. The gathered data was subjected to statistical analysis using percentage distributions and weighted means, along with inferential tests to explore potential relationships among the identified variables. The study revealed a strong level of agreement among respondents regarding the effectiveness of both school-based training and on-the-job training (OJT) in developing their housekeeping competencies. Students reported a high degree of satisfaction with simulation-based learning, particularly in key areas such as butler services, bed making, and laundry and linen management. These structured simulations, combined with real-world exposure during their internship at Astoria Plaza, significantly contributed to their job preparedness, skill mastery, and professional growth. However, despite these positive outcomes, the respondents also identified several critical limitations within the training program. Among the most cited challenges were outdated equipment, insufficient and overcrowded training facilities, and limited time allocated for practical sessions, all of which were perceived as barriers to optimizing hands-on learning experiences and achieving higher levels of competency. The findings of this study emphasize the value of integrating school-based instruction with on-the-job training (OJT) in hospitality education. This dual approach not only equips students with practical competencies but also enhances their confidence, motivation, and sense of professionalism. The seamless connection between academic simulations and actual industry experience ensures that students are better prepared to meet workplace demands. Nonetheless, the effectiveness of these training programs could be significantly improved by addressing persistent challenges, including limited resources, outdated equipment, and insufficient time for hands-on learning.

**IMPACT OF BARTENDER SKILLS ON THE CUSTOMER LOYALTY:
BASIS FOR A PROPOSED CUSTOMER RETENTION PLAN**

Shiella May Tabunda, Mari Anthonette Rancudo, Kaye Narvaez, Ronoel Arcede,
Jessica Legardo, Hannah Mae Besmonte, Oliver Fabon

Abstract

The hospitality industry remains one of the fastest-growing sectors worldwide, playing a vital role in economic development, job creation, and tourism growth. However, globalization and evolving customer expectations have intensified competition across the sector. To remain competitive and ensure long-term sustainability, establishments such as bars, restaurants, and hotels must consistently elevate their service quality, innovate their offerings, and prioritize customer satisfaction to retain loyalty and stand out in a crowded market. The researchers adopted a descriptive research design and employed purposive sampling to identify the appropriate target population. To collect relevant data, a survey was conducted as the primary method of data gathering. The researchers designed structured questions to ensure that the information obtained aligned with the objectives of the study. Data collection was carried out through face-to-face interviews, allowing for better engagement and more accurate responses from participants. The majority of respondents strongly agreed on the importance of various skills within the hospitality industry. In terms of communication skills, active listening was recognized as essential for understanding customer needs and delivering appropriate service. For mixology skills, respondents emphasized that proper muddling techniques enhance drink quality by extracting flavors from fruits, herbs, or spices. They also noted that the ability to balance flavors such as sweet, sour, salty, and bitter, requires a refined palate, and that knowledge of appropriate glassware and serving temperature improves drink presentation and customer satisfaction. In the area of flairtending skills, most participants strongly agreed that the simultaneous use of multiple bottles or tools contributes to a dynamic and visually engaging performance. Regarding customer loyalty, excellent customer service was seen as a key factor in converting one-time buyers into loyal customers through prompt, effective, and empathetic support. Finally, regarding customer satisfaction, respondents agreed that personalized service tailored to individual needs leads to higher satisfaction levels. A skilled bartender contributes significantly to the overall customer experience by creating a warm, friendly, and welcoming atmosphere. Their approachable demeanor helps establish a positive connection with guests, making them feel valued and comfortable. Customer satisfaction is not only a key outcome of excellent service but also a strong indicator of customer loyalty. Bartending skills ranging from crafting quality drinks to providing attentive and engaging service, are essential in fostering loyalty. When customers receive great service in a pleasant environment, they are more likely to return, recommend the venue to others, and remain loyal over time.

Keywords: bartender skills, customer satisfaction, customer loyalty, hospitality industry, customer experience, quality service, drink preparation, welcoming atmosphere

**IMPACT OF EDUCATIONAL TOURS: ENHANCING THE CAREER OPPORTUNITY
INSIGHT ON HOSPITALITY MANAGEMENT STUDENTS AT BCP**

Jaylord De Luna, Doyet Amangas, Jason Balino, Tito Bell Oben,
Alexander Luis Bangayan, Dr. Dana France Ignacio

Abstract

This study explores the impact of educational tours on the career goals and industry awareness of 4th-year Bachelor of Science in Hospitality Management (BSHM) students at Bestlink College of the Philippines. Fifty participants were selected to provide their insights through a survey questionnaire. The findings are summarized and followed by conclusions and recommendations to offer a thorough understanding of the tours' effects and to inform future initiatives. This research aims to deliver valuable insights that address student concerns and support informed decision-making related to career development and industry exposure. This study utilized a correlational research design involving 50 fourth-year students from Bestlink College of the Philippines who have participated in educational tours. Participants were selected through purposive sampling. Data collection was conducted using an online survey questionnaire. The study focuses on examining the impact of educational tours in enhancing career opportunity awareness among Hospitality Management students. The findings underscore the significant role of educational tours and industry exposure in equipping Bachelor of Science in Hospitality Management (BSHM) students for successful careers in the hospitality industry. These tours substantially improved students' problem-solving skills and provided valuable practical experience that expanded their industry knowledge. Moreover, the tours facilitated important networking opportunities, enabling students to connect with industry professionals and potentially secure internships and future employment. The study explored the complex relationship between the benefits and challenges associated with educational tours for Bachelor of Science in Hospitality Management (BSHM) students. While these tours significantly enhance practical skills and offer valuable networking opportunities vital for success in the competitive hospitality industry, notable barriers to access persist. To address these challenges and optimize the program's impact, a comprehensive guide was developed to help students fully maximize the benefits of the educational tours.

**IMPACT OF FOOD WASTE ON RESTAURANT OPERATIONS;
STRATEGIES FOR REDUCTION AND MANAGEMENT**

Franclyn Catangui, Sean Gabriel Huab, Giann Mortiz, Carlos Miguel Salopesa,
Joven Sangalang, Dana Rae Boatis

Abstract

Food waste remains a persistent challenge in the restaurant industry, undermining both sustainability and profitability. This study explores the impact of food waste on restaurant operations and identifies effective strategies to reduce it. Concentrating on Max's Restaurant in SM Fairview, Quezon City, the research investigates key causes of food waste, including over-ordering, inefficient inventory management, portion control, and inadequate staff training, and assesses their effects on costs, profitability, and customer perception. This study employed a quantitative descriptive research design with purposive sampling. Data was collected from 25 employees of Max's Restaurant using a structured questionnaire focused on food waste practices, challenges, and mitigation strategies. The responses were analyzed through frequency distribution, weighted mean, and ranking techniques to assess the findings. The findings indicate that over-preparation and inaccurate demand forecasting (80%), along with the short shelf life of perishable goods (76%), are the primary contributors to food waste. While inventory tracking, portion control, and regular staff training were considered moderately effective, there remains significant room for improvement. The study also revealed a strong correlation between food waste and increased operational costs, decreased profitability, and customer dissatisfaction. Strategies such as utilizing data analytics, standardizing portion sizes, implementing comprehensive training programs, and integrating customer feedback received high levels of agreement. Employees highlighted the need for improved cross-departmental communication and enhanced forecasting tools to strengthen food waste management. The results indicate that although Max's Restaurant has implemented effective food waste reduction practices, further improvements are possible by leveraging advanced technology, fostering stronger employee involvement, and enhancing communication with customers. This emphasis on practical solutions underscores the hospitality industry's broader need for comprehensive waste reduction strategies that align economic efficiency with environmental sustainability.

Keywords: food waste, restaurant operations, demand forecasting, inventory management, portion control, staff training, operational costs, profitability, customer satisfaction, waste reduction strategies, hospitality industry, quezon city

IMPACT OF ONLINE INFORMATION ON HOTEL BOOKING

Colleth Quitay, Marites Aunzo, Lovely Mae Borja, Leana Coeurcy De Guzman,
Claudine Hamot, Roland Rambo Jayoma

Abstract

The hospitality industry heavily relies on online platforms for attracting and engaging customers. Inaccurate or misleading online information can lead to customer dissatisfaction and harm hotel reputations. This study utilizes surveys and interviews to identify these inaccuracies, assess their effects, and recommend strategies for improving digital content management to build customer trust and loyalty. This study was conducted at Oriental Garden Lilac Tower using a quantitative descriptive design. A total of 100 guests, with 70% female respondents, were selected through snowball sampling to participate in a survey concerning online booking information. Data collection was carried out efficiently using structured questionnaires. The study, involving 100 respondents, found that the majority (43%) were aged 18–25, with females comprising 70% of the sample. Most guests visited “once a month” (32%). Key factors driving hotel booking satisfaction included visual appeal (high-quality images, weighted mean = 3.64), ease of navigation (search functionality, 3.54), information clarity (accurate maps, 3.66), customer reviews (overall ratings, 3.58), price (value for money, 3.48), and hotel amenities (comfort and convenience, 3.71). Technical issues and information accuracy emerged as primary challenges, with website glitches and inconsistent information receiving weighted means of 0.42 and 0.37, respectively. High-quality visuals and mobile-friendly interfaces are vital components of successful hotel websites. Competitive pricing combined with perceived value is essential for attracting and retaining guests. Technical issues such as website glitches and inaccurate information can erode customer trust, underscoring the importance for hotels to improve website design, ensure accurate data management, implement thorough fact-checking, and strengthen security measures.

Keywords: hotel websites, high-quality visuals, mobile-friendly design, competitive pricing, customer trust, website glitches, data accuracy, website security, digital content management

IMPACT OF RESORT RECREATIONAL ACTIVITIES ON GUEST SATISFACTION

John David Doble, Trisha Mariz Valerio, Lovely Toriaga, Katrina Sumalpong,
Leachim Udarbe, Roland Rambo Jayoma

Abstract

In today's diverse society, promoting inclusivity in recreational activities is essential. Rancho Luisito Resort, located in the tranquil setting of Rodriguez, Rizal, offers a range of recreational facilities designed to accommodate a wide variety of guests. However, to truly uphold inclusive values, it is important to develop programs that ensure all individuals regardless of background, ability, or preference, can fully enjoy and benefit from the resort's amenities. This study aims to assess the impact of recreational activities on overall guest satisfaction by evaluating offerings such as water sports, fitness programs, cultural events, and entertainment options, and determining their influence on the guest experience. This chapter presents the research methodology adopted in the study. It covers research design, selection of participants, sampling method, development and validation of research instruments, procedures for data collection, administration and retrieval of questionnaires, and the statistical techniques employed for data analysis. This chapter presents the results of the study, which were analyzed using appropriate statistical techniques and evaluated according to the established research criteria. The data are presented in tables and interpreted in alignment with the specific research problems outlined in the study. Guest satisfaction is a vital aspect of the hospitality industry, with recreational activities playing a key role in enhancing the overall guest experience. This study explores the impact of resort recreational activities on guest satisfaction, focusing on three core dimensions: entertainment, relaxation, and personalization. Through the analysis of guest surveys and feedback, the study highlights the most valued elements in recreational programs, including variety, accessibility, and alignment with individual preferences.

Keywords: guest satisfaction, recreational activities, hospitality industry, entertainment, relaxation, personalization, accessibility, resort experience, customer feedback, tourism management

**IMPACT OF ROOM SERVICE DELAY ON EMPLOYEE SATISFACTION:
AN ASSESSMENT**

Camile Ocampo, Ruszel Andrei Tambong, Jhorgie Buela,
Johnkinneth Roma, John Mark Deza, Dana Rae Boatis

Abstract

This study explores the causes of food delivery delays in room service at Astoria Plaza Hotel and their effects on employee morale, engagement, and job satisfaction. It identifies key operational challenges, including the absence of a dedicated room service team, increased workload, and poor resource allocation, as primary contributors to delays and staff stress. The dual role of Café Plaza employees, who manage both restaurant and room service operations, adds further strain. The study highlights the need for improved staff training, effective resource management, and a thorough review of operational inefficiencies. Additionally, it underscores the importance of supporting employees' psychological well-being, noting the strong connection between mental health, job satisfaction, and performance. The study ultimately recommends investing in employee development to enhance service quality, boost staff satisfaction, and strengthen the hotel's competitiveness in the hospitality industry. This study adopted a quantitative descriptive research design to investigate the impact of room service delays on employee satisfaction. A purposive sampling method was used to select 20 Café Plaza employees from Astoria Plaza Hotel, all of whom had direct experience with delayed room service deliveries. Data were collected through a structured questionnaire designed to obtain measurable insights into employees' experiences and perceptions regarding service delays. The study found that most employees at Astoria Plaza Hotel were aged 26–35, with equal gender representation and 3–5 years of service. Respondents highlighted the importance of effective communication, prompt meal delivery, and the integration of technology in improving service efficiency and job satisfaction. Major concerns included high workloads, poor interdepartmental communication, and staff shortages, all contributing to stress and burnout. Statistical analysis revealed significant differences in satisfaction levels based on gender, age, and length of service, emphasizing the need for targeted management strategies to enhance employee well-being and performance. To improve room service operations and employee satisfaction at Astoria Plaza Hotel, the study recommends enhancing service speed through better coordination, more efficient elevator management, and the assignment of a dedicated room service team. Furthermore, the implementation of wellness programs, inclusive workplace policies, and an employee recognition or reward system is advised to strengthen staff morale, promote well-being, and elevate overall service quality.

Keywords: room service, employee satisfaction, hospitality management, operational efficiency, staff morale, wellness programs, reward system, service quality, astoria plaza hotel, workplace policies

**IMPACT OF SHUTTLE SERVICE ON EMPLOYEE RETENTION
AND OPERATIONAL EFFICIENCY**

Carlo James Sumampong, Carlo Dexter Sumampong, Justine Shea Paler, Angelito Prospero,
Jhon Luis Pineda, Christina Borrás, Roland Rambo Jayoma

Abstract

In today's competitive business landscape, employee well-being is essential to organizational success. Shuttle services can enhance job satisfaction and reduce turnover by easing daily commutes, boosting morale, and increasing productivity. Despite these advantages, there is a lack of empirical data quantifying their impact on retention and efficiency. This study examines the effects of shuttle services on employee job satisfaction, turnover intentions, and productivity, offering actionable recommendations to promote sustainable workplace practices while addressing safety and reliability concerns. This quantitative study explored the effects of shuttle services on employee retention and efficiency at Concentrix Technohub. Fifty employees, evenly divided by gender, were selected through purposive sampling, and data were gathered using a structured questionnaire. The results highlight the necessity for further research into possible gender bias in hiring practices. A survey of 50 Concentrix employees, mostly aged 24 to 35, demonstrated a strong connection between positive commute experiences and job satisfaction. Reliable shuttle services boosted productivity and work enjoyment while reducing travel costs. Employees reported increased loyalty and lower turnover rates. The service also improved attendance and punctuality, leading to smoother transitions and enhanced productivity. The findings highlight the importance of employee feedback and clear communication for effective implementation. Shuttle services play a vital role in boosting job satisfaction, employee retention, and loyalty by offering reliable and convenient transportation. These benefits contribute to lower turnover rates, improved attendance, and increased productivity. Implementing robust evaluation methods, including employee surveys and performance metrics, is essential for measuring effectiveness. Tailoring shuttle services to align with employee needs enhances their impact. Key recommendations include expanding service coverage, ensuring consistent scheduling, improving shuttle comfort, and conducting regular assessments to monitor outcomes.

Keywords: shuttle services, employee well-being, job satisfaction, employee retention, productivity, commute reliability, attendance, workplace loyalty, evaluation methods, service customization, concentrix technohub

**IMPACT OF SUSTAINABILITY PRACTICES OF GOLDEN PYRAMID PAVILION AND
RESORTS TO THE GUEST SATISFACTION LEVEL**

Cyril Anne Oliquino, Lyka Turreda, Jenny Mae Austral, Rona Amor Birera,
Divine Mae Canimo, Roland Rambo Jayoma

Abstract

This research examines the impact of Golden Pyramid Pavilion and Resorts' sustainability initiatives on the satisfaction levels of its guests. It aims to identify which sustainable practices have the most significant impact on a positive guest experience. The findings aim to offer actionable insights for improving service quality while ensuring that sustainability efforts align with guest expectations and preferences. This study utilized a quantitative descriptive research design with a sample of 100 diverse respondents from Golden Pyramid Pavilion and Resort, selected through simple random sampling. A self-constructed questionnaire, written in both English and Filipino, served as the primary data collection tool. The instrument underwent expert validation and a pre-test to ensure reliability and clarity. To guarantee full participation, the researchers personally administered and retrieved the questionnaires, enabling systematic and accurate data collection and analysis. The findings indicate that 23% of respondents are between the ages of 24 and 28, with an equal split between male and female guests (50% each). Nearly half of the participants (47%) reported visiting the resort occasionally. Guests generally responded positively to the resort's sustainability initiatives, particularly in energy conservation, which received the highest mean score of 3.60. Water conservation and waste management both received favorable ratings (mean = 3.20), while environmental responsibility (mean = 3.13), cleanliness (mean = 3.18), and cost reduction (mean = 3.14) were also acknowledged. Despite these strengths, some areas for improvement were identified, including cracked pathways (reported by 18% of respondents) and mold in bathrooms (17%). The study concludes that Golden Pyramid Pavilion and Resort have an equal gender distribution among its respondents, with a significant number aged 24–28 and many visiting occasionally. Guests generally view the resort's water management and waste disposal efforts positively (mean = 3.20), highly value its energy conservation initiatives (mean = 3.60), and recognize its commitment to environmental responsibility (mean = 3.13), cleanliness (mean = 3.18), and affordability (mean = 3.14). Despite these strengths, concerns regarding comfort, safety, and hygiene remain, highlighting areas for further improvement.

Keywords: sustainability, guest satisfaction, energy conservation, water management, waste disposal, environmental responsibility, hospitality industry, resort services, customer experience, golden pyramid pavilion

**IMPACT ON SOCIAL MEDIA INFLUENCERS ON BRAND PROMOTION AND
CUSTOMER ENGAGEMENT AT GLAZED UNLIMITED WINGS FAIRVIEW-LAGRO**

Andrei Gabriel Dulay, Josephine Elmidulan, Shan Castillo, Sherika Jane Estrada,
Dyane Jean Monterola, Dr. Dana France Ignacio

Abstract

Social media influencers play a vital role in today's digital landscape, significantly shaping consumer perceptions and driving brand engagement. In the food industry, many businesses leverage influences to build brand credibility, boost visibility, and attract a wider customer base. At Glazed Unlimited Wings in Fairview, Lagro, influencer marketing, is a key component of the restaurant's promotional strategy. This study investigates how influence-driven content affects the restaurant's brand visibility, customer engagement, and overall consumer behavior. It also highlights challenges associated with influencer marketing, such as inflated customer expectations, inconsistent service quality, and overcrowding. By analyzing customer feedback and evaluating the effectiveness of promotional efforts, the study provides data-driven insights and practical recommendations to enhance partnerships, improve social media strategies, and elevate customer satisfaction. Ultimately, it aims to strengthen the restaurant's brand positioning and ensure a seamless dining experience for customers influenced by online promotions. This chapter presents the research methodology, detailing the research design, respondent selection, sampling technique, research instrument, validation process, data collection procedures, and the statistical methods employed for data analysis. The study reveals that social media influencers play a vital role in enhancing brand promotion and attracting customers to Glazed Unlimited Wings in Fairview-Lagro. Data analysis shows that influencer marketing positively affects customer engagement, brand awareness, and sales growth. Customers exposed to influencer content expressed greater interest in visiting the restaurant and trying its offerings. The findings also emphasize the influence of credibility and content quality in shaping consumer perceptions. Overall, the results highlight the importance of strategic partnerships in achieving success in the food industry. This chapter presents a comprehensive discussion of the summary, conclusions, and recommendations derived from the findings of the study, in response to the research problems outlined in Chapter 1.

Keywords: social media influencers, brand promotion, customer engagement, glazed unlimited wings, influencer marketing, brand awareness, consumer perception, digital marketing, restaurant industry, strategic collaboration

**IMPLEMENTING RAINWATER HARVESTING IN HOTEL ACTIVITIES: A STRATEGIC
APPROACH FOR WATER CONSERVATION AND COST SAVINGS**

Katherine Barrios, Pinky Mar Calimotan, Mayrrel Gerarcas,
Chino Sombe, Khiem Visitacion, Dr. Dana France Ignacio

Abstract

This study investigates a sustainable strategy within the hospitality industry, emphasizing rainwater harvesting as a practical solution for conserving natural resources and improving cost efficiency. By capturing and storing rainwater for later use, hotels can lessen their dependence on municipal water sources, reduce utility expenses, and address environmental sustainability goals. This study utilized a quantitative descriptive research design to examine the implementation of rainwater harvesting and its impact on water conservation and cost efficiency. A validated questionnaire was administered to 20 hotel employees to gather data on the system's influence across hotel operations, perceived benefits, and implementation challenges. The collected data were analyzed using frequency distributions and weighted means to assess the overall effectiveness and potential adoption of rainwater harvesting as a sustainable water management strategy in the hospitality sector. A study examining hotel staff perceptions of rainwater harvesting revealed a predominantly young, single, and female sample (70% female, 80% aged 21–25, 90% single), which may limit the broader applicability of the results. Staff showed moderate support for using rainwater in toilet flushing and general cleaning, largely due to its environmental benefits and potential for reducing water costs. However, there was limited acceptance for its use in laundry and significant hesitation regarding swimming pools, mainly due to water quality concerns. The study underscores a strong staff commitment to water conservation as a hotel priority, while also identifying key implementation challenges, including limited awareness, quality concerns, and the need for ongoing training and public education to enhance trust and adoption. The findings indicate that hotel staff are generally supportive of using rainwater for toilet flushing and cleaning, recognizing its benefits in reducing costs and supporting environmental sustainability. However, concerns about water quality limit its acceptance for laundry and swimming pool use. Effective implementation will require staff training, assurance of water safety, and clear communication to promote confidence and public acceptance of the system.

Keywords: rainwater harvesting, hotel staff perception, water conservation, environmental sustainability, water quality concerns, staff training, cost savings, implementation challenges

**INFLUENCE OF AI-POWERED PERSONALIZED LEARNING PLATFORMS ON
HOSPITALITY STUDENTS ENGAGEMENT ACADEMIC PERFORMANCE**

Hazel Abaygar, Ma Lourdes Acosta, Justine Aspa, Jennefer Morales,
Charlene Manuel, Jose Rico Verania, Oliver Fabon

Abstract

Artificial Intelligence (AI) is reshaping education by enabling more personalized and adaptive learning, especially within hospitality education. Through the use of student data, AI-driven platforms provide tailored recommendations and support, helping learners receive instruction that aligns with their individual needs and progress. The study adopted simple random sampling to select sixty-fourth-year Bachelor of Science in Hospitality Management (BSHM) students from Bestlink College of the Philippines for the academic year 2024–2025. This approach ensures equal selection chances for all students, minimizing selection bias and increasing data reliability. The research aims to gather diverse insights into student engagement, frequency of platform use, participation in activities, resource usage, and academic performance in an AI-driven learning environment. It also seeks to uncover challenges encountered in AI-based education, offering data that can support enhancements in teaching strategies and digital learning systems. Among the respondents, 66.67% were male (40 students) and 33.33% were female (20 students), providing a balanced range of insights into the effectiveness of AI-driven personalized learning platforms. The study found that these platforms significantly enhance students' academic experiences. A weighted mean of 3.57 indicates strong agreement that AI helps students tackle complex academic tasks. Furthermore, AI's influence in motivating learners and simplifying their workload received weighted means of 3.53 and 3.43, respectively. With a composite mean of 3.51, the results clearly show that AI positively impacts academic performance by increasing productivity and learning efficiency. This study investigated the use of AI-powered learning platforms among students, with findings showing that young adult males aged 21–25 were the primary users, often relying on tools like ChatGPT for personalized learning and academic research. The results revealed that AI significantly enhanced student engagement by improving confidence, increasing participation, and creating a more interactive learning experience. Furthermore, AI positively influenced academic performance by providing structured content, supporting skill development, and enhancing problem-solving abilities. However, the study also identified key challenges. Participants noted concerns about reduced human interaction, limited creativity in AI-generated content, overreliance on technology, and the potential weakening of essential human skills. These findings highlight the need for a balanced approach integrating AI tools with traditional teaching strategies to ensure both technological advancement and the preservation of critical human elements in education.

Keywords: artificial intelligence, personalized learning, academic performance, student engagement, chatgpt, hospitality education, technology integration, human interaction, skill development, learning platforms

**INFLUENCE OF SOCIAL MEDIA ON CUSTOMER ENGAGEMENT AND PERCEPTION
AT RETRO COFFEE HOUSE PH IN NOVALICHES QUEZON CITY**

Rodalyn Manalo, Angela Bonturan, Reyniel Bustamante, Cyrel Dejesus,
Angelo Logagay, Roland Rambo Jayoma

Abstract

Social media has become an indispensable tool for businesses in the hospitality industry, boosting brand visibility and fostering active customer engagement. Through these platforms, hotels and restaurants can effectively showcase their offerings, respond promptly to inquiries, and build personal connections that enhance trust and loyalty. User-generated content and influencer collaborations further strengthen credibility and expand marketing reach. However, challenges such as misinformation and inconsistent branding can harm public perception, making it crucial for businesses to maintain a consistent voice and address concerns swiftly. This study employed a quantitative research design to examine the influence of social media on customer engagement and perception at Retro House Coffee PH in Novaliches, Quezon City. By collecting numerical data and utilizing statistical analysis, the approach aimed to ensure validity and reliability. The sample consisted of 100 customers, with a gender distribution of 35% male and 65% female, indicating a higher female representation. Purposive sampling was used to select participants based on relevant characteristics. Data collection was conducted through a self-designed questionnaire, developed using Parasuraman's customer satisfaction framework. The study revealed that the majority of respondents at Retro House Coffee PH are young adults between 18 and 27 years old, with males slightly outnumbering females. Most participants are single and visit the café infrequently, mainly interacting with the brand via Facebook. The café's social media marketing efforts, including well-crafted content and targeted advertising, are viewed positively and contribute significantly to increased brand loyalty, purchase intentions, customer perception, and trust. Of the demographic variables examined, only civil status demonstrated a meaningful correlation with social media engagement. Nonetheless, issues such as slow response times and inaccurate information were noted as obstacles to effective customer interaction. It is recommended to introduce exclusive in-store promotions to increase offline visits, improve response times through the use of chatbots, tailor content to suit various demographic segments, encourage user-generated content to boost brand loyalty, and optimize social media navigation for enhanced accessibility.

Keywords: social media marketing, customer engagement, brand loyalty, retro house coffee ph, quantitative research, customer perception, user-generated content, chatbots, demographic targeting, in-store promotions

**INNOVATING MENU TWIST: EXPLORING HOW FOOD BUSINESS ADOPTS
LOCAL FOOD INNOVATION IN QUEZON CITY**

John Brix Nicolasora, Mary Claire Padrones, Rochelle Arellano, Angel Crishelda Nacional,
Emily Shane Cariaga, Roland Rambo Jayoma

Abstract

The food industry in Quezon City is increasingly embracing local food innovation, adopting a "menu twist" approach that incorporates unique, locally sourced ingredients into both traditional and contemporary dishes. This study aims to explore how restaurants in Quezon City utilize local food innovation to develop distinctive and competitive menus. Specifically, it examines the motivations, methods, and strategies driving this innovation, while identifying the successes and challenges food businesses encounter in integrating local ingredients and flavors. Additionally, the study highlights best practices in sustainability, ethical sourcing, and customer education. Ultimately, it seeks to propose ways to support the growing trend of local food innovation for the benefit of both businesses and local communities. The research employed quantitative design to enhance validity and reliability. A descriptive approach was used to investigate the innovation of the "Menu Twist" and how food businesses in Quezon City adopt local food innovation. Data were collected from 60 customers (20 per restaurant) across three establishments: Tres Filipino Twist, Mesa, and Storya Kitchen and Bar, using simple random sampling to ensure equal selection probability. The majority of respondents were between the ages of 23 and 32, with the age groups 23–27 and 28–32 equally representing the largest segments of the sample. Female participants made up 53% of the total, indicating a slightly higher inclination among women to explore innovative local cuisine. Additionally, 42% of respondents reported visiting these food businesses occasionally, suggesting that customer interest is driven more by the novelty and variety of offerings than by routine dining habits. The study found that food businesses in Quezon City effectively embrace local food innovation, appealing especially to respondents aged 23–32, the majority of whom were female. There was a strong interest in fusion cuisine and creative food experiences, with most participants dining occasionally, suggesting a desire for variety and discovery. Restaurants such as Tres, Mesa, and Storya were praised for skillfully blending traditional Filipino flavors with modern twists. Respondents valued the consistent quality and thoughtful presentation of new dishes, noting that these innovations maintained cultural authenticity while catering to contemporary tastes.

Keywords: local food innovation, quezon city, fusion cuisine, filipino flavors, modern dining, customer preferences, food business, culinary innovation, traditional and modern balance, restaurant evaluation

**INVENTORY SHRINKAGE AND WASTE MANAGEMENT ON RESTAURANT
OPERATIONS: ANALYSIS ON BEST PRACTICES**

Paul Andrei Bauí, Rica Mae Aben, Jonalie Bancil, Kier Concepcion,
Joana Mirabueno, Roland Rambo Jayoma

Abstract

Controlling inventory shrinkage and waste is vital for improving profitability and operational efficiency in the restaurant industry. Shrinkage from theft, spoilage, and errors, along with waste due to food disposal and regulatory issues, poses significant challenges. Embracing modern technology, sustainable practices, and data-driven strategies is essential to tackle these problems. Inventory shrinkage results in considerable financial losses, while inefficient operations negatively impact market share and customer satisfaction. Key solutions include just-in-time inventory, real-time tracking, and thorough staff training. Innovations in service, process, and organizational management enable tailored waste management approaches suited to diverse restaurant operations. This study underscores the need to reduce losses, optimize operations, enhance customer experience, and support environmental sustainability. This study utilized a descriptive quantitative research design to examine inventory shrinkage and waste management practices in restaurants. A total of 45 participants took part, including 40 staff members and 5 managers, with 28 females and 17 males represented. The data indicate a predominantly young and female workforce in the restaurant industry, emphasizing key demographic and operational factors. Most respondents are between 22 and 25 years old, highlighting the need for youth-centered support. Females represent the majority, revealing a gender imbalance. The workforce is primarily service based, with waiters making up 60%, and a noticeable scarcity of managerial roles. High turnover and short tenure suggest staffing challenges. Educational attainment is mostly at the secondary and college levels, indicating limited opportunities for those with less formal education. The restaurant industry struggles with inventory shrinkage and waste management, which contribute to financial losses and lower customer satisfaction. Key solutions involve just-in-time inventory, real-time tracking, and thorough staff training. Advancements in service, processes, and organizational strategies allow waste management to be customized to meet specific needs, fostering profitability, enhanced customer experience, and environmental sustainability.

Keywords: inventory shrinkage, waste management, restaurant industry, just-in-time inventory, real-time tracking, staff training, operational efficiency, customer satisfaction, environmental sustainability

**INVESTIGATING ACCESSIBILITY STANDARDS AND THEIR EFFECTS ON THE
TOURISM EXPERIENCE FOR DIFFERENTLY ABLED TOURIST IN INTRAMUROS**

James Andrew Zuñiga, March Adrian Baledoya, Leslie Cariño, Jennelyn Laurecio,
Dianna Rose Menor, Dr. Dana France Ignacio

Abstract

This research explores the influence of accessibility standards on the tourism experiences of differently abled tourists in Intramuros, Manila. It aims to identify the specific barriers faced by individuals with mobility, hearing, and speech impairments, and to assess how these challenges affect their overall travel experience. The study further seeks to offer practical recommendations to improve accessibility, ensure inclusivity, and enhance the quality of tourism services for people with disabilities. This study employs a descriptive research design, utilizing a structured questionnaire to collect data from 30 individuals with disabilities who have visited tourist attractions in Intramuros. Participants were selected through purposive sampling to ensure the relevance of their experiences. The questionnaire was designed to capture information on the respondents' demographic profiles, their experiences with accessibility, and the specific challenges encountered during their visit. The collected data were analyzed using frequency distribution, ranking, and weighted mean to effectively interpret the results. The findings of the study indicate that most respondents were aged 31 and above, with a higher representation of female participants. Mobility impairments emerged as the most common type of disability, followed by speech and hearing impairments. While general navigation and mobility within Intramuros were rated positively, specific accessibility features such as ramps, elevators, and accessible restrooms received lower evaluations. Accommodations and services were generally viewed favorably, with staff knowledge and training identified as key factors contributing to a positive tourism experience. Although information availability was considered adequate, some respondents reported difficulties in locating comprehensive and reliable details about accessible sites. Technology was highly valued for its potential to improve accessibility and support travel planning. The most significant challenges highlighted by respondents included the lack of reliable information on accessible attractions, minimal support from local government, and inadequate infrastructure to fully meet the needs of differently abled tourists. The findings highlight the pressing need to improve accessibility infrastructure in Intramuros, particularly with regard to essential features such as ramps, elevators, and accessible restrooms. Enhancing the availability and reliability of information, along with the integration of assistive technologies, is vital in addressing both mobility and information barriers. The study also underscores the importance of comprehensive staff training, strategic public-private partnerships, and strong governmental support in fostering a more inclusive and accessible tourism experience for differently abled individuals.

Keywords: accessibility, intramuros, differently abled tourists, inclusive tourism, mobility impairment, infrastructure, assistive technology, staff training, public-private partnerships, government support

**LEVEL OF ACCEPTABILITY OF STRAWBERRY WITH SPARKLING SODA AS
DRINK QUENCHER AMONG HOME ECONOMIC STUDENTS OF
BESTLINK COLLEGE OF THE PHILIPPINES**

Mary Ann Camacho, Justine Nicole Avestro, Erika Festin, Quintin Adan Camañan,
Jazmine Kyle Gregorio, John Michael Guevarra, Mar Domagtoy

Abstract

This study investigates the innovative blend of fresh strawberries and sparkling soda as a refreshing beverage. It evaluates the nutritional benefits and student acceptability of this novel drink. Sensory evaluations and nutritional analyses focus on the appearance, color, taste, and health advantages of the strawberry-soda mixture. Using a descriptive quantitative approach, the study employed a survey questionnaire and cluster sampling to assess the acceptability level among 50 Home Economics students at Bestlink College of the Philippines. This study focused on evaluating the sensory attributes of the strawberry quencher, including its appearance, color, and taste, to determine the factors affecting student acceptability. The questionnaire was divided into three sections: demographic information, satisfaction level, and recommendations. Data analysis involved frequency and percentage distributions, weighted means, Likert scales, and ranking methods. The survey results showed that most respondents were Home Economics students aged 17 to 18, with an equal number of males and females (each comprising 10%). Among the sensory attributes evaluated, appearance was rated as the most acceptable, followed by color, and then taste. Respondents recommended increasing the amount of sugar, soda, and strawberries to improve the product. Overall, the appearance of the strawberry quencher was highly favored. Accordingly, the researchers enhanced the color and adjusted the sweetness and flavor balance of the beverage. The strawberry and sparkling soda combination is well accepted as a refreshing and nutritious beverage among Home Economics students.

Keywords: strawberry quencher, sparkling soda, sensory evaluation, student acceptability, nutritional beverage, home economics students, flavor enhancement, refreshing drink, beverage development

**LEVEL OF EFFECTIVENESS ON THE MARKETING STRATEGIES
OF THE SELECTED RESORT IN MONTALBAN RIZAL**

Aira Rose Mallorca, Jinky Jalayajay, Justine Romares, Alfredo Obsina,
Jerome Tabasa, Roland Rambo Jayoma

Abstract

This study analyzes the marketing strategies employed by two resorts in Montalban, Rizal, examining the effects of seasonality and customer preferences on their performance. The objective is to offer actionable recommendations that can strengthen marketing initiatives and increase the resorts' competitive advantage. This study employed a quantitative descriptive design to evaluate the marketing strategy effectiveness at a resort in Montalban, Rizal. Participants were purposively selected based on specific criteria relevant to the study. Following the approval from both the resort guests and the Hospitality Management Department, researchers personally distributed and collected the questionnaires to maximize response rates and ensure the accuracy of the data collected. The study found that 80% of guests were under 25 years old, with 68% comprising families, highlighting a predominantly young, family-oriented clientele. Costa Abril attracted younger, more affluent visitors, whereas Villa Elena primarily served low-income families. Guests rated seasonal offers (4.40), pricing (4.43), and activities (4.41) highly, with 92% valuing timely updates and 88% enjoying themed events. Areas needing improvement included better alignment of activities with guest preferences (2.76) and the hiring of multilingual staff (2.72). Although promotional efforts received positive feedback (3.76), the use of diverse marketing channels scored lower (2.76). Overall, both resorts were well-rated but would benefit from enhancing seasonal services, promotional strategies, and tailoring offerings to better meet guest needs. Costa Abril primarily appeals to younger, affluent guests, whereas Villa Elena serves a broader demographic, including lower-income families. While both resorts receive positive remarks for their marketing, there is room for improvement in their offerings. Costa Abril should develop adventure packages for younger visitors and luxury options for older clientele. Villa Elena could benefit from wellness events and budget-friendly packages targeting guests aged 30 and above, especially those from lower-income backgrounds. Both resorts should also enhance family amenities, solo traveler services, and the range of seasonal events available.

Keywords: marketing strategies, resort industry, customer preferences, seasonality, costa abril, villa elena, montalban rizal, guest satisfaction, demographic segmentation, promotional effectiveness

**LEVEL OF EFFECTIVENESS OF THE OPERATIONAL RISK MANAGEMENT AND
IMPROVEMENT PLAN IN SELECTED KTV BARS AT QUEZON CITY**

Lea Guinoo, Anlirma Agarao, Romlyn Columbers, Joshua Dela Cruz,
Jessica May Orogo, Roland Rambo

Abstract

This study explores the effectiveness of Operational Risk Management (ORM) strategies in selected KTV bars in Quezon City. These establishments face unique challenges related to customer safety, staff management, financial security, and customer retention. Given their vibrant and dynamic atmosphere, KTV bars must proactively manage risks to ensure efficient operations and long-term viability. The study evaluates the role of key ORM measures including CCTV surveillance, staff training, safety policy enforcement, and access control in enhancing safety, operational efficiency, and customer satisfaction. This study employed a quantitative descriptive research design involving 50 respondents: 20 guests and 30 employees from two KTV bar establishments. Data was collected using a validated structured questionnaire assessing demographics and perceptions of the effectiveness of existing Operational Risk Management (ORM) strategies. Random sampling was utilized to reduce bias and ensure diverse participation. Statistical tools were applied to compute mean scores and interpret the effectiveness of ORM practices. The findings reveal that Operational Risk Management (ORM) strategies are perceived as “Very Effective” in critical areas, including customer safety, staff coordination, financial management, and customer loyalty. Staff training and CCTV systems were highlighted as the most impactful measures. However, gaps remain in communicating safety policies and raising customer awareness about data privacy. The respondent pool mainly consisted of young adults, with a majority being female. The study found that Operational Risk Management (ORM) strategies in selected KTV bars were generally effective, particularly in staff training and CCTV use. However, lower effectiveness ratings were noted for camera placement, emergency training, and enforcement of safety policies. Differences in perception across demographic groups highlight the need for more inclusive and targeted approaches. Enhancing communication, refining enforcement protocols, and boosting customer engagement can further improve ORM effectiveness in the hospitality sector.

Keywords: operational risk management, ktv bars, staff training, cctv surveillance, safety policies, emergency preparedness, hospitality industry, customer engagement, risk mitigation, quezon city

**LEVEL OF SATISFACTION OF MACARONS INTO MACARROTS AMONG SENIOR
HIGH SCHOOL HOME ECONOMICS AT BESTLINK COLLEGE OF THE PHILIPPINES**

Jess De Guia, Ricky Roy Zafe, Gian Pamfilo, John Lebie Cuevas,
Mary Rose Rendaje, Mar Domagtoy

Abstract

This research explores the impact of customer satisfaction preferences for macarons, focusing on overall satisfaction, product preference, and perceived service quality. It aims to understand how these factors influence consumer behavior and purchasing decisions related to macarons. A quantitative approach was employed, collecting data through a survey administered to 50 senior high school Home Economics students at Bestlink. Cluster sampling was used to ensure diversity among respondents. The questionnaire consisted of three sections: demographic profile, satisfaction with macarons, and recommendations to improve macaron satisfaction. Data analysis involved calculating frequencies, percentages, and weighted means, with responses evaluated using a Likert scale. The study found that the appearance of the macarons significantly influences consumer preferences. A majority of respondents indicated that the authentic appearance of the macarons builds trust and satisfaction (weighted mean = 2.93), contributes to the perceived texture (weighted mean = 2.93), and affects the perceived flavor (weighted mean = 2.80). Most survey participants were male (27), and over half (54%) had experience in the food industry. These findings suggest that ethical and effective advertising strategies play a crucial role in shaping consumer behavior. The research highlights that transparency and honesty in product presentation enhance consumer satisfaction and loyalty, which strongly influence purchasing decisions. The researcher recommends prioritizing a balanced diet rich in vegetables, such as our product, the Macarrots, to support energy and overall well-being while consistently providing valuable nutritional information. To foster healthy eating habits in children, parents should lead by example, offer a variety of nutritious foods, involve children in meal preparation, and create a positive, relaxed mealtime environment.

Keywords: macarrots, customer satisfaction, product preference, perceived service quality, balanced diet, healthy eating habits, parental influence, nutrition, consumer behavior, food appearance

**LOCAL VS. GLOBAL OPPORTUNITIES: A STUDY ON THE EMPLOYABILITY
OF BSHM GRADUATES IN THE HOSPITALITY INDUSTRY**

Nicole Mendiola, Rhea Mae Lopez, Norjay Peñaredondo,
Rhona Mae Salomon, Regine Tayawa, Dana Rae Boatis

Abstract

The hospitality industry is one of the world's largest and fastest-growing sectors, characterized by its diverse cultural and regional practices. For Bachelor of Science in Hospitality Management (BSHM) graduates, employment opportunities, whether local or overseas, offer varying benefits and challenges. While international careers may appear to be more practical and financially rewarding in the short term, local employment offers broader insights into operational standards and long-term development within the domestic industry. This study investigates the employability of BSHM graduates in both local and global contexts within the hospitality sector. This study adopts a correlational research method to analyze the relationship between local and international employment opportunities and the employability of BSHM graduates. Data was collected through online survey questionnaires targeting alumni working in the food and beverage sector of the hospitality industry. Using snowball sampling, the researchers reached respondents employed both locally and abroad to gather detailed perspectives on the required competencies and employment trends. The survey addressed technical, service-related, and interpersonal skills to determine their relevance to employability outcomes. Findings revealed that the majority of employed BSHM graduates are within the age range of 23 to 27, indicating a high rate of recent graduates entering the hospitality workforce. Among technical skills, service skills emerged as the most in-demand, with 29 reported instances. In terms of performance expectations, the highest average weighted mean of 3.50 was recorded under efficiency and effectiveness, particularly in room service quality. The highest mean of 3.56 under accuracy and congruency pertained to staff voluntarism in taking on additional tasks relevant to their skill set. The study highlights the competencies most valued in the hospitality industry, particularly among BSHM graduates from Bestlink College of the Philippines. Service-related and technical skills, along with problem-solving and interpersonal abilities, were shown to influence employability both locally and globally. Most graduates are currently employed in the local sector, although transferable skills are essential for broader career mobility. Future studies may explore the impact of international experience on long-term career development and professional advancement within the hospitality industry.

Keywords: bshm graduates, employability, hospitality industry, local employment, overseas opportunities, service skills, technical skills, career development, food and beverage sector, transferable skills

**MANAGING SUPPLY SHORTAGES IN RESTAURANTS:
A STUDY ON DEVELOPMENT STRATEGIES AND PERFORMANCE**

Deycelyn Estrella, Danicah Bantayao, Mariella Dancel,
Jayvee Dela Torre, Jeramie Morilla, Jenelyn Comon

Abstract

This study investigates how restaurants manage supply shortages and identifies the development strategies they implement to address such disruptions. The research explores the measures used to meet customer needs, handle complaints, and maintain service quality standards when faced with limited inventory. It also aims to share actionable strategies that can help restaurants respond more effectively to supply chain issues. By analyzing real-world practices and performance outcomes, this study offers insights into how restaurants sustain operations and profitability during supply shortages. The study focuses on identifying strategies used by restaurants in response to supply shortages and assessing their impact on overall performance. A qualitative approach was employed to explore how dining establishments navigate supply constraints. The effectiveness of these development strategies was evaluated through direct feedback from restaurant personnel. Data was gathered from 30 kitchen staff members working in various dining restaurants. These respondents were selected due to their direct involvement in inventory management and menu preparation. Their insights highlighted the most common supply shortages encountered, the strategies used to address them, and the immediate impacts on operations. The findings suggest that kitchen staff play a critical role in adapting and responding to supply limitations by adjusting menus, modifying portions, or finding alternative ingredients. The study provides valuable insight into how restaurants manage supply shortages and the effect of these strategies on business performance. It highlights proactive and adaptive strategies such as supplier diversification, inventory planning, and real-time communication, that help mitigate the negative effects of supply chain disruptions. The results emphasize the importance of preparedness and strategic planning in maintaining operational continuity and customer satisfaction in the food service industry.

Keywords: supply shortages, restaurant management, development strategies, supply chain disruption, hospitality operations, kitchen staff, performance management, customer satisfaction, menu adaptation, inventory management

MANAGING THE EFFECT OF GUEST FEEDBACK ON HOTEL REPUTATION

Ma Pamela Jean Garcia, Kaye Andrey Florentino, Maria Luisa Gomez,
Jessa Laurenciano, Roxan Ronquillo, Roland Rambo Jayoma

Abstract

The guest review system plays a vital role in shaping hotel reputation and in aligning service quality with customer expectations. While positive feedback enhances a hotel's image, negative reviews can severely affect public perception. This study explores how Solaire Parañaque manages guest feedback to uphold and improve its reputation, focusing on strategies for addressing both favorable and critical feedback. The study utilized a descriptive approach, gathering data primarily from young adults aged 20 to 24, with a slight majority of female respondents. Most participants were college graduates engaged in part-time employment, representing a well-educated but demographically limited sample. Data collection focused on evaluating guest feedback management practices at Solaire Parañaque. Key indicators assessed included responsiveness to negative feedback, employee engagement, health and safety practices, and decision-making effectiveness. Feedback was analyzed in relation to employee development, operational efficiency, and overall reputation management. Guest feedback management at Solaire Parañaque was rated "Very Effective" across several performance indicators. Respondents highlighted strong practices in handling negative feedback, valuing employee input, and promoting respectful management. High satisfaction ratings were also observed in areas such as guest satisfaction initiatives, employee well-being, and health and safety. Strategic decision-making, teamwork, and continuous improvement were positively noted, although the connection between individual employee actions and the overall professional image could be further strengthened. Communication and development efforts contributed positively, while teamwork and environmental positivity were seen as moderately impactful. Findings indicate that while Solaire Parañaque demonstrates effective guest feedback management, enhancing internal systems for addressing negative feedback and reinforcing employee engagement can further strengthen its reputation. Maintaining strategic planning, open communication, and a positive workplace culture remains essential. A balanced strategy that includes proactive guest feedback analysis, transparent communication, and adaptive reputation management is recommended. Additionally, developing a long-term approach to meet evolving guest expectations and respond to industry changes will support the hotel's continued competitiveness and service excellence.

Keywords: guest feedback, hotel reputation, hospitality management, customer satisfaction, feedback management, employee engagement, strategic planning, communication, service quality, solaire parañaque

**MODERN BANQUET SERVICE TRENDS AND ITS IMPACT TO
GUEST SATISFACTION IN THE WESTIN MANILA HOTEL**

Dorethy Del Rosario, Jasper Hipol, Rubilyn Cantila, Jimmy Lomibao,
Janna Rabi, Dr. Dana France Ignacio

Abstract

This study aims to explore how The Westin Manila Hotel addresses current challenges in banquet service, with a specific focus on enhancing guest satisfaction. It contributes to a broader understanding of how modern banquet service trends influence guest experiences in a hospitality setting. Furthermore, the research evaluates the effectiveness of The Westin Manila's strategies in managing and improving its banquet services amid evolving industry demands. This research adopts a structured and systematic approach to data collection, analysis, and interpretation to ensure the validity and reliability of findings. By employing both quantitative and qualitative techniques, the study provides a comprehensive understanding of guest perceptions. This methodology enables the exploration of new service trends and innovations within banquet operations, fostering a deeper understanding of their impact on guest satisfaction. The findings revealed that The Westin Manila's banquet services received highly favorable feedback from young adult respondents (aged 24–30), with a slight female majority. Guests expressed strong satisfaction with the modern service design, use of locally sourced food, interactive culinary experiences, customizable menu options, and the integration of technology. Sustainability efforts, such as the use of eco-friendly packaging, were also well-received. However, several operational challenges were identified, including delayed food service, audio-visual malfunctions, inconsistent food temperatures, limited dietary accommodations, poor sound quality, hygiene lapses, and unaddressed last-minute requests. These issues highlight areas for improvement to enhance service efficiency and guest loyalty. The Westin Manila Hotel has made a positive impression through its innovative banquet service approach, particularly its emphasis on sustainability, technology, and culinary interactivity. Nonetheless, recurring operational issues must be addressed to sustain and elevate guest satisfaction. By enhancing responsiveness, offering personalized service, and investing in technological upgrades, the hotel can further strengthen its reputation and maintain its competitive edge in the modern banquet service industry.

Keywords: modern banquet service, guest satisfaction, hospitality trends, the westin manila, culinary experience, sustainability, service customization, technology integration, operational efficiency, hotel management

**MODERNIZED HOSPITALITY: THE ROLE OF INTERACTIVE TECHNOLOGY
TOWARDS ENHANCED GUEST EXPERIENCE IN HOTEL SOGO IN FAIRVIEW**

Mary Jastine Batingal, Melanie Capisnon, Trixie Mae Balansayo, Mylene Lozano,
Hannah Joy Cudal, Roland Rambo Jayoma

Abstract

This study explores the role of interactive technology in enhancing the guest experience at Hotel Sogo in Fairview. Interactive technologies are reshaping the hospitality industry by offering more personalized, convenient, and seamless services that align with modern travelers' expectations. By integrating digital advancements, the hotel can improve service delivery and elevate guest satisfaction. The study emphasizes the importance of designing technology that addresses guests' psychological needs, fosters trust, and enhances perceived ease of use. The study employed descriptive research design and utilized a mixed-method approach to cover various components of the research. It involved purposive sampling of twenty (20) guests from a 4-star hotel under Hotel Sogo Fairview. A structured questionnaire was developed, validated, and used to gather data on guest experiences with interactive technology. The research also detailed the sampling techniques, data collection procedures, and statistical analysis methods applied to evaluate the findings. Findings revealed that most Millennial and Gen Z respondents occasionally visited Hotel Sogo and were familiar with its interactive technology features. These tech-savvy guests valued the ability to personalize their environment and adapt quickly to digital tools. Their expectations significantly influenced their perceptions of the hotel experience. Respondents expressed strong preference for seamless engagement, highlighting the convenience and efficiency of technologies such as mobile apps and automated systems designed to enhance comfort during their stay. The results demonstrate that interactive technologies positively impact on the guest experience at Hotel Sogo Fairview. Respondents, primarily female and aged 23–27, appreciated services like virtual concierge features, in-room tablets, and mobile applications for their convenience and personalization. However, challenges were identified, including usability issues, technical malfunctions, and insufficient staff training. To maximize the benefits of interactive technology, hotels must focus on improving user interface design, ensuring device compatibility, and integrating systems for smoother operations.

Keywords: interactive technology, guest experience, hotel sogo, hospitality innovation, mobile apps, virtual concierge, in-room tablets, tech-savvy guests, service personalization, hotel management

**MODERNIZING SYSTEMS AT MAKATI DIAMOND RESIDENCES HOTEL:
ADVANCING OPERATIONAL EFFICIENCY AND ELEVATING GUEST EXPERIENCES**

Ralph Labita, Lisa Mae Erojo, Alexandra Nuguid, Eduard Umali,
Angelica Mary Ancheta, Roland Rambo Jayoma

Abstract

The hospitality industry is experiencing a significant shift driven by the integration of modern technology into hotel operations. Hotels are increasingly adopting digital solutions to enhance operational efficiency, streamline service delivery, and personalize guest experiences. These innovations not only improve service quality but also reduce labor costs, optimize resource management, and contribute to overall competitiveness. This study focuses on Makati Diamond Residences Hotel and investigates how system modernization can elevate guest satisfaction and operational performance. This research adopts a case study approach to examine the impact of system modernization at Makati Diamond Residences Hotel. The study explores how aligning technology with guest expectations can enhance service delivery, create new revenue opportunities, and maintain a competitive edge. Data was collected through structured surveys targeting hotel guests and staff to assess their experiences with the hotel's reservation system, security measures, and digital services. The analysis provides a practical framework for similar hotels transitioning from outdated systems to advanced, tech-driven operations. Survey results revealed that 60% of respondents were over the age of 31, with an equal distribution of male and female participants. Guests expressed high satisfaction with the reservation process, noting the accuracy of reservation details, the speed and efficiency of the online system, and the improved security features. These findings suggest that the implementation of modern systems at Makati Diamond Residences Hotel has had a positive impact on guest experience and operational workflow. The study recommends further enhancements to better accommodate a diverse guest demographic, including adult generations, male travelers, female guests, and the LGBTQ+ community. Strategies include expanding promotional offers, improving communication and confirmation processes, increasing staffing levels, and staying current with technological advancements. Addressing persistent concerns such as data migration issues, maintenance delays, billing errors, language barriers, Wi-Fi reliability, and safety protocols is essential to ensure consistently high-quality guest experience and to support sustainable operational success.

Keywords: hospitality management, system modernization, operational efficiency, guest experience, makati diamond residences, digital transformation, reservation systems, hotel technology, service innovation, hospitality trends

**MOTIVATIONAL TOOLS AND ITS IMPACT ON EMPLOYEE PRODUCTIVITY AMONG
SELECTED RESTAURANTS IN QUEZON CITY**

Dan Carlo Dela Cruz, Jayvee Acabal, Reymart Llanos, John Philip Taroy,
Elairol Ortil, Roland Rambo Jayoma

Abstract

The restaurant industry in Quezon City faces persistent challenges, including high employee turnover and demanding working conditions. Motivation and productivity remain critical factors for organizational success, yet traditional management approaches often fail to address essential employee needs such as career development and work-life balance. This study investigates the motivational tools that influence Filipino restaurant workers, aiming to assist restaurant managers in aligning motivation strategies with staff expectations. The goal is to enhance employee engagement, reduce turnover, and improve overall productivity in a high-pressure and diverse work environment. This research utilizes purposive sampling to select participants with direct relevance and experience in the restaurant sector. Data collection was conducted through a researcher-made questionnaire, informed by Parasuraman's customer satisfaction model and divided into three main sections. To ensure validity, the questionnaire underwent review by an adviser, subject matter expert, grammarian, and statistician. Pre-interviews and pre-testing were also conducted to refine the tool. Additionally, the study is supported by a comprehensive literature review and a locally contextualized survey to strengthen its theoretical framework. Findings indicate that restaurant workers are predominantly young and often view their positions as temporary employment. Male employees typically assume physically demanding kitchen roles, while females are more often assigned to customer-facing positions. Although overall performance was deemed acceptable, motivation and opportunities for skill development were lacking. Respondents cited supportive management, workplace safety, effective communication, overtime compensation, and meal allowances as key motivators. Recognition, teamwork, and professional growth were also valued. However, challenges such as long work hours, interpersonal conflicts, physical fatigue, and lack of appreciation were identified as barriers to sustained motivation. The study highlights the importance of tailored motivational strategies to address the distinct needs of restaurant employees. A supportive work environment, financial incentives, consistent scheduling, and clear recognition programs contribute positively to employee morale and retention. Conversely, long working hours, workplace conflicts, and insufficient acknowledgment undermine motivation. To address these concerns, the study recommends implementing structured training, wellness initiatives, equitable reward systems, and career advancement opportunities to promote productivity and job satisfaction among restaurant staff.

Keywords: employee motivation, productivity, hospitality industry, restaurant staff, quezon city, recognition programs, work-life balance, supportive environment, retention strategies, incentive systems

**NATIONAL CERTIFICATE NCII HOSPITALITY ASSESSMENT:
CATALYST FOR PROFESSIONAL ADVANCEMENT**

Ivan Zam Sabillano, Dessirie Blancada, Hannah Joy Sentorias,
Jhellie Lacanilao, Twinkle Magno, Ivan Zam Sabillano

Abstract

The National Certificate II (NCII) Hospitality Assessment is a competency-based certification regulated by the Technical Education and Skills Development Authority (TESDA). It offers assistive training for individuals seeking foundational skills and knowledge required to deliver exceptional services in the hospitality industry. Successfully completing the assessment grants a certificate that serves as formal proof of competency in a specific hospitality trade. The integration of NCII certification within the industry promotes evidence-based practices, skill enhancement, and higher service standards. It also contributes to improved guest satisfaction and career advancement for hospitality workers. This study utilized a descriptive-correlational research design to explore the impact of the NCII Hospitality Assessment on professional advancement. Respondents included hospitality workers who had undergone the assessment within the past one to three years. Data was gathered through an online survey administered via Google Forms and analyzed using descriptive statistics to evaluate trends and correlations in certification outcomes and career progression. The majority of respondents were aged 21–25, with an even gender distribution. Most held Food and Beverage Services NCII certifications and worked as food and beverage attendants. Respondents perceived the certification as highly beneficial, reporting increased opportunities for promotion, better salary potential, and enhanced job stability. The certification was also credited with improving employability, validating skills, and providing a competitive advantage aligned with industry standards. However, common challenges included the time and cost required to complete the assessment, emotional stress during evaluation, and limited recognition of the certificate outside the hospitality sector. NCII Hospitality Certification plays a significant role in developing a skilled, service-oriented workforce. It fosters professional growth by enhancing career mobility, financial rewards, and job security. Certified individuals gain confidence and become more competitive candidates for specialized roles due to their alignment with industry benchmarks. Despite these benefits, some limitations remain, particularly regarding time investment, financial burden, and the certificate's limited cross-industry application. Addressing these concerns may further increase the value and accessibility of the certification across hospitality sub-sectors and beyond.

Keywords: ncii certification, tesda, hospitality industry, food and beverage services, career advancement, skill validation, professional growth, employability, hospitality standards, workforce development

**NIHONGO LANGUAGE SKILLS AS A COMPETITIVE ADVANTAGE FOR ALUMNI
STUDENTS ON BESTLINK COLLEGE OF THE PHILIPPINES**

Jenny Cañon, Arnie Loyd De Guzman, Gerlyn Muñoz, Micaela Nicole Purawan,
Andrea Sabejon, Jenelyn Comon

Abstract

The hospitality industry increasingly emphasizes the need for foreign language proficiency, particularly Nihongo, in its curriculum to enhance communication skills. By learning Nihongo, hospitality students are better equipped to interact with Japanese-speaking guests, facilitating smoother and more enjoyable customer experiences. Integrating Nihongo into hospitality programs prepares students to meet the demands of a globalized service industry and increases their employability in competitive sectors such as hotels, cruise lines, and airlines. This study explored the role of Nihongo language skills as a competitive advantage among alumni of the Hospitality Management program at Bestlink College of the Philippines. The respondents included alumni with current or past experience in the hospitality industry. Data was gathered using an online survey administered via Google Forms. A snowball sampling technique was applied, starting with 30 participants who were asked to share the survey with other eligible alumni in their network. The results indicated that a significant majority of respondents encountered challenges during their internships or employment in the hospitality sector. Participants frequently cited issues related to knowledge gaps, time constraints, verbal and written communication, career opportunities, cultural awareness, and job-related stress. Notably, alumni who lacked Nihongo language skills were more likely to experience communication difficulties, particularly when interacting with Japanese-speaking clients or supervisors. These challenges highlighted the value of language proficiency as a means of improving workplace integration and career mobility. The study underscores the importance of Nihongo language skills as a competitive edge for hospitality graduates. Respondents who were proficient in Nihongo reported fewer communication barriers and greater confidence in their professional roles. Challenges faced by alumni with limited language skills suggest a clear link between language training and workplace performance. The findings further suggest that continuous practice, such as watching Japanese-language films and engaging in regular pronunciation exercises, can help alumni improve their language competence and reduce job-related stress.

Keywords: nihongo proficiency, hospitality management, communication skills, competitive advantage, alumni outcomes, cultural awareness, language barriers, career opportunities, workplace integration, bestlink college of the philippines

**OPTIMIZING BANQUET SERVICE FLOW: A STUDY OF
STAFF TRAINING AT WESTIN MANILA**

Carl James Catulay, Kristine Nacional, Jackelyn Ocampo, Lioneda Diga,
Patrick Lloyd Reyes, Dr. Dana France Ignacio

Abstract

This study explores the effectiveness of staff training in optimizing banquet service flow at Westin Manila. It evaluates existing training practices, identifies operational challenges, and proposes enhancements to improve service efficiency. In the competitive hospitality industry, delivering exceptional service is essential for guest satisfaction and business success. Banquet services, which involve formal meals for large groups, demand precise coordination, teamwork, and service quality. Although Westin Manila aims to deliver high standards, operational issues continue to affect service flow. This research investigates these issues and examines how the training program influences staff performance. A descriptive quantitative survey design was used, involving 25 banquet staff members at Westin Manila. Respondents completed a structured questionnaire assessing training effectiveness across key areas: technical skills, service orientation, guest relations, and product knowledge. Demographic data such as age, sex, and civil status were also collected. Data was analyzed using frequency distribution, percentages, and weighted mean to evaluate training outcomes and operational concerns. The training program was found to be generally effective in developing essential competencies. High composite mean scores were recorded across all training areas, ranging from 3.43 to 3.67. However, several operational challenges persisted. Staff reported issues such as equipment shortages, difficulty in multitasking, and limited flexibility in handling last-minute changes, which hindered the smooth flow of banquet services despite adequate training. The findings suggest that while the training program effectively strengthens staff capabilities, additional focus is required on resource management and adaptability to operational demands. Addressing challenges related to equipment availability, multitasking efficiency, and reactive protocols is essential to optimize overall banquet service performance. Enhancing these aspects could further elevate service quality and guest satisfaction at Westin Manila.

Keywords: banquet service, staff training, hospitality management, service flow, operational challenges, westin manila, guest satisfaction, resource management, technical skills, service orientation

**OPTIMIZING TECHNOLOGY: SOLUTION FOR ENHANCING OPERATIONAL
MANAGEMENT IN ASTORIA PLAZA HOTEL**

Nelson Borres Jr, Prences Ermac, Kyle Noshka Esquivel, Wolter Saldivar,
Kimberly Siladores, Roland Rambo Jayoma

Abstract

Technology plays an increasingly vital role in the hospitality industry, improving operational efficiency and guest satisfaction through tools such as property management systems, mobile check-ins, and automated services. The integration of artificial intelligence and data analytics allows hotels to anticipate guest needs and manage resources effectively, responding to the growing demand for personalized services. However, many establishments continue to face difficulties in implementing these technologies due to challenges in system integration, data security, and staff training, which hinder efficiency and service quality. This study aims to provide practical insights and recommendations for optimizing technology use in hotel operations, using Astoria Plaza Hotel as a case study to illustrate both achievements and barriers. The objective is to close the gap between technological adoption and its intended benefits, ultimately enhancing productivity, operational efficiency, and guest experience. The study adopts a descriptive quantitative approach to examine the optimization of technology in operational management at Astoria Plaza Hotel in Metro Manila. A total of 25 respondents were selected through purposive sampling. Survey questionnaires were used to gather data on technological implementation and its impact. The demographic distribution consisted of 60% male and 40% female respondents, with the goal of identifying operational trends and areas for improvement. The findings showed that 44% of respondents belonged to an older age group, with a slight female majority (52%). Most participants were Reservation Assistants (64%) and held college degrees. Feedback on the use of Property Management Systems and digital key technology was generally positive. However, notable concerns were raised regarding system integration, data security, communication gaps between departments, and the need for more comprehensive staff training. The results revealed that the hotel's workforce consisted primarily of older, college-educated employees, with concentration in front office roles such as Reservation Assistants. While the implementation of Property Management Systems and digital key access produced favorable outcomes, several issues persisted. These included difficulties in integrating systems, the need for stronger cybersecurity measures, and increased investment to foster guest trust. Additionally, vulnerability management required more responsive patching and risk mitigation strategies. Positive impacts were observed particularly in front office and housekeeping operations. However, enhanced interdepartmental communication and targeted staff training remain essential. Future research should explore ways to address workforce demographics, strengthen system integration, and resolve the challenges identified in this study.

Keywords: hospitality technology, operational management, property management system, artificial intelligence, data security, system integration, staff training, guest experience, astoria plaza hotel, hospitality industry

**OVERCOMING BARRIERS TO SMART TECHNOLOGY FOR SENIOR CITIZENS:
BASIS FOR A PROPOSE ACCESSIBILITY PLAN**

Jerikke Altamera, Dricson Abdiel Dimpal, Wilfredo Guerrero,
Lloyd Patrick Pascua, John Cristan Sison, Roland Rambo Jayoma

Abstract

This study investigates the impact of SMART hotel technologies on senior citizens, with a particular focus on the barriers that hinder their effective use of these modern facilities. As hospitality establishments increasingly adopt advanced technologies to improve guest experiences, it becomes essential to ensure that these innovations are accessible and user-friendly for older adults. A quantitative research approach was employed at Hop Inn Hotel, utilizing a structured questionnaire to gather data from senior guests. The instrument assessed their demographic profiles, perceptions of usability, and overall satisfaction with smart technology features. The study aimed to identify key usability challenges and evaluate the general acceptance of technology among senior users. The majority of respondents were aged 60–69 and were predominantly female. Although many seniors appreciated the customizable features of smart hotel technologies, they experienced significant challenges related to complex instructions and non-intuitive interfaces. Despite reporting high levels of satisfaction and loyalty associated with smart features, participants cited usability concerns, such as unclear operational guidance and insufficient technical support. These issues highlight the importance of improving accessibility and ease of use for elderly hotel guests. The study recommends enhancing personalization and simplifying technological features to foster a more inclusive and senior-friendly hotel environment. Addressing these barriers can enable hotels to fully leverage the benefits of smart technologies while ensuring that all guests, including senior citizens, enjoy a seamless and comfortable experience. The findings serve as the foundation for a proposed accessibility plan aimed at improving the integration of smart technologies for aging populations in the hospitality industry.

Keywords: smart technology, senior citizens, accessibility plan, usability barriers, hospitality innovation, guest experience, hotel technology, user-friendly design

**REVOLUTIONIZING HOSPITALITY: HOW NON-TRADITIONAL HOTEL
PRACTICES CREATE EXCEPTIONAL GUEST EXPERIENCES**

Cheska Beatriz Pasion, Dionnie Gabuyo, Kathirene Lacanilao, Vanila Mahait,
Julie Rose Villanueva, Dr. Dana France Ignacio

Abstract

The hospitality industry is increasingly adopting non-traditional practices to improve guest satisfaction, build loyalty, and gain a competitive edge. While these innovations offer significant benefits, hotels face challenges if modernization efforts are not accompanied by proper planning and employee training. Insufficient awareness and training can impair staff performance, potentially resulting in guest dissatisfaction. This study focuses on the effects of non-traditional practices within the Food and Beverage department on guest satisfaction. The research was conducted at Minami Saki restaurant, located in Astoria Plaza, Pasig City, to explore how innovation influences guests' experiences. This study utilized a descriptive research design, involving 25 employees with experience in non-traditional organizational practices. Data collection was conducted through face-to-face surveys, and the gathered information was analyzed using statistical methods, including percentage analysis, weighted means, and Likert scales. The research is grounded in the Pine and Gilmore Experience Economy Model, which provides the theoretical framework for understanding the impact of these practices. The findings reveal that innovative Food and Beverage (F&B) strategies significantly boost guest satisfaction and enhance organizational performance. Respondents emphasized the critical role of non-traditional practices in strengthening guest loyalty. Essential elements include maintaining consistent and reliable service quality, implementing sustainable initiatives, offering personalized interactions, integrating digital technologies, and utilizing effective feedback systems. Nevertheless, challenges such as slow service delivery, technical issues, difficulty adapting to emerging trends, and managing guest feedback were identified. Despite these challenges, these innovative practices remain key contributors to increasing guest loyalty. The study proposes practical recommendations for hospitality management to effectively implement non-traditional practices that foster memorable guest experiences. It advocates actionable measures to overcome operational challenges associated with innovation. Suggested initiatives include creating an employee recognition program, offering internships to support career development for younger staff, organizing regular seminars on fundamental technology skills, and utilizing brief online surveys to collect guest feedback. These strategies aim to enhance customer loyalty and ensure sustained organizational success.

Keywords: non-traditional practices, food and beverage, guest satisfaction, guest loyalty, hospitality industry, innovation, service quality, digital technology, operational challenges, employee development, customer feedback.

**ROLE OF LEADERSHIP STYLE IN EMPLOYEE ATTRITION:
A BASIS FOR A PROPOSED DEVELOPMENT PLAN**

Rachel Francisco, Arianne Condes, Jan Marie De Guzman,
Annah Joy Dinopol, Herline Jimenez, Jenelyn Comon

Abstract

The style of leadership greatly influences how teams operate, how motivated employees feel, and how productive the workplace becomes. Within the fast-moving hospitality sector, employee turnover poses a significant concern, often leading to increased expenses, operational disruptions, and a potential drop in service standards. Addressing this issue requires strong communication practices and clear, effective delegation of tasks to ensure organizational stability and service consistency. This study explored the connection between leadership styles and employee turnover at Solace Hotel by surveying thirty team leaders across different departments. The survey assessed employees' perceptions of their leaders' behaviors using a four-point Likert scale to gauge levels of agreement or disagreement. Additionally, a checklist was incorporated to identify specific factors that may influence or reflect the prevailing leadership styles within the organization. To assess the impact of leadership styles on employee turnover, the study surveyed 30 staff members at Solace Hotel. The majority of respondents were aged 21 to 30, with 53% identifying as male. Most participants held positions as Team Leaders or Housekeepers. Leadership was generally viewed favorably in areas such as conflict management, employee training, and support for work-life balance. However, respondents pointed out shortcomings in recognizing accomplishments and offering clear pathways for career advancement. Key challenges included insufficient communication, workload pressure, and a lack of effective response to employee concerns. The study explores the leadership styles at Solace Hotel and their effect on employee retention. Results indicate a predominantly young workforce, with most employees aged 21 to 30, highlighting potential retention challenges over the long term. While there is a near-equal gender distribution, males slightly outnumber females. Leadership was generally viewed in a positive light, especially in areas such as conflict resolution and boosting employee morale. However, the study points to a lack of consistent recognition for employee achievements and limited opportunities for career growth, factors that may negatively impact staff retention.

Keywords: leadership styles, employee retention, solace hotel, young workforce, employee recognition, career development, conflict resolution, employee morale, hospitality industry, staff turnover

**ROLE OF PERSONAL PROTECTIVE EQUIPMENT (PPE) IN
ENHANCING HOUSEKEEPING SAFETY PROTOCOLS**

Daryl Chiapoco, Bryan Anthony Delfin, Ronald Del Rosario Jr,
Johnrussel Francisco, Henri James Tadit, Dana Rae Boatis

Abstract

Housekeeping personnel are frequently exposed to workplace hazards, including toxic cleaning chemicals, airborne pollutants, and sanitation-related risks. Personal Protective Equipment (PPE) is vital in mitigating these hazards and promoting occupational safety. However, despite its recognized importance, compliance with PPE protocols remains inconsistent across many housekeeping settings. This study aims to investigate the availability, usage, and perceived effectiveness of PPE in housekeeping safety procedures, while also exploring workers' perceptions and identifying the factors that influence adherence to safety standards. This study utilized quantitative research design and involved a survey of 25 housekeeping staff. A structured questionnaire was used to gather data on their perceptions regarding the use of Personal Protective Equipment (PPE). The responses were analyzed through weighted mean and ranking techniques to determine the level of PPE compliance and to identify the factors affecting adherence to safety protocols. The findings reveal that although housekeeping staff understand the significance of PPE in reducing health hazards and ensuring hygiene, their level of compliance is relatively low. Contributing factors include inconsistent enforcement of safety policies, inadequate training, and discomfort associated with PPE use. The proper implementation of PPE protocols received the lowest rating, indicating deficiencies in both policy execution and employee engagement. Overall, the responses reflect a lack of consistent adherence to PPE guidelines among housekeeping staff. The study recommends enhancing the enforcement of PPE protocols through stricter policy implementation, regular and comprehensive training sessions, and the introduction of incentive-based initiatives to encourage compliance. Strengthening these measures is essential to improving overall workplace safety and minimizing occupational health risks among housekeeping personnel.

Keywords: personal protective equipment (ppe), housekeeping staff, workplace safety, occupational hazards, compliance, training, enforcement, health risks, sanitation, incentive strategies.

SHAPING VISITORS PERCEPTION: THE IMPACT OF DESTINATION BRANDING

Ellaliel Lazaro, Christon Ivan Roger Concrenio, Penjie Paul Catubay, Joshua Lumaban,
Arjay Melu, Erlyn Mae Montiano, Dana Rae Baotis

Abstract

This study explores the increasing importance of destination branding in influencing tourists' perceptions and decision-making processes. It aims to examine how branding efforts impact visitors' expectations, experiences, and overall perception of a destination. Particular attention is given to how destination branding shapes both the destination's image and the tourist's experience. A mixed-methods approach is employed to analyze the role of destination branding in shaping visitor perceptions. This study adopts a primarily quantitative approach, utilizing surveys and observational methods to collect data on visitor perceptions related to destination branding. This descriptive method is selected to effectively measure and document visitor attitudes and experiences, providing objective insights that address the research questions and objectives. The findings revealed that young adults aged 16 to 25 are the most frequent visitors to tourist destinations and are highly influenced by destination branding and storytelling. Local narratives and visitor reviews played a significant role in shaping travel decisions. A strong destination brand and effective storytelling were found to foster visitor loyalty and encourage repeat visits. Cloud 9 Antipolo received generally positive feedback; however, its brand awareness remained relatively limited among respondents. The study underscored that young adult travelers are highly responsive to destination branding and storytelling, particularly through digital platforms. Local narratives and shared experiences enhance a destination's attractiveness, with positive interactions increasing the likelihood of loyalty and advocacy. While Cloud 9 Antipolo gained favorable reviews, it must improve its brand visibility. It is recommended that destinations promote authentic local stories, encourage social media engagement from visitors, and enhance brand visibility through targeted digital marketing strategies. Focusing on young adults and continuously evaluating visitor satisfaction can strengthen destination branding, foster loyalty, and drive advocacy.

Keywords: destination branding, visitor perception, tourist behavior, storytelling, brand awareness, digital marketing, hospitality management, cloud 9 antipolo, young adult travelers

**SOCIAL MEDIA MARKETING STRATEGIES IN NOVOTEL:
BASIS FOR A MARKETING DEVELOPMENT PLAN**

Juan Miguel Bautista, Jeffry Fuentes, Jeffry Fuentes, Daniela Mae Guab,
Joshua Estigoy, Queen Ruffa Mae Vista

Abstract

This quantitative study evaluates the effectiveness of Novotel Hotel's social media marketing strategies in relation to customer satisfaction, service quality, and product representation. With the growing influence of digital marketing in the hospitality industry, this study investigates how Novotel's online presence impacts guest perception and engagement. Data was collected from guest respondents to assess how well the hotel's digital content reflects its branding and service offerings. Quantitative research design was employed through the administration of survey questionnaires to 50 randomly selected Novotel guests. The survey captured demographic profiles, social media usage behaviors, and perceptions regarding the effectiveness of the hotel's social media marketing content. Findings showed a generally favorable perception of Novotel's social media marketing. Respondents agreed that the hotel's content accurately reflected its star rating, promoted its location and nearby attractions, and effectively appealed to its target market. Positive ratings were recorded for the relevance of promotional offers (mean = 3.54) and the usefulness of content about local attractions (mean = 3.46). However, the study also identified notable concerns, including the creation of unrealistic expectations (reported by 12 respondents), instances of misleading information, slow response times to inquiries, and limited accessibility of online platforms. The results indicate that while Novotel exhibits strengths in its digital branding and promotional content, there is a need for more strategic management of its social media platforms. To improve guest satisfaction and operational performance, the study recommends refining digital content to align more closely with actual guest experiences, ensuring the accuracy of online information, enhancing responsiveness to guest inquiries, and improving the accessibility of social media channels. These findings serve as the foundation for the development of a comprehensive marketing development plan, enabling Novotel to strengthen its digital presence and support sustained business growth.

Keywords: social media marketing, hospitality management, customer satisfaction, digital branding, online promotion, marketing strategy, novotel, marketing development plan

**SOCIAL MEDIA PLATFORM AND ITS IMPACT ON BUSINESS REPUTATION
OF SELECTED SALONS AND SPA IN QUEZON CITY**

Andrea Santos, Maria She Barrera, Mark Rally Magtalas,
Jamaica Rosco, John Lloyd Salibio, Dana Roa Boatis

Abstract

This study explores the factors and challenges influencing public perception of salons and spas, particularly in Quezon City. The primary goal is to provide valuable insights to business owners and managers in the beauty and wellness industry to help improve service quality, enhance customer satisfaction, and foster stronger client relationships. The study focuses on establishments with varying service speed and customer volume to identify issues affecting business reputation. The research aims to offer practical solutions to strengthen brand image and overcome obstacles that may negatively impact online reputation. A descriptive-correlational research design was employed, using survey questionnaires distributed to 50 staff and customers. The data were statistically analyzed to explore the relationship between common social media challenges and online brand perception among selected salons and spas in Quezon City. The study, completed in March 2025, surveyed 50 customers of David's Salon and Nuat Thai. Results revealed that while both businesses acknowledge the role of social media in brand development, they face ongoing challenges such as negative feedback, fake reviews, and misleading advertisements. Respondents, primarily young adults aged 22–32 and predominantly male, strongly agreed on the importance of maintaining a proactive digital presence. Notable findings include positive ratings for content relevance and marketing value, particularly through consistent posting and informative visuals. The study recommends key strategies such as gathering authentic customer feedback, developing a consistent brand voice, and investing in staff training to improve customer interactions. The findings highlight the need for improved social media marketing strategies and enhanced customer service to maintain and strengthen business reputation. Salons and spas must adopt a comprehensive digital strategy that includes consistent content management, prompt feedback responses, and a customer-centric approach to online engagement. These efforts can significantly enhance brand credibility, build consumer trust, and improve overall performance in a competitive digital marketplace.

Keywords: social media marketing, business reputation, online presence, customer engagement, salons and spas, hospitality management, brand strategy, digital feedback management

**SUPPLY CONSISTENCY ON KITCHEN MANAGEMENT AT 8 KINGS BUFFET
RESTAURANT: STRATEGIES FOR MITIGATING DISRUPTIONS**

Jandel Jhumel Donato, Karen Mae Abuyabor, Glaiza Camille Delos Reyes, Maria Angelica Durna,
Mary Rose Nikka Gerado, Roland Rambo Jayoma

Abstract

This study investigates supply consistency in kitchen management at 8 Kings Buffet Restaurant. Buffet establishments often face operational challenges in meeting varied customer demands due to factors such as specialty diets, sustainability practices, and local sourcing requirements. These challenges are compounded by issues like supplier reliability, ingredient seasonality, and fluctuating demand, all of which can disrupt food offerings and effect on customer satisfaction. The study aims to examine the factors affecting supply consistency, evaluate existing operational strategies, and propose data-driven solutions to mitigate disruptions. The findings are intended to support improved supply chain practices, enhance kitchen efficiency, and contribute to hospitality management literature. A quantitative descriptive research design was employed. Data were collected from 50 respondents (25 male and 25 female) through purposive sampling, focusing on individuals with direct involvement or knowledge of kitchen and supply chain operations at 8 Kings Buffet Restaurant. A structured survey instrument was used to gather data regarding supply chain practices and disruption management. The findings revealed that most employees were aged 18–27 and had 1 to 4 years of service, indicating a young, entry-level workforce. The restaurant demonstrated strong performance in supply chain risk management (mean = 3.31) and performance measurement (mean = 3.30). Effective inventory tracking, strong supplier partnerships, and demand forecasting were identified as core strategies for managing supply disruptions. The use of Point of Sales (PoS) systems was acknowledged as crucial for operational efficiency; however, respondents expressed limited involvement in technology-related decision-making processes. The study highlights that while 8 Kings Buffet Restaurant maintains strong supply chain strategies, there is room for improvement in areas such as risk communication and employee engagement in system-based decision-making. The youthful workforce presents both opportunities and challenges in terms of retention and capacity building. Strengthening staff involvement, enhancing technological integration, and reinforcing supplier collaboration are recommended to further improve supply consistency and overall operational resilience in buffet kitchen management.

Keywords: supply chain management, kitchen management, buffet restaurant, inventory tracking, supplier relationships, hospitality operations, pos systems, risk management

**SUSTAINABLE RESTAURANT OPERATIONS: AN EXPLORATORY STUDY OF
ECO-FRIENDLY PRACTICES IN QUEZON CITY ESTABLISHMENTS**

Macy Rancel Lacdao, Christine Joy Cainoy, Jayb Valenzuela,
Joshua Barrun, Eugene Relox, Roland Rambo Jayoma

Abstract

The restaurant industry significantly contributes to environmental degradation, particularly in the Philippines, where its impact includes contamination and contributions to global warming amid increasingly severe weather conditions. To ensure long-term viability, restaurants must adopt sustainable practices focused on energy efficiency, water conservation, ethical sourcing, waste management, sanitation, and customer engagement. Programs such as GreenLeaders assist establishments in implementing eco-friendly strategies, resulting in reduced environmental impact, cost savings, and enhanced brand reputation. However, challenges remain in balancing sustainability with cost management, maintaining customer satisfaction, and reinforcing a strong eco-conscious brand identity. This study utilized a descriptive quantitative research design to evaluate sustainable operational practices among restaurants in Quezon City. Data were collected through simple random sampling using structured questionnaires distributed to both employees and customers. The questionnaire was divided into three key sections: sustainable practices, perceived challenges, and participant perceptions. This approach facilitated efficient data gathering and pattern identification to assess the current state and effectiveness of eco-friendly initiatives in the restaurant sector. Findings revealed that young adults, particularly females, are the most engaged demographic in supporting sustainability efforts, with servers and waitresses playing a key role in implementation. Most respondents held Bachelor's degrees and dined out occasionally. Highly rated sustainable practices included energy efficiency, water conservation, and waste management, with specific initiatives such as kamayan-only dining and LED lighting. However, challenges related to cost efficiency and customer satisfaction were prominent. Consumers expressed a preference for restaurants that are transparent about their sustainability initiatives. The study highlights that young, educated consumers and frontline restaurant staff are central to promoting sustainability in restaurant operations. While eco-friendly practices such as waste and energy management are effectively implemented, addressing operational costs and maintaining customer satisfaction remain critical concerns. The study recommends enhanced communication of sustainability practices, targeted marketing campaigns, continuous improvement of sustainable operations, and customer education to strengthen engagement and brand loyalty. A more authentic and transparent messaging strategy is essential for fostering long-term consumer trust and environmental responsibility.

Keywords: sustainable restaurant operations, eco-friendly practices, hospitality management, waste management, energy efficiency, customer engagement, quezon city, greenleaders

**TECHNOLOGICAL MALFUNCTION: ITS EFFECT ON HOTEL ROOM
ACCOMMODATION TOWARDS GUEST IMPROVED EXPERIENCE**

Romeo Delfin, April Joy Bonto, Erika Mae Dorado, Efren Jay Lucero,
Jake Vincent Valera, Roland Rambo Jayoma,

Abstract

In today's technology-driven hospitality industry, digital tools play a vital role in elevating guest experiences and optimizing hotel operations. However, technological malfunctions can disrupt service delivery, affecting room accommodation and overall guest satisfaction. This study explores the implications of such malfunctions on hotel operations and guest perceptions, particularly at Winford Casino and Resort Hotel. It also aims to provide strategic recommendations to mitigate the negative impact of technological failures and enhance service continuity and guest satisfaction. The study employed descriptive research design and utilized purposive sampling to select 50 hotel guests at Winford Casino and Resort Hotel. Data collection was conducted through a validated survey questionnaire focusing on the guests' experiences with hotel technology. The instrument measured satisfaction levels, encountered technical issues, responsiveness of hotel staff, and perceived safety and service quality. Statistical tools were used to evaluate responses and identify key trends related to the impact of technological issues on the guest experience. Findings revealed that overall guest satisfaction was high, especially regarding staff responsiveness, safety protocols, and maintenance practices. However, Wi-Fi-related malfunctions emerged as the most common technical concern. Guests reported that staff addressed issues promptly and provided clear guidance, which helped maintain positive impressions. While most guests felt that safety and contingency measures were in place, areas for improvement included better communication during outages and the provision of alternative solutions when systems fail. The study concluded that although minor technical problems occurred, primarily involving Wi-Fi, hotel staff and proactive maintenance protocols effectively minimized negative impacts. The results highlight a direct relationship between efficient technology management and enhanced guest satisfaction. To further improve service delivery, the hotel should reduce downtime, improve guest communication during malfunctions, and offer viable alternatives to ensure a seamless experience. Strategic planning for technological resilience is essential for sustaining guest trust and loyalty in modern hotel operations.

Keywords: hospitality technology, technological malfunction, guest experience, hotel accommodation, service continuity, wi-fi issues, hotel operations, winford casino and resort

**THE CAUSE OF EMPLOYEE FATIGUE AND ITS IMPACT TO JOB PRODUCTIVITY
AMONG RESTAURANTS IN QUEZON CITY**

Maricar Grampon, Honey Bee Leynes, Mildred Marigmen, James Cedric Orencia,
Jonnilen Patani, Daneca Rose Regaspi, Dana Rae Boatis

Abstract

This study investigates the causes of employee fatigue and its impact on job productivity in the restaurant industry, with a specific focus on Mesa Restaurant, a well-known Filipino dining establishment. It aims to identify key contributors to exhaustion, such as extended working hours, physical labor, and mental stress. High levels of fatigue have been found to negatively influence employee performance, decision-making, and overall productivity, which may affect customer satisfaction and profitability. By examining these issues, the study highlights the need to promote workplace health and sustainability, emphasizing the importance of staff well-being in maintaining operational efficiency, service quality, and customer experience. This research employs descriptive design, utilizing a survey to gather data from 50 restaurant employees. The study aimed to determine the primary causes of fatigue and their direct effects on employee productivity. Survey questions explored work schedules, physical demands, and stress-related conditions in the restaurant environment. The study, completed in March 2025, revealed several factors that contribute to fatigue among restaurant workers. Most respondents were male and aged between 22 and 27. Data indicated that long working hours impaired concentration and increased error rates. Physically demanding tasks heightened safety concerns, while inconsistent shifts negatively affected sleep quality and overall well-being. Fatigue was shown to significantly reduce service quality and efficiency, which led to customer complaints. Additionally, financial penalties for damaged items and operational lapses further affected employee morale and productivity. These findings point to the need for better scheduling practices, enhanced workplace safety, and improved operational systems. The findings demonstrate a complex interaction between work conditions and employee performance in the restaurant sector. Fatigue resulting from prolonged hours, intense physical work, and irregular schedules hinders service delivery and reduces workplace efficiency. Financial disincentives and procedural issues further exacerbate the problem. To address these challenges, the study recommends implementing effective scheduling, improving safety protocols, and optimizing resource management. Enhancing employee well-being is essential to improving overall restaurant productivity and ensuring high-quality service.

Keywords: employee fatigue, job productivity, restaurant industry, work schedules, physical demands, service quality, hospitality management, employee well-being

**THE CULINARY CONNECTIONS: TAGAYTAY'S FOOD CULTURE AND
TOURIST'S FREQUENCY VISIT AND OVER-ALL EXPERIENCE**

Dessere Bayon-on, Mac Adrielle John Araña, Jasper Keith Basco, Jed Pineda,
Jomar Tambo-ong, Dana Rae Boatis

Abstract

Tagaytay is a well-known tourist destination recognized for its culinary offerings and scenic landscape. This study explores food as a key factor influencing the frequency of tourist visits to Tagaytay, which is considered a gastronomic hub. The research aims to understand visitor preferences and how these can guide local businesses in improving their services to enhance the overall tourism experience. This study employs a descriptive research method using simple random sampling. A structured survey questionnaire was used as the primary instrument to collect data from 100 tourists. The survey covered various aspects such as demographic profile, culinary offerings, events and festivals, ambiance, location, service quality, food quality and presentation, accessibility, challenges encountered, and awareness of Tagaytay's culinary experiences. Data was analyzed using frequency distribution, percentage, weighted mean, and ranking to identify significant factors that affect tourists' frequency of visits. Findings revealed that Tagaytay is most popular among young adults aged 22 to 25, with the majority of tourists being Filipino. Food emerged as the leading factor for repeat visits, particularly due to local dishes, culinary events, and dining ambiance. However, while service quality is important, elements such as food authenticity, presentation, accessibility, and cultural relevance play a larger role in visitor satisfaction. A notable concern was the lack of awareness about certain offers. The results suggest that promoting authentic cuisine and implementing youth-oriented marketing strategies can help increase repeat visitation. The study confirms that Tagaytay's food culture significantly influences tourist frequency and experience, particularly among younger demographics. Engaging this group through social media and experiential activities is essential. Loyalty programs and budget-friendly options may attract return visitors. To further enhance the culinary appeal, the promotion of regional cuisine, diversified dining options, and the organization of food festivals are recommended. Improving food presentation, ensuring consistent quality, and enhancing restaurant ambiance can strengthen Tagaytay's position as a culinary destination. Addressing operational challenges and elevating cultural value in food offerings will enrich the tourist experience and support the city's hospitality sector.

Keywords: tagaytay, culinary tourism, food culture, tourist experience, hospitality management, local cuisine, gastronomy, repeat visitation, filipino food, dining ambiance

**THE EFFECTIVENESS OF HANDS-ON TRAINING FOR HOSPITALITY MANAGEMENT
AT BESTLINK COLLEGE OF THE PHILIPPINES**

Kyla Mae Garcia, Franz Emiril Imperial, Jhon Lenard Saludaga,
Princess Ortinez, Angel Loriely Velasco, Oliver Fabon

Abstract

This study evaluates the effectiveness of hands-on training in the field of Hospitality Management. As the industry demands professionals who are both theoretically knowledgeable and practically skilled, experiential learning plays a crucial role in bridging academic concepts with real-world application. Internships, simulations, and other practical training methods provide opportunities for students to enhance their competence, confidence, and employability. However, the true impact of these methods on workplace preparedness remains a subject of investigation. Guided by Kolb's Experiential Learning Theory, this research aims to assess whether hands-on training at Bestlink College of the Philippines helps students develop essential practical skills, adapt to industry standards, and overcome common challenges, while also identifying areas for improvement in current training practices. A descriptive-correlational research design was employed to examine the relationship between hands-on training and variables such as skill development, confidence, industry readiness, and encountered challenges. The respondents were Hospitality Management students from second to fourth year, with 5% of the total population from each level selected through proportionate sampling. A structured questionnaire served as the primary data collection tool. The findings revealed that hands-on training significantly contributed to the development of practical skills, confidence, and workplace readiness among Hospitality Management students. Simulations and internships were particularly effective in enhancing task execution and decision-making abilities. A strong positive correlation was observed among skill development, confidence levels, and the students' capacity to navigate real-world challenges. The study concluded that hands-on training is highly effective in preparing students for the hospitality industry by strengthening their practical abilities and boosting their confidence. It is recommended that educational institutions continue to provide updated training materials, incorporate more industry-based activities, assign qualified mentors, and implement flexible training schedules. These improvements will further support student development and ensure alignment with industry expectations.

Keywords: hands-on training, hospitality management, skill development, experiential learning, industry readiness, simulations, internships, student confidence, bestlink college, training effectiveness

**THE EFFECTIVENESS OF INTERPERSONAL COMMUNICATION SKILLS AMONG
BACHELOR OF SCIENCE IN HOSPITALITY MANAGEMENT STUDENTS
DURING ON-THE-JOB TRAINING PROGRAM**

Michael Servañez, Janice Simbulan, Grace Ann Lumilang, Ma Aleaza Ballecer,
Krisha Silvallana, Dr. Dana France Ignacio

Abstract

This study investigates the effectiveness of interpersonal communication skills among Bachelor of Science in Hospitality Management (BSHM) students during their On-the-Job Training (OJT) programs. Interpersonal communication plays a vital role in the hospitality industry, where service quality often depends on meaningful and effective interactions. The study aims to identify the specific communication competencies that contribute most to a successful OJT experience and to explore how these skills can be developed further to enhance students' readiness for professional work in hospitality settings. A qualitative descriptive approach was employed, utilizing a structured questionnaire administered to 100 fourth-year BSHM students from Bestlink College of the Philippines. Stratified random sampling ensured representative participation across the population. The questionnaire focused on four major domains of interpersonal communication: verbal communication, non-verbal communication, active listening, and empathy. The collected data were analyzed using percentages and weighted means. The results indicated that students perceived themselves as generally effective in interpersonal communication. High levels of agreement were recorded in their ability to communicate verbally and non-verbally, demonstrate empathy, and actively listen. However, areas needing improvement were identified, particularly in building confidence when speaking during team meetings, interpreting non-verbal cues, and effectively summarizing or paraphrasing during conversations. The findings underscore the need for targeted interventions to further develop students' interpersonal communication skills. It is recommended that training programs include practical modules such as role-playing exercises, guest interaction simulations, and peer feedback sessions. These activities can help boost confidence, deepen understanding of non-verbal communication, and refine listening and speaking abilities. The study provides meaningful insights for hospitality educators and industry practitioners aiming to enhance the professional readiness of future hospitality graduates.

Keywords: interpersonal communication, on-the-job training, hospitality education, verbal communication, non-verbal communication, active listening, empathy, bshm students, communication skills, student development

**THE EFFECTIVENESS OF ONLINE REVIEWS TO THE CUSTOMER'S
SATISFACTION AT UHAW CAFÉ IN QUEZON CITY**

Lovelyn Janine Reyes, Jennievieve Barcial, Eric Marqueses,
Jake Ruzzel Reyes, Jeny Rose Sevilla, Jenelyn Comon

Abstract

Online reviews play a significant role in influencing customer expectations and perceptions, often shaping their decisions before visiting a restaurant. Positive feedback found on digital platforms can increase the likelihood of customer visits, especially when these reviews align with the restaurant's promotional content. This study aims to determine the effectiveness of online reviews in relation to customer satisfaction at Uhaw Café in Quezon City. It evaluates whether the café meets or exceeds customer expectations based on their exposure to online feedback and the establishment's social media presence. A quantitative research approach using descriptive design was employed. Data were gathered from a maximum of 50 customers of Uhaw Café, selected through purposive sampling. A 4-point Likert scale survey questionnaire was used to obtain customer feedback. The collected data were statistically analyzed to determine the effectiveness of online reviews in relation to various satisfaction metrics and to draw conclusions and recommendations based on customer responses. The demographic profile revealed that 52% of respondents were male and 48% female, with most respondents aged 21 to 25. Facebook (Meta) was identified as the most frequently used platform for engaging with the café's online presence. In terms of customer expectations, respondents strongly agreed that online reviews influenced their perception, with a composite weighted mean of 3.37. Positive feedback received a composite mean of 3.29 (Strongly Agree), while customer loyalty and decision-making both received a mean of 3.22 (Agree). The primary challenges identified were the content of the reviews (35 responses) and the restaurant's responsiveness to feedback on social media. The findings suggest that Uhaw Café has exceeded customer expectations based on its online presence, particularly through effective social media engagement. However, customer satisfaction is affected by the quality and clarity of review content, as well as the timeliness and tone of the restaurant's response to customer feedback. The study recommends that Uhaw Café continue encouraging customers to share honest experiences, as this fosters transparency, identifies areas for improvement, and helps attract new patrons through authentic online visibility.

Keywords: online reviews, customer satisfaction, social media footprint, hospitality management, uhaw café, customer loyalty, decision-making, digital engagement, restaurant marketing, facebook promotion

THE EFFECTIVENESS OF THE MENU DESIGN ON CONSUMER CHOICES IN FINE

Robert Pillado, John Abig, Janica Hebertas, Jabriel Sandiego, Christine Layderos, Jenelyn Comon,

Abstract

This study investigates the impact of menu design elements, specifically, layout, typography, color, descriptions, and pricing, on consumer choices in fine dining restaurants in Quezon City. Menus are not merely informational tools but strategic marketing instruments that shape the dining experience, influence customer behavior, and contribute to overall satisfaction. Despite their importance, menu design is often overlooked by restaurateurs, resulting in missed opportunities for increased sales and guest engagement. This research aims to demonstrate how effective menu design enhances customer experience and supports business success. A descriptive research design was employed to assess the influence of menu design on consumer decision-making. The study involved 30 randomly selected respondents, 15 each from Aristocrat Restaurant and Prime Steakhouse in Quezon City. Data was collected through validated questionnaires containing Likert-scale and open-ended items. The survey focused on five key areas: menu layout, color, typography, pricing, and descriptions. Data were analyzed using frequency, percentage, and weighted mean to evaluate the influence of each element on customer choices and satisfaction. Findings revealed that effective menu design significantly improved the dining experience. Respondents favored organized layouts, legible typography, and detailed, accurate descriptions, which facilitated decision-making and built customer trust. Transparent pricing that aligned with food quality positively influenced satisfaction. While color had a more limited effect, warm and subtle tones were generally preferred. A key concern identified was the lack of allergen and dietary information, which reduced comfort for some guests. Overall, the results supported the use of strategic, customer-focused menu designs to boost satisfaction and loyalty. The study concludes that menu design plays a critical role in enhancing the overall dining experience in fine dining settings. Clear structure, informative descriptions, and transparent pricing empower customers to make confident decisions. Though color had a lesser influence, warm tones contributed to a pleasant ambiance. Restaurants are encouraged to update menus regularly, incorporate allergen and dietary information, and seek customer feedback to maintain engagement and ensure continuous improvement.

Keywords: menu design, consumer behavior, fine dining, customer satisfaction, typography, pricing strategy, hospitality management, restaurant marketing, customer engagement, quezon city

**THE IMPACT OF AI-POWERED HOUSEKEEPING ROBOTS ON
EMPLOYEE ROLES AND JOB SATISFACTION**

Alissa Jabeguero, Vince Carlo Arcilla, Viberlyn Romana, Rica Mae Rufo,
Jacqueline Villanueva, Dr. Dana France Ignacio

Abstract

In today's technology-driven world, individuals across all age groups have become increasingly familiar with using advanced tools that simplify everyday tasks. One of the most transformative developments in recent years is Artificial Intelligence (AI), which continues to reshape industries, including hospitality. While the concept of AI dates back to 1956, its practical applications have become widespread due to advances in computing power, data analytics, and machine learning algorithms. In hospitality operations, AI-powered housekeeping robots are being introduced to improve efficiency. This study explores how such technological integration impacts employee roles and job satisfaction within the hospitality industry, particularly in hotel settings. The study employed a purposive sampling technique to select participants who have direct experience working with AI-powered housekeeping robots. According to Nikolopoulou (2022), purposive sampling involves deliberately selecting individuals who are most likely to provide relevant and valuable information. The study was conducted at Okada Manila, with a total of fifty (50) respondents. A Likert-scale questionnaire was used to gather data regarding changes in employee roles and levels of job satisfaction as influenced by the presence of AI-powered housekeeping robots in the workplace. The analysis focused on the relationship between the use of AI-powered housekeeping robots and two workplace variables: employee roles and job satisfaction. A negligible positive correlation ($r = 0.0806$) was found between AI integration and employee roles, with a p-value of 0.580767, indicating no statistically significant relationship. Similarly, no significant correlation was observed between the use of AI-powered robots and job satisfaction. These results suggest that the implementation of AI-powered housekeeping robots does not substantially alter job responsibilities or affect the satisfaction levels of employees in the hospitality sector. The findings indicate that while AI-powered robots are becoming more common in hotel operations, their integration does not significantly influence employee roles or job satisfaction. This suggests a level of adaptability among employees or a limited scope of impact by current AI applications. As technology continues to evolve, further studies are recommended to examine long-term effects, potential skill shifts, and changes in employee perception. Hospitality institutions may consider balancing automation with human-centered policies to ensure workforce engagement and well-being.

Keywords: ai-powered robots, employee roles, job satisfaction, housekeeping automation, hospitality management, artificial intelligence, okada manila, purposive sampling, workplace technology, hotel operations

**THE IMPACT OF CASINO GAMBLING ON HOTEL GUEST
ENGAGEMENT AND SATISFACTION**

Zandra Gale Bisco, Ana Lorraine Anastacio, Geraldin Taguam, Angel Rose Boadilla,
Diana Marie Santillan, Roland Rambo Jayoma

Abstract

This study explores the impact of casino gambling on hotel guest engagement and satisfaction, focusing on both the advantages and challenges associated with integrated casino-hotel operations. Casinos have become a central feature of the hospitality industry by offering guests entertainment, personalized services, and social experiences that contribute to increased satisfaction and revenue. However, concerns such as gambling-related addiction, heightened security risks, and potential environmental impacts also emerge as significant issues. This research aims to evaluate how casino gambling influences overall guest satisfaction and to identify areas for improvement within hotel services. The study was conducted at Solaire Resort and Casino using quantitative, descriptive research design. A total of 50 hotel guests were selected through purposive sampling based on their familiarity and experience with casino amenities. Data was collected via structured surveys focusing on four key dimensions: service quality, safety and security, non-gambling entertainment, and personalized service. The survey aimed to assess how these elements affect guest engagement and satisfaction in a casino-hotel setting. The findings indicated that most respondents were young adults aged 23 to 32, with a majority being male (64%) and frequent visitors, attending the casino at least twice a week. Participants reported high levels of satisfaction with game variety, cleanliness, and seating comfort. In contrast, customer service and overall ambiance received lower ratings. While respondents viewed service quality positively, especially in terms of cleanliness and operational efficiency, they identified gaps in staff friendliness and complaint resolution. Safety measures were generally rated well, although some guests recommended quicker response times. The availability of non-gambling entertainment and opportunities for social interaction were appreciated, though suggestions were made to improve the variety and organization of these offerings. Personalized service was seen as valuable, but enhancements in guest preference tracking and anticipation of needs were suggested. The study concludes that while casino gambling positively influences guest satisfaction through entertainment and service offerings, several operational areas require attention. Strengthening staff communication, enhancing non-gambling entertainment options, and implementing improved systems for personalized guest experiences are recommended to increase engagement and satisfaction. These findings offer valuable insights for hotel operators seeking to optimize the integration of casino services within the broader hospitality experience.

Keywords: casino gambling, hotel guest satisfaction, guest engagement, hospitality management, service quality, personalized service, non-gaming entertainment, safety and security, solaire resort, guest experience

**THE IMPACT OF CUSTOMER INTERACTION ON DINING EXPERIENCE
AT JAPANESE RESTAURANT IN MALL OF QUEZON CITY**

Ferdinand Kyle Aquino, Kyla Christine Valencia, John Cedrick Eugenio,
Cherry Mae Villanueva, Eric Ojano, Dr. Dana France Ignacio

Abstract

The hospitality industry faces a growing challenge in balancing personalized service with respect for customer privacy. This study examines the impact of customer interaction on the overall dining experience, focusing on comfort, ambiance perception, repeat patronage, and cultural preferences at a Japanese restaurant located in a mall in Quezon City. As customers increasingly seek service that is attentive yet non-intrusive, understanding this dynamic is essential for enhancing satisfaction and improving service quality. A descriptive research design was utilized in this study. Data was collected through a self-administered questionnaire distributed to 50 diners using convenience sampling. The survey assessed respondent demographics, experiences with staff interaction, and perceptions related to privacy and dining comfort. Collected data were analyzed using percentages, rankings, and weighted mean to evaluate key aspects of the dining experience and identify service-related challenges. The results indicated that guests placed a high value on dining experiences that respected their personal space, with ambiance perception receiving the highest composite mean (3.50), followed by comfort (3.43). Respondents expressed greater satisfaction and a higher likelihood of returning when customer service was respectful and unobtrusive. However, several concerns were reported, including meal interruptions, language barriers, and perceived cultural insensitivity, all of which negatively affected comfort and service consistency. The findings suggest that an optimal balance between personalized service and privacy awareness significantly improves the dining experience. Strategic interventions, such as staff training in cultural sensitivity, the use of subtle non-verbal service cues, and maintaining a tranquil dining atmosphere, are recommended. Emphasizing respectful engagement can enhance customer satisfaction, promote loyalty, and encourage positive word-of-mouth, making privacy-conscious service a critical component of modern restaurant management.

Keywords: customer interaction, dining experience, privacy, ambiance perception, cultural sensitivity, restaurant service, hospitality management, customer satisfaction, quezon city, japanese restaurant

**THE IMPACT OF GENDER EQUALITY ON GUEST SATISFACTION IN
AZURE URBAN RESORT RESIDENCES, PARAÑAQUE CITY**

Charmie Baledio, Bernard Magnifico Abad, Princess Meca Deiparine,
Reniel Mabunga, Jenzel Mae Santos, Dr. Dana France Ignacio

Abstract

As inclusivity and equality gain greater attention in the hospitality industry, the role of gender-sensitive practices in shaping guest experiences becomes increasingly relevant. This study investigates the impact of gender equality on guest satisfaction at Azure Urban Resort Residences in Parañaque City. Specifically, it aims to evaluate how gender-related considerations in service delivery, communication, and physical environment influence guest perceptions and overall satisfaction. A quantitative research design was utilized, with purposive sampling employed to survey fifty (50) guests at Azure Urban Resort Residences. Data was collected through a structured questionnaire that measured guest perceptions of gender equality across three key dimensions: environment, services, and communication. Descriptive statistical tools, including percentage, weighted mean, and Likert scale interpretation, were used to analyze the responses. The results revealed that guests generally agreed gender equality positively contributes to their satisfaction. Among the dimensions, services received the highest composite mean (3.25), followed by communication (3.22), and environment (3.03). Guests expressed appreciation for fair treatment, inclusive service options, and respectful communication. However, the availability of gender-neutral restrooms was rated relatively low, highlighting a gap in inclusive facility provisions. The findings underscore the significance of visibly integrating gender equality practices within hospitality operations. Guests place value on equitable treatment and inclusive interactions, which directly affect their satisfaction. To enhance guest experiences, the study recommends improving inclusive infrastructure, implementing comprehensive staff training on gender sensitivity, and promoting transparency in equality-related policies. These measures can strengthen a property's reputation and align its operations with contemporary hospitality standards.

Keywords: gender equality, guest satisfaction, inclusive hospitality, gender-sensitive service, azure urban resort, communication, service delivery, gender-neutral facilities, parañaque city, hospitality management

THE IMPACT OF INCREASED COMPETITION ON CUSTOMER BEHAVIOR AND PREFERENCE IN PUBLIC MARKET BOOTH NOVALICHES PROPER

Ruel Tulmo, Joseph Betong, Elizabeth Cabulit, Rozelle Demegillo,
Rodmar Siena, Roland Rambo Jayoma

Abstract

Public markets in urban areas such as Novaliches Proper are experiencing heightened competition from supermarkets, convenience stores, online shopping platforms, and specialty shops. These developments are shifting consumer preferences and shopping behaviors. This study aims to assess how increased market competition affects customer purchasing decisions, brand loyalty, and overall shopping experiences in public market booths. By examining local consumer trends, the study seeks to provide practical recommendations for vendors to enhance competitiveness and sustainability. It addresses a gap in localized market research, focusing on the unique challenges faced by public market vendors. The study adopted a descriptive research design to evaluate the influence of competition on customer behavior. A total of 50 vendors were selected through purposive sampling to ensure relevant and informed responses. Data were gathered using closed-ended survey questionnaires. Statistical tools such as frequency distribution, percentages, and weighted means were used to analyze customer demographics, perceptions, and preferences. The weighted mean was particularly useful in identifying which competitive factors most influenced consumer decision-making. Findings revealed that product quality is the leading factor influencing customer purchases, followed by new booth offerings and discounts. Increased spending was driven by product quality, clean and organized displays, excellent customer service, and price incentives. While price remains important, 42% of customers prioritized affordability, consumers consistently chose quality over the lowest-cost options. Familiarity with brands and perceived value also significantly shaped consumer preferences. The results emphasized that customer service, brand recognition, and consistent product quality outweigh short-term price reductions in sustaining customer loyalty. The results suggest that increased competition creates a more discerning and value-conscious consumer base. Although affordability remains a priority, consumers are willing to pay more for high-quality products and a positive shopping experience. This shift compels public market vendors to focus on delivering greater value through improved product offerings, enhanced service, and clean, attractive booth presentation. To remain competitive, vendors should invest in customer relationship management, loyalty programs, and promotional strategies that highlight quality and trust. These findings underscore the importance of balancing competitive pricing with a strong emphasis on product excellence and service reliability.

Keywords: customer behavior, consumer preference, market competition, public market, product quality, customer service, price sensitivity, brand loyalty, novaliches proper, hospitality management

**THE IMPACT OF MIXOLOGY TRENDS ON BARTENDING SKILL DEVELOPMENT
AND CUSTOMER ENGAGEMENT IN SELECTED MIXOLOGY BAR**

Jason Cayon, Jonash Adrean Bersabal, John Robert Santos, John Zyrile Sebastian,
John Alester Balintang, Dana Rae Boatis

Abstract

The cocktail industry is rapidly evolving, driven by trends such as molecular mixology, craft cocktail innovation, and sustainability. These developments require bartenders to cultivate advanced skills in creativity, precision, and environmental responsibility. As customers increasingly seek unique, visually striking, and ethically crafted drinks, bartenders must balance innovation with consistency and cost-effectiveness. This study examines the impact of emerging mixology trends on bartender skill development, customer engagement, and training effectiveness, with particular emphasis on sustainable practices and practical strategies for small bars operating with limited resources. This study employed a descriptive research design with a quantitative approach to investigating how mixology trends influence bartending practices. Data were collected through a structured survey using a Likert scale, enabling respondents to indicate their level of agreement or disagreement with statements related to cocktail creation, presentation, and skill requirements. The study found that emerging mixology trends significantly enhance bartender skills and customer engagement. Respondents reported that new techniques and ingredients improved creativity and adaptability, with high ratings for skill development ($M = 3.68$) and innovation ($M = 3.56$). Customer experiences were elevated through novelty ($M = 3.60$), creative presentations ($M = 3.80$), and flavor complexity ($M = 3.52$). Trends also improved service efficiency ($M = 3.60$) through tools such as batch preparation and digital aids. Overall, mixology trends contribute to bartender development while simultaneously increasing customer satisfaction. The study demonstrates that modern mixology trends enhance both bartender skills and customer engagement. Bartenders reported that new techniques foster continuous learning, creativity, and innovation. These trends enrich customer experiences through novelty, visual appeal, flavor complexity, and efficient service. Creative presentations and distinctive flavors were found to boost satisfaction, while innovative tools improved service speed without compromising quality. The findings underscore the importance of trend-focused training and cost-effective innovation, particularly for small bars, to elevate service standards and enhance customer satisfaction.

Keywords: molecular mixology, craft cocktail innovation, mixology

**THE IMPACT OF NATIONAL CERTIFICATE II IN HOSPITALITY INDUSTRY
AND IN CAREER ADVANCEMENT OF THE BSHM STUDENTS OF
BESTLINK COLLEGE OF THE PHILIPPINES**

Marvin John Relucio, Maribel Aragon, Maria Lera Mallapre,
Christian Pangilinan, Loreanne Salas, Oliver Fabon

Abstract

This chapter presents the background of the study, including the review of related literature, the theoretical and conceptual frameworks, and the statement of the problem. It also discusses the study's assumptions, scope, significance, and definitions of key terms. According to Jhon Carlo (2024), the NCII certification is granted to individuals who have demonstrated the essential skills and knowledge required in industries such as hospitality. Valid for five years, this certification is increasingly sought by employers, especially for positions abroad. It serves as proof of a candidate's competence and enhances their employability and career advancement opportunities. This chapter outlines the procedures and techniques employed to collect and obtain the data necessary for the study. It details the analysis and rationale for how each procedure contributes to acquiring relevant information. The discussion covers research design, target population, sampling technique, instruments used, and the construction of survey questions. It also explains the process of instrument validation, the retrieval of completed questionnaires, and the statistical methods applied for data analysis. This chapter presents the findings derived from the questionnaires administered to BSHM students at Bestlink College of the Philippines. Results indicate that most respondents fall within the age range of 21–25 years, with equal representation across all year levels and genders. The majority are single. Regarding the impact of NCII certification, respondents strongly agree that it provides greater employment opportunities, qualifies individuals for higher-paying positions, and is highly regarded by employers, particularly for overseas employment. Nonetheless, concerns were noted about rising competition in the job market, potential job displacement due to automation, and the mismatch between NCII training and the evolving demands of various industries. The study reveals that NCII certification provides substantial benefits to BSHM students by enhancing their career prospects, boosting self-confidence, and equipping them for specialized roles in the hospitality industry. Most respondents were between 21–25 years old, with balanced representation across year levels and genders. While the certification is recognized for opening pathways to higher-paying jobs, international opportunities, and long-term career advancement, respondents also identified persistent challenges, including a mismatch between the curriculum and current industry requirements, geographic constraints, and limited access to advanced training programs.

**THE IMPACT OF NIGHT SHIFT WORK TO THE EMPLOYEE OF
GO HOTELS NORTH EDSA - QUEZON CITY**

Jiro Dela Peña, Jeephany Butona, Cedric Medillin, Leann Nocillado,
Rinalyn Pader, Dr. Dana France Ignacio

Abstract

The hotel industry depends on night shift employees to maintain seamless operations during late hours. However, working night shifts poses several challenges, including disruptions to normal sleep patterns, increased health risks, and notable psychosocial effects. This study investigates the impact of night shift work on employees at Go Hotels North Edsa–Quezon City, highlighting key concerns and identifying strategies to enhance their working conditions and overall well-being. A descriptive-comparative research design was utilized to examine the experiences of night shift employees. A structured survey questionnaire was administered to 20 employees from various departments, addressing aspects such as health and well-being, safety and security, work environment, and available support resources. The collected data underwent statistical analysis to identify patterns, explore relationships, and pinpoint areas requiring intervention. Findings reveal that night shift employees face significant challenges in maintaining regular sleep schedules, resulting in fatigue and elevated stress levels. Many also experience irregular eating habits, which negatively affect their overall health. Despite these issues, employees generally view the hotel’s security measures and work environment positively, crediting their sense of safety to well-implemented protocols and sufficient workplace resources. Statistical analysis further indicates a strong correlation between employees’ demographic profiles and their experiences, suggesting that concerns related to night shift work vary across age groups and job positions. To mitigate the challenges of night shift work, employers should adopt targeted strategies such as comprehensive wellness programs, sleep hygiene and fatigue management initiatives, and access to balanced nutritional options. Enhancing security protocols, upgrading rest areas, and offering more flexible scheduling can further support employees’ physical and mental well-being. By addressing these key areas, hotel management can create a healthier, safer, and more supportive work environment, ultimately improving productivity and job satisfaction among night shift staff.

Keywords: night shift work, night shift work challenges, employee well-being

**THE IMPACT OF ROOM MAINTENANCE AND PEST CONTROL ON
GUEST EXPERIENCE AT GOLDEN PYRAMID PAVILION
AND RESORTS, QUEZON CITY: AN ANALYSIS**

Diana Ingco, Mary Ann Cañete, Ma Cristina Esguerra, Mark Adrienne Marquez,
Lexquiel Jhervin Punla, Roland Rambo Jayoma

Abstract

In today's competitive hospitality industry, a resort's success hinges on offering a clean, comfortable, and safe environment. Consequently, room maintenance and pest control are just as vital as amenities and services. Guests expect well-maintained, pest-free accommodation, encouraging resorts to implement proactive, eco-friendly pest management, advanced maintenance systems, and well-trained staff to enhance satisfaction and foster loyalty. While some resorts still rely on reactive approaches that risk damaging guest experience and reputation, effective preventive practices lead to improved reviews, higher occupancy rates, and increased revenue. This qualitative study employed a descriptive research design to assess the impact of room maintenance and pest control on guest experience at Golden Pyramid Pavilion and Resorts in Quezon City. Fifteen resort management staff were purposively selected as respondents. Data was collected using a validated, researcher-designed questionnaire developed based on relevant literature and insights from preliminary interviews. The results revealed high guest satisfaction in key areas such as pest control, hygiene, room maintenance, value for money, staff performance, accessibility to services, and responsiveness to guest feedback. The highest ratings were awarded to cleanliness, prompt resolution of pest-related issues, staff professionalism, and clear communication. However, some areas, specifically communication regarding pest control schedules and training on cleaning agents, were identified as opportunities for improvement. Overall, the findings underscore the resort's strong commitment to service quality and guest satisfaction, while highlighting the need for ongoing enhancements in maintenance and pest control practices. The findings highlight the crucial role of effective room maintenance and pest control in enhancing guest experience at Golden Pyramid Pavilion and Resorts. Routine inspections, preventive maintenance, and stringent hygiene standards were shown to significantly boost guest satisfaction, health, and safety. Additionally, factors such as convenience, staff behavior, and respect for guest privacy were identified as important contributors. Challenges included coordination among maintenance teams and managing chemical safety protocols. The study concludes that adopting proactive strategies, enforcing strong hygiene measures, and prioritizing guest-centered service are essential. Recommendations include regular staff training, establishing clear maintenance schedules, improving communication channels, and leveraging technology to ensure a safe, comfortable, and seamless stay for guests.

Keywords: room maintenance, pest control, guest experience, resort

**THE IMPACT OF SMART TECHNOLOGIES ON GUEST EXPERIENCE:
A CASE STUDY OF MANILA MARRIOTT HOTEL**

Maui Lou Cayabyab, Sophia Fernandez, Eden EJ Inanod, Kyla Lyn Delos Santos,
Mark Jones Catalan, Oliver Fabon

Abstract

The Manila Marriott Hotel, a key component of Resorts World Manila's mixed-use development, offers cutting-edge amenities accessible through a dedicated mobile app. As a 5-star property, it is positioned to become the Philippines' premier venue for meetings, incentives, conferences, and exhibitions. Smart technology enhances guest interactions by meeting high expectations and providing convenience. Guest rooms are equipped with advanced lighting systems and voice-activated controls, enabling personalized adjustments that boost satisfaction and encourage loyalty. This study aims to improve the hotel's image and guest satisfaction by implementing smart room controls for lighting, temperature, and entertainment. The findings will provide valuable insights to help Manila Marriott optimize its technology offerings, enhance guest experiences, and influence the future direction of the hospitality industry. This chapter covers research design, study participants, sampling method, study instruments including the questionnaire and its validation, data collection procedures, administration and retrieval of questionnaires, and the statistical techniques used for data analysis. This research examines the effectiveness of smart technology at the Manila Marriott Hotel. Researchers surveyed 50 employees to evaluate how smart technology impacts guest satisfaction. Overall, the use of smart technologies has a significant positive effect on the guest experience by providing personalized services, enhancing convenience, and improving operational efficiency and safety. A guest's overall perception and interaction with the hotel, from check-in to check-out, is influenced by factors such as service quality, room comfort, and the ease of using smart technology. The challenges highlight various aspects of the smart technology used in the hotel, including technical issues with mobile keys, AI-powered personalized services, smart TVs, and thermostats. Additionally, the efficiency of smart technology in terms of convenience, ease of access, and service quality is a significant concern. The consistent ranking of these factors suggests that all are equally important considerations for enhancing the overall quality of smart technology within hotel services. This indicates that these challenges are commonly experienced. The survey also identifies the main obstacles the hotel faces regarding smart technology, such as technical difficulties and the need to improve the service quality of these technologies.

**THE IMPACT OF SOCIAL MEDIA MARKETING ON
GUEST SATISFACTION IN THE AMBIANZA APARTELLE**

Rheo Ezekiel Pionelo, John Marie Bohol, Jeric Tadeo, John Paul Topue,
Dennis Villanueva, Dr. Dana France Ignacio

Abstract

Social media has transformed marketing strategies within the hospitality industry, playing a key role in shaping guest perceptions and satisfaction. This study explores the impact of social media marketing (SMM) on guest satisfaction at Ambianza Apartelle, examining how demographic factors and various SMM elements such as service quality, promotions, pricing, and facilities, influence customer preferences and experiences. A descriptive research design was employed to analyze data collected through a researcher-designed questionnaire administered to 30 frequent guests of Ambianza Apartelle who actively engage with its social media platforms. Respondents were selected using purposive sampling. Data analysis involved frequency distribution, weighted mean, and ranking techniques to assess guest perceptions and identify key social media marketing issues. The findings reveal that most respondents were males aged 26–30, with the majority visiting Ambianza Apartelle infrequently. Social media marketing was rated as "very influential" in shaping guest expectations and preferences across service quality (mean = 3.56), promotions (3.61), price (3.52), and facilities (3.61). However, key issues such as misleading visuals, delayed responses to inquiries, and technical problems with the booking system were identified. These challenges contribute to guest dissatisfaction despite effective promotional efforts. The results suggest that although social media marketing (SMM) plays a significant role in guest satisfaction, its effectiveness depends heavily on authenticity, prompt responsiveness, and reliable technical support. To enhance guest experiences and foster loyalty, it is recommended to focus on accurate advertising, timely customer engagement, and personalized marketing strategies. Bridging the gap between online representation and actual service delivery is crucial to maximize the positive impact of SMM within the hospitality industry.

**THE IMPACT OF SOCIAL MEDIA ON THE TOURISM GROWTH
AS MARKETING TOOL FOR QUEZON CITY**

Mary Rose Villegas, Dona Alambra, Jyza Rose Pelojero, Via Vibal,
Maria Christina Jane Yurong, Mernel Joy Lacorte

Abstract

This study aims to examine the impact of social media as a marketing tool on the tourism growth of Quezon Memorial Circle (QMC) in Quezon City, Metro Manila. Specifically, it seeks to determine how social media influences tourists' perceptions, behaviors, and engagement, thereby contributing to the park's development as a popular tourism destination. The study also identifies key factors affecting visitor satisfaction, including challenges faced and recommendations for enhancing tourism growth. A quantitative research design was employed, utilizing surveys administered to a stratified random sample of QMC visitors. The population was categorized based on demographic variables such as age, gender, and location to ensure a representative sample, focusing on 50 respondents at Quezon Memorial Circle. The research instrument underwent rigorous validation to ensure both reliability and validity, with expert reviews conducted by statisticians and language specialists. This study underscores the importance of leveraging social media as an effective marketing tool to sustain and expand Quezon Memorial Circle's presence in the competitive tourism landscape. Recommendations include developing a strategic social media marketing plan and engaging audiences through interactive, visually appealing content. The research highlights the critical role of social media in promoting Quezon City Memorial Circle (QCMC) and emphasizes that addressing the identified challenges can greatly improve its marketing effectiveness, helping maintain competitiveness in the tourism industry. This study offers actionable insights for QCMC's management and stakeholders, providing a clear roadmap to optimize social media use as a marketing tool and enhance visitor engagement and satisfaction. This study underscores the pivotal role that social media plays in driving tourism growth at Quezon City Memorial Circle (QCMC). In today's digital age, social media platforms have become indispensable marketing channels, shaping how potential visitors perceive, engage with, and ultimately choose tourism destinations. Through a comprehensive quantitative analysis of visitor responses, this research reveals that social media not only influences tourists' awareness and expectations but also affects their behaviors and overall satisfaction with QCMC.

**THE IMPACT OF SUSTAINABLE PRACTICES ON CUSTOMER PERCEPTION AND
SATISFACTION AT NEXTGEN CAFE, MINDANAO AVENUE**

Aaliyah Denise Maglangit, Alysa Casandra Macaraeg, Patricia Ann Magno,
Allyson Gayle Sawali, Imee Fernandez, Roland Rambo Jayoma

Abstract

The coffee shop industry is growing rapidly, with NextGen Café on Mindanao Avenue, established in 2023, emerging as a leader in sustainability. The café reduces plastic waste by using eco-friendly packaging, offering reusable mugs for dine-in, and utilizing compostable materials for takeout orders. Additionally, NextGen Café emphasizes hygiene through strict cleaning protocols and maintains consistent service quality, ensuring a safe and enjoyable experience for its customers. The study employed a quantitative design to examine the integration of sustainable practices at NextGen Café and their impact on customer perception. A total of 100 respondents participated, comprising 74 customers and 26 employees. Purposive sampling was used to select participants based on criteria relevant to the research objectives. Data collection involved designing the survey, obtaining consent from the establishment, organizing the gathered data, and drawing conclusions for presentation to a review panel. NextGen Café attracts a predominantly younger customer base, mostly aged 19 to 23, highlighting a gap in workforce demographics. While both customers and employees value sustainability, customer engagement is notably higher, indicating a need for improved communication and education among employees. The café's strong customer loyalty is primarily driven by product quality and variety, with sustainability playing a supportive role. However, the positive correlation between sustainability adoption and customer satisfaction underscores the importance of emphasizing sustainable practices to further strengthen brand loyalty. Sustainable practices enhance customer satisfaction, but maintaining high product quality and service remains vital. Recommendations include improved financial planning, negotiating better supplier terms, introducing age-inclusive and limited-time sustainable offerings, and effectively communicating sustainability efforts. These strategies aim to boost customer satisfaction and market appeal while advancing the café's sustainability goals.

**THE IMPACT OF UTILIZATION OF TECHNOLOGY IN ONLINE BOOKING
ON SELECTED RESTAURANT IN MAKATI: BASIS FOR
STRATEGIES DEVELOPMENT PLAN**

Rhashiella Ashely Fontanilla, Gerald Bardon, Samantha Nicole Lumbab, Ylayza Kelly Ilogon,
Kent Emmanuel Martin Mendoza, Syrin Janaban, Jenelyn Comon

Abstract

This study examines how online reservation systems have enhanced efficiency and customer satisfaction in selected Makati restaurants: Yabu: House of Katsu, Texas Roadhouse, and Tim Ho Wan. These establishments utilize digital platforms such as OpenTable and proprietary applications to manage high demand, minimize wait times, and improve service quality. The research underscores the role of technology in optimizing operations, meeting customer expectations, and streamlining staff allocation, with particular attention to features such as digital menu access and real-time wait time transparency. This study employed a descriptive research method to assess the impact of online booking technology in selected restaurants in Makati. The sample consisted of 50 participants, including both customers and staff, selected through purposive sampling. Data was collected using structured questionnaires and semi-structured interviews, with quantitative results summarized through descriptive statistics. The findings aim to inform the development of strategies to enhance digital reservation systems in restaurants. The study found that the restaurant workforce in Makati is predominantly young, mostly single, and female. Booking.com and Tripadvisor emerged as the most commonly used online booking platforms. While customers appreciate the convenience and features offered by these systems, they also encounter challenges such as system instability, complex interfaces, cancellation difficulties, and double bookings, which negatively impact user experience and operational efficiency. The study highlights the positive impact of online booking systems on operational efficiency and customer satisfaction in selected Makati restaurants. Customers value the convenience and time-saving features, although challenges such as system delays, overbookings, and user-unfriendly interfaces, particularly for older users, remain. Staff and managers find these systems helpful for managing seating and customer flow but report difficulties including technical issues and insufficient training. The research underscores the importance of regular system updates, comprehensive staff training, and improved system integration. Overall, the success of online booking platforms depends on effective implementation, user-friendly design, and strong support systems to maintain competitiveness in the digital era.

Keywords: online reservation systems, online booking technology, operational efficiency, customer satisfaction

**THE INFLUENCE OF CASUAL DINING FOOD PRESENTATION ON
CUSTOMER PATRONAGE: AN EVALUATION**

Janine Buhayo, Cristina Adarayan, Clyde Chang, Erah Mae Carcosia, Jonell Salas

Abstract

Blake's Wings & Steaks Restaurant serves as a case study in this evaluation, offering insights into how a well-executed food presentation strategy can enhance customer experience and contribute to business success. The significance of food presentation goes beyond aesthetics; it plays a vital role in the overall sensory experience, shaping customer expectations and influencing satisfaction levels. In the digital age, visually appealing dishes are frequently shared on social media platforms, further boosting a restaurant's visibility and reputation. This evaluation aims to examine how food presentation in casual dining establishments, particularly at Blake's Wings & Steaks, affects customer patronage, satisfaction, and the restaurant's overall performance. This study used a descriptive quantitative approach to assess customer satisfaction with food presentation at Blake's Wings & Steaks in Quezon City. Fifty dine-in customers were selected using convenience and purposive sampling. Data was collected through a survey questionnaire focusing on visual appeal and plating. Surveys were conducted in person, while responses were analyzed using frequency and percentage distribution to describe respondent demographics. For casual dining, presentation is crucial for young adults, particularly women influenced by social media. They prefer clean, colorful plating, generous portion sizes, and well-designed menus. While food complaints are uncommon, atmosphere issues arise. To attract youth, restaurants should emphasize visual appeal and have a welcoming vibe. This study explores the impact of visually appealing food presentation on customer patronage in the competitive dining scene of Blake's Wings and Steak's. It highlights how a well-presented plate elevates a meal, influencing perceived value, satisfaction, and repeat business. The study also explores how visual presentation can help restaurants gain a competitive edge.

Keywords: food presentation, visual appeal, aesthetics, casual dining, patronage, loyalty, plating techniques

**THE INFLUENCE OF CULTURAL DIVERSITY ON CATERING MENU DESIGN
AND CLIENT PREFERENCES**

Edrian Libawas, Ariez Cordovez, Nikko Lebantino, Camela Matin-ao,
Earl Jerard Meneses, Dr. Dana France Ignacio

Abstract

This study investigates the influence of cultural diversity on catering menu design and client preferences. As societies become increasingly multicultural, catering businesses face growing pressure to develop menus that reflect a wide range of tastes, cultural traditions, and dietary requirements. The research explores the key factors influencing menu design and examines how client preferences are shaped by cultural diversity. Quantitative research design was employed in this study. Data were collected via a survey questionnaire distributed to 85 respondents, consisting of both clients and employees in the catering industry. A purposive sampling technique was applied to select individuals with relevant experience in catering services. The survey focused on various aspects such as food presentation, authenticity, sustainability, and customization. The data were analyzed using descriptive statistics to identify the factors most valued by clients and employees. This study examines the impact of cultural diversity on catering menu design and client preferences within the catering industry. With societies becoming increasingly multicultural, catering businesses must adapt to reflect diverse tastes, cultural traditions, and dietary needs. The research employed a quantitative approach, using a survey questionnaire distributed to 85 respondents, including clients and employees in the catering sector. Data were analyzed using descriptive statistics to assess the importance of factors such as food presentation, authenticity, customization, sustainability, and cultural inclusivity. The study highlights the importance of cultural sensitivity in menu design, suggesting that catering businesses should focus on offering diverse, authentic, and visually appealing options. Sustainable practices and customizable menus are essential for meeting client expectations. The research also suggests that catering businesses invest in training staff to ensure authenticity and address cost-related challenges. Future research could explore regional food preferences and include additional stakeholders, such as suppliers and chefs, to provide a more comprehensive understanding of cultural diversity's role in catering services.

Keywords: cultural diversity on catering menu, menu diversity, diverse culinary experience

THE INFLUENCE OF QUICK RESPONSE CODE ORDERING SYSTEM ON SERVICE QUALITY IN KOREAN BARBEQUE RESTAURANT IN QUEZON CITY

Emmanuel Espinoza, Joan Caboteja, Alexis Celebrado, Janine Fuentes,
Davedson Penaranda, Roland Rambo Jayoma

Abstract

This study examines the impact of QR code ordering systems on restaurant operations and employee experiences in Korean barbecue establishments in Quezon City. This study employs a quantitative design, involving 2 owners and 48 employees selected through non-probability sampling. Data were collected using a survey questionnaire aligned with the study's objectives. The study findings show that The data shows that respondents generally view the service positively. Empathy scored highest at 3.31, followed by reliability (3.28), assurance and tangibles (both 3.22), and responsiveness (3.21). Overall, the service is seen as reliable, empathetic, responsive, and reassuring. To address connectivity and compatibility issues, restaurants should invest in high-speed internet, upgrade QR code scanning technology, and ensure seamless integration across devices. Regular system maintenance and software updates will minimize technical disruptions. Offering multiple payment methods such as mobile wallets, credit/debit cards, and cash alternatives via staff assistance will accommodate diverse customer preferences. Strengthening encryption and security features will enhance customer trust in digital payments. To improve order processing and customer satisfaction, the QR code menu should feature clear categorization, high-quality images, and personalized recommendations. A user-friendly interface with smooth navigation will enhance the overall ordering experience. Implementing a hybrid ordering system that allows customers to choose between self-service and waitstaff assistance ensures inclusivity and meets varied preferences. Employees should be trained to assist customers with QR code ordering, troubleshoot technical issues, and provide alternative ordering options. Establishing dedicated technical support, such as a support team or chatbot, can further enhance user experience. Restaurants should leverage data from QR code orders to analyze customer preferences, peak ordering times, and inventory trends. This data-driven approach can optimize menu offerings, improve stock management, and enable personalized marketing strategies. Continuous collection of customer feedback on the digital ordering experience is essential for ongoing system improvements, resolving pain points, and increasing overall satisfaction.

Keywords: security features, qr code scanning technology, encryption, trust in digital payments

**THE ROLE OF CHATBOT TECHNOLOGY IN MODERN HOTEL
ACCOMMODATION ALONG QUEZON CITY**

Angeline Tañeza, Aubrey Paza, Rogelio Rosell, Venus Lumantas, Pauline Anne Valdez, Dana Rae Boatis

Abstract

AI chatbots have revolutionized the hospitality industry by delivering seamless services, minimizing human intervention, and enhancing customer satisfaction. These advanced technologies operate continuously, offering instant responses to guest inquiries and complaints, thereby improving overall efficiency. By automating routine tasks such as front desk interactions, AI chatbots significantly reduce wait times and streamline operational processes. This study aims to explore how AI-driven chatbots contribute to increased guest satisfaction, reduced staff workload, and the delivery of personalized services, ultimately transforming the hospitality experience. This study employed a descriptive research design, emphasizing comprehensive fact-finding and interpretive analysis to support the development of theories and hypotheses. The credibility of the quantitative findings was anchored in the reliability and accuracy of the data collected. To further strengthen the study's validity and transparency, an audit trail was maintained, a systematic documentation of the research process that allows for external scrutiny. This approach enhanced the trustworthiness of the results and contributed to the overall rigor of the research. Participants generally found chatbots to be more acceptable among younger users, while older users perceived them as impersonal and lacking a human touch. Chatbots were effective in providing accurate hotel information and assisting with bookings, but they showed limitations in handling complex inquiries and correcting errors. While their emotional intelligence received moderate ratings, participants noted a need for improvement in personalization and contextual understanding. To enhance user experience and satisfaction, it is recommended that chatbots be developed with greater empathy and deeper technological integration. This study explores the use of chatbot technology in modern hotel accommodations, with a particular focus on its impact on guest experiences. The research involved 25 participants aged over 31 from Quezon City. Findings indicate that while chatbots are effective in handling inquiries, bookings, and basic customer service functions, several concerns were identified. These include limited emotional intelligence, lack of personalization, poor interpretation of slang or informal language, and difficulty addressing complex queries. To address these issues, the study recommends enhancing natural language processing capabilities, integrating sentiment analysis, ensuring smooth handovers to human staff when necessary, and regularly updating chatbot systems in alignment with hotel facilities and services.

Keywords: chatbot technology, hotel accommodation, guest experience, customer service, emotional intelligence, personalization, natural language processing, sentiment analysis, quezon city, hospitality industry

**THE ROLE OF INCLUSIVE EMPLOYMENT FOR PERSON WITH VISUAL
IMPAIRMENT ON SELECTED RESTAURANT IN QUEZON CITY**

Allih Joyce Lancero, Marcheanne Edith Ehbs Naval, Estephanie Pejo,
Rachelle Anne Peraz, Justin Maynard Ramos, Dana Rae Boatis

Abstract

This study examines the challenges and procedures involved in employing visually impaired individuals in Quezon City-based restaurants. It aims to assess how disability employment is perceived by both employers and restaurant staff, particularly in terms of its impact on service quality and operational efficiency. The findings suggest that the inclusion of visually impaired individuals in the restaurant workforce can enhance both efficiency and quality of service. Moreover, such employment promotes social and economic integration, supports individual development, and fosters positive attitudes among employers and employees toward disability inclusion in the workplace. This research design aims to present data-driven narratives to support future studies, with a focus on efficiency and precision. The study involves 50 visually impaired (VI) employees from selected restaurants in Quezon City, chosen through purposive sampling. A phenomenological approach is employed to explore their lived experiences, with participants selected based on specific criteria: visual impairment, age, educational enrollment, and communication skills. To ensure ethical standards, anonymity is maintained through the use of questionnaires, and participant confidentiality is protected through pseudonyms. This study adheres to psychological quantitative research methods to ensure the validity and reliability of findings. This research analyzed the profiles of respondents from selected restaurants in Quezon City based on age, sex, educational attainment, and length of work experience. The majority of participants were aged 26–30 (50%), female (56%), held a bachelor's degree (62%), and had 1–3 years of work experience (48%). Respondents strongly agreed on the effectiveness of disability awareness training, particularly those focusing on tolerance and collaboration. Disability-inclusive hiring practices were also positively received; however, recommendations were made to improve the accessibility of job advertisements and the implementation of related policies. Lastly, while restaurant design accessibility received broad support, participants identified the need for improvements in restroom accessibility and the usability of work tools for visually impaired employees. This study on restaurants in Quezon City highlights prevailing inclusive practices concerning visually impaired employees while identifying key areas for improvement. Although younger employees exhibited positive attitudes toward inclusion, gaps were noted in the provision of specialized training related to visual impairment. Significant issues identified included limited restroom accessibility and communication barriers, underscoring the need for enhanced structural support and greater integration of Employee Resource Groups (ERGs) to foster an inclusive and accommodating work environment.

Keywords: visually impaired employees, inclusive practices, quezon city restaurants, disability training, accessibility, communication barriers, employee resource groups (ergs), workplace inclusion, restroom accessibility, staff attitudes

**THE ROLE OF MINIMIZING FOOD WASTE ON
SELECTED RESTAURANT IN QUEZON CITY**

Ken Lester Muñoz, Jayson Dorognan, Jaylord Maguddayao,
John Carl Parallag, Mario Keano Zuleta, Dana Rae Boatis

Abstract

The growing concern over food waste has compelled the food service industry to develop effective strategies that reduce waste while maintaining customer satisfaction. This study explores the impact of food waste minimization efforts in selected restaurants in Quezon City, a dynamic urban hub renowned for its diverse culinary landscape. Specifically, it examines how portion sizes influence food waste levels and investigates the various strategies employed by restaurateurs to address this issue. The researchers employed a descriptive research method to effectively present the study and obtain relevant data. Data was collected using survey questionnaires, which offered valuable insights into food waste practices in restaurants. A purposive sampling technique was utilized, selecting participants based on their availability, relevance to the study, and willingness to participate. The study was limited to fifteen (15) employees from a chosen restaurant in Quezon City. The study highlights key practices for minimizing food waste, including FIFO (First-In, First-Out), stocking essentials, proper refrigeration, and wise freezing techniques, as implemented in a selected restaurant in Quezon City. Based on a sample of 15 respondents, the study analyzed demographic factors such as age, gender, job description, and length of service. Findings show that the majority of employees were aged between 21–25 years (53%) and were predominantly male (53%). Most held the position of waiter (66%) and had been in service for approximately two years (67%). The results indicate a high level of agreement among employees regarding food waste reduction practices: FIFO (mean = 3.44), stocking essentials (mean = 3.36), proper refrigeration (mean = 3.45), and freezing wisely (mean = 3.35). These findings underscore the importance of such practices in minimizing food waste, suggesting that continued training and reinforcement of these strategies can significantly enhance waste management efforts within the restaurant industry. To further enhance efforts in minimizing food waste, the study recommends the implementation of effective storage and inventory management practices. Organizing food items using the First-In, First-Out (FIFO) method ensures that older stock is utilized first, thereby reducing the risk of spoilage. Regular monitoring of inventory helps avoid unnecessary purchases and promotes the efficient use of existing supplies. Additionally, properly storing perishable items at appropriate temperatures preserves their freshness and prevents premature spoilage. Freezing surplus food in portion-sized containers also extends shelf life and significantly minimizes overall waste.

Keywords: food waste reduction, fifo method, inventory management, proper food storage, refrigeration, freezing techniques, restaurant practices, quezon city, employee perception, waste minimization strategies.

**THE ROLE OF MODERN TECHNOLOGY IN ENHANCING
SAFETY AND SECURITY IN ASTORIA PLAZA HOTEL**

Rean Ladera, Candy Mae Dela Cruz, Camel Flor Merida, Elvira Valde,
Ivy Divine Villacorta, Dr. Dana France Ignacio

Abstract
